Implant success is no longer judged by whether the implant integrates or how long the implant remains in the patient's mouth. The lack of precise duplication of color, contour, and function of the natural dentition for the final implant prosthesis may ultimately result in an implant failure as defined by your patient. The entire implant team must envision the final result appropriate for each patient. Patients expect and deserve the finest restoration available, a safe procedure, and long term results from dental implants.

This presentation is designed to achieve the criteria of longevity for the dentist and the criteria as set by the implant patient in defining success as esthetics, function, longevity, and a healthy environment. Dr. Callan will also present a dental implant update based on sound biological literature to meet the demands of your patients. Implant selection, placement location, spacing, marketing, surgical stents, immediate load, immediate placement, and surgical placement will also be reviewed.

The purpose of this program is to provide evidence-based information to evaluate grafting materials for periodontal, restorative, and implant dentistry based upon clinical, esthetic, functional, and histological results in humans.

OBJECTIVES
- Understand the goal of implant dentistry.
- Identify the need and indications for implant success.
- Define and avoid implant failure.
- Understand the difference between implant successes and implant survival.
- Select proper implant location to obtain maximum esthetics.
- How to market dental implants to your patients.
- Understand how to prevent implant problems.
- Identify the proper time and sequence of implant placement procedures.
- Defend clinically, functionally, and histologically, the use of the dental implant system being utilized.
- Select proper implants based on sound biological principles.

PRESENTER
DONALD P. CALLAN, D.D.S., received his dental degree in 1975 and a Certificate in Periodontics from the University of Missouri at Kansas City in 1978. Dr. Callan maintains a private practice limited to Periodontics with an emphasis on tissue regeneration and implant dentistry in Little Rock, Arkansas. His current hospital appointment includes the Arkansas Children Hospital in Little Rock, Arkansas.

TIME
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM Program: Friday, 9:00 AM-5:00 PM

LOCATION
The University of Texas Health Science Center at San Antonio, Dental School

TUITION
Dentist: $270.00

CREDIT (Course Code: 150850A) AGD Code: 780 Hours: 7

The Dental School thanks PeriSeal for its educational grant in support of this continuing education program.

Dental bonding agents and resin luting cements are constantly evolving areas of restorative dentistry. In addition, new products have been introduced in the glass ionomers category. Dentists are faced with a large range of restorative dental materials and are expected to separate advertising from reality. In this presentation, Dr. Khajotia will differentiate among the various categories of bonding agents and resin luting cements from the perspective of critical Materials Science considerations and clinical use, without personal bias or commercial interests. He will also discuss traditional glass ionomers and resin-modified glass ionomers from that perspective.

During this presentation, Dr. Khajotia will review the composition, manipulation and properties of bonding agents, resin luting cements, glass ionomers and resin-modified glass ionomers. He will also provide an overview of current research in his laboratory on the development of an antibacterial bonding system, and on interactions between oral biofilms and dental materials. Overall, this presentation will provide participants with the tools needed to select suitable bonding agents, glass ionomers and resin luting cements with confidence.

OBJECTIVES
- Composition, manipulation and properties of bonding agents
- Benefits and limitations of bonding agents
- Developing an antibacterial bonding system
- Composition, manipulation and properties of resin luting cements
- Benefits and limitations of resin luting cements
- Composition, manipulation and properties of glass ionomers and resin-modified glass ionomers
- Benefits and limitations of glass ionomers and resin-modified glass ionomers
- Interactions between dental materials and oral biofilms
- Concepts that dentists need to know about dental materials

PRESENTER
SHARUKH S. KHAJOTIA, B.D.S., M.S., Ph.D., attained a dental degree from Nair Hospital Dental College, University of Bombay, India in 1988, a Master of Science degree in Dental Biomaterials from Marquette University in 1992, and a Ph.D. in Oral Biology from the Medical College of Georgia in 1997. Currently he is the Assistant Dean for Research as well as Professor and Chair of the Department of Dental Materials in the College of Dentistry at the University of Oklahoma. He also holds appointments in the OU Health Sciences Center Graduate College and the OU School of Chemical, Biological and Materials Engineering.

TSBDE-Approved Course for Certification
Coronal Polishing for the Dental Assistant
LYNN A. SMILEY R.D.H., B.A.

OVERVIEW
This program offers 8 hours of clinical and didactic education required by the Texas State Board of Dental Examiners for certification in coronal polishing. This course will include: Oral Anatomy; Tooth morphology; Indications, contraindications and complications for coronal polishing; Infection control procedures; and Jurisprudence relating to coronal polishing. The laboratory and clinical activity will include: training in using a slow-speed hand piece; principles of coronal polishing; armamentarium; operator & patient positioning, polishing technique, polishing agents; and polishing coronal surfaces of teeth. This course is offered through the Department of Dental Hygiene at The University of Texas Health Science Center at San Antonio in collaboration with San Antonio College Dental Assisting Program and is a TSBDE APPROVED & ACCREDITED COURSE. In order to obtain your certification the State also requires at least 2 yrs as a dental assistant.

OBJECTIVES
• State the effect polishing has on the patient, environment, teeth and gingival tissues.
• Identify indicators for polishing the teeth.
• Discuss contraindications for polishing the teeth.
• Distinguish between abrasion, abrasive and polishing.
• Identify the characteristics of abrasive particles.
• Determine how particle size/shape, speed, and pressure affect abrasiveness.
• Recognize different abrasive agents.
• Describe the constituents of a commercial polishing agent utilized by a dental professional.
• Demonstrate use of a slow speed hand piece and prophylaxis angle on a partner in clinic.
• Define cumulative trauma disorders and explain how the dental assistant might prevent such injuries.
• Given a description of a seated operator and/or a reclined patient, determine if the situation serves the clinician’s best interest ergonomically.
• Outline the anatomy of the carpal tunnel and explain how compression of the median nerve occurs.
• List the symptoms of carpal tunnel syndrome.
• List the areas of the work site to be evaluated for potential carpal tunnel syndrome risk.
• Define disclosing.
  a. Explain the different ways that disclosing plaque can assist the dental assistant in patient education and motivation.
  b. List the properties of an acceptable disclosing agent.
  c. Describe the various formulas of disclosing agents.

PRESENTER
LYNN A. SMILEY, RDH, BA, is a clinical instructor in the Department of Dental Hygiene at the University of Texas Health Science Center at San Antonio. She has 25 years of experience as a clinical dental hygienist. She is currently course director for Introduction to Clinical Theory, PreClinical Dental Hygiene, Clinic I and Clinic I Seminar. As the junior Year Clinic Coordinator, Ms. Smiley is responsible for the clinical experience of students in their first semester of patient care.

TIME
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Friday, 9:00 AM-5:00 PM

AUGUST 17

Texas Brief AM
The Dynamics of Anterior Teeth: Form, Function, and Esthetics
JACK I. SHIRLEY, D.D.S.

OVERVIEW
The clinician is spending more time taking care of anterior teeth. If the dentist is not bleaching them, he or she is covering them with beautiful porcelain. It is time to take a close look at what makes front teeth look beautiful and function correctly. Let’s see if form does follow function. In this course, Dr. Shirley will look at the anatomy of anterior teeth, the esthetics of anterior teeth, how to prepare anterior teeth for crowns and veneers, how to temporize anterior veneers and crowns, and how anterior tooth function.

OBJECTIVES
• Review the anatomy of anterior teeth
• Understand totally how anterior teeth are supposed to function
• Take a close look at what makes front teeth esthetically pleasing
• Preparation of anterior teeth -- crowns and veneers
• Simple methods of temporization
• A quick review of impression technique

PRESENTER
JACK I. SHIRLEY, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio in 1979. He has maintained a private practice in San Antonio, Texas for over twenty years. Dr. Shirley has been associated with the Pankey Institute in Key Biscayne, Florida for eighteen years. He has served as Associate Faculty for thirteen years and is President of the Board of Trustees and a member of the Board of Directors. Dr. Shirley has been selected to represent the Pankey Institute through its Speakers Bureau and can be heard throughout the nation at numerous dental meetings speaking about Pankey philosophy, techniques, and the effectiveness of comprehensive care dentistry. He has a passion for dental education and a strong desire to help dentists reach their full potential.

TIME
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Friday, 9:00 AM-12:00 PM

LOCATION
The University of Texas Health Science Center at San Antonio, Dental School

AUGUST 17

Texas Brief PM
Occlusion Made Easy
JACK I. SHIRLEY, D.D.S.

OVERVIEW
A walk down occlusion lane is not a walk that we often want to take, but Dr. Shirley advocates, “Give it another chance; it might change your whole practice and the way you practice dentistry”.

This course on occlusion has received rave reviews from dentists around the country. One dentist’s comment was, “This is the first time I have ever understood occlusion, and I have been a dentist for 28 years.” Another dentist said, “Finally, someone is giving me something I can use in my practice.” This is just the beginning. Come join us and see why you are actually going to start enjoying occlusion and are going to be excited about what it will do for your practice.

OBJECTIVES
Topics to be discussed:
• CR vs. CO.
• What is adequate anterior guidance?
• The significance of incline interferences.
• Should we be concerned with condylar guidance?
• How to recognize occlusal disease and what to do about it.
• How to equilibrate and who to equilibrate.
• Splint construction and adjustment.
• Verbal skills that will help you with patient education.
• How to make sure those big veneer cases are functioning properly.

PRESENTER
JACK I. SHIRLEY, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio in 1979. He has maintained a private practice in San Antonio, Texas for over twenty years. Dr. Shirley has been associated with the Pankey Institute in Key Biscayne, Florida for eighteen years. **AUGUST 17**

Lecture/Participation Course
**The Precision Prosthesis, The Use of Attachments in Dentistry**
JAMES T. ELLISON, C.D.T.

**OVERVIEW**
This course will be presented in four modules. The first will address the biomechanical considerations of the precision retained partial denture. It will cover the proper use of intra and extracoronal attachments and include an informative slide series and demonstration documenting several of the more popular attachment systems.

Next, the segmenting of fixed bridgework will be presented, including those attachments used with non parallel abutments, and those used in future conversion to removable prostheses. Special attention will be given to those attachments used with implants.

Thirdly, the overdenture will be considered. This rapidly growing area of dentistry will be discussed from the biomechanical as well as clinical aspect, including slides and demonstration of both stud and bar systems. Once again, those attachments that have become popular for implant prosthetics will be considered in detail.

The fourth module will be a hands-on participation section where each participant will learn to deal with misaligned implants in an overdenture application. An innovative chair side attachment pick up technique will be used along with proper attachment maintenance procedures.

**OBJECTIVES**
- Why attachments?
- Case Design – How to choose the correct attachment for any partial denture or overdenture.
- What causes failures and how to avoid them
- Why is it necessary to segment long bridges?
- Why choose an overdenture?
- Clinical fabrication procedures
- Laboratory fabrication procedures
- Troubleshooting
- Maintenance
- How to market and price

**PRESENTER**
JAMES T. ELLISON, C.D.T., received a Bachelor’s Degree in Biology and an Associate’s Degree in Chemical Technology. He earned the title of Certified Dental Technician during 20 years of at-the-bench experience in all phases of dental technology. In addition to a year as Director of Technical Services for Belle de St. Claire, he has spent the past twenty-three years with Sterngold as the head of the technical and educational departments and is also in charge of product development.

**TIME**

**AUGUST 24**

Lecture Course
**Dentistry and the Aging Population: The Common and Complex Medical Needs**
SARAH J. DIRKS, D.D.S.

**OVERVIEW**
Treating the elderly can be intimidating because it often requires the general dentist to manage complex medical and dental problems in an atmosphere of uncertainty. This course explores practical approaches that will assist you in the successful management of dental patients with chronic medical conditions. Dr. Dirks will discuss basic risk assessment strategies needed to safely provide dental care. Learn how to integrate nursing facility patients into your existing practice.

**OBJECTIVES**
- General principles of risk assessment
- Determining when physician input is warranted
- What is “medically necessary” dental care?
- Antibiotic prophylaxis & management of patients in the “grey areas”
- Managing patients on anticoagulant and antiplatelet therapies
- Risk stratification and cardiac patients
- The must have “geriatric tools of the trade”
- Aspiration risk and the elderly

**PRESENTER**
SARAH J. DIRKS, D.D.S., received her dental degree from The University of Texas Health Science Center at San Antonio in 1988. She has a full-time practice in Geriatric Dentistry with an emphasis on medically compromised elderly patients. She completed fellowship training in Geriatrics and served as Clinical Director of the UTHSC-SA Geriatric Dental Clinic prior to going into private practice. Dr. Dirks has patients from over thirty nursing facilities in South Texas. Her patient base is primarily from referring physicians and associated adjunct medical care providers.

**TIME**
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Friday, 9:00 AM-5:00 PM

**LOCATION**
The University of Texas Health Science Center at San Antonio, Dental School

**TUITION**
Dentist: $210.00
Allied Dental Personnel: $160.00

**AUGUST 24**

Lecture Course
**A Comprehensive Review of Oral Pathology for the Practicing Dentist and Dental Hygienist**
JOHN M. WRIGHT, D.D.S.

**OVERVIEW**
The course presents highlights of virtually all pathologic conditions affecting the jaws, teeth and soft tissue seen with any frequency in practice. It will cover all those things you have forgotten since your formal training. A portion of the course will focus in more detail on oral cancer and precancer. The course will conclude with an interactive session on diagnostic differential.

**OBJECTIVES**
You should learn:
- The clinical features of developmental conditions of the teeth and soft tissues
- How to recognize the more common oral infectious and noninfectious forms of stomatitis
- Oral manifestations of systemic disease
- Clinical features and new biologic principles of benign and malignant neoplasms, with emphasis on oral cancer/precancer
- Update on odontogenic cysts and tumors
- Recognition of bone disorders
- Differential diagnosis of common presenting signs and symptoms of oral disease

**PRESENTER**
JOHN M. WRIGHT, D.D.S., received his dental degree from West Virginia University and Oral Pathology training at Indiana University. Dr. Wright is Regents Professor and Chairman of the Department of Diagnostic Sciences, Texas A&M Health Science Center, Baylor College of Dentistry in Dallas, Texas. He is an oral pathologist and a Diplomate of both the American Board of Oral and Maxillofacial Pathology and the American Board of Oral Medicine.

He has contributed over 100 publications to the scientific literature, as well as 14 book chapters and three textbooks. Dr. Wright is a past President of both the American Academy of Oral and Maxillofacial Pathology and the American Board of Oral and Maxillofacial Pathology. He is Immediate Past President of the International Association of Oral Pathologists. He has participated in over 300 statewide, national and international programs.

**TIME**
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Friday, 9:00 AM-5:00 PM

**LOCATION**

The Dental School thanks *Sterngold and Zimmer Dental* for its educational grant in support of this continuing education program.
NEW TICKET AND PARKING PASS POLICY

Because of the high demand of football tickets this year, a policy has been established for ordering extra game tickets on a limited basis. All ticket orders are handled on a first-come, first-served basis. Parking passes are limited, we have only enough to provide 1 per family. If more become available, you will be contacted.

**Priority Tickets, Priority Seating, and Priority Parking will be given to Season Subscribers.**

- Season Subscribers who order the same number of extra ticket(s) for each game will be given priority.
- The Season Subscriber who orders extra ticket(s), but not the same number of tickets for each game, will not be guaranteed that the guest(s) will be seated together.
- Those who register on an individual basis for the series and ordering extra ticket(s), will not be guaranteed that the guest(s) will be seated next to the individual.

Pediatric Dentistry Refresher
STEVEN P. HACKMYER, D.D.S.

OVERVIEW
Treatment of the pediatric patient involves more than approaching them as miniature adults. This course will provide the participant with a better understanding to enable them to provide quality comprehensive care for their pediatric patients. The course will cover a number of topics that are associated with every day comprehensive treatment of the pediatric patient.

OBJECTIVES
Review current basics and concepts of essential areas of clinical everyday Pediatric Dentistry
- Prevention/Anticipatory Guidance
- Behavior Management
- Diagnosis & Treatment planning
- Pediatric Restorations
- Pediatric Pulp Therapy
- Trauma

PRESENTER
STEVEN P. HACKMYER, D.D.S., earned his dental degree from New York University College of Dentistry. He completed a residency in Pedodontics at Brookdale Hospital University Medical Center in Brooklyn, New York. Prior to joining the University of Texas Health Science Center Houston. He is currently, Associate Clinical Professor for the Department of Developmental Dentistry, University of Texas Health Science Center San Antonio.

Dr. Hackmyer was an Assistant Professor in Residence, Clinical Sciences and the initial Pre-doctoral Pediatric Dentistry Course Director at the University of Nevada Las Vegas, School of Dental Medicine. While at UNLV he was the Principal Investigator for a three year 1.6 million dollar HRSA grant to fund a new Pediatric Dental residency program. Dr. Hackmyer is a Fellow of the International College of Dentists, a member of the American Dental Association, American Academy of Pediatric Dentistry, the American Dental Education Association, and American Association for Dental Research. He has been an invited speaker at local and national professional meetings.

TIME
Check-in: Saturday, five hours prior to kick-off
Game: Texas vs. Wyoming
Royal Texas-Memorial Stadium (kick-off time TBA)

LOCATION
Joe C. Thompson Conference Center at The University of Texas at Austin
28th and Red River (next to LBJ Library)
Austin, Texas 78713
(800) 882-8784

TUITION
Individual game ticket: $325.00
Individual without game ticket: $265.00
We have a limited number of parking passes.

CREDIT (Course Code: 152406A)
AGD Code: 438
Hours: 3

SPECIAL FEE INFORMATION
Additional game tickets can be purchased at $60.00 each. Pre-game meals can be purchased for guests at $15.00 per person. We have a limited number of parking passes that are on a first come first serve basis. Please register early.

The Dental School thanks Procter and Gamble Professional Oral Health, and Denstply Cande for their educational grants in support of this continuing education series.

September 6

Luncheons for Learning

Trauma in the Pediatric Patient
STEVEN P. HACKMYER, D.D.S.

FORMAT
One day a month a speaker discusses a dental topic during lunch. The sessions are informal and the group has an opportunity to interact with the speaker during the short discussion period at the end of the lecture. It requires only about one and one-half hour of your time to learn the latest developments in many areas of dentistry. It also offers the opportunity to become better acquainted with your colleagues and their staff since all dental allied personnel and technicians are also invited to attend.

OVERVIEW
A part of everyday life is that accidents can happen. For the Dental Professional this can present as trauma to the face and oral cavity. The goal of this discussion will be to enhance the attendees understanding of both diagnosis and treatment of dental trauma. This presentation will focus on and discuss, trauma to both primary and permanent dentition classification, diagnosis and treatment modalities of dental trauma will be presented. Importantly, the presentation will address current accepted standards and evidenced based approaches concerning dental trauma.

OBJECTIVES
Topics to be discussed:
- Diagnosis and treatment of dental trauma
- Primary and permanent dentition classification
- Diagnosis and treatment modalities of dental trauma
- Current accepted standards
- Evidenced based approaches concerning dental trauma

PRESENTER
STEVEN P. HACKMYER, D.D.S., earned his dental degree from New York University College of Dentistry. He completed a residency in Pedodontics at Brookdale Hospital University Medical Center in Brooklyn, New York. Prior to joining the University of Texas Health Science Center Houston. He is currently, Associate Clinical Professor for the Department of Developmental Dentistry, University of Texas Health Science Center San Antonio.

JOSEPH L. CARRICK, D.D.S.

OVERVIEW
In this hands-on course you will be placing implants in cadavers to compare the actual placement to that of the virtual placement which creates the surgical guide. This course will combine C.T. scan technology to help the clinician to evaluate which edentulous patients are candidates for fixed prosthesis on four to five implants. I will demonstrate how to predict prior to surgery where the implants are placed to achieve maximum anterior-posterior support, the abutment that will support the transitional and final prosthesis. The candidates will then treat plan cases using C.T. scan data utilizing the software that allows them to place the implants. They will place implants utilizing surgical guides produced from the same software they have learned. All aspects of the treatment from impressions to placement of both transitional and definitive prostheses will be demonstrated on the cadavers that implants were placed. The morning portion of the course will be reinforced by the practical application in the afternoon of all the steps on the scanned cadavers and both arches will be treated. By taking the participants through all the steps and having them be able to do each step on the cadavers, they will be more comfortable with the process as close to real patient treatment without the added stress.

OBJECTIVES
At the conclusion of this course, attendees should be able to:
- Place implants utilizing a C.T generated surgical guides on the cadavers
- Become familiar with the C.T. scan software
- Take impressions for the final prostheses on the cadaver that the implants were placed and deliver the transitional prostheses
- Understand the steps required to make an all on five implant supported fixed prosthesis

PRESENTER
JOSEPH L. CARRICK, D.D.S., attained his dental degree at The University of Texas Health Science Center at San Antonio in 1977. He maintains a private practice with an emphasis on cosmetic dentistry. Dr. Carrick has served in various capacities for the American Academy of Cosmetic Dentistry, and was President from 1998 to 1999 and is currently on its Board of Governors. He is also an Examiner for Accreditation for the AADCD and has served as Editor of the Journal of Cosmetic Dentistry.

TIME
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Friday, 9:00 AM – 5:00 PM

LOCATION
The University of Texas Health Science Center at San Antonio, Dental School

TUITION
Dentist: $470.00
Dentist: $470.00 - 20% = $376.00
Dentist: $470.00 - 15% = $400.00

Lecture Course
Contemporary Management of Traumatic Dental Injuries: A Look at the 2012 Guidelines
ANTHONY J. DIANGELIS, D.M.D., M.P.H.

OVERVIEW
Estimated suggests that the vast majority, (71-92%) of traumatic dental injuries (TDI) occur before age 19, with fully 10% occurring before age 10. Also, studies suggest that in the adolescent and young adult population up to 39% of TDI’s are sports related, while 25% of 6-50 year olds in the United States will have experienced dental trauma. Additionally, preliminary evidence demonstrates that TDI’s may be increasing in persons age 65 and older as this population is retaining their natural dentition longer and the risk of falling increases in older adults. This presentation is designed to inform and assist the practitioner in effectively managing a wide range of traumatic dental injuries. Understanding the biological basis of wound healing will facilitate assessing prognosis, anticipating complications and selecting treatment options.

The lecture utilizes numerous case presentations and treatment based on the most recently published Guidelines for the Management of Traumatic Dental Injuries. The program provides a comprehensive approach to both assessment and treatment with an emphasis on enhancing prognosis while minimizing complications often encountered.

OBJECTIVES
The following represent topics that will be included:
- A comprehensive trauma assessment
- Immediate and long-term treatment goals
- Stabilization Techniques
  - Splinting times
  - Problem solving in the mixed dentition
- Deciduous vs Permanent Tooth Management
- Immature vs Mature Permanent Tooth Management
- Pulpal Management
  - Timing
  - Treatment choices
- Avulsion Injuries
  - Extraoral time
  - Storage media
  - Topical and systemic medications
- Complications and their management
  - Future directions
- Concussion and Subluxation
- Lateral Luxation
- Intrusive Luxation
- Extrusive Luxation
- Root Fractures
- Coronal Fractures

PRESENTER
ANTHONY J. DIANGELIS, D.M.D., M.P.H., was awarded his DMD degree from Tufts University School of Dental Medicine in 1969 and in 1971, he obtained his Master’s degree in Public Health at the University of Minnesota. He is Professor at the University of Minnesota School of Dentistry and Chief of Dentistry at the Hennepin County Medical Center in Minneapolis, Minnesota.

TIME
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Friday, 9:00 AM – 5:00 PM

LOCATION
The University of Texas Health Science Center at San Antonio, Dental School

TUITION

Longhorn Football Dental Study Club
Assessing Orofacial Pain
EDWARD F. WRIGHT, D.D.S., M.S.

OVERVIEW
This presentation provides knowledge of how to distinguish among the various types of orofacial pains. Since referred pain is very common within the oral cavity, head, and neck regions, clinical exam techniques and referred pain patterns are used to identify practitioners on how they can locate the true source(s) for a patient’s pain. Since sinus pain may cause or contribute to tooth, TMD, and neck pain, potential medication choices are provided that may temporarily reduce the sinus pain, enabling the practitioner to identify the sinus’s contribution to the pain complaint. An explanation for how TMD and neck disorders may cause or contribute to a headache complaint and a recommendation for when to treat the TMD and/or neck disorder for the headache complaint are provided.

OBJECTIVES
- Understand how referred pain patterns may be used to help determine whether a patient’s perceived pain is coming from a different location.
- Realize how local anesthetic challenges may be used to identify a patient’s true source of pain.
- Understand which TMD therapies are most beneficial for the various patient characteristics.
- Understand how to integrate TMD and cervical spine therapies with the treatment of headaches.

PRESENTER
EDWARD F. WRIGHT, D.D.S., M.S., received his dental degree from Case Western Reserve in Cleveland, Ohio in 1977. He completed his postgraduate training in an Advanced Clinical Dentistry Program in 1986 at Eglin Air Force Base, and in 1994 he attained his MS degree and completed a TMJ and Orofacial Pain program at the University of Minnesota, Minneapolis, Minnesota. Dr. Wright is currently a Clinical Associate Professor in the Department of Restorative Dentistry at The University of Texas Health Science Center at San Antonio.

A Diplomate of the American Board of Orofacial Pain, Dr. Wright is the primary author of 23 journal articles, and author of the textbook, Manual of Temporomandibular Disorders, which was published in 2005.

TIME
Check-in: Saturday, five hours prior to kick-off
Game: Texas vs. New Mexico
Royal Texas-Memorial Stadium (kick-off time TBA)

LOCATION

SEPTEMBER 14

Texas Brief AM
Lecture Course
ANTIBACTERIAL AGENTS
Use and Misuse
GEZA T. TEREZHALMY, D.D.S., M.A.

OVERVIEW
Most infections of the head and neck region are odonto-
genic in origin, which can be resolved satisfactorily
through an approach that incorporates appropriate, time-
lessly debridement (primary dental care). Odontogenic infec-
tions, which fail to respond to debridement, may spread
into anatomical spaces contiguous with fascial planes
and lead to serious, even life-threatening situations
especially in immunocompromized patients. The intent
of this course is to present clinicians a rational strategy
for the medical management of odontogenic infections
and to discuss current recommendations for the use of
antibacterial prophylaxis.

OBJECTIVES
Participants in this course will be introduced to evidence-
based information that will help them to select the most
appropriate therapeutic intervention for the management
of an odontogenic infection considering the diagnosis,
the need for antibacterial chemotherapy or antibacterial
prophylaxis, the benefits versus the risks of drug thera-
py, the need to individualize drug regimen, the need for
educating patients, and the importance of follow-up.

LEARNING OBJECTIVES
Upon completion of this course the practitioner should be
able to:
• Discuss the etiology of odontogenic infections.
• Discuss the pharmacological basis of antibacterial
  chemotherapy in dentistry.
• Develop appropriate strategies for the medical
  management of odontogenic infections.
• Recognize indications and contraindications for
  the use of antibacterial prophylaxis.
• Understand the clinical relevance of antibacterial
drug resistance.

PRESENTER
GEZA T. TEREZHALMY, D.D.S., M.A., received his D.D.S. degree from Case Western Reserve University in 1971; a B.S.
degree from John Carroll University; an M.A. in Higher Education and Human Development from The George Washington
University; and a Certificate in Oral Medicine from the National Naval Dental Center. Dr. Terenhalmy is certified by the American Board of Oral
Medicine and the American Board of Oral and Maxillofacial Radiology (Life).

He is Professor and Dean Emeritus, School of Dental Medicine, Case Western Reserve University. In addition, he is a Consultant, Naval Postgraduate
Dental School, National Naval Medical Center.

TIME
Check-in & Breakfast: D.S. Cafeteria, 9:00 AM-12:00 PM
Program: Monday, 9:00 AM-12:00 PM

Lecture Course/Examination
Texas State Board of Dental Examiners Requires Dental Assistants’ Registration Course and Examination
MONA L. THIBADEAU, R.D.A., C.D.A., B.A.

OVERVIEW
As of September 1, 2006 the Texas State Board of Dental Examiners require Dental Assistants attend a prep course and pass an examination on Jurisprudence, Infection Control, and Radiology, which will be administered at the end of the presentation. This course is intended to provide sufficient information in the following areas.

OBJECTIVES
Jurisprudence:
• Purpose of the Texas Dental Practice Act
• State Board Rules
• Purpose and structure of the State Board of Dental Examiners
• Provisions for licensure
• Regulations for Dental Auxiliaries
• Professional Conduct
• Minimum Standard of Care
Infection Control
• CDC Infection Control Guidelines
• Infection Control Rules of the Texas State Board of Dental Examiners
• Hand hygiene
• Alcohol based hand rubs
• Sterilization techniques
• Sterilization vs. disinfection
• Spore testing
• Instrument processing
• Instrument wrapping
• Surface disinfection
• Medical waste
• Dental unit waterline disinfection
Radiology
• Radiographic principles and theory
• Normal Anatomy
• Technique and processing error recognition for intraoral and panoramic radiographs
• Radiation biology
• Protection
• Risk assessment
• Aseptic techniques for dental radiology
• Quality assurance principles and procure

PRESENTER
MONA L. THIBADEAU, R.D.A, C.D.A, B.A, is a Dental Instructior at San Antonio College of Medical and Dental Assistants in San Antonio, Texas.

TIME
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Friday, 9:00 AM – 6:00 PM

LOCATION
The University of Texas Health Science Center at San Antonio, Dental School

TUITION
Individual: $240.00
Individual: $240.00 - 20% = $192.00
Individual: $240.00 - 15% = $204.00

SEPTMBER 14

Participation Course for Dental Hygienists Dentists are Invited Seven Ways to Avoid Carpal Tunnel Syndrome (This is not just another Scaling and Root Planing course) HAROLD L. MEADOR, D.D.S.

OVERVIEW
Why would dental professionals subject themselves to the possibility of carpal tunnel syndrome? Today’s dental professionals are at high risk for many neuromusculoskeletal problems. Traditionally, the highest percentage of entrapment neuropathies affecting the dentist and their staff occur in the neck and back.

To help the individual cope with such issues, this course will address the universal needs of the office using new insights from orthopedics and ergonomics research. This new information will incorporate an instrumentation technique that can improve working conditions for those who perform scaling and root planing procedures. Course attendees will have the opportunity to learn the new components of the technique, especially the basic power strokes in instrumentation. At the end of the didactic session, each participant will complete a personal questionnaire, which becomes the key to understanding the application of the solutions to the 7 basic problems. The lecture will be followed by a hands-on session involving the biocentric simulator.

OBJECTIVES
Participants will be able to recognize the following universal pitfalls:
• The danger of the high wing
• Recognizing improper body alignment
• How pronation and extension of the hand can contribute to tennis elbow
• How sustaining the same body positions and work motions over an extended period of time can contribute to pain
• How universal gloves contribute to fatigue and pain of the thumb
• How fatigue is caused by flexion and extension of the wrist as it is seen in some work motions

Then participants will learn how the use of several options in the components of the instrumentation technique can lead to solutions for the neuromusculoskeletal problems including carpal tunnel syndrome.

PRESENTER
HAROLD L. MEADOR, D.D.S., earned his dental degree at The University of Texas Health Science Center at Houston in 1952. He practiced general dentistry for seven years and went onto graduate training in Periodontics at Baylor Dental College which he completed in 1960.

TIME
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Friday, 9:00 AM - 5:00 PM

Academic Outreach in Hondo,
Texas/Lecture Course
Whitewings, Implants, and Board Investigations. Know the Rules to Avoid Being a Target
EDWARD P. "JOE" WALLER, JR., D.D.S., JD

OVERVIEW
Effective September 1, 2008 Rule 104.1, licensees may choose to have up to four (4) hours of risk management-related coursework (includes risk management, record keeping, and/or ethics courses and the allowance for self-study hours has been increased to (6) hours. This course is designed to assist the dental practitioner in minimizing their chances of a lawsuit or Dental Board investigation through the use of effective risk management techniques. Dr. Waller will explore how to avoid these setbacks in your dentist office.

OBJECTIVES
• Learn the steps to be taken to reduce to chances of litigation in implant cases
• Discussion of the documentation which must be present in every implant case
• Discussion of informed consent in implant cases
• Legal ramifications of various types of imaging techniques utilized in implant cases
• Learn the three steps which must be taken to reduce your chances of a Dental Board Investigation
• Discussion of documentation requirements to minimize the risk of a Board investigation
• Learn the steps which must be taken should you become the subject of a Board investigation
• Learn the difference between a White Wing and a Bite Wing.

PRESENTER
EDWARD P. "JOE" WALLER, JR., D.D.S., JD, received his dental degree from St. Louis University School of Dentistry in 1969. He maintained a private practice in general dentistry from 1971 to 1987 in San Antonio, Texas. Subsequently, Dr. Waller went onto to pursue a law degree which he attained in 1990 at St. Mary's University School of Law in San Antonio, Texas. Currently, he is an attorney with the law firm of Brin & Brin in San Antonio, Texas. His area of practice includes the defense of hospitals, physicians, and dentists in medical and dental malpractice lawsuits.

TIME
Check-in & breakfast and departure to Hondo, TX: La Quinta Inn & Suites, 8:00AM – 9:30 AM
4431 Horizon Hill
San Antonio, TX 78229
210.525.8090
Rates: Single/Double $85.00 (Indicate UTHSCSA for rate)

Program: Saturday, 12:00 PM – 3:00 PM
Dive Hunt & Check-in: 3:00PM – 6:30PM
Steak Dinner: 6:30PM – 9:00PM
(Dinner includes appetizers, 1 1/8” thick Ribeye steaks, with all the fixin’s)

LOCATION

SEPTEMBER 20-22

Academic Outreach in Carlsbad, California
Lecture/Hands-On Course

A Fully Simulated Comprehensive Implant Placement Course

SIDNEY L. BOURGEOIS, JR., D.D.S.
MICHAEL P. MILLS, D.M.D., M.S.
IVY S. SCHWARTZ, D.D.S., M.S.Ed.
RONALD G. VERRETT, D.D.S., M.S.

OVERVIEW
This advanced course is designed to give dentists an intensive and comprehensive, fully simulated hands-on experience in implant dentistry. The program will be held in Carlsbad, California at the new state-of-the-art Zimmer Institute.

The institute is all about training with its sophisticated labs, audiovisual equipment and lecture facilities with advanced and realistic patient treatment mannequins. Participants are encouraged to bring models and x-rays of cases that they would like reviewed during a treatment planning session.

OBJECTIVES
- Develop treatment planning skills, rationale, and scientific basis for the clinical practice of simple and complex implant cases.
- Become adept at implant placement and soft tissue handling.
- Gain experience with the latest implant surgery and prosthetic implant instrumentation.
- Gain surgical knowledge and hands-on training in immediate load, extraction and immediate implant placement, socket preservation techniques, block grafts, sinus lifting, cancellous grafting and membrane techniques.
- Learn and perform prosthetic procedures on advanced mannequin models with single unit, multiple unit, and edentulous scenarios in a hands-on environment.

PRESENTERS
SIDNEY L. BOURGEOIS, JR., D.D.S., received his dental degree from the Louisiana State University School of Dentistry in 1991.

MICHAEL P. MILLS, D.M.D., M.S., received his dental degree from the University of Alabama School of Dentistry in 1970.

IVY S. SCHWARTZ, D.D.S., M.S.Ed., earned her D.D.S. degree from the University of Texas Health Science Center at San Antonio in 1982.

RONALD G. VERRETT, D.D.S., M.S., attained both his dental and M.S. degrees from The University of Texas Health Science Center at San Antonio in 1979 and 1987.

TIME
Check-in, receive materials and snacks: Wednesday, 9:00 PM – 10:00 PM, Carlsbad Inn 
For reservations: 800-235-3939 or 760-434-7020
Program: Thursday, 8:00 AM – 5:00 PM 
Friday, 8:00 AM – 5:00 PM 
Saturday, 8:00 AM – 5:00 PM
All sessions have working lunches

LOCATION
The Zimmer Institute
Carlsbad, California (just north of San Diego)

TUITION
- Dentist: $2000
- Dentist: $2000 - 25% = $1600

Lecture Course

The Right (and Wrong) Way To Treat Pain

GEZA T. TEREZHALMY, D.D.S., M.A.

OVERVIEW
The most common complaint causing a person to seek the services of a health care provider is pain or the closely associated symptom, discomfort. Consequently, the primary obligation and ultimate responsibility of every practitioner of the healing arts is not only to restore health but also to relieve pain. The intent of this course is to present clinicians a rational strategy for the medical management of acute odontogenic pain and to discuss current recommendations for the use of local anesthetic agents and analgesics.

OBJECTIVES
Participants in this course will be introduced to evidence-based information that will help them to select the most appropriate therapeutic intervention for the management of acute odontogenic pain and when pharmacotherapy is indicated, to prescribe dose enough, soon enough, often enough, long enough—to prescribe, as they would receive.

LEARNING OUTCOMES
Upon completion of this course the practitioner should be able to:
- Discuss the basic mechanisms of acute pain.
- Discuss the pharmacological basis of and factors to be considered in the selection of a local anesthetic agent.
- Discuss the pharmacological basis of and factors to be considered in the selection of a COX inhibitor.
- Discuss the pharmacological basis of and factors to be considered in the selection of a combination analgesic.

PRESENTERS
GEZA T. TEREZHALMY, D.D.S., M.A., received his D.D.S. degree from Case Western Reserve University in 1971, continuing with his postgraduate training from 1975 to 1977 and obtaining a Certificate in Oral Medicine from the National Naval Dental Center.

MICHIEL P. MILLS, D.M.D., M.S., received his dental degree from Case Western Reserve University in 1975 to 1977 and obtaining a Certificate in Oral Medicine from the National Naval Dental Center. Dr. Terezhalmy is Professor and Dean Emeritus, School of Dental Medicine, Case Western Reserve University. In addition, he is a Consultant, Naval Postgraduate Dental School, National Naval Medical Center. He is certified by the American Board of Oral Medicine and the American Board of Oral and Maxillofacial Radiology (Life).

SEPTMBER 22

Lecture Course

Alternative Medications and Their Impact on Patient Care

ELEONORE D. PAUNOVICH, D.D.S., M.S.

OVERVIEW
With the ever-increasing market of herbal and alternative medications, today's dental practitioner must be ready not only to recognize what these medications are, but what their impact is on medications that we may choose to prescribe for our patients. In addition, an understanding of the potential interactions and side effects of these alternative medications may be helpful in light of the steadily increasing use of these products. Particular emphasis will be on the use, side effects, and interactions these products have not only on the more frequently prescribed dental medications, but also on some of the more frequently prescribed medications our patients may be on.

OBJECTIVES
Upon completion of this course, you will learn:
• An overview of some of today's more common herbal and alternative supplements.
• Begin to review what the literature knows as the impact these products may have on the management of our dental patients.

PRESENTER
ELEONORE D. PAUNOVICH, D.D.S., M.S.C., received her DDS from Indiana University School of Dentistry. Dr. Paunovich holds the position of Associate Clinical Professor in the Department of Dental Diagnostic Science at The University of Texas Health Science Center at San Antonio where she serves as coordinator of the clinical geriatric programs for the Oral Medicine and Senior Care Clinic.

TIME
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Saturday, 9:00 AM - 5:00 PM

LOCATION
The University of Texas Health Science Center at San Antonio, Dental School

Lecture/Participation Course

Restorative Planning in Implant Dentistry

NORMA OLVERA, D.D.S., M.S.

OVERVIEW
The lecture will cover comprehensive restorative planning in implant dentistry. The presenter will discuss restorative options to implant success (What has worked/What has not!) and cover clinical case presentations. In addition, the speaker will discuss how to enhance confidence restoring dental implants, as well as, providing better service to our patients.

OBJECTIVES
• Discuss specific restorative planning principles for partially dentate and edentulous patients
• Identify causes of dental implant failures
• Explain restorative thinking in preventing implant failures
• Experience a detailed hands on session with restorative components
• Leave the course knowing basic implant restorative principles and ready to get started!

PRESENTER
NORMA OLVERA, D.D.S., M.S., obtained her dental degree from The University of Texas Health Science Center at San Antonio in 1987. She completed her postgraduate training in prosthodontics and received her certification and Master of Science in prosthodontics. She is currently an assistant professor in the Department of Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio.

Dr. Olvera has been in full-time private practice as a prosthodontist in Houston, Texas for the past 20 years. She has extensive experience in the area of oral rehabilitation involving all facets of reconstructive and restorative dentistry with and without dental implants.

TIME
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Friday, 9:00 AM - 5:00 PM

LOCATION

SEPTMBER 28

Lecture Course

Pediatric Dentistry Update for the General Practitioner

CLAUDIA I. CONTRERAS, D.D.S.

MARIA-JOSE CERVANTES, D.D.S., M.S.

OVERVIEW AND OBJECTIVES
This one-day course will serve as a comprehensive review of clinical pediatric dentistry. Course participants will interact with the faculty in an open-forum seminar on a variety of pediatric dentistry topics, including the following:

• Examination, Diagnosis and Treatment Planning
• Infant Examination and Anticipatory Guidance
• Restorative Dentistry for the Pediatric Patient
• Pulp Therapy for the Primary Dentition
• Space Maintenance
• Non-Pharmacologic Behavior Management
• Nitrous Oxide Analgesia for the Child Patient
• Local Anesthetic Dosage Regimens for Pediatric Patients

PRESENTERS
CLAUDIA I. CONTRERAS, D.D.S., received her D.D.S. degree from the National University of Mexico City, Mexico City, Mexico in 1993. She continued with her postgraduate training as a Preceptor in Pediatric Dentistry at The University of Texas Health Science Center at San Antonio in 1999. This was followed by an Internship in Pediatric Dentistry at the University of Puerto Rico, San Juan, Puerto Rico where she attained her Certificate in Pediatric Dentistry in June, 2004. Subsequently, Dr. Contreras completed her training as a Fellow in June, 2005 at The Children's Hospital & University of Colorado Health Science Center, Denver, Colorado. She currently serves as an Assistant Professor in the Department of Pediatric Dentistry at The University of Texas Health Science Center at San Antonio.

MARIA-JOSE CERVANTES MENDEZ, D.D.S., M.S., obtained her dental degree from Intercontinental University at Mexico City. After working as a general practitioner for a couple of years she continued her training at The University of Texas Health Science Center San Antonio where she completed her Residency in Pediatric Dentistry. She continued her education and received her Masters Degree in Orthodontics at the Intercontinental University.

TIME
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Friday, 9:00 AM-5:00 PM

LOCATION
The University of Texas Health Science Center at San Antonio, Dental School

TUITION
Dentist: $210.00
Dentist: $210.00 - 20% = $168.00
Dentist: $210.00 - 15% = $179.00
Allied Dental Personnel: $170.00
Allied Dental Personnel: $170.00 - 20% = $136.00
Allied Dental Personnel: $170.00 - 15% = $145.00

CREDIT (Course Code: 152422A)

Even in today's economy there are many patients that still want implants for tooth replacement.

**PRECEPTORSHIP INFORMATION**

The Preceptorship will consist of a curriculum which is clinically focused while incorporating the latest research from the clinical basic sciences. This will provide the participant with an understanding of the rationale and scientific basis for the clinical practice of implantology. The participants will meet for six weekend sessions which will include didactic sessions and some hands-on training experiences in an interactive learning environment.

**PRECEPTORSHIP OBJECTIVES**

The participant will learn:

- The rationale and scientific basis for the successful clinical practice of implantology.
- The current concepts, principles, and clinical methodology used effectively in practice.
- The proper evaluation, diagnosis, and selection of patients for implant placement and restoration.
- To develop and understand specific implant, surgical and prosthodontic skills, and the different modalities available.
- To manage the more difficult clinical situations, such as patients with advanced maxillary or mandibular atrophy.
- The practice management aspects of dental implantology: records, insurance, informed consent, medical-legal and marketing considerations.
- Peri-implantitis and its effect on the dental implant from the infective and traumatic aspects.
- Post-restoration responsibilities of staff personnel, hygienist, surgeon and restorative dentist on a recall basis.
- Demonstration of instruments, techniques for post-implant placement, restoration hygiene.
- Principles in troubleshooting, rescue, and retrieval procedures.
- The prosthodontic aspects of diagnosis and treatment planning as well as the clinical communication of this information to the surgeon.
- Procedures for developing optimum esthetics and the biomechanical loading aspects of implant restorations.
- Component systems will be categorized with specific indications for their use.
- The importance of optimal laboratory support and clinical communication skills to facilitate positive interaction with the dental technician.
- Indications and techniques relating to insertion of implants in single tooth and fresh extraction site situations.
- Hard and soft tissue grafting, guided soft, hard tissue regeneration in both pre and post-implant placement, including sinus lift procedures.
- Repair of the ailing, failing implant with new regenerative procedures and materials.
- An overview of informed consent documentation and medical-legal review.
- The principles of practice management, marketing, and insurance considerations.
- An opportunity for your dental hygienist to complete a certification course in dental implant hygiene.

**DIDACTIC SESSIONS**

- History and future of dental implantology.
- Three-day classroom/cadaver laboratory exercises.
- Biomechanical and biomaterial aspects of dental implantology.
- Physiology of bone with emphasis on cellular, molecular healing, bone maturation of bone in function and selection of implants with different designs and surfaces relating to bone density and planned implant function.
- Anatomy of the maxilla, mandible and TMJ in terms of available bone and anatomy as related to stress distribution.
- Anatomical structures (muscles, nerves, arteries) as they relate to implant placement.
- Philosophies of implant retention and stabilization.
- Essential treatment planning facets, including patient selection, past dental and medical history, essential diagnostic guides (casts, templates, etc.), documentation, appointment sequencing with laboratory, surgeon, restorative dentist. Essentials of joint treatment planning, and recall principles.
- Surgical and prosthodontic considerations including incision design, fixture and abutment selection, occlusal considerations, and force transmission.
- Peri-implantitis and its effect on the dental implant from the infective and traumatic aspects.
- Post-restoration responsibilities of staff personnel, hygienist, surgeon and restorative dentist on a recall basis.
- Demonstration of instruments, techniques for post-implant placement, restoration hygiene.
- Principles in troubleshooting, rescue, and retrieval procedures.
- The prosthodontic aspects of diagnosis and treatment planning as well as the clinical communication of this information to the surgeon.
- Procedures for developing optimum esthetics and the biomechanical loading aspects of implant restorations.
- Component systems will be categorized with specific indications for their use.
- The importance of optimal laboratory support and clinical communication skills to facilitate positive interaction with the dental technician.
- Indications and techniques relating to insertion of implants in single tooth and fresh extraction site situations.
- Hard and soft tissue grafting, guided soft, hard tissue regeneration in both pre and post-implant placement, including sinus lift procedures.
- Repair of the ailing, failing implant with new regenerative procedures and materials.
- An overview of informed consent documentation and medical-legal review.
- The principles of practice management, marketing, and insurance considerations.
- An opportunity for your dental hygienist to complete a certification course in dental implant hygiene.

**PRECEPTORSHIP DIRECTORS**

- **BRIAN L. MEALEY, D.D.S., M.S.**, received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1983. He attained his specialty certificate in Periodontics from Wilford Hall Air Force Medical Center, Lackland Air Force Base in 1990 and a Master of Science in Periodontics from The University of Texas Health Science Center at San Antonio. He is an Associate Professor and Head of the Specialist Division in the Department of Periodontics at The University of Texas Health Science Center at San Antonio.

- **STEPHAN J. HANEY, D.D.S.**, earned his dental degree in 1974 from Baylor College of Dentistry in Dallas. With Air Force sponsorship he obtained specialty certification in Prosthodontics from The University of Southern California in 1979. He taught in Air Force AEGD residencies for 15 years until his retirement in 1998 when he entered private practice in Fort Worth, TX. Assuming a full time teaching position at UTHSCSA in 2007, he transitioned to Director of the Postdoctoral Prosthodontics Program in 2011.

**PRECEPTORSHIP CO-FOUNDERS**

- **ROLAND M. MEFFERT, D.D.S.**, received his dental degree from Marquette University in 1955 and Certificates in Periodontics from the University of Texas Health Science Center at Houston, Dental Branch in 1961 and Wilford Hall USAF Medical Center, Lackland Air Force Base, Texas in 1962.

- **ROBERT J. CRONIN, JR., D.D.S., M.S.**, was the Director of the Postdoctoral Prosthodontics Program and Professor at The University of Texas Health Science Center at San Antonio Dental School. He received his D.D.S. degree from Georgetown University in 1967 and completed a three year postdoctoral program in Prosthodontics at Wilford Hall USAF Medical Center, receiving a Master of Science Degree from The University of Texas Dental Branch at Houston in 1975.
PLAN NOW TO ATTEND OUR 2012-2013 PRECEPTORSHIP
Sessions 2012-2013
2013: January 4-6 • February 1-3 • March 1-3 - *Dental Team Weekend

TUITION INFORMATION
(Includes course materials, lunch on Friday and Saturday, celebration dinner, case presentations, and recognition as a Dr. Kenneth D. Rudd Continuing Dental Education Participant Award Recipient.)

DENTIST: $9,897.50
Save $1,100.00 off the tuition fee by making a one-time payment of $8,797.50 between May 4 and August 3, 2012 (which includes a non-refundable $1,000 deposit).

TWO ADDITIONAL EASY WAYS TO SAVE!
Reserve your spot now with a non-refundable deposit of $1,000.00 before July 9, 2012 and qualify for $697.50 off the full tuition fee.

DENTIST: $9,897.50
Save $1,100.00 off the tuition fee by making a one-time payment of $8,797.50 between May 4 and August 3, 2012 (which includes a non-refundable $1,000 deposit).

OR
Send a non-refundable deposit of $1,000.00 before August 3, 2012 and qualify for $497.50 off the full tuition fee.

THEN YOU WILL HAVE FOUR MORE OPPORTUNITIES TO SAVE EVEN MORE:

If you pay the entire balance due (based on your deposit date) before August 10, 2012 you will receive an additional $400.00 off the remaining balance.

OR
Pay the entire balance due (based on your deposit date) before September 3, 2012 and you will receive an additional $200.00 off the remaining balance.

OR
Start making the first of 5 successive monthly payment plans (based on your balance due) before August 10, 2012 and you will receive an additional $100.00 off the remaining balance.

OR
If you make the first of 5 successive monthly payment plans (based on your balance due) before September 3, 2012 and you will receive an additional $50.00 off the remaining balance.

No fee reductions are available after September 3, 2012 but a five successive monthly payment plan is available. 

PAST PRECEPTORSHIP FACULTY

BRING YOUR STAFF TO THE DENTAL TEAM WEEKEND
March 1 Lynn D. Mortilla, RDH
Dental Hygiene and
Dental Assistant Certification Course

March 2 Joy Milliss, CSP
Essential Skills for the Dental Implant Team

Plan to join us either in Carlsbad, CA or
Parsippany, NJ at the
Zimmer Institute.
For an advanced comprehensive course

La Quinta Inn & Suites Medical Conference Center
4431 Horizon Hill Blvd
San Antonio, TX 78229

RATES:
Single/Double $85.00

ACCOMMODATIONS
Special rates and arrangements have been made at the newly built
La Quinta Inn & Suites Medical Conference Center. Enjoy this
UPSCALE - hotel offering vibrant, inviting San Antonio feel guest rooms, all with luxurious pillow-top beds and down pillows, refrigerator, microwave, and complimentary wired and wireless Internet access. This is the closest hotel (only 1 mile) to the
UTHSC Medical Center and hospitals, with Six Flags Fiesta Texas, La Cantera Shopping Mall, the Riverwalk, the Alamodome minutes away; and only 12 miles to Seaworld!

It is recommended that you make your reservations directly with this host hotel for all the Preceptorship weekends at this time. Indicate your participation at the UTHSCSA Continuing Dental Education program, Preceptorship in Dental Implantology to receive the reduce rate of $85.00.

In order to insure you receive shuttle service you must make your reservation through the front desk and not online or through a third party service.

PRECEPTORSHIP IN DENTAL IMPLANTOLOGY
REFUND POLICY:
If you must cancel your registration, please notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that a refund may be considered. Due to commitments to this type of programs, any cancellation made before August 31, 2012 will be subject to an administrative fee assessment of $2,087.50 plus applicable nonrefundable deposits.

Any cancellation made after August 31, 2012 does not qualify for a refund. However, participants may choose to place their tuition minus an administrative, applicable nonrefundable deposits, and any direct cost fee assessment’s into a holding account for future use. "No Shows" will not qualify for refunds. Written notification is required within five business days by mail, fax, or e-mail to initiate the refund process. Please allow four to six weeks for all refunds.

ADA CERP®
Continuing Education Recognition Program
The University of Texas Health Science Center at San Antonio is an
ADA CERP Recognized Provider

http://smile.uthscsa.edu
**Mandibular Tissue Supported Implant-Retained Overdentures – A Satisfactory Solution**

**Peggy P. Alexander, DDS, MPH**

**FORMAT**
One day a month a speaker discusses a dental topic during lunch. The sessions are informal and the group has an opportunity to interact with the speaker during the short discussion period at the end of the lecture. It requires only about an hour and a half of your time to learn the latest developments in many areas of dentistry. It also offers the opportunity to become better acquainted with your colleagues and their staff since all dental allied personnel and technicians are also invited to attend.

**OVERVIEW**
An implant-retained mandibular overdenture is considered by many to be the gold standard for rehabilitation of the edentulous mandible. This course will describe aspects of treatment planning, surgical preparation and functional loading of the mandibular prosthesis featuring the Locator® retentive system.

**OBJECTIVES**
- To discuss the rationale for various implant options
- To develop an orderly approach to treatment planning
- To describe preparation techniques required for radiographic and surgical stents
- To clarify various approaches to surgical placement of the implant fixtures.
- To demonstrate installation and functional loading of the Locator® abutment.

**Presenter**
Peggy Alexander, D.D.S., M.P.H., received her D.D.S. degree from Meharry Medical College School of Dentistry in 1981. She also received a Certificate in Dental Hygiene from the University of Alabama at Birmingham in 1957. Dr. Alexander is currently Clinical Professor in the Department of Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio, Dental School. She also serves as a Research Associate the Department of Periodontics at the UT Health Science Center.

Prior to her appointment at The University of Texas Health Science Center at San Antonio, Dental School, she had served the National Health Services Corps, in the United States Uniformed Services and maintained a private practice in San Antonio. Dr. Alexander’s research interests include control of infection, cross contamination in the dental setting, parafunctional habits and their influence on the dentition, functional habits and their effect on the dentition, and etiology of dental erosion.

**Time**
Check-in & Lunch: D.S. Cafeteria, Private Dining Room, 11:30 AM
Program: Thursday, 12:00 PM-1:00 PM

**Location**
Dental School, Private Dining Room in the Cafeteria The University of Texas Health Science Center at San Antonio (back of Dental School and adjacent to Visitor Parking Lot.)

**Tuition**
Includes Luncheon and Lecture Individual: $49.50

**Credit** (Course Code: 150860A)
AGD Code: 670/671 Hours: 1

---

**Certification Course for Dentists**

**Fall Nitrous Oxide Conscious Sedation Hands-On Training Course**

**Ernest E. Valdez, D.D.S.**

**Overview**
The course will provide information to meet the Nitrous Oxide/oxygen inhalation conscious sedation. This is a required course for dentists on the rules and regulations for the Texas State Board of Dental Examiners to qualify for an sedation/anesthesia permit.

**OBJECTIVES**
At the end of the didactic and clinical sessions, the participant will be able to:
- Define conscious sedation and be aware of the benefits for the patient and dentist.
- Understand the psychophysiology of pain, anxiety, and sedation.
- Understand the physiology of respiration and of N2O-02 inhalation.
- Know the advantages, disadvantages, indications, and contraindications to the use of N2O in normal and medically compromised patients.
- Understand the techniques used to administer N2O and monitor patients while they receive it.
- Recognize the complications that may arise as a result of N2O administration, and understand the prevention, early detection, and treatment of these complications.
- Learn the health hazards associated with the use of N2O and accepted methods used to reduce exposure to an acceptable level in the dental office.
- Recognize special problems associated with the use of N2O in children and know the proper technique for administering it to them.
- Become familiar with nitrous oxide equipment, including tanks, regulators, manifolds and machines.
- Understand the guidelines for their installation and use as issued by the National Fire Protection Association and the American Dental Association.
- Recognize the similarities of N2O sedation and hypnosis, be familiar with the basic concepts of hypnosis and its usefulness as an adjunct to N2O sedation.
- Administer N2O-02 inhalation until the patient and the instructor agree all clinical aspects are clearly identified and satisfactorily accomplished.
- Receive N2O-02 and experience the effects of N2O sedation.

**Presenter**
Ernest V. Valdez, D.D.S., earned his DDS degree from The University of Texas Health Science Center at San Antonio in 1993. He is an Assistant Professor in the Department of Oral and Maxillofacial Surgery at The University of Texas Health Science Center at San Antonio, Dental School.

**Time**
Check-in: Saturday, five hours prior to kick-off
Game: Texas vs. West Virginia
Royal Texas-Memorial Stadium (kick-off time TBA)

**Location**
Joe C. Thompson Conference Center at The University of Texas at Austin
26th and Red River (next to LBJ Library)
Austin, Texas 78713
(800) 882-8784

**Tuition**
Individual with game ticket: $325.00
Individual without game ticket: $265.00
We have a limited number of parking passes.

**Credit** (Course Code: 152431A)
AGD Code: 690 Hours: 3

---

**Longhorn Football Dental Study Club**

**An Alternative Treatment Plan Using Small Diameter Implants**

**Norma Olvera, D.D.S., M.S.**

**OBJECTIVES**
Upon completion of the course, participants will understand:
- Immediate loading status post multiple extractions
- Immediate prosthesis wear post graft or implants
- Inadequate width of alveolar ridge
- Inadequate inter-dental space
- Atrophic / narrow posterior mandibular ridge (IAN issues)
- Orthodontic anchorage
- Medically compromised
- Financial challenges

**Presenter**
Norma Olvera, D.D.S., M.S., obtained her dental degree from The University of Texas Health Science Center at San Antonio in 1987. She completed her post-graduate training in prosthodontics and received her certification and Master of Science in prosthodontics. She is currently an assistant professor in the Department of Comprehensive Dentistry at the University of Texas Health Science Center at San Antonio. Dr. Olvera has been in full-time private practice as a prosthodontist in Houston, Texas for the past 20 years. She has extensive experience in the area of oral rehabilitation involving all facets of reconstructive dentistry with and without dental implants.

**Time**
Check-in: Saturday, five hours prior to kick-off
Game: Texas vs. West Virginia
Royal Texas-Memorial Stadium (kick-off time TBA)

**Location**
Joe C. Thompson Conference Center at The University of Texas at Austin
26th and Red River (next to LBJ Library)
Austin, Texas 78713
(800) 882-8784

**Tuition**
Individual with game ticket: $325.00
Individual without game ticket: $265.00
We have a limited number of parking passes.

**Credit** (Course Code: 152431A)
AGD Code: 690 Hours: 3

---

**Special Fee Information**
Additional game tickets can be purchased at $95.00 each. Pre-game meals can be purchased for guests at $15.00 per person. We have a limited number of parking passes that are on a first come first serve basis. Please register early.

The Dental School thanks Procter and Gamble Professional Oral Health, and DenMat® Caudle for their educational grants in support of this continuing education series.

**CPR Certification**
Participants must complete our on-line didactic portion of Nitrous Oxide Conscious Sedation as a prerequisite to attending this clinical session at an additional fee of $247.50. (The course can be found at http://smile.uthscsa.edu) Visit our website and click on Interactive Web Courses. Participants must also bring a copy of their CPR certification on the day of the course.

This course will not certify allied dental personnel.
Lecture Course
Have You Been Sued Yet? New Challenges in Risk Management and Record Keeping
ROBERT M. ANDERTON, D.D.S., JD, LLM
JAMES W. ORR, D.D.S.

OVERVIEW
This course will include an in-depth discussion of actual lawsuit cases. This NEW course is approved by the Texas State Board of Dental Examiners for technical and/or scientific course credits and can be used toward relicensure.

OBJECTIVES
At the conclusion of the course, participants will learn:
• Jurisprudence and ethics review
• Types of lawsuits affecting the practice of dentistry
• Potential sources of all dental lawsuits
• What are the odds of being sued, and are they increasing
• New challenges increasing the risk of being sued entered
• What to do if you are sued
• Texas State Board disciplinary actions
• What to do if you are charged with rule violations
• Keeping dental records that meet TSBDE requirements and provide malpractice defense
• What the future holds

PRESENTERS
ROBERT M. ANDERTON, D.D.S., JD, LLM, received dental degree from Baylor College of Dentistry in 1961 and JD degree from Southern Methodist University School of Law. He is a fellow of the AGD, ACLA, ICD, and ACID.

JAMES W. ORR, D.D.S., obtained his dental degree from The University of Texas Health Science Center at Houston. He served on the Texas State Board of Dental Examiners, the Texas State Board of Radiation Control, and as Director of the Texas Medicaid Program.

TIME
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Friday, 9:00 AM–5:00 PM

LOCATION
The University of Texas Health Science Center at San Antonio, Dental School

TUITION
Dentist: $210.00
Dentist: $210.00 - 20% = $168.00
Dentist: $210.00 - 15% = $179.00
Allied Dental Personnel: $125.00
Allied Dental Personnel: $125.00 - 20% = $100.00
Allied Dental Personnel: $125.00 - 15% = $106.00

OCTOBER 13

Lecture Course
Diagnosis and Restoration of the Worn Dentition
PAUL A. HANSEN, D.D.S.

OVERVIEW
This program will concentrate on the nuts and bolts of the full mouth rehabilitation. Where do we begin? How do we develop the treatment plan? What will be our clinical objectives? What materials should we use to return our patients to proper form and function? This program is clinically oriented using cases Dr. Hansen has completed over the years.

This program will begin with a brief overview of occlusion and how it relates to the full mouth rehabilitation. We will discuss where to begin and how to develop the case. Keeping the case temporized and functional during the construction phase is important. We will review how to articulate the large case, and how to keep it simple. We will review anterior guidance and how to develop it in a clinical situation.

This is a very clinically oriented program concentrating on completed cases, how to restore difficult occlusal problems, how to develop anterior guidance and transfer this information to the articulator and the laboratory.

OBJECTIVES
- How to make interocclusal records for the large case
- Know where to restore the patient, centric relation vs. maximum intercuspation.
- How to develop the treatment plan
- Basics of how to observe the occlusion.
- How to recognize occlusal problems?
- How do we develop the interocclusal relationships?
- How can we provisionalize the patient for a predictable final result?
- Can we change the VDO safely?
- What materials should we use for our rehabilitations?
- How do we incorporate implants into our restorations?
- What to look for in recalls and how to keep the rehabilitation going for years to come.

PRESENTER
PAUL A. HANSEN, D.D.S., obtained his dental degree from the University of Nebraska Medical Center College of Dentistry in 1975. Dr. Hansen started a one-year Prosthodontic residency at the University of Texas Health Science Center in San Antonio, Texas (UTHSCSA) and a two-year Prosthodontic residency at Wilford Hall Medical Center. Currently he is the Prosthodontic Section Director, Department of Adult Restorative Dentistry, University of Nebraska Medical Center College of Dentistry. He also maintains a private practice in Lincoln, Nebraska.

TIME
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Saturday, 9:00 AM - 5:00 PM

LOCATION
The University of Texas Health Science Center at San Antonio, Dental School

TUITION
- Dentist: $240.00
- Dentist: $240.00 - 20% = $192.00
- Dentist: $240.00 - 15% = $204.00

CREDIT
- AGD Code: 180
- Hours: 7

OCTOBER 13

Lecture/Participation Course
Contemporary Trends in Pediatric Dentistry
STEVEN P. HACKMYER, D.D.S.

OVERVIEW
Treatment of the pediatric patient is involves more than approaching them as miniature adults. This course is divided into two parts: lecture and hands on. The hands on portion will cover a number of topics that are associated with every day comprehensive treatment of the pediatric patient.

The topics this course will cover are: Primary Pulpal Therapy, Behavior management, prevention, the dental home, anticipatory guidance, fluoride, sealants, diet, nutrition, caries risk assessment and management of dental trauma to both the primary and permanent dentition will be discussed. The new current standards of dental trauma addressing, classification, diagnosis and treatment modalities will be discussed. As part of the entire presentation, examples of various types of the treatment and treatment planning will be utilized as part of the different topics covered. The hands on part will cover current pediatric restorations for primary teeth. Integral in this will be a focus on esthetic anterior and posterior restorations.

OBJECTIVES
- Review current basics of essential areas of clinical everyday pediatric dentistry.
- Provide the participant with a better understanding to enable them to provide quality comprehensive care for their pediatric patients.
- An update of current concepts and procedures that can be utilized as part of their everyday pediatric patient care.

PRESENTER
STEVEN P. HACKMYER, D.D.S., earned his dental degree from New York University College of Dentistry. He completed a residency in Pedodontics at Brookdale Hospital University Medical Center in Brooklyn, New York. Prior to joining the UTHSCSA, Dr. Hackmyer was faculty for the Interim Pediatric Dentistry Program Director at the Dental Branch at University of Texas Health Science Center Houston. He is currently, Associate Clinical Professor for the Department of Developmental Dentistry, University of Texas Health Science Center San Antonio.

TIME
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Saturday, 9:00 AM-5:00 PM

LOCATION
The University of Texas Health Science Center at San Antonio, Dental School

TUITION
- Dentist: $210.00
- Dentist: $210.00 - 20% = $168.00
- Dentist: $210.00 - 15% = $179.00
- Allied Dental Personnel: $170.00
- Allied Dental Personnel: $170.00 - 20% = $136.00
- Allied Dental Personnel: $170.00 - 15% = $145.00

CREDIT (Course Code: 152436A)
- AGD Code: 430
- Hours: 7

OCTOBER 13

Lecture Course
Update on Common Medical Conditions and Lesions Encountered in the Contemporary Dental Practice
MICHAEL A. HUBER, D.D.S.

OVERVIEW
Demographic trends clearly demonstrate that as the average life-expectancy continues to grow in America, so does the burden of chronic illness. Thus, the contemporary dental practitioner is encountering an ever-increasing number of patients with a multitude of medical conditions and associated oral lesions which affect both the patient’s oral health and management. In addition, many dental patients see their dentist more regularly and frequently than they do their primary medical manager. Places the dental practitioner in the unique position of often being the first to observe the signs and symptoms of a serious systemic condition. This course will provide a review of some of the common medical conditions and associated oral lesions the dental practitioner is likely to encounter in his or her practice. In addition, the historical and clinical clues of commonly encountered undiagnosed systemic conditions will be provided.

OBJECTIVES
This course is intended to improve the practitioner’s ability to obtain and interpret the medical history and correlate these findings with the clinical examination to:
- Establish an appropriate diagnosis
- Plan appropriate treatment modifications to safely manage the medically compromised patient

Specific topics discussed will include, but not be limited to:
- Allergic reactions
- Autoimmune disorders
- Candidiasis
- Cardiovascular disease
- Dermatologic disease
- Dry mouth
- Hepatitis
- HIV/AIDS
- Indications for antimicrobial prophylaxis
- Oral cancer
- Sexually transmitted diseases

PRESENTER
MICHAEL A. HUBER, D.D.S., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He continued with postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1988. Upon his retirement from the United States Navy in 2002, Dr. Huber joined the faculty as an Assistant Professor in the Division of Oral Medicine, Department of Dental Diagnostic Science at The University of Texas Health Science Center at San Antonio, Dental School.

TIME
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Saturday, 9:00 AM-5:00 PM

**OCTOBER 26**

Texas Brief AM

Lecture Course

**A Spanish Class for the Dental Office**

**Vamos al Dentista**

(Let’s Go to the Dentist)

**Part I: Introduction to Spanish**

MYLENE MACKEY, M.S., B.S.

**OVERVIEW**

Although there are many excellent Spanish books and courses available, this course is designed specifically for members of the dental team. A brief, but intensive introduction for beginners on the everyday application of basic Spanish grammar, pronunciation, and vocabulary will be presented. In addition, Mrs. Mackey will review simple phrases, which can be commonly used by the dental team. The material will be based upon the text, Vamos al Dentista, designed to be used in a dental office.

**OBJECTIVES**

- A beginner’s course of the Spanish language for members of the dental team. This course is a prerequisite for Part II.

**PRESENTER**

MYLENE MACKEY, M.S., B.S., received her Masters degree in mental health counseling from St. Mary’s University, previously earning her Bachelors in theater and psychology form Texas A&M. Mrs. Mackey currently works as a Licensed Practicing Counselor.

She has taught Spanish for many years including offering private lessons to businesses and individuals. Mrs. Mackey enjoys translating documents, traveling to Mexico, yoga, reading and drawing.

**TIME**

Check-in & Breakfast: D.S. Cafeteria, 8:00 AM

Program: Friday, 9:00 AM–12:00 PM

**LOCATION**

The University of Texas Health Science Center at San Antonio, Dental School

**TUITION**

Includes text, Vamos al Dentista

Individual: $125.00

**CREDIT** (Course Code: 152439A)

AGD Code: 770  Hours: 4

---

**SPECIAL FEE OFFER**

Register for the morning program and receive a 30% discount on the afternoon Texas Brief. Lunch is included for the participants attending both sessions.

---

On sale now! Get them while they last.

**Vamos al Dentista**

(Let’s Go to the Dentist)

English to Spanish Translations of commonly used terms and phrases in the dental office

- Birgit Junfin Glass, DDS, MS, Ivan Rodriguez, DMD
- Norma Partida, DDS, & Daniel G Arredondo, DDS

For those on the dental team who wish to communicate with their Spanish speaking patients, this pocket size, spiral bound book can now be purchased. All authors are from The University of Texas Health Science Center at San Antonio.

The books are $17.00 each (shipping is included up to 10 books). Any order after 10 books will receive a 25% discount plus shipping cost.

Please contact Continuing Dental Education for questions on discount.

For questions or to order by phone, please call the Office of Continuing Dental Education at The University of Texas Health Science Center at San Antonio, (210) 567-3177.

Texas Brief PM

Lecture Course

**A Spanish Class for the Dental Office**

**Vamos al Dentista**

(Let’s Go to the Dentist)

**Part II: Dental Terminology**

MYLENE MACKEY, M.S., B.S.

**OVERVIEW**

This course is designed for members of the dental team with some knowledge of the Spanish language and wish to meet the even greater need for its usage. Part II concentrates on dental terminology. Mrs. Mackey will review common vocabulary and standard phrases related to a dental practice. The material will be based upon the text, Vamos al Dentista, designed to be used in a dental office.

**OBJECTIVES**

- This course will be a comprehensive review of the Spanish language most commonly used in the dental office. The participants should already be somewhat familiar with the language.

**PRESENTER**

MYLENE MACKEY, M.S., B.S., received her Masters degree in mental health counseling from St. Mary’s University, previously earning her Bachelors in theater and psychology form Texas A&M. Mrs. Mackey currently works as a Licensed Practicing Counselor.

She has taught Spanish for many years including offering private lessons to businesses and individuals. Mrs. Mackey enjoys translating documents, traveling to Mexico, yoga, reading and drawing.

Lecture Course
Dental Sleep Medicine: Snoring and Obstructive Sleep Apnea
What Every Dentist Should Know About this Life Threatening Medical Disorder

RICHARD B. DRAKE, D.D.S.

OVERVIEW
Are you sick and tired of being sick and tired? Fatigue is the number one complaint heard by health professionals across the globe. Fifty to seventy million Americans suffer from sleep related problem. Sleep related breathing disorders, such as snoring and obstructive sleep apnea, are at the top of this list. Less than 10% of these patients have been diagnosed. As dentists, we are in a prime position to be the first to recognize this disorder and to help steer patients in the right direction to get diagnosed. We also have the ability to treat many of these patients ourselves, thus improving their quality of life as well as possibly saving their life.

OBJECTIVES
Background:
• Understand normal breathing and airway anatomy and the problems and variants that lead to snoring and obstructive sleep apnea.
• Learn the health risks associated with sleep disordered breathing.
• Learn the basics of sleep Signs and Symptoms:
• Learn the effects of sub-optimal sleep on health and quality of life.
• Recognize those symptoms and behaviors that may indicate sleep disordered breathing.

Diagnosing:
• Understand current and proposed diagnostic methods and the role of dentists in the team approach.

Treatment:
• Review the current treatment modalities for snoring and for mild, moderate and severe OSA.
• Explore the role that dentists can play in the management of sleep disordered breathing.

Follow Up:
• Understand the side effects of oral appliance therapy and how to manage them.

PRESENTER
RICHARD B. DRAKE, D.D.S., received his D.D.S. degree from The University of Texas Health Science Center at San Antonio, Dental School in 1989. He maintained a private practice in general dentistry from 1990 to 2001 and currently serves as Clinical Assistant Professor of the Department of Dental Diagnostic Science at The University of Texas Health Science Center at San Antonio. He isa founder of Dental Sleep Medicine Associates of San Antonio, a private practice devoted solely to the treatment of snoring and sleep apnea. Dr. Drake is also a member of the University’s Center for Dental Sleep Medicine. Dr. Drake is a Diplomate of the American Board of Dental Sleep Medicine. He serves on the Board of Directors with the American Academy of Dental Sleep Medicine, as well as chairing the Reimbursement Committee.

TSDBE-Approved Course for Certification
Coronal Polishing for the Dental Assistant
LYNN A. SMILEY R.D.H., B.A.

OVERVIEW
This program offers 8 hours of clinical and didactic education required by the Texas State Board of Dental Examiners for certification in coronal polishing. This course will include: Oral Anatomy; Tooth morphology; Indications, contraindications and complications for coronal polishing; Infection control procedures; and Jurisprudence relating to coronal polishing. The laboratory and clinical activity will include training in using a slow-speed handpiece; principles of coronal polishing; armamentarium; operator & patient positioning, polishing technique, polishing agents; and polishing coronal surfaces of teeth. This course is offered through the Department of Dental Hygiene at The University of Texas Health Science Center at San Antonio in collaboration with San Antonio College Dental Assisting Program and is a TSDBE APPROVED & ACCREDITED COURSE. In order to obtain your certification the State also requires at least 2 yrs as a dental assistant.

OBJECTIVES
• State the effect polishing has on the patient, environment, teeth and gingival tissues.
• Identify indications for polishing the teeth.
• Discuss contraindications for polishing the teeth.
• Distinguish between abrasion, abrasive and polishing.
• Identify the characteristics of abrasive particles.
• Determine how particle size, shape, speed, and pressure affect abrasiveness.
• Recognize different abrasive agents.
• Describe the constituents of a commercial polishing agent utilized by dentists, dental professionals.
• Demonstrate use of a slow speed hand piece and prophylaxis angle on a partner in clinic.
• Define cumulative trauma disorders and explain how the dental assistant might prevent such injuries.
• Given a description of a seated operator and/or a reclined patient, determine if the situation serves the clinician’s best interest ergonomically.
• Outline the anatomy of the carpal tunnel and explain how compression of the median nerve occurs.
• List the symptoms of carpal tunnel syndrome.
• List the areas of the work site to be evaluated for potential carpal tunnel syndrome risk.
• Define disclosing.
• Explain the different ways that disclosing dental plaque can assist the dental assistant in patient education and motivation.

b. List the properties of an acceptable disclosing agent.
• Describe the various formulas of disclosing agents.

PRESENTER
LYNN A. SMILEY, RDH, BA, is a clinical instructor in the Department of Dental Hygiene at the University of Texas Health Science Center at San Antonio. She has 25 years of experience as a dental hygienist. She is currently course director for Introduction to Clinical Theory, PreClinical Dental Hygiene, Clinic I and Clinic I Seminar. As the Junior Year Clinic Coordinator, Ms. Smiley is responsible for the clinical experience of students in their first semester of patient care.

Lecture Course for the General Dentist and the Dental Team

Oral Surgery for the General Dentist

GREGORY K. SPACKMAN, D.D.S., M.B.A.

OVERVIEW
This course will review a variety of topics pertinent to outpatient oral surgery which are relevant to the dentist and the dental team. Dr. Spackman will discuss topics on patient evaluation, record keeping, and risk management in addition to the various aspects of surgical techniques and procedures.

OBJECTIVES
The participant will learn about:
- Patient evaluation
- Record keeping
- Risk management
- Local anesthesia
- Armament
- Preoperative evaluation for extractions
- Flap design
- Routine and difficult extractions
- Third molar evaluation and surgery
- Biopsy technique
- Minor preprosthetic surgery
- Complications
- Emergencies

PRESENTERS
GREGORY K. SPACKMAN, D.D.S., M.B.A., received his dental degree from the University of Nebraska College of Dentistry in 1977, subsequently continuing his training in Oral and Maxillofacial Surgery at the Mayo Graduate School of Medicine at the Mayo Clinic where he was awarded a Certificate in 1980. Dr. Spackman earned his MBA degree from Washington University in 1987. He is currently an Associate Professor in the Department of Oral and Maxillofacial Surgery at the University of Texas Health Science Center at San Antonio, Dental School.

Dr. Spackman serves as the Predoctoral Director in the Department of Oral and Maxillofacial Surgery at the Dental School. He is also active in the Clinical Faculty Practice and serves on the Faculty Practice Advisory Board.

Luncheons for Learning

Are Your Intra-Oral Digital X-Rays Disappointing You?

PETER K. MAH BSc, BSc PHARM, DMD, M.S.

FORMAT
One day a month a speaker discusses a dental topic during lunch. The sessions are informal and the group has an opportunity to interact with the speaker during a short discussion period at the end of the lecture. It requires only about one and one-half hour of your time to learn the latest developments in many areas of dentistry. It also offers the opportunity to become better acquainted with your colleagues and their staff since all dental allied personnel and technicians are also invited to attend.

OVERVIEW
To create, improve and maintain high quality intra-oral digital radiographs.

OBJECTIVES
- Understand quality assurance requirements as it applies to intra-oral digital radiographs.
- Develop or modify radiographic techniques to ensure compliance with Federal and State mandated requirements for quality assurance.
- Understand and apply methods to optimize image quality and minimize radiation dose in conjunction with ALARA (As Low As Reasonably Possible).
- Understand how to tailor a specific quality assurance program suitable for your dental office's imaging system, software, and x-ray sources using the Digital Dental Quality Assurance Phantom.

PRESENTERS
PETER MAH B SC, B SC PHARM, DMD, MS, graduated from the University of Manitoba in 1995 and practiced general dentistry for 10 years before returning to graduate school. In July 2005 he entered the Oral and Maxillofacial Radiology program at The University of Texas Health Science Center at San Antonio and graduated with both a Certificate in the specialty of Oral and Maxillofacial Radiology and a Masters Degree from the Graduate School of Biomedical Sciences in May 2008. In his masters project, he developed a method to derive radiographic images with a computer program and continues to work with others to implement this technique into clinical use. Additionally, he has worked as a consultant to industry and healthcare organizations.

Currently, he is employed as Senior Research Associate at The University of Texas Health Science Center at San Antonio in the Research Imaging Lab where he continues in many facets of dental radiology research. He will give you a presentation on a quality control device which he and his research partners developed in the research lab to monitor and evaluate the performance of digital intra-oral sensors. This product is licensed from the University of Texas. Dr. Peter Mah is a licensed practising dentist in both Canada and the United States.

TIME
Check-in & Lunch: D.S. Cafeteria, 11:30 AM
Program: Thursday, 12:00 PM-1:00 PM

LOCATION
Dental School, Private Dining Room in the Cafeteria The University of Texas Health Science Center at San Antonio (back of Dental School and adjacent to Visitor Parking Lot)

TUITION
Includes Luncheon and Lecture
Individual: $49.50

CREDIT (Course Code: 150861A)
AGD Code: 165 Hours: 1

THE DENTIST’S PLEDGE

I, as a member of the dental profession, shall keep this pledge and these stipulations.

I understand and accept that my primary responsibility is to my patients, and I shall dedicate myself to render, to the best of my ability, the highest standard of oral health care and to maintain a relationship of respect and confidence. Therefore, let all come to me safe in the knowledge that their total health and well-being are my first considerations.

I shall accept the responsibility that, as a professional, my competence rests on continuing the attainment of knowledge and skill in the arts and sciences of dentistry.

I acknowledge my obligation to support and sustain the honor and integrity of the profession and to conduct myself in all endeavors such that I shall merit the respect of my patients, colleagues and my community. I further commit myself to the betterment of my community for the benefit of all of society.

I shall faithfully observe the Principles of Ethics and Code of Professional Conduct set forth by the profession.

All this I pledge with pride in my commitment to the profession and the public it serves.

Author Unknown
Successful management of the oral cancer patient requires a multidiscipline effort, in which the dental professional plays a critical role. An estimated 29,000 new cases of oral and pharyngeal will be diagnosed this year, many as a consequence of an oral screening provided by a dentist. Research over the past decade has produced several advances improving the profession’s ability to diagnose, treat, and manage the short and long-term consequences of oral cancer. Ultimately, however, successful cancer therapy often incurs life-long impairments, which may adversely affect the patient’s quality of life. As many of the impairments directly affect the oral cavity, the dentist will be frequently called upon to manage many of these impairments such as mucositis, xerostomia, increased caries, and disfigurement. This course will provide a review of the most contemporary approaches to manage the oral cancer patient, from diagnosis to management.

OBJECTIVES

- The participants will learn about:
  - Epidemiologic overview
  - Cancer prevention
  - Diagnostic/Screening modalities
  - Contemporary treatment strategies
  - During-treatment care
  - After-treatment care

PRESENTER

MICHAEL A. HUBER, D.D.S., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He continued with postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1988. Upon his retirement from the United States Navy in 2002, he joined the faculty in the Department of Dental Diagnostic Science at The University of Texas Health Science Center at San Antonio, Dental School. Dr. Huber is the Head of the Division of Oral Medicine.

TIME

Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Friday, 9:00 AM - 5:00 PM

LOCATION

The University of Texas Health Science Center at San Antonio, Dental School

TUITION

- Dentist: $210.00
- Dentist: $210.00 - 20% = $168.00
- Dentist: $210.00 - 15% = $179.00
- Allied Dental Personnel: $170.00
- Allied Dental Personnel: $170.00 - 20% = $136.00
- Allied Dental Personnel: $170.00 - 15% = $145.00

TWO STEP SAVINGS

Register before September 2, 2012 to receive a 20% discount. Register before October 4, 2012 to receive a 15% discount.

The Dental School thanks Access Medical USA for its educational grants in support of this continuing education series.

The Texas State Board of Dental Examiners (TSBDE) requires level 2 and level 3 sedation permit holders to complete approved continuing education every 2 years to maintain the sedation permit. This must take the form of ACLS, PALS or an approved sedation review course. Individuals who complete the entire course will receive a certificate that can be submitted to the TSBDE to document completion of the approved moderate sedation review course. Level 2 and 3 permit holders must also complete every 2 years an additional 8 hours of medical emergency or sedation related CE separate from the ACLS, PALS or this "approved" course.

OBJECTIVES

- Review the Texas rules and regulations regarding the administration of moderate enteral and moderate parenteral sedation.
- Update the dentist on patient evaluation for the administration of moderate sedation.
- Update the dentist on monitoring techniques for moderate sedation.
- Update the dentist on pharmacology relating to moderate sedation.
- Update the dentist on the management of sedation emergencies and common medical emergencies.
- Review basic EKG interpretation.
- Review airway management techniques useful in the administration of moderate sedation.
- Review risk management in moderate conscious sedation.

PRESENTER

ERNEST B. LUCE, D.D.S., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. In June of 1986, he completed a one year General Practice Residency at The University of Texas Health Science Center at San Antonio. Upon completion of the residency, Dr. Luce joined the Department of Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio. Currently, he is a Clinical Associate Professor at the Health Science Center, and he also maintains a part time private practice in general dentistry in San Antonio.

His teaching duties include didactic presentations as well as clinical supervision of graduate general dentistry residents. Dr. Luce served as Head of the Graduate Division of the Department of General Dentistry and Program Director for the General Practice Residency at The University of Texas Health Science Center at San Antonio from 1993 to 1999. He also served as the Department Chairman for the Department of Hospital Dentistry, University Hospital, in San Antonio during that same time period.

TIME

Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Friday, 9:00 AM - 5:00 PM

TUITION

- Dentist: $470.00
- Dentist: $470.00 - 15% = $400.50

CREDIT (Course Code: 152450A)
AGD Code: 132 Hours: 14

Dental trauma is part of the General and Pediatric Dentistry practice. Current research has led to a better understanding of the healing mechanisms that translate into better clinical protocols for the management of trauma. The course will start with an introduction to trauma and the evaluation of the patient with trauma. Then, a review of the classification, diagnosis and treatment of traumatic lesions is presented. Finally, several clinical cases will be presented and discussed.

A review of the current guidelines (from the American Academy of Endodontics, the International Association of Dental Traumatology and the American Academy of Pediatric Dentistry) for the management of dental trauma in the primary and permanent dentition will be presented. Easy-to-use decision analysis and protocols for the emergency treatment as well as follow-up and referral needs will also be discussed.

OBJECTIVES

Present a systematic way of gathering trauma history. Review the classification of traumatic dental injuries. Discuss the diagnosis, emergency treatment and follow-up in primary tooth trauma according to type of injury. Discuss the diagnosis, emergency treatment and follow-up in permanent tooth trauma according to type of injury. Present current clinical cases of primary and permanent tooth trauma.

PRESENTER

LINA M. CARDENAS, D.D.S., M.S., Ph.D., received her dental degree at the Institute of Health Sciences, CES. She obtained her PhD in Dental Science (combined with Pediatric Dentistry) from Nagasaki University, Japan, where she was a recipient of a scholarship from the Japanese Ministry of Education. She also received a Master of Science at the University of North Carolina at Chapel Hill in a combined program with Pediatric Dentistry. She participated in the core course of the prestigious Robert Wood Johnson Clinical Scholar Program in Clinical Research and Epidemiology at the University of North Carolina. Currently she is Chair, Department of Pediatric Dentistry and Community Oral Health at The University of Tennessee Health Science Center.

NOVEMBER 9  
Lecture Course  
Esthetic and Functional Considerations in Implant Dentistry  
ALFONSO MONARRES, D.D.S., M.S.  

OVERVIEW  
The high success of dental implants has influenced our contemporary treatment plan philosophy regarding the restoration of the severely compromised dentition and the replacement of missing teeth.  

The demands of our population, the advances in implant surfaces, designs, and the recent introduction of 3D Imaging and CAD/CAM technology have helped to improve our current surgical and restorative protocols by providing high predictability, shortening treatment time, and facilitating the fabrication of implant prostheses.  

Predictable function with aesthetic results are key elements for success with dental implant therapy. This course will present the basic concepts and guidelines that help make the placement and restoration of implants a predictable treatment option that offers both esthetics and function to our patients.  

OBJECTIVES  
• Understand the importance of diagnosis, treatment planning and treatment sequencing in implant dentistry.  
• Use of contemporary diagnostic tools and 3D Imaging.  
• Implant prostheses for the partially edentulous patient.  
• Basic concepts for the ideal implant placement and restoration in the esthetic zone.  
• Guidelines and techniques for immediate placement, immediate provisionalization and immediate loading of dental implants.  
• Implant prostheses for the edentulous patient  
• CAD/CAM technology for dental implant restorations.  
• Occlusal considerations in implant Prosthodontics  

PRESENTER  
ALFONSO MONARRES, D.D.S., M.S., received his DDS degree from The UAC in Torreon, Mexico. He then completed a three-year post-doctoral program in Prosthodontics, a one year Fellowship in Implant Dentistry and earned his Master of Science degree in Biomaterials at the School of Dental Medicine of the State University of New York at Buffalo (UB).  

Dr. Monarres was a Clinical Instructor in Fixed and Removable Prosthodontics at UB School of Dental Medicine. He is a Clinical Associate Professor of the department of Prosthodontics at The University of Texas Health Science Center at San Antonio, Dental School and maintains a private practice limited to Implant, Esthetic and Prosthetic Dentistry.

NOVEMBER 10  
Longhorn Football Dental Study Club  
Rediscovering Removable Prosthodontics  
STEPHAN J. HANEY, D.D.S.  

OVERVIEW  
With the advent of dental implants for support, prosthodontic treatment plans are creating a resurgence of interest in removable treatment alternatives. Often implant supported removable options are the most esthetic and cost effective methods of care to meet the patient's needs. This course is designed to explore why conventional removable prosthetic care remains unpopular and why implant supported removable options can be so valuable.  

OBJECTIVES  
At the end of this program, participants should be able to:  
• Recognize patient anatomy that challenges conventional removable treatment.  
• Use basic removable prosthodontic principles to locate ideal anterior tooth positions.  
• Recognize when removable options may be more ideal than fixed replacement of missing teeth.  
• Understand the role of implants in facilitating removable prosthodontics.  
• Envision the risks engendered by fixed implant prostheses for age debilitated patient.  
• Anticipate aesthetic concerns with the tissue-prosthesis interface.  
• Recommend removable treatment options with a smile and genuine optimism.  

PRESENTER  
Stephan J. Haney, D.D.S., earned his dental degree in 1974 from Baylor College of Dentistry in Dallas. With Air Force sponsorship he obtained specialty certification in Prosthodontics from The University of Southern California in 1979. He taught in Air Force AEGD residencies for 15 years until his retirement in 1998 when he entered private practice in Fort Worth, TX. Assuming a full time teaching position at UTHSCSA in 2007, he transitioned to Director of the Postdoctoral Prosthodontics Program in 2011.

Lasers In Hygiene  
The Future is Now  
JANET A. PRESS R.D.H.  

OVERVIEW  
Take the voyage of discovery through diode laser techniques in this dynamic workshop. This program will explore the fundamentals of Laser science and discuss the value and benefit of Laser technological advancements in patient health and wellness. Learn the Hygiene approach to laser assisted bacterial reduction in periodontal therapy.  

OBJECTIVES  
• Learn the correlation between emerging science and Laser technology when combating the periodontal infections.  
• Discover new Laser applications that optimize clinical results and patient treatment acceptance.  
• Expand your practice model of available treatment as we explore the vast potential of Laser incorporation when used adjunctively with scaling and root planning.  

PRESENTER  
JANET A. PRESS R.D.H., Fellow of the Academy of Laser Dentistry, is a Dental Hygienist in general and specialty practice for 36 years, with 16 years clinical experience in soft tissue lasers. Ms. Press holds the Academy of Laser Dentistry Standard Proficiency in both Diode and Nd:Yag lasers and has been a member of the ALD Regulatory Affairs, Scientific Sessions, and Auxiliary Committees. An international speaker, Ms. Press holds the honor of being named a “Distinguished Dental Professional”. Currently, she has an in-office education/clinical coaching programs specific to team development, communication and the laser, peri, and aesthetic practice model in Las Vegas, NV.  

TIME  
Check-in & Breakfast: D.S. Cafeteria, 7:00 AM  
Program: Friday, 8:00 AM-5:00 PM  

LOCATION

SPECIAL FEE INFORMATION  
Additional game tickets can be purchased at $70.00 each. Pre-game meals can be purchased for guests at $15.00 per person. We have a limited number of parking passes that are on a first come first serve basis. Please register early.  

The Dental School thanks Ivoclar Vivadent for its educational grants in support of this continuing education series.
Please join us as we celebrate our 29th Annual James P. Hollers Memorial Lectureship

Lecture Course
“Global Diagnosis” - A New Vision of Dental Diagnosis and Treatment Planning
J. William Robbins, D.D.S., M.A.
November 16, 2012

OVERVIEW
With the increased emphasis on interdisciplinary treatment in recent years, the deficiencies associated with traditional methods of diagnosis and treatment planning have become more evident and problematic. Historically, the treatment plan was primarily dictated by information provided by study casts which were mounted on a sophisticated articulator in centric relation. At that time in history, the primary tools available for treating the complex restorative patient were functional crown lengthening surgery and increasing the vertical dimension of occlusion. The treatment plan was simply based on restorative space, anterior tooth coupling and resistance and retention form of the final preparations, with no focus on placing the teeth in the correct position in the face. Practitioners did not have access to advanced periodontal, orthodontic and orthognathic surgical tools that are currently available. With the advent of comprehensive dental care, and treatment planning is no longer adequately serving our profession. It is the purpose of this course to provide a systematic approach to diagnosis and treatment planning with a common language that may be used by the orthodontist, periodontist, and oral and maxillofacial surgeon, as well as the restorative dentist.

- Global Diagnosis
- Communication with specialists
- Principles of Esthetics
- A systematic approach to facial, esthetic, and functional diagnoses
- Global Diagnoses
  - Diagnoses
    - Short or Hyperactive Maxillary Lip
    - Altered Passive Eruption
    - Dentofacial Extrusion
    - Skeletal Deficiency
    - Combination

OBJECTIVES
Upon completion of this course the participant will be able to:
- Describe 4 Global Diagnoses
- Describe the “5 CORE Questions” with their corresponding treatment options
- Complete a Global diagnosis form which will lead to a comprehensive diagnosis
- Communicate with interdisciplinary team

PRESENTERS
J. WILLIAM ROBBINS, D.D.S., M.A., graduated from the University of Tennessee Dental School in 1973. Dr. Robbins maintains a full-time private practice and is Clinical Professor in the Department of Comprehensive Dental Care at the University of Texas Health Science Center at San Antonio Dental School. He completed a rotating internship at the Veterans Administration Hospital in Leavenworth, Kansas and a 2-year General Practice Residency at the V.A. Hospital in San Diego, California. Dr. Robbins has published over 80 articles, abstracts, and chapters on a wide range of dental subjects and has lectured in the United States, Canada, Mexico, South America, Europe, Middle East and Africa. He coauthored a textbook, Fundamentals of Operative Dentistry – A Contemporary Approach, which is published by Quintessence, and is in its 3rd edition. He has won several awards including the Presidential Teaching Award at the University Of Texas Health Science Center, the 2002 Texas Dentist of the Year Award, and the 2003 Honorary Thaddeus V. Weclaw Fellowship Award from the Academy of General Dentistry, and the 2010 Saul Schluger Award given by the Seattle Study Club. He is a diplomat of the Federal Services Board of General Dentistry and the American Board of General Dentistry and is a past president of the American Board of General Dentistry. He is a member of several organizations including the American College of Dentists, the International College of Dentists, the American Dental Association, the American Academy of Restorative Dentistry, the Southwest Academy of Restorative Dentistry, the Academy of General Dentistry, and the Academy of Operative Dentistry.

AGD Code: 310
Hours: 7

As we honor Dr. James P. Hollers at the 29th Annual Lectureship, we commemorate his memory as a Texan with vision, numerous civic and military achievements, and as a dentist of national stature, having held the post of President of the American Dental Association. In celebrating his memory, we have invited another prominent lecturer, Dr. J. William Robbins, to present pertinent clinical and relevant information at the 29th Annual Hollers Lectureship.

One of the turning point events in the long history of San Antonio took place on June 5, 1969 in front of the Alamó under the blazing South Texas sun. Preston Smith, Governor of Texas, signed the legislative bill that authorized the construction of the Dental School in San Antonio as well as the Nursing School and The University of Texas at San Antonio. Proudly looking on, just over Governor Smith’s shoulder, was Dr. Jim Hollers, who on that day saw his twenty year campaign to bring not only a Dental School, but also an entire Medical Center Complex to San Antonio, transformed from dream to reality.

Without a doubt, the history of Medical Education in South Texas and what we now know as the South Texas Medical Center is intertwined with the history of Dr. Jim Hollers. If it’s true that every great enterprise requires the right person, in the right place, at the right time… then Dr. Jim Hollers was the right person, in the right place, at the right time for San Antonio.

All the hard work paid off. When the 1969 Texas Legislature met in January, there was little doubt that San Antonio would emerge with a Dental School. And the third piece of Dr. Hollers’ dream fell into place just a few months later in the Alamó Plaza as he stood behind Preston Smith, watching the Governor sign the authorization.

Planning for the Dental School moved ahead quickly, assisted in no small measure by the availability of millions of dollars of construction funds from the Department of Health Education and Welfare who agreed to pay two-thirds of the costs of the new building. The original plan was to enroll 400 students the first year but the Acting Dean of the School, Dr. Victor Olson, who was also Dean of The University of Texas Health Science Center at Houston, Dental Branch, obtained enough additional funding from the Legislature to open the School in the fall of 1970 in a temporary facility.

Dr. Billy Riggsby came to San Antonio from Houston with Dr. Victor Olson and was in on the ground floor of planning in 1970. Drs. Olson, Riggsby, and many other faculty members who signed on in the first year worked round the clock to blueprint the facility and ensure it was state-of-the-art.

Dr. Kenneth D. Rudd Continuing Education Participant Award…

Dr. Kenneth D. Rudd is a Professor Emeritus in the Department of Prosthodontics, and the former Associate Dean for Continuing Dental Education at The University of Texas Health Science Center at San Antonio, Dental School. He is an internationally renowned prosthodontist and is recognized for his leadership in numerous dental organizations. Dr. Rudd has dedicated more than 50 years to the field of dentistry. He continues his involvement in dentistry and is currently working on specifications for dental materials for the American National Standards Institute/ADA.

Your patronage to our continuing dental education courses allows us to continue to recognize his outstanding contributions.
OBJECTIVES
- Learn the top three reasons dental offices are at risk for lawsuits.
- Understand how the utilization of risk management techniques can dramatically decrease the risk of a lawsuit.
- Be able to identify issues in your own practice which will reduce the risk of a Dental Board investigation.
- Identify the essential elements which must be in every dental record to allow you to comply with Dental Board rules.
- Learn the steps which must be taken to increase your chances of a favorable outcome in a Dental Board investigation.
- Understand the documentation issues which can reduce your exposure from investigations by other State and Federal agencies.

OVERVIEW
Effective September 1, 2008 Rule 104.1, licensees may choose to have up to four (4) hours of risk management-related coursework (includes risk management, record keeping, and/or ethics courses and the allowance for self-study hours has been increased to (6) hours. This course is designed to assist the dental practitioner in minimizing their chances of a lawsuit or Dental Board investigation through the use of effective risk management techniques.

PRESENTER
EDWARD P. “JOE” WALLER, J.R., D.D.S., J.D., received his dental degree from St. Louis University School of Dentistry in 1969 and his law degree from St. Mary’s University School of Law in 1990. He is an attorney with the law firm of Brin & Brin in San Antonio, Texas. His practice is focused on the defense of hospitals, physicians, and dentists in medical and dental malpractice lawsuits. Dr. Waller also frequently represents dentists in investigations and hearings before the State Board of Dental Examiners.

NEW COURSES
JANUARY 11
TSBD-E Approved Course for Certification in Nitrous Oxide Monitoring
Certification Course for Dental Hygienists and Dental Assistants

MARY E. JACKS, R.D.H., M.S.

OVERVIEW
Dental hygienists and dental assistants, who are not currently certified to monitor nitrous oxide/oxygen inhalation conscious sedation, must now attend an approved certification course. In accordance with Rule 114.4, this course has been approved by the Texas State Board of Dental Examiners (TSBDE). Over the course of the course, participants will receive a packet of study materials. The course will consist of:
- Class, laboratory, and test session (8 hours)
- Participants must pass a written examination with a 70%
- To meet the individual needs of each student, remediation and re-testing will be determined on a case-by-case basis.
- Participants may retake the examination up to 2 times ($10 each exam). If the participant does not successfully pass after the third try, the course must be retaken.

Successful completion of this course will permit certification for five (5) years.

To engage the participants’ learning, innovative teaching techniques will be used. Games, audience response, and role-playing demonstrations of clinical emergencies associated with nitrous oxide-oxygen conscious sedation are some of the learning strategies that will be used. Upon completion of the course the student should be competent to pass an examination covering the following:

OBJECTIVES
- Brief history of Nitrous Oxide-Oxygen Conscious Sedation (NO-OCS)
- The legal provisions (Texas Jurisprudence) for Dental Auxiliaries to monitor NO-OCS
- Dental anatomy and physiology related to NO-OCS
- Common drugs that react to the exposure of NO-OCS
- The operation of equipment used to monitor Nitrous Oxide, as well as the safety features and infection control of equipment
- Responsibilities in monitoring patients under NO-OCS
- Recognition and management of medical emergencies associated with Nitrous Oxide

PRESENTERS
MARY E. JACKS, R.D.H., M.S., is an Assistant Professor in the Dental Hygiene Department at the University of Texas Health Science Center at San Antonio. Ms. Jacks has over 25 years’ clinical experience and has been full-time faculty member since 2000. Areas of teaching expertise include: Periodontics, advanced hand and powered instrumentation, faculty calibration, humor in healthcare, and distance education technologies. She has provided numerous national and international lectures on micro ultrasonic instrumentation and adapting techniques to efficiently manage periodontal clients.

TIME
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM Program: Friday, 9:00 AM-5:00 PM

LOCATION
The University of Texas Health Science Center at San Antonio, Dental School

Allied Dental Personnel: $495.00 Includes lab, clinical, handouts, and study materials

CREDIT (Course Code: 152495A)

Hours: 16

SEE PAGE 61 FOR A DETAILED REGISTRATION FORM.

NEW COURSES
JANUARY 17-18
TSBD-E Approved Course for Certification in Application of Pit and Fissure Sealants: A Certification Course for Dental Assistants

OVERVIEW
This two-day course meets Texas State Board of Dental Examiners Rule 114.3 which states that a dental assistant wishing to obtain certification must complete a minimum of 16 hours of clinical and didactic education in pit and fissure sealants taken through a CODA accredited dental hygiene program approved by the Board course of instruction includes:
- Microbiology and infection control
- Patient management and medical emergency considerations
- Dental anatomy, sealant products, techniques and placement
- Ethics and jurisprudence related to pit and fissure sealants

The laboratory and clinical portions of the course will provide the participant with:
- Experience in securing a dry field
- Ergonomic considerations
- Placement of dental sealants with light and chemical cured products on extracted teeth in a laboratory setting
- Placement of at least (6) pit and fissure sealants and topical fluoride on a patient that has been prescreened for sealant placement

Please Note: PARTICIPANTS MUST PROVIDE THE PATIENT

Rule 114.3 also states that dental assistants must also: Have at least two years of dental assisting experience Show successful completion of current course in basic life support (AHA, ARC).

Applicant must have proof of malpractice insurance (may be obtained through Seabury & Smith 1-800-503-9226) and current CPR certification.

Presenters provide a friendly and relaxing learning environment. Special attention is given to the hands-on instruction.

PRESENTERS

TIME
Check-in: TBD, 7:30-8:00 AM Program: Thursday, 8:00 AM-5:00 PM Friday, 8:00 AM-5:30 PM

LOCATION
The University of Texas Health Science Center at San Antonio, Dental School

TUITION
Allied Dental Personnel: $495.00 Includes lab, clinical, handouts and study materials

CREDIT (Course Code: 152495A)

NEW COURSES
JANUARY 18
Participation Course for Dental Hygienists

Dentists are invited to Seven Ways to Avoid Carpal Tunnel Syndrome

HAROLD L. MEADOR, D.D.S.

OVERVIEW
Why would dental professionals subject themselves to the possibility of carpal tunnel syndrome? Today’s dental professionals are at high risk for many neuromusculoskeletal problems. Traditionally, the highest percentage of entrapment neuropathies affecting the dentist and their staff occur in the neck and back.

To help the individual cope with such issues, this course will address the universal needs of the office using new insights from orthopedics and ergonomics research. This new information will incorporate an instrumentation technique that can improve working conditions for those who perform scaling and root planing procedures. Course attendees will have the opportunity to learn the new components of the technique, especially the basic power strokes in instrumentation. At the end of the didactic session, each participant will complete a personal questionnaire, which becomes the key to understanding the application of the solutions to the 7 basic problems. The lecture will be followed by a hands-on session involving the biocentric simulator.

OBJECTIVES
Participants will be able to recognize the following universal pitfalls:
- The danger of the high wing
- Recognizing improper body alignment
- How pronation and extension of the hand can contribute to tennis elbow
- How sustaining the same body positions and work motions over an extended period of time can contribute to pain
- How universal gloves contribute to fatigue and pain of the thumb
- How fatigue is caused by flexion and extension of the wrist as it is seen in some work motions

Then participants will learn how the use of several options in the components of the instrumentation technique can lead to solutions for the neuromusculoskeletal problems including carpal tunnel syndrome

PRESENTER
HAROLD L. MEADOR, D.D.S., earned his dental degree at The University of Texas Health Science Center at Houston in 1952. He practiced general dentistry for seven years and went onto graduate training in Periodontics at Baylor Dental College which he completed in 1960.

TIME
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM Program: Friday, 9:00 AM - 5:00 PM

**JANUARY 18**

**Lecture/Hands-On Course**

**Gingival and Connective Tissue Grafting**

JAMES S. KOHNER, D.D.S.

**OVERVIEW**

This course discusses and evaluates the use of two different soft tissue grafts. It includes detailed indications, contra-indications and multiple case examples of Free Gingival and Connective Tissue Grafts. The surgical exercises use pig jaws to allow participants to practice the techniques of harvesting, placing and suturing both types of grafts. Gingival Grafts are excellent for creating zones of attached gingiva where neither root coverage nor esthetics are factors. They provide a predictable way to stop recession from progressing. Connective Tissue Grafts are very useful for total root coverage in cases of severe recession, especially in the maxilla where esthetics is important.

This workshop is for the dentist who wants to offer soft tissue grafting to their patients or those who just want to learn more about enhancing esthetic restorative results. Two video demonstrations of surgical techniques are included.

A workbook detailing the procedures is included.

**OBJECTIVES**

At the conclusion, participants should be able to:
- Learn diagnostic criteria for graft selection
- Understand indications for each type of graft
- Understand limitations of each type of graft
- Step-by-step harvesting, placing and suturing
- Step-by-step use of specialized instruments

**PRESENTER**

JAMES S. KOHNER, D.D.S., received his dental degree from The Ohio State University, and Case Western Reserve University Dental School, and obtained his certification in Periodontics from the Boston University School of Graduate Dentistry. He currently lives in Scottsdale, Arizona.

Dr. Kohner is an experienced teacher who has presented courses on Soft Tissue Grafting to a wide range of audiences, including many state associations all over the US and in 8 foreign countries, and has presented at the American Academy of Periodontology meetings for many years. He has been teaching for the Perio Institute since 2003.

**TIME**

Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Friday, 9:00 AM - 5:00 PM

Hours: 7

The Dental School thanks Perio Institute, for its educational grants in support of this continuing education series.

**JANUARY 19**

**Lecture/Hands-On Course**

**Crown Lengthening Workshop**

JAMES S. KOHNER, D.D.S.

**OVERVIEW**

This course provides a maximum hands-on experience covering the various principles and clinical procedures needed for crown lengthening. We cover indications, contraindications, and methods of managing surrounding bone.

Topics include:
- How to handle hard and soft tissues
- Proper surgical techniques
- Preservation of esthetics in the final tissue contours
- Relocation of all structures that comprise the biologic width, namely: sulcus, junctional epithelium, connective tissue fibers, and bone.

The hands-on experiences include flap surgery with pig jaws, plus bone surgery on anatomically correct plaster models. It is coupled with a detailed slide presentation, as well as two video demonstrations of surgical technique.

Dentists who want to do some or most of their own crown extensions, or those who just want to know more about the subject, will be helped by this course. Crown extension is one of the most commonly required procedures in restorative dentistry, and is often under utilized.

A workbook detailing the procedures is included.

**OBJECTIVES**

At the conclusion, participants should be able to:
- Make predictable impressions every time
- Learn why crowns come loose and how to prevent it
- Save chair time and be more profitable
- Understand causes of red gum tissue around crown margins
- Diagnose esthetic crown lengthening
- Understand the Gummy Smile
- Coordinate surgery with restorative procedures

**PRESENTER**

JAMES S. KOHNER, D.D.S., received his dental degree from The Ohio State University, and Case Western Reserve University Dental School, and obtained his certification in Periodontics from the Boston University School of Graduate Dentistry. He currently lives in Scottsdale, Arizona.

The Dental School thanks Perio Institute, for its educational grants in support of this continuing education series.
According to a published study, a dentist and staff, on average, will manage a medical emergency once every 1.4 years*. The same study reports that cardiac arrest in a dental office may occur once every 130 years*. It appears that medical emergencies occur infrequently in the dental office. It is for this very reason that it is easy for dentists and staff to forget medical emergency prevention and management techniques and systems. In a productive dental practice, medical emergency equipment may become dusty, emergency medications may expire, portable oxygen tanks become empty, emergency management systems are forgotten. Do you have enough equipment or too much equipment to manage medical emergencies in your dental office? What is the anticipated arrival time of EMS to your office? Do you AND your staff know how to manage the most common medical emergencies that can occur in your dental office?

OBJECTIVES

Upon completion of this course, participants will be able to:

- Evaluate their medical emergency equipment, as well as, the office for efficiency of management of medical emergencies by bringing a schematic of the floor plan of their dental office, a list and photos of their medical equipment of their office.
- Determine the response time of the emergency medical services to a medical emergency in their dental office.
- Design a "Medical Emergency Management Plan" for the dental office.
- Learn to recognize and manage the ten most common medical emergencies, as well as, acute myocardial infarction and cardiac arrest in the dental office.
- Learn medical emergency preventive measures.

PRESENTER

ERNEST E. VALDEZ, D.D.S., earned his DDS from The University of Texas Health Science Center at San Antonio in 1993. He is an Assistant Professor in the Department of Oral and Maxillofacial Surgery at The University of Texas Health Science Center at San Antonio, Dental School.

TIME

Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Saturday, 9:00 AM–5:00 PM

LOCATION

The University of Texas Health Science Center at San Antonio, Dental School

TUITION

Dentist: $210.00
Allied Dental Personnel: $170.00

CREDIT (Course Code: 152488A)
AGD Code: 142 Hours: 7

IMPORTANT COURSE INFORMATION

Participants should bring the following: (1) simple schematics of your office floor plan (hand drawn or digitized is acceptable); (2) response time of the medical emergency services in your area; (3) photos and a list of your medical emergency equipment, in their CURRENT, AS-IS LOCATION AND STATUS. The course requirements are to aid in the evaluation of the medical emergency equipment and office efficiency in the management of a medical emergency.

HOW TO IDENTIFY AND HOW TO TREAT
RICHARD FINLAYSON, D.D.S.

OVERVIEW
This course will review classification of various gingival and periodontal diseases as it relates to clinical diagnosis and treatment of Aggressive Periodontitis. A review of Aggressive Periodontitis as a distinct entity will be given as well as rationales for treatment of this condition to include antibiotic therapies as well as novel approaches to oral debridement. Antibiotic usage, both systemically and locally for the treatment of periodontal diseases will be reviewed and indications for both will be discussed.

OBJECTIVES
• To be able to classify periodontal and gingival conditions in accordance with the classification system of the AAP Classification of Periodontal Diseases and Conditions International Workshop in 1999.
• To be able to identify and treat all forms of Aggressive Periodontitis.
• To understand when and what antibiotics to use in treating susceptible periodontal diseases as well as proper dosages of each.
• To understand the role of antibiotics in periodontal therapy as well as their limits.

PRESENTER
RICHARD S. FINLAYSON, D.D.S., received his dental training at the University of Texas Health Science Center Houston, Dental Branch in 1975. He entered the Air Force that year for a GPR and later completed training in Periodontics at Wilford Hall Medical Center in 1984 and received his Board Certification in Periodontics in 1987. During his 23 year Air Force career he has lectured both locally and internationally on various topics as well as teaching at the graduate level in GPR programs as well as for the Air Forces largest residency program in General Dentistry. Following retirement in 1999, he worked as a contract Periodontist for a number of clinics in the San Antonio area as well as working part time at UT Health Science Center in the GPR/AEGD program. Currently, Dr. Finlayson is with the Department of Periodontics. Currently he is 80% teaching in the Graduate Periodontics program at UTHSCSA while continuing his private practice endeavors. He is a Fellow of the Academy of General Dentistry as well as having received the 2009 Outstanding Educators Award from the American Academy of Periodontology.

Dr. Finlayson is a native of San Antonio, TX.

HOW TO TREAT
CHARLES W. WAKEFIELD, D.D.S.

OVERVIEW
This program will review current restorative materials and the rationale for selection and clinical use of the most appropriate material in varying clinical situations. The confusion between marketing and evidence-based dentistry will be made clear. Aspects to be discussed include: selection of adhesive systems; microfill, hybrid and nanofilled composites; glass ionomers, resin modified glass ionomers and composites as liners, luting agents and restoratives; bleaching; direct pulp capping with calcium hydroxide or adhesive agents; biocompatibility of tooth colored restorations; esthetic alternatives such as indirect composite, porcelain inlays/onlays/veneers and their clinical techniques. The application of color in dentistry, principles of smile design and clinical restoration of cosmetic cases for the general dentist will be described and illustrated in detail. Updated information on bisphosphonates in dentistry will be presented.

OBJECTIVES
• This session will enable the participant to confidently and accurately determine shades and accomplish simple and complex restorations using composite resin. The hands-on session will allow participants to restore Class I and Class II posterior composites with dentin and enamel replacement, occlusal groove resin tints and the optimal matrix system. In addition, a Class IV and anterior facial composite veneer will be restored with lifelike translucency, dentin and enamel replacement, enamel crazing and characterization. Finishing and polishing techniques will be refined to ensure maximum esthetics and longevity of the restorations.

PRESENTER
CHARLES W. WAKEFIELD, D.D.S., received his dental degree from the University of California at Los Angeles School of Dentistry in 1971. During his career in the United States Army Dental Corps, he completed a two-year Advanced General Dentistry Residency at Fort Knox, Kentucky. He is currently a Tenured Professor in the Department of General Dentistry and Director of Advanced Education in General Dentistry Residency Program at the Baylor College of Dentistry, Texas A & M Health Science Center at Dallas, Texas. In addition to his academic appointments and research, he is also a Consultant to the Commission on Dental Accreditation with the American Dental Association. Prior to joining the Baylor College of Dentistry, Dr. Wakefield served as the Director of Advanced Education in the General Dentistry Residency Program and Director of the Division of Operative Dentistry at the College of Dental Medicine, Medical University of South Carolina, Charleston, from 1993 to 1995.

TIME
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Saturday, 9:00 AM – 5:00 PM

LOCATION
The University of Texas Health Science Center at San Antonio, Dental School

TUITION
Dentist: $260.00

CREDIT
(Code Course: 152499A) AGD Code: 250 Hours: 7

The Dental School thanks Kerr for their educational grant in support of this continuing education program.

FORMAT
One day a month a speaker discusses a dental topic during lunch. The sessions are informal and the group has an opportunity to interact with the speaker during the short discussion period at the end of the lecture. It requires only about one and one-half hour of your time to learn the latest developments in many areas of dentistry. It also offers the opportunity to become better acquainted with your colleagues and their staff since all dental allied personnel and technicians are also invited to attend.

OVERVIEW
Oral fluids, such as saliva, and oral mucosal cells are currently being studied as substitutes for blood and/or tissues for tissue engineering. These materials are easy to obtain and eliminate the need for needle sticks, local anesthesia, or surgery. Nanotechnology is being developed that will allow these tests to be done on very small samples and be performed at the point of care, greatly reducing time to diagnosis. This presentation provides a review of several areas of research incorporating salivary and cellular oral diagnostics for systemic diseases.

OBJECTIVES
• Summarize the characteristics that make saliva an appropriate fluid for disease diagnosis
• Summarize the current scope of tests using saliva as a diagnostic fluid
• Understand the concept of point of care diagnostics
• Understand the concept of lab-on-a-chip tests
• Describe the concept of a point of care lab-on-a-chip test for oral cancer using brush biopsies

PRESENTER
SPENCER W. REDDING, D.D.S., MEd, earned his dental degree from University of North Carolina in 1976. He then completed his General Practice Residency in 1978 from The Medical College of Pennsylvania Hospital. Afterwards, he obtained his MEd from University of New Orleans in 1980. Currently, he is a Professor and Chair of the Department of Comprehensive Dentistry at the University of Texas Health Science Center at San Antonio Dental School. His research is focused on oral diagnostics and prevention and management of oral candidiasis. He has authored over 90 peer reviewed articles.

TIME
Check-in & Lunch: D.S. Cafeteria, Private Dining Room, 11:30 AM
Program: Thursday, 12:00 PM-1:00 PM

LOCATION
Dental School, Private Dining Room in the Cafeteria The University of Texas Health Science Center at San Antonio (back of Dental School and adjacent to Visitor Parking Lot.)

TUITION
Includes Luncheon and Lecture
Individual: $49.50

The David E. Snyder Luncheons for Learning Series
The University of Texas Health Science Center at San Antonio,
Dental School • Office of Continuing Dental Education

FORMAT
One day a month a speaker discusses a dental topic during lunch. The sessions are informal and the group has an opportunity to interact with the speaker during a short discussion period at the end of the lecture. It requires only about one and one-half hour of your time to learn the latest developments in many areas of dentistry. It also offers the opportunity to get better acquainted with your colleagues and their staff since all dental allied personnel and technicians are also invited to attend.

COURSE DIRECTOR
DAVID E. SNYDER, D.D.S., came from a dental family. His father graduated from Northwestern in 1915, practiced in a small South Dakota town for two years and joined the Navy Dental Corps in 1917 because of the World War. He stayed in the Navy for 35 years and then practiced in a small Washington town for a few years. Dr. Snyder heard many tales about how dentistry “used to be practiced.” His older brother was also a dentist from the time of graduation in 1950 until the day he died in 1994.

Dr. David Snyder entered the University of Washington Dental School in 1950, just at the beginning of the Korean War. After graduation in 1954 he served in the Navy Dental Corps for three years, two of which were spent on the USS Nereus, a submarine tender home ported in San Diego, California. After his discharge, he opened a dental practice in San Diego. While still in the Navy he had joined a gold foil study club, which was mentored by Dr. James P. Vernetti. Dr. Vernetti remained a mentor for over twenty years. He mentored the foil clubs at UCLA and UTHSCSA. Dr. Snyder followed Dr. Vernetti to Texas in 1975 and tried to continue the gold foil traditions. He kept teaching gold foil until around 1986 when the last jurisdiction stopped requiring foils on the licensing exams.

Accounts of “old dentistry” from his father, teachings of dental schools of the 1950’s, and tricks learned from Dr. Vernetti encouraged Dr. Snyder to teach senior dental students several alternative techniques. Some of them, such as the intra-osseous local anesthetic injections taught by Dr. Vernetti in the 1960’s, became popular in our Texas school decades later. Most of the old techniques have been judged as unnecessary or dropped because of compressed curriculum.

TIME
11:30 AM - 1:00 PM The first or second Thursday of each month (Subject to change due to state meetings or holidays)

MEETING DATES:
February 7, 2013
Salivary/Oral Diagnostics Update
Spencer W. Redding, D.D.S., MeD
March 7, 2013
April 4, 2013
May 9, 2013
June 13, 2013
July 11, 2013
August 8, 2013
September 5, 2013
October 3, 2013
November 7, 2013
(Topics currently being developed)

LOCATION
Private Dining Room in the cafeteria at The University of Texas Health Science Center at San Antonio, (back of Dental School and adjacent to Visitor Parking Lot); 7703 Floyd Curl Drive; San Antonio, Texas 78229-3900.

LUNCH INCLUDED
Plan to arrive at 11:30 AM or shortly thereafter. This will give you plenty of time to eat before the presentation starts at 12:00 PM. Should you be delayed in arriving, you can eat during the presentation. The presentation will be completed by 1:00 PM at the latest so you can schedule your first afternoon patient early.

CREDIT (Course Code: 152500A)
Each luncheon: 1 AGD Lecture Credit, Subject Code (dependent on lecture topic) 1 CEU

TUITION
(Includes Luncheon and Lecture)
Entire Series: $399.50
Individual Lecture: $49.50

LUNCH AND LEARN REFUND POLICY
If you must cancel your registration, please notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that a refund may be considered. Due to commitments to this special series, any cancellation made 30 days prior to January 7, 2013 will be subject to an administrative fee assessment of $160.00. If you must cancel an individual course $60.00 will be withheld. Any cancellation made after that date does not qualify for a refund. However, participants may choose to place their tuition minus an administrative and direct cost fee assessment into a holding account for future use. No Shows will not qualify for refunds. Written notification is required within five business days by mail, fax, or e-mail to initiate the refund process. Please allow four to six weeks for all refunds.

The 18th ANNUAL

Ski & Learn

Steamboat Springs, Colorado

Thursday-Saturday

February 7-9 2013

Featuring

Dr. David J. Clement & Dr. Stephen K. Shuman

For registration or more information, please contact:
The University of Texas Health Science Center at San Antonio
Continuing Dental Education
7703 Floyd Curl Drive - MSC 7930 • San Antonio, TX 78229-3900
phone (210)567-3177 • fax (210) 567-6807
www.smile.uthscsa.edu
Steamboat, positioned 7,000 feet up in the Colorado Rockies, is home to one of North America’s largest ski mountains. This northwestern Colorado ski resort, which averages 27 feet of snow yearly, is renowned for its season-long “champagne powder.” The Steamboat ski area gives you not just one mountain to explore but five peaks that include 141 trails (13% beginner, 56% intermediate, 31% advanced), all accessed by one of the Rockies largest lift systems. Steamboat is also recognized for having one of the finest ski & snowboard schools and the premier kids program in the industry. And, as an added bonus, kids 12 years of age and under ski free when parents purchase a five-day pass. The City of Steamboat Springs offers two distinct shopping and entertainment areas, the “Village” and “Old Town,” with free bus transportation between the two. Included in the area are over 70 diverse restaurants and bars and an abundance of boutiques and galleries to explore. The Sheraton Steamboat Resort and Conference Center is nestled at the base of the mountain, just steps from the Silver Bullet™ gondola and the dining and shopping attractions in Ski Time Square. This full-service, luxury ski in/ski-out hotel includes: 315 guest rooms, suites and condominiums, each with private balcony; sauna, steam rooms and fitness center; outdoor heated pool and hot tubs; complimentary ski storage and ski valet service; ski & sport shops, gift shop and ski rental; complimentary underground parking, two restaurants and one lounge.

Steamboat is located 22 miles from the Yampa Valley Regional Airport in Hayden. Daily nonstop flights from eight major cities (including Minneapolis/St. Paul and Dallas/Ft. Worth) are available, as are frequent daily jet and commuter connections from Denver. If you wish to drive, Steamboat is an easy 3 1/2-hour drive (157 miles) from Denver. Steamboat Springs has a wonderful busing system therefore a rental car is not necessary.

**We recommend Alpine shuttle to and from the airport, book directly with them at**

http://www.alpinetaxi.com

**THE YAMPA VALLEY REGIONAL AIRPORT** in Hayden is just 22 miles from the Steamboat ski area. Nonstop flights from eight major cities (including Minneapolis/St Paul and Dallas/Ft. Worth) are available daily. Regular shuttle service is available from Hayden to Steamboat and charter service can be arranged from Denver. The Denver airport is 170 miles from Steamboat, approximately a 3 hour drive.

**THE SHERATON STEAMBOAT RESORT** is nestled at the base of the Steamboat Ski Area, just steps from the Silver Bullet Gondola. This full service luxury hotel includes: 315 beautifully-appointed guest rooms, suites and condominiums-each with a private balcony; sauna, steam rooms and fitness center; outdoor heated pools and hot tubs; complimentary ski storage and ski valet service; ski & sport shops, gift shop and ski rental; complimentary underground parking; two restaurants and one lounge.

**THE CITY OF STEAMBOAT SPRINGS** offers two distinct shopping and entertainment areas, the “Village” and “Old Town,” and provides free bus transportation between the two. Included in these areas are over 70 restaurants and bars and an abundance of boutiques and galleries to explore.
OVERVIEW
This course will consider the surgical and restorative planning and treatment options for single-tooth and edentulous implant patients. Patient selection criteria from the perspective of both implant placement and the proposed restoration will be detailed. Where appropriate discussion will include site preparation and disease control. The available restorative materials, options and techniques will be discussed for single tooth replacements in both non-esthetic and esthetic sites. Removable and fixed restorative options will be considered for edentulous arches. Scientific, technical, and practical issues will be addressed from the clinical perspective ensuring the transfer of information into the everyday practice of the participants. The hands-on component of this program will include familiarization with components, use of locator attachments for edentulous restorations, and the fabrication of provisional restorations for partially edentulous sites.

OBJECTIVES
Upon completion of this course, the participant will be able to:
- Define patient selection criteria for successful implant therapy
- Identify relevant health issues associated with implant treatment and physical diagnosis of the patient
- Describe the step by step procedures associated with site preparation and implant placement for straightforward and advanced edentulous and single-tooth patients
- Describe the clinical procedures associated with the restoration of single missing teeth in both esthetic and non-esthetic sites
- Discuss the clinical procedures relevant to the fabrication of removable and fixed prostheses for edentulous arches
- Describe the locator abutment in detail
- Design and fabricate surgical templates and provisional restorations for single missing teeth

PRESENTERS
BRYAN T. HARRIS, D.M.D., C.D.T., received his dental degree from the University of Louisville School of Dentistry in 2004. He originally started in Dentistry through his training as a fixed crown and bridge technician for five years. As a Prosthodontic resident at the University of Texas Health Science Center at San Antonio (UTHSCSA), he received his post-graduate training in Prosthodontics and a certificate in Fixed Prosthodontics. Dr. Harris has lectured nationally and internationally on fixed prosthodontics, esthetics, and porcelain laminate veneers. He has been a key speaker for various companies and universities, including the University of Pennsylvania, Philadelphia. His main focus is the integration of technology into restorative dentistry.

TIME
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Friday, 9:00 AM - 5:00 PM

LOCATION
The University of Texas Health Science Center at San Antonio, Dental School

TUITION
Dentist: $240.00
Dentist: $240.00 - 20% = $192.00
Dentist: $240.00 - 15% = $204.00

FEBRUARY 9
Lecture/Hands-On Course
Endodontics is Really a “Slam Dunk”
RONALD H. LEBBY, D.D.S.

OVERVIEW
This course is designed to bring you an informative and fun filled day of endodontics. There will be no magic, no removal of separated instruments and no blasting through calcified canals—well almost none. We want your fee income to go up...not down!

Dr. Lebby will bring to you the practitioner, the principles necessary to perform predictable and effective single visit endodontic therapy.

You will learn endodontics from beginning to end by seeing step-by-step procedures, illustrations and case presentations that encompass all current endodontic concepts, both conventional and high tech. You will learn how to incorporate these techniques profitably and efficiently into your practice.

There will be a microscope demonstration, and you will participate in a hands-on session, which will afford you a seamless transition between shaping and cleansing the root canal system and predictable carrier based obturation.

OBJECTIVES
This course will enable the dentist to understand:
- An intelligent diagnosis and thereby determine which tooth requires Endodontic intervention.
- Perform a painless Endodontic procedure, which tooth requires Endodontic intervention.
- Be able to easily gain coronal and radicular direct access, and be able to quickly and accurately determine the exact working length in a matter of seconds without the use of radiographs.
- To optimally cleanse and shape the root canal system by utilizing rotary instruments, enabling you to place a thermoplastic seal quickly and efficiently.

PRESENTERS
RONALD H. LEBBY, D.D.S., received his degree from Temple University School of Dentistry in 1961, where he continued on to receive his post-graduate training in Endodontics. Dr. Lebby is a practicing Endodontist in Suburban Philadelphia. He served at the base Endodontist at The Quonset Point Naval Air Station and The U.S. Naval Base in Newport, Rhode Island. Dr. Lebby has taught in the graduate and post-graduate departments of Endodontics at Temple University School of Dentistry, The University of Pennsylvania School of Dental Medicine and at The Albert Einstein Medical Center in Philadelphia, Pennsylvania. He has lectured at several universities on “The Effects of Smokeless Tobacco on the Oral Tissues.” Dr. Lebby has been published and has lectured nationally and internationally on conservative single visit Endodontics for the generalist.

TIME
Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Saturday, 9:00 AM-5:00 PM

LOCATION
The University of Texas Health Science Center at San Antonio, Dental School

Lecture Course

Update on Common Medical Conditions and Lesions Encountered in the Contemporary Dental Practice

MICHAEL A. HUBER, D.D.S.

OVERVIEW

Demographic trends clearly demonstrate that as the average life-expectancy continues to grow in America, so does the burden of chronic illness. Thus, the contemporary dental practitioner is encountering an ever-increasing number of patients with a multitude of medical conditions and associated oral lesions which affect both the patient’s oral health and management. In addition, many dental patients see their dentist more regularly and frequently than they do their primary medical manager. This places the dental practitioner in the unique position of often being the first to observe the signs and symptoms of a serious systemic condition.

This course will provide a review of some of the common medical conditions and associated oral lesions the dental practitioner is likely to encounter in his or her practice. In addition, the historical and clinical clues of commonly encountered undiagnosed systemic conditions will be provided.

OBJECTIVES

This course is intended to improve the practitioner’s ability to obtain and interpret the medical history and correlate these findings with the clinical examination to:

- Establish an appropriate diagnosis
- Plan appropriate treatment modifications to safely manage the medically compromised patient

Specific topics discussed will include, but not be limited to:

- Allergic reactions
- Autoimmune disorders
- Candidiasis
- Cardiovascular disease
- Dermatologic disease
- Dry mouth
- Hepatitis
- HIV/AIDS
- Indications for antimicrobial prophylaxis
- Oral cancer
- Sexually transmitted diseases

PRESENTER

MICHAEL A. HUBER, D.D.S., received his dental degree from the University of Texas Health Science Center at San Antonio, Dental School in 1980. He continued with postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1988. Upon his retirement from the United States Navy in 2002, Dr. Huber joined the faculty as an Assistant Professor in the Division of Oral Medicine, Department of Dental Diagnostic Science at The University of Texas Health Science Center at San Antonio, Dental School.

TIME

Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Friday, 9:00 AM–5:00 PM

Lecture/Participation Course

Full-Arch Rehabilitation With the All-on-4™ Technique

KEN PARRISH, D.M.D., M.S., Ph.D.

OVERVIEW

Many patients are living longer and do not find a complete removable denture acceptable. The demand for dental implants is rising exponentially and is now considered the standard of care. The practices that incorporate less expensive, immediate loading techniques will have the ability to offer the patient a great service. Complete rehabilitation of the upper and lower jaw can be costly and time consuming. A new technique that has been common in Europe for many years has crossed the Atlantic and is becoming very popular in the United States. This system is called the All-on-4™ because it utilizes only four implants per arch for an immediate complete full fixed-detachable screw retained prosthesis. The prosthesis is similar to the Brånemark hybrid denture that was developed years ago. The system can be used in the maxilla, allowing you to avoid sinus grafting or in the mandible, to avoid having to place implants posterior to the symphysis. The prosthesis can be completed the same day as surgery or the next day to accommodate the lab processing time.

OBJECTIVES

The participant will learn about:

- Scientific Basis for the All-on-4™
- Diagnosis and Pre-surgical Planning
- Restorative Steps
- Restorative Options
- Diagnosis and Anatomic Requirements
- Surgical Armamentarium and Implant Selection

PRESENTER

KEN PARRISH, D.M.D., M.S., Ph.D., graduated from the University of Louisville School of Dentistry in 1989. He received his specialty training at the University of Iowa in periodontics and also received his Ph.D. in microbiology. Dr. Parrish is certified by the American Board of Periodontology. Dr. Parrish was an assistant professor in the Division of Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1988. Upon his retirement from the United States Navy in 2002, Dr. Huber joined the faculty as an Assistant Professor in the Division of Oral Medicine, Department of Dental Diagnostic Science at The University of Texas Health Science Center at San Antonio, Dental School.

FEBRUARY 23

Lecture Course

Tissue Regeneration vs Bone Grafting

DONALD P. CALLAN, B.S., B.A., D.D.S.

OVERVIEW

Alveolar bone loss occurs when teeth are removed. It is the responsibility of the dental professional to diagnose the current and potential future problems. The dentist should also inform the patient of various treatment modalities to restore and maintain the integrity of the natural arch form for the replacement of the lost teeth. The result of the procedure should support dental implants, dentures, or a fixed bridge for long-term function and esthetics for the patient. Should the procedure be a bone graft, soft tissue graft, a tissue regeneration procedure, or tissue augmentation procedure? What is the difference? Should the graft material be osteoinductive or osteoconductive? Should the material be an autograft, a xenograft, alloplast or a J-Block? Should the material be mineralized or demineralized? Should a membrane be utilized? What determines the success of the procedure? Will the result support all prosthetic replacements? The questions and other questions regarding restoration and ridge preservation of the upper and lower arches and techniques will be answered in the presentation.

The purpose of this program is to provide evidence-based information to evaluate grafting materials for periodontal, restorative, and implant dentistry based upon clinical, esthetic, functional, and histological results in humans.

OBJECTIVES

This course will enable the dentist to understand:

- The biological mechanism of bone formation in grafting and tissue regeneration procedures.
- The difference of tissue grafting and tissue regeneration.
- Identify the need for tissue regeneration.
- Why tissue regeneration is needed.
- Selecting the proper materials based upon the objective.
- Determining the time and sequence for ridge preservation.
- To defend the procedure clinically, functionally, and histologically.

PRESENTER

DONALD P. CALLAN, D.D.S., received his dental degree in 1975 and a Certificate in Periodontics from the University of Missouri at Kansas City in 1978. Dr. Callan maintains a private practice limited to Periodontics with an emphasis on tissue regeneration and implant dentistry in Little Rock, Arkansas. His current hospital appointment includes the Arkansas Children Hospital in Little Rock, Arkansas.

Dr. Callan also serves as an Assistant Clinical Professor in the Department of Periodontics at the University of Tennessee College of Dentistry. He maintains a private practice limited to Periodontics and an Associate Professor in the Department of Periodontics at The University of Texas Health Science Center at San Antonio.

TIME

Check-in & Breakfast: D.S. Cafeteria, 8:00 AM
Program: Saturday, 9:00 AM–5:00 PM

take it on-line for $60.00!
ePOD (educational/electronic Presentations-On-Demand) are high definition, entertaining, state of the art advanced animation technology video presentations which allow users to select and watch/listen to internet/streaming continuing education video content available 24 hours-a-day, 7 days-a-week.

CDEMobile

CDEmobile provides video content on different dental topics for FREE! The course content are designed to work on iPhone, iPod Touch, iPad and Android-based mobile phones and devices:
http://cdemobile.uthscsa.edu

CDEonDemand

CDE on Demand are 1-hour video presentations which allow users to select and watch/listen to internet/streaming continuing education video content for FREE using your computer (desktop or laptop) available 24 hours-a-day, 7 days-a-week: http://cdeondemand.uthscsa.edu

Video Streaming

Video Streaming (also referred to as the Dental Library) is in partnership with The Massad Center for Higher Learning and there will be up to 200 new peer reviewed courses a year. Currently, they are in the planning and development stage:

If you have any problems connecting or viewing any of these sites please call our office at 210.567.3177
CONGRATULATIONS! LET'S GET STARTED...

STEP 1
Click on the CDEmobile app that is on your smartphone.

STEP 2
Next, you will see this screen and click on the center button to proceed.

STEP 3
Click on “Add to Home Screen”

STEP 4
Click on “Add” at the top right corner. Your app will now be displayed on your phone.

STEP 5
Upon course selection, you will given the opportunity to preview the course or register to watch the full presentation. After registering you’ll be directed to a link that will allow you to login to the course.

STEP 4
After viewing the course material, if you wish to receive CE credit, click on the “Done” button. This will take you to the link that will allow you to register, pay the fee, and take the required exam.

STEP 5
After successful completion of the exam, you will automatically be sent a confirmation e-mail, you need to print and retain as your official copy.

GOOD LUCK ON THE EXAM!

There is not a fee for viewing this material. However, you will be asked to register. After viewing the course material, if you wish to receive credit, you will be given instructions how to do so.

INTERNET CONNECTIVITY
Broadband connection is required. High-speed connection (via WiFi, cable, DSL or satellite) is recommended.

CAN I HAVE ACCESS TO CDEmobile USING A COMPUTER (DESKTOP OR LAPTOP)?
Yes, you may access the same content using your desktop or laptop computer via our CDEonDemand site at: http://cdeondemand.uthscsa.edu
CDE on Demand are 1-hour video presentations which allow users to select and watch/listen to internet/streaming continuing education video content available 24 hours-a-day, 7 days-a-week in the comfort of your home or office. You may watch previews of the video presentations and can also register for FREE for the full feature version. To earn continuing education (CE) credit, you enroll by paying the testing fee and taking the online quiz. Check out the courses on page.

Broadband internet connection is recommended for a more satisfactory playback experience.

You also have access to CDE on Demand using your mobile device (iPhone, iPod touch, iPad, and Android Smartphones) via CDEmobile at http://cdemobile.uthscsa.edu.

Video presentations are streamed in your web browser in Quicktime format. If you don’t have Quicktime software installed in your computer, you may download from Apple’s website at: http://www.apple.com/quicktime/download/
I know you love those people close to you and you want to make your death or incapacity an event they can mourn while celebrating your life. You don’t want them to have to spend all the fruits of your labor on attorneys, court costs and others. You don’t want them to curse your name for failing to do something so simple, yet so powerful. So, have a relationship with lawyers you like to work with, lawyers you’ll call friends and you’ll trust to create and update with you the best estate plan for you and your family. Not only will you save those you love time, heartache and headache, you may be able to save huge sums of money.

Too many of our patients have diabetes, and more are coming! As we become more comfortable with the therapeutic benefits of dental implants, we need to understand the implications of diabetes, and appreciate the potential benefits this treatment option offers to our patients with diabetes.

Orthodontic treatment is becoming increasingly important in interdisciplinary cases and is opening new opportunities for other dental disciplines. Several aspects of utilization of orthodontics in interdisciplinary patients will be discussed, as well as the importance of including all relevant disciplines in the initial planning of treatment.

This clinically oriented one hour presentation will first discuss recommended mandibular positions to be used when adjusting intraoral appliances. The various physical variables of intraoral appliances will be presented, which includes the choices of a full or partial coverage appliance; maxillary or mandibular appliance; and the appliance being fabricated from a hard, intermediate, or soft material. Additionally, recommended techniques for adjusting intraoral appliances and a preferred initial occlusal scheme will be presented.

This course is designed to assist dental practitioner in minimizing their chances of a lawsuit and expanding their scope of understanding of current HIPAA requirements.

This course is designed to discuss the many difficulties associated with mini-implants and the alternative ways used to treat patients. Many difficulties will be addressed in this course, such as: immediate loading status post multiple extractions, immediate prosthesis wear post graft or implants, inadequate width of alveolar ridge, orthodontic anchorage, medically challenged patients, and many more!
ORAL CANCER UPDATES  
COURSE DIRECTOR: MICHAEL HUBER, D.D.S.  
The purpose of this course is to update the practitioner on recent scientific advances addressing our understanding of oral cancer risk and the value of risk reduction strategies. An objective discussion of new and future diagnostic adjuncts for mucosal assessment will also be provided.

PEDIATRIC DENTISTRY REFRESHER  
COURSE DIRECTOR: STEVEN P. HACKMYER, D.D.S.  
This refresher course will review current basics and concepts of four essential areas of clinical everyday pediatric dentistry: prevention/anticipatory guidance, behavior management, pediatric restorations, and pediatric pulp therapy.

PEDO DENTAL TRAUMA  
COURSE DIRECTOR: JEFFREY MABRY, D.D.S.  
His lecture will review the epidemiology of dental trauma, prevention of trauma, diagnostic trauma work-up, Common reactions of the pulp to trauma, management of trauma to the primary dentition, management of trauma to the supporting structure and potential damage to the permanent dentition.

TRIAZOLAM SEDATION  
COURSE DIRECTOR: RICHARD S. FINLAYSON, D.D.S.  
This course will be to familiarize the practitioner with oral sedative drugs as well as give treatment regimens for the use of the oral sedative, Triazolam.

WISDOM TEETH MANAGEMENT  
COURSE DIRECTOR: DAVID L. ROBERTS, D.D.S.  
The purpose of this course is to discuss the age and tooth position criteria for treatment, have a better understanding of how to evaluate radiographic findings, and learn how to manage complications related to the third molars.

TRUTH ABOUT ZIRCONIA  
COURSE DIRECTOR: NORMA OLVERA, D.D.S.  
This course is designed to show and explain how zirconia is rapidly becoming an option for use in all clinics. Dr. Olvera will describe and define zirconia, explain mechanical properties of zirconia, show dental zirconia in 2011, discuss advantages and disadvantages, and illustrate the clinical management of zirconia.

NEXSMILE PROCEDURE  
COURSE DIRECTOR: MARK L. LITTLESTAR, D.D.S.  
The surgical placement of implants always affects the restorative outcome for better or worse. CT scans and 3D imaging now enable surgeons to get it right. Surgical guides can be fabricated from CT and scanned dental model data that will provide the correct trajectory and also indicated when and where bone should be removed. Without these two components, implants frequently end-up violating the restorative space.

(210) 567-3177

http://smile.uthscsa.edu 41
KEEPING UP-TO-DATE WITH BIOMEDICAL INFORMATION

COURSE DIRECTOR: JOHN D. RUGH, Ph.D.

This program provides practitioners strategies and specific information technology skills to keep up-to-date with new innovations and clinical biomedical literature. It provides strategies to deal with the explosion of new marketing information (and misinformation) and make evidence-based decisions about new products and procedures.

OCCLUSION MADE SIMPLE

COURSE DIRECTOR: JACK I. SHIRLEY, D.D.S.

A walk down occlusion lane is not a walk that we often want to take, but Dr. Shirley advocates, “Give it another chance; it might change your whole practice and the way you practice dentistry”.

This course on occlusion has received rave reviews from dentists around the country. One dentist’s comment was, “This is the first time I have ever understood occlusion, and I have been a dentist for 28 years.”

Another dentist said, “Finally, someone is giving me something I can use in my practice.” This is just the beginning. Come join us and see why you are actually going to start enjoying occlusion and be excited about what it will do for your practice.

CRACKED TOOTH SYNDROME

COURSE DIRECTOR: EDWARD F. WRIGHT, D.D.S.

Cracked tooth syndrome can be extremely difficult disorder to identify and determine the location of the fracture within the tooth. Gain insights in various techniques for diagnosing, preventing, and treating incomplete coronal fractures. Garner clinically valuable information on incomplete tooth fractures that you can immediately use in your dental practice.

STAYED TUNED More topics coming soon!

Antibacterial Chemotherapy
Geza T. Terezhalmy, DDS, MA

Section 1 deals with the microbiological and pharmacological basis of antibacterial chemotherapy
• Discuss the etiology of odontogenic infections.
• Discuss the pharmacological basis of antibacterial chemotherapy in dentistry
• Understand the mechanisms and relevance of antibacterial drug resistance

Section 2 deals with the indications for and the selection of an appropriate antibacterial agent for the treatment of odontogenic infections.
• Develop a rational strategy for the medical management of acute odontogenic infections.
• Discuss current recommendations for the use of antibacterial prophylaxis
• Discuss potential adverse drug events.

Emergency Medicine
Stanley F. Malamed, D.D.S.

This course contains seven sections (sections 3 through 7 are currently being produced, you will be notified when they are completed) that can be viewed independently. It is recommended that they be viewed in sequence. This course is developed to provide you with appropriate information to manage your practice in regard to patient processing and evaluation, sedation, and medical emergencies. Each section contains pertinent information regarding prevention, preparation and education of the patient and office staff.

Section 1 and Section 2 should be taken together.

At the conclusion of section 1 you should be able to:
• List the most common medical emergencies occurring in the dental environment
• List the 5 components of physical evaluation of dental patients
• List the 6 vital signs
• Describe the A.S.A. physical status classification system
• Provide examples of ASA 1, 2, 3, and 4 medical problems
• List the 8 components of the Stress Reduction Protocol
• Define the goal of physical evaluation

At the conclusion of section 2 you should be able to:
• Define the legal obligation of a doctor to the victim of a medical emergency
• List the 4 components of preparation of the office for medical emergencies
• Describe the victim who is ‘clinically dead.’
• Describe the difference between ‘clinical’ and ‘biological’ death
• List and describe the steps in the AHA 2010 cardiac arrest algorithm
• List and describe the steps in the algorithm for all medical emergencies except cardiac arrest
• Explain why survival rates from sudden cardiac arrest are significantly lower in young children than in adults
• Describe the functions of each member of the In-Office Emergency Team
• List the 7 drugs in the bare-bones-basic emergency drug kit
**Impressions Made Simple**  
*Joseph J. Massad, DDS*

Take precise impressions of edentulous patients that will allow excellent restorations and doing that in one appointment instead of two. Eliminate the surprise of an unexpected extraction when Impressioning the patient with mobile teeth for Immediate and/or partial dentures. Accomplish enhanced impression procedures in the most difficult implant variations such as Stud Abutments and Complete Fixed Prosthesis. Complete a predictable impressions to successfully reline the Complete, Immediate and Implant Over-dentures.

After completing this course the participant should be to be able to:
- Take precise impressions of edentulous patients that will allow excellent restorations and doing that in one appointment instead of two.
- Eliminate the surprise of an unexpected extraction when Impressioning the patient with mobile teeth for Immediate and/or partial dentures.
- Accomplish enhanced impression procedures in the most difficult implant variations such as Stud Abutments and Complete Fixed Prosthesis.
- Complete a predictable impressions to successfully reline the Complete, Immediate and Implant Over-dentures.

**Patient Management... from a non-clinical perspective**  
*Jennifer de St. Georges*

- Create an environment in their office that supports clinical excellence
- Enhance the patient’s experience
- Keep the schedule on time 85%
- Develop seamless communication between Doctor’s clinical and administrative teams, so they work as one.
- Reduce stress for all participants (patient and practice)
The Right (and Wrong) Way to Treat Pain
Geza T. Terezhalmy, DDS, MA

This course includes two sections. Section I: Anesthetics, Section II: Analgesics. The most common complaint causing a person to seek the services of a health care provider is pain or the closely associated symptom, discomfort. Consequently, the primary obligation and ultimate responsibility of every practitioner of the healing arts is not only to restore health but also to relieve pain. The intent of this course is to present clinicians a rational strategy for the medical management of acute odontogenic pain and to discuss current recommendations for the use of local anesthetic agents and analgesics.

Participants in this course will be introduced to evidence-based information that will help them to select the most appropriate therapeutic intervention for the management of acute odontogenic pain and when pharmacotherapy is indicated, to prescribe dose enough, soon enough, often enough, long enough---to prescribe, as they would receive.

Upon completion of this course the practitioner should be able to:
• Discuss the basic mechanisms of acute pain.
• Discuss the pharmacological basis of and factors to be considered in the selection of a local anesthetic agent.
• Discuss the pharmacological basis of and factors to be considered in the selection of a COX inhibitor.
• Discuss the pharmacological basis of and factors to be considered in the selection of a combination analgesic.

The Patient with Endocrine Disorders:
Risk Stratification and Dental Management
Geza T. Terezhalmy, DDS, MA

This course includes two sections. Participants in this course will be introduced to evidence-based knowledge essential for the risk stratification of patients with diabetes mellitus, thyroid dysfunction, adrenal dysfunction, and osteoporosis and the development of appropriate diagnostic, preventive, and therapeutic strategies commensurate with a patient’s ability to undergo and respond to dental care. The course contains two sections that must be taken sequentially.

Section 1 will be introduced to evidence-based knowledge essential for the risk stratification of patients with diabetes mellitus and thyroid dysfunction and the development of appropriate diagnostic, preventive, and therapeutic strategies commensurate with a patient’s ability to undergo and respond to dental care. Please note: The mentioned objective #2 in section 1 will be discussed in Section 2.

Section 2 will be introduced to evidence-based knowledge essential for the risk stratification of patients with adrenal dysfunction and osteoporosis and the development of appropriate diagnostic, preventive, and therapeutic strategies commensurate with a patient’s ability to undergo and respond to dental care.

Upon completion of this course the practitioner should be able to:
• Discuss the current and accepted medical management of patients with diabetes mellitus, thyroid dysfunction, adrenal dysfunction, and osteoporosis.
• Identify disease-related, patient-related, and procedure-related factors that will impact on the dental management of patients with diabetes mellitus, thyroid dysfunction, adrenal dysfunction, and osteoporosis.

If you have any problems connecting or viewing any of these sites please call the continuing dental office at 210.567.3177

Check out our newest courses at http://cdestream.uthscsa.edu

http://smile.uthscsa.edu
HOW IT WORKS AND HOW TO REGISTER:

You are invited to participate in our interactive courses presented by The University of Texas Health Science Center at San Antonio, Continuing Dental Education. Modern version of the correspondence courses from the past, some courses are available in video-streaming format, they will be noted. Via the Internet/World Wide Web (WWW), you may review this material in your office or home at your leisure; and receive continuing education credit at the same time! Participation in the didactic portion of the course requires that you:

STEP 1: Register online with the Office of Continuing Dental Education and pay a registration fee.

STEP 2: Complete all reading assignments and submit quiz answers via Internet at the completion of each chapter. The quizzes will be graded and returned to you via internet instantaneously.

STEP 3: Upon successful completion of this portion of the course, you will receive an electronic certificate for didactic continuing dental education hours—print this for your records.

Dental Assistant Registration Course and Examination
Course Director: Mona Thibadeau, RDA, CDA, BA
As of September 1, 2006 the Texas State Board of Dental Examiners is requiring that Dental Assistants attend a course to prepare them to pass an examination. The examination will cover the three main topics of Jurisprudence, Infection Control, and Radiology, which will be offered at the end of each module. This course is intended to provide sufficient information to permit dental assistants to gain knowledge and understanding of the critical concepts associated with each of these areas of registration in order to facilitate success at the time of examination. (Soon to be available in video streaming)

Tuition fee of US $60.00 • Eight(8) hours of didactic continuing dental education. Reviewed and updates 7/1/10

OSHA 2011: The Required Annual Training Course
Course Director: Geza T. Terezhalm, DDS, MA
This will fulfill your annual OSHA requirement on Bloodborne Pathogens Training. Welcome to OSHA: The Required Annual Training Course -- its economical, easy and fun! It is our goal to provide you with information in an educational format that is both simple and convenient. As you progress through the course - feel free to contact Dr. Terezhalm, via e-mail with individual questions, concerns, or comments. Completion of each individual session (including a quiz) will require approximately 5 minutes to half hour of time. Your answers to the quizzes will be recorded and graded electronically. (Soon to be available in video streaming)

Tuition fee of US $97.50 • Six(6) hours of didactic continuing dental education. Reviewed and updates 7/1/10
Ergonomics in Pain Management (Including Carpal Tunnel Syndrome)
Course Director: Harold L. Meador, DDS
Changes in dentistry and periodontics are putting more pressure on the dental professional. More occupational pain is the result of an increased physical workload that can lead to neuromusculoskeletal problems. To help the dental professional cope with a demanding workload, this course will address those needs by considering how fatigue reduction and time control contribute to stress management and efficiency. New insights from orthopaedics and ergonomics research explain problems from past instrumentation techniques. This new information is incorporated in an instrumentation technique that can improve working conditions for the hygienist. This course is divided into five chapters. Completion of each individual chapter (including a quiz) will require approximately 30 minutes to an hour of time.

Tuition fee of US $97.50 • Seven(7) hours of didactic continuing dental education. Reviewed and updates 7/1/10
(Soon to be available in video streaming)

Instrument Sharpening NEW!!!
Course Director: Harold L. Meador, DDS
Instrument sharpening continues to be a mystery. Working with dull instruments increase the physical demands on the operator and the discomfort of the patient while providing a sub-standard result. There have been many methods developed but a method that will provide sharp instruments one hundred percent of the time will be presented. Since it takes only twelve to fifteen strokes to dull a curet, it becomes obvious that chair side sharpening is essential for maximum efficiency. (Soon to be available in video streaming)

Tuition fee of US $47.50 • one(1) hour of didactic continuing dental education. Reviewed and updates 7/1/10

Nitrous Oxide Conscious Sedation (for Dentists only)
Course Director: Ernest E. Valdez, DDS
If you wish to be certified in Nitrous Oxide Administration following completion of this portion of the course, you may sign up to participate in the clinical/hands-on portion of the certification at the Dental School for a fee in the amount of US $299.50. One-on-one instruction is set at US $599.50, plus travel expenses for outreach office instruction. To apply for the clinical/hands-on portion (after you have completed the didactic portion) leading to certification, call the Office of Continuing Dental Education at (210) 567-3177.

Tuition fee of US $247.50 • Nine(9) hours of didactic continuing dental education. Reviewed and updates 7/1/10
(Soon to be available in video streaming)

Monitoring the Administration of Nitrous Oxide
(for Dental Hygienists and Assistants) Course Director: Ernest E. Valdez, DDS
Texas State Board of Dental Examiners offers an optional Nitrous Oxide Monitoring Certificate for Dental Hygienists and Dental Assistants. This course will cover: History and Safety, Patient Monitoring, Effects of N2O, etc. This program is intended to provide sufficient information to dental hygienists and dental assistants to gain knowledge and to understand their responsibility of monitoring the patients when they assist their dentist during the administration of nitrous oxide. (Soon to be available in video streaming)

Tuition fee of US $100.00 • Nine(9) hours of didactic continuing dental education. Reviewed and updates 7/1/10
This testing site has been developed to allow the dental professional to receive continuing dental education credits after viewing or reading dental material that has been made available through the Office of Continuing Dental Education at The University of Texas Health Science Center at San Antonio, Dental School.

The University of Texas Health Science Center at San Antonio is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Continuing Dental Education credits are designated in each course description. Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at www.ada.org/goto/cerp.

The purchaser of these materials can earn hours of Continuing Education Credit by taking our online administered test. When individuals are ready to take the exam they start at the CDE Homepage at www.smile.uthscsa.edu. Click on CDE Testing Center, then choose the course you wish to take the exam. The registration step-by-step process is on the Testing Center page. CE credit requirements vary from state to state. Participants are encouraged to contact their State Boards for information about their specific requirements. Upon successful completion of a test, you will have an opportunity to print out a certificate. Individuals are given the opportunity to take the exams electronically or by hard copy. Specific information is provide below and inside the purchased text or DVD.

To receive education credits for any DVD, the purchaser has two options:

Option 1. Complete the answer sheet on the back of this booklet, and complete the registration information on the reverse side. Include a check for $25.00 or provide credit card information and mail to the Office of Continuing Dental Education.

Option 2: Participants may also take the test electronically for $20.00 by registering on our web site Test Center link. Our address on the web is www.smile.uthscsa.edu.

Predictable Complete Dentures III/The Platinum DVD Edition

*Author: Joseph J. Massad, D.D.S.

Includes both Clinical and Lab procedures:

- Comprehensive Evaluation - Predict Outcome & Identify Possible Complications
- Orthopedic Splints & Tissue Conditioning
- Making Exquisite Impressions
- Lab Procedures I—Cast Fabrication, Custom Baseplates, EBP Base, Neutral Zone Base, & Central Bearing Devise
- Records—Centric Relation, Neutral Zone, Esthetic Blue Print, Posterior Tooth Selection, & Facebow
- Lab Procedures II—Articulator Setup, Index EBP, Index Neutral Zone, Tooth Setup
- Dress Rehearsal—Finalizing Esthetics and Phonetics
- External Impressions
- Delivery—Pressure Relief Post Dam, Occlusal Evaluation & Correction, Subtractive Correction, Patient Instructions
- Massad Team Discussion—Trouble Shooting Problems in Denture Fabrication & More!

The purchaser of this DVD Predictable Complete Dentures III/The Platinum DVD Edition, or a single designee, can earn up to fourteen (14) hours of Continuing Education (CE) Credit by reviewing the material in this DVD, taking each individual section self-administered exam and correctly answering 80% of the test questions. This course contains 4 discs with independent listed hours per exam (see below). Participants can take each CE test electronically for $10.00 per section by clicking on the disc number listed below in which you are prepared to take the exam.

The DVDs cost $349.50 plus $16.95 shipping and handling within the United States. Contact our office @ (210) 567-3177 if you are interested in purchasing the DVDs or contact Dr. Joseph J. Massad’s office at 918-749-5600 or online at www.drjoemassad.com to order your copy. Reviewed and updates 7/1/10
Dental Implant and Alternative Options featuring Informed Consent for your Patients
*Author: Samuel M. Strong, D.D.S.
This DVD represents a valuable patient educational instrument intended to aid in the informed consent process prior to initiating dental implant therapy. The accompanying study guide highlights material presented in the video, expands on important implant-related concepts, and provides numerous citations from review of the topic. Therefore, the DVD in combination with the study guide offer useful information for both patients interested in receiving dental implant treatment and health care providers appropriately trained to render such therapy.
The objectives of this DVD and the accompanying study guide are to:
• Familiarize patients, dentists, and dental auxiliaries with different types of implant restorations;
• Discuss indications for and advantages of various implant prostheses;
• Provide a means for conveying credible information to patients considering dental implant therapy so they may give consent prior to initiating treatment.
The purchaser of this DVD and text Dental Implants and Treatment Alternatives - Informed Consent for Patients, or a single designee, can earn up to one (1) hour of Continuing Education (CE) Credit by reviewing the material in this DVD and text, taking self-administered exam and correctly answering 80% of the test questions. This DVD is being offered for a special price of half off the suggested retail price of $149.95 ($75.00) plus $16.95 shipping and handling within the United States. Contact our office @ (210) 567-3177 if you are interested in purchasing the DVD and text. The testing fee is $10.00. Reviewed and updates 7/1/10

Legal Considerations for Today’s Practitioner
*Author: Joseph J. Massad, D.D.S.
Is a delay in writing records a problem? Should a patient sign an informed consent or is it okay to verbally inform the patient? Is there is risk in giving advice over the phone? What role does the dental staff play in helping or hurting the chances of a lawsuit? These questions and more will be answered in Dr. Joseph Massad’s latest series. From informed consent to lawsuits, Dr. Massad covers a broad range of legal questions and answers for the practicing dentist provided in written text. The purchaser of this DVD Legal Considerations for Today’s Practitioner, or single designee, can earn two hours of Continuing Education Credit by correctly answering 80% of the questions of the test. The DVDs cost $139.95 plus $16.95 shipping and handling within the United States. Contact our office @ (210) 567-3177 if you are interested in purchasing the DVDs and book. The testing fee is $15.00. Reviewed and updates 7/1/10

Emergency Medicine in Dentistry 3
*Author: Stanley F. Malamed, D.D.S.
Medical emergencies can, and do, happen in dentistry. In this presentation we will review the preparation for, and management of, common medical emergencies that happen in the dental office environment. Preparation of the entire office staff and basic management principles are stressed. Section 1: I. Preparation to VII. Hyperventilation Section 2: VIII. Asthmatic Attack to XIV. Cardiac Arrest
The purchaser of this DVD Emergency Medicine in Dentistry 3, or a single designee, can earn up to eight(8) hours of Continuing Education (CE) Credit by reviewing the material in this DVD, taking each individual section self-administered exam and correctly answering 80% of the test questions. This course contains 2 sections with four(4) hours of CE per section. Participants can take each CE test electronically for $10.00 per section by clicking on the section number listed below in which you are prepared to take the exam. This DVD is not in stock with The Office of Continuing Dental Education, please contact Dr. Joseph J. Massad’s office at 918-749-5600 or online at www.drjoemassad.com to order your copy. Reviewed and updates 7/1/10

**ADDITIONAL TESTING CENTER COURSES CONTINUED ON NEXT PAGE**
*Author: Robert P. Langlais, D.D.S., M.S.
"While many oral lesions are said to be "common", the individual doctor, hygienist or other clinical staff may not encounter them frequently. If a team member or the doctor can describe the lesion as for example a white patch, ulcer or multiloculac radiologic lesion, the atlas which contains over 600 color pictures and radiographs can be consulted as a quick simple reference to help establish the diagnosis or a list of possibilities. The reason for this simplicity is that the Color Atlas is divided into sections based on the clinical presentation of lesions and not by disease process. For example a white patch may represent infection such acute pseudomembranous candidiasis or squamous cell carcinoma. In addition, tables of differential diagnoses can be found in the back section of the book. If the disease process can be identified such as infection and a diagnosis established, updated common prescriptions are also included. The purchaser of this text Color Atlas of Common Oral Lesions 4th Edition, or a single designee, can earn up to (24) hours of Continuing Education (CE) Credit by reviewing the material in this text, taking each individual section self-administered exam and correctly answering 80% of the test questions. This course contains 12 sections with two(2) hours of CE per section. Participants can take each CE test electronically for $30.00 per section by clicking on the section number listed below in which you are prepared to take the exam. This book is not in stock with The Office of Continuing Dental Education, you can order it online at www.lww.com or www.amazon.com. Reviewed and updates 7/1/10

Predictable Complete Dentures: Helpful Hints
*Author: Joseph J. Massad, D.D.S.
Dr. Joseph Massad has just released the long-awaited sequel to his popular videotape, Predictable Complete Dentures. As the title implies, Dr. Massad’s new video, Helpful Hints, includes many helpful hints on how to correct problematic denture wearers. Complete with new techniques and simplified old techniques, this video is a must. Dr. Massad recently released series II of his nationally recognized video Complete Predictable Dentures. In this new two-part video, called Helpful Hints, he will share with you countless time-saving and unique techniques that he has learned through his many years of experience. The purchaser of this videotape/DVD Predictable Complete Dentures: Helpful Hints, or single designee, can earn six hours of Continuing Education Credit by correctly answering 80% of the questions of the test. This DVD is not in stock with The Office of Continuing Dental Education, please contact Dr. Joseph J. Massad’s office at 918-749-5600 or online at www.drjoemassad.com to order your copy. The testing fee is $15.00. Reviewed and updates 7/1/10

Difficult Dentures Made Easier: An Alternative To Dental Implants
*Author: Thomas H. Shipmon, Sr., D.D.S.
This very practical video tape series is the Step-by-Step Procedures on how to make denture construction from Impressions to Insertion as well as many helpful hints. Dr. Thomas H. Shipmon, Sr. demonstrates in operatory with live patient proven techniques that are sure to assist dentists, from the beginner to the accomplished practitioner! Practical Methods and Techniques that can easily be adapted to your practice to help you produce quality dentures in HALF the time! The purchaser of this videotape Difficult Dentures Made Easier: An Alternative To Dental Implants, or single designee, can earn five (5) hours of Continuing Education Credit by correctly answering 80% of the questions of the test. The testing fee is $15.00. Reviewed and updates 7/1/10
The Authors

RICHARD S. FINLAYSON, D.D.S., received his dental training at the University of Texas Health Science Center at Houston, Dental Branch in 1975. He entered the Air Force that year for a GPR and later completed training in Periodontics at Wilford Hall Medical Center in 1984 and received his Board Certification in Periodontics in 1987.

DAVID M. GROGAN, D.D.S., M.S.D., graduated from the Baylor College of Dentistry in 1981. He continued his postgraduate training and received his Certificate and MSD degree in Oral and Maxillofacial Surgery from Baylor College of Dentistry in 1986. Dr. Grogan also earned a MS degree in Histology at Baylor in 1978. He is currently an Assistant Professor in the Department of Oral and Maxillofacial Surgery and Pharmacology at the Baylor College of Dentistry, Texas A&M University System Health Science Center in Dallas, Texas.

STEVEN P. HACKMYER, D.D.S., earned his dental degree from New York University College of Dentistry. He is currently, Clinical Associate Professor Department of Developmental Dentistry, University of Texas Health Science Center San Antonio. Dr. Hackmyer earned his dental degree from New York University College of Dentistry.

MICHAELA HUBER, D.D.S., received her dental degree from the University of Texas Health Science Center at San Antonio, Dental School in 1980. She continued with postgraduate training in Oral and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1988. Upon his retirement from the United States Navy in 2002, he joined the faculty in the Department of Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio, Dental School.

ARTHUR H. JESKE, D.M.D., PH.D., received his dental training at Georgia Health Sciences University College of Dental Medicine in 1978. He joined the faculty of the University of Texas School of Dentistry at Houston the same year, later serving as Chair of the Department of Dental Pharmacology (1987-1993) and, subsequently, Chair of the Department of Restorative Dentistry and Biomaterials.

ROBERT P. LANGLAIS, D.D.S., M.S., graduated from McGill University Dental School in Montreal, Quebec, Canada in 1967, and he subsequently completed a one-year pediatric dentistry externship in British Columbia. Dr. Langlais then established his own practice in general dentistry for a brief time. In 1973, he attended Indiana University and obtained his Master of Science degree with advanced training in oral diagnosis, oral medicine and dental radiology. Currently, Dr. Langlais is a Professor for the Graduate Program in Oral and Maxillofacial Radiology in the Department of Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio.

MARK L. LITTLESTAR, D.D.S., received his dental degree from the University of Texas Health Science Center at San Antonio in 1983. Following graduation, he completed a General Practice Residency at Navy Hospital, San Diego, CA. After nine years in the Navy he entered private practice and has been a faculty member at UTHSCSA since 1999. His interests are in restorative dentistry, particularly in the rehabilitation of the terminal dentition using advanced imaging and implant retained prostheses.

JEFFREY C. MABRY, D.D.S., M.S., obtain his dental degree from the University of Oklahoma College of Dentistry in 1980. Dr. Col Mabry) retired from the USAF in October, 2006. During his last USAF tour, he served as the Chairman, Pediatric Dentistry, 59th Dental Squadron, 59th Aeromedical Dental Group, Lackland AFB, TX. He was also serving as the Chief Military Consultant to the USAF Surgeon General for Pediatric Dentistry.

STANLEY F. MALAMED, D.D.S., graduated from the New York University College of Dentistry in 1969. He then completed a dental internship and residency in anesthesiology at Montefiore Hospital and Medical Center in the Bronx, New York before serving for 2 years in the U.S. Army Dental Corps at Ft. Knox, Kentucky. In 1973, Doctor Malamed joined the faculty of the University of Southern California School of Dentistry, in Los Angeles, where today he is Professor of Anesthesia & Medicine.

JOSEPH J. MASSAD, D.D.S., received his dental degree from Loyola University School of Dentistry in 1975. He has practiced in Tulsa, Oklahoma as a general practitioner with a focus on removable complete prosthetics since 1977. Dr. Massad was an associate professor from 1992-2003 at the Pankey Institute in Florida and holds faculty positions at Tufts University School of Dental Medicine in Boston. He also served as a clinical associate professor from 1982 to 1987 at the Michael Cardone, Sr. School of Dentistry in Oklahoma. As of June 2000, he is serving as adjunct associate clinical professor in the Department of Prosthodontics at the University of Texas Health Science Center at San Antonio Dental School. Dr. Massad is an adjunct professor of forensic dentistry for the Oklahoma State University College of Osteopathic Medicine.

HAROLD L. MEADOR, D.D.S., earned his dental degree at The University of Texas Health Science Center at Houston in 1952. He practiced general dentistry for seven years and went onto to graduate training in Periodontics at Baylor Dental College which he completed in 1960. Dr. Meador maintained a practice limited to Periodontics for 37 years in San Antonio, Texas. Although Dr. Meador is retired from his practice, he continues to serve as an Associate Clinical Professor in the Department of Periodontics and Senior Research Fellow in the Center for Health, Economics and Policy at The University of Texas Health Science Center at San Antonio.

THOMAS W. OATES, JR., D.M.D., PH.D., received his D.M.D degree and completed a general practice residency at the University of Pennsylvania in 1983. Dr. Oates maintained a private practice in Philadelphia, Pennsylvania from July 1984 to June 1989, after which he returned to academics at the Medical College of Virginia and the University of Pennsylvania School of Dental Medicine.

NORMA OLVERA, D.D.S., M.S., obtained her dental degree from The University of Texas Health Science Center at San Antonio in 1987. She completed her post-graduate training in prosthodontics and received her certification and Master of Science in prosthodontics. She is currently an assistant professor in the Department of Comprehensive Dentistry at the University of Texas Health Science Center at San Antonio.
DUBRAVKO PAVLIN, D.M.D., M.S.D., Ph.D., received his dental degree and Master's degree from the University of Zagreb in Croatia. He trained in the clinical specialty of Orthodontics and obtained his PhD in Biomedical Sciences at the University of Connecticut. Dr. Pavlin is currently a Professor for the Department of Developmental Dentistry at The University of Texas Health Science Center at San Antonio, Dental School.

DAVID L. ROBERTS, D.D.S., PA, received his doctor of dental surgery degree from the University of Illinois Dental School. He then spent two years in a dental residency at the University Of Texas Health Science Center in San Antonio. During this residency he received training in dental and implant surgery as well as sedation procedures.

JOHN D. RUGH, PH.D., Director of the Evidence Based Practice Program, received his Ph.D. from the University of California at Santa Barbara and completed four years of postdoctoral training at Claremont Graduate School. He founded and served as Director of the School's Facial Pain Clinic (1978-2003). He also served as Director of Research for the Dental School (1991–97), and Chair of the Department of Orthodontics (1996-2010).

JACK I. SHIRLEY, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio in 1979. He has maintained a private practice in San Antonio, Texas for over twenty years. Dr. Shirley has been associated with the Pankey Institute in Key Biscayne, Florida for eighteen years. He has served as Associate Faculty for thirteen years and is President of the Board of Trustees and a member of the Board of Directors. Dr. Shirley has been selected to represent the Pankey Institute through its speakers Bureau and can be heard through the national at numerous dental meetings speaking about Pankey philosophy, techniques, and the effectiveness of comprehensive care dentistry. He has a passion for dental education and a strong desire to help dentists reach their full potential.

THOMAS H. SHIPMON, SR., D.D.S., Professor Emeritus of Prosthodontics School of Dentistry, University of Tennessee, Memphis, Tennessee.

MATT W. SPAHN, ESQ., the founder and principal of the law firm that bears his name, Matt W. Spahn is glad to be a leader in estate, tax and business planning. For almost twenty years he has focused on the needs and desires of his clients who he counsels and advises in the creation and execution of their wills, trusts, powers of attorney, directives to physicians and in the creation and execution of their corporate plans.

JENNIFFER de ST. GEORGES, founder of JdSG International Inc., and has gained a well deserved reputation for providing dentists and their teams the ‘nuts & bolts’ of effective dental practice management. Her logical, bottom line approach and motivational manner has won her a loyal fan base around the world. Whether attending a Jenny ‘on stage’ program or listening to a CD audio programs or tele-seminar or webinar, Jenny inspires the listener to commit to making needed changes to practice dentistry in a stress free, productive and profitable environment.

SAMUEL M. STRONG, D.D.S., graduated from Baylor College of Dentistry in 1974. He has been a general practitioner in Little Rock, Arkansas since 1976, focusing his private practice on cosmetic, implant restorative dentistry, and sleep apnea. Dr. Strong has been involved with the restorative phase of endosseous implants since 1988 and has experience with unilateral, bilateral and anterior fixed/detachable restorations.

MONA L. THIBADEAU, R.D.A., C.D.A., B.A., is a Dental Assistant graduate from the United States Air Force in 1973. She has vast experience in multiple aspects of the dental assisting field and enjoys teaching and working with students. She acquired her work life experience in dental organizations throughout the Military and Civilian sectors. Ms.Thibadeau's experience includes prosthodontics, oral and maxillofacial surgery, general dentistry, endodontics, and office management. Ms. Thibadeau is a Dental Instructor at San Antonio College of Medical and Dental Assistant where she has taught since 1998. Ms. Thibadeau is a Texas Registered Dental Assistant; Certified Dental Assistant and CPR Facility Instructor certified by the American Heart Association, Radiation Safety Officer, OSHA and Safety Coordinator.

GEZA T. TEREZHALMY, D.D.S., M.A., received his D.D.S. degree from Case Western Reserve University in 1971, continuing with his postgraduate training from 1975 to 1977 and obtaining a Certificate in Oral Medicine from the National Naval Dental Center. In 1987, he obtained his M.A. degree in Higher Education and Human Development from The George Washington University. Dr. Terezhalmy is the Endowed Professor in Clinical Dentistry in the Department of Comprehensive Dentistry with a cross appointment in the Department of Pharmacology in the Graduate School of Biomedical Sciences at The University of Texas Health Science Center at San Antonio.

ERNEST E. VALDEZ, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio, Dental School in 1993. He pursued a two year General Practice Residency at The University of Texas Health Science Center at San Antonio which he completed in 2001. Dr. Valdez is currently an Assistant Professor in the Department of Oral and Maxillofacial Surgery at the Dental School and maintains a practice at the UTHSCSA Dental School's Dental Faculty Practice Clinic.

EDWARD P. 'JOE' WALLER, JR., D.D.S., J.D., received his dental degree from St. Louis University School of Dentistry in 1969. He maintained a private practice in general dentistry from 1971 to 1987 in San Antonio, Texas. Subsequently, Dr. Waller went on to pursue a law degree, which he attained in 1990 at St. Mary's University School of Law in San Antonio, Texas. Currently, he is an attorney with the law firm of Brin & Brin in San Antonio, Texas.

EDWARD F. WRIGHT, D.D.S., M.S., MAG.D., received his dental degree from Case Western Reserve University in 1977. After practicing general dentistry for ten years, he was selected and attended the Air Force’s 1-year Advanced Clinical Dentistry Program. In 1992, Dr. Wright entered the 2-year TMJ and Craniofacial Pain Program at the University of Minnesota. He received his MS degree in 1994. From 1994 to 2001, he was the head Air Force dentist for TMD and on the staff at Lackland AFB’s 2-year general dentistry residency program. Dr. Wright provided the TMD training for all of the base’s AEGD, Prosthodontics, Periodontics and Orthodontics residents and has had over 100 residents rotate through his TMD Clinic.
TDA ADVISES DENTISTS TO FOLLOW TSBE RULES TO THE LETTER. TSBE Rule 108.24(b)(5) states: “Sterilization equipment and its adequacy shall be tested and verified in accordance with the American Dental Association (ADA) Recommendations.”

ADA and CDC RECOMMEND WEEKLY VERIFICATION AND DOCUMENTATION OF INSTRUMENT STERILIZATION (i.e. sterilizer monitoring) on each sterilizer. Sterilization of high-speed dental hand-pieces between patients is now recommended by CDC, ADA, FDA and required by at least some state dental boards.

Biological monitors are recognized as the best indicator of the presence or absence of living microorganisms. Biological indicators are used to challenge sterilizers and are the only devices, which, can integrate all process parameters required for sterilization. Those parameters measured include: temperature, time, degree of steam saturation, degree of steam purity, penetration of sterilant through obstacles such as wrapping, trapped air, and other goods being sterilized. Results of laboratory tests serve as a tangible record as well as a legal device where proof of sterilization must be provided.

The Board of Directors of the Dental School Alumni Association provides a sterilizing monitoring service. The money from the use of this service has two benefits: one-the product and the service, and two-to support programs benefiting dental students and alumni. You do not need to be a member of the Dental School Alumni Association to participate in the Sterilizer Monitoring Service.

Our spore strip kits can be used in steam, chemical vapor, dry heat and ethylene oxide gas sterilizers. Each kit contains two (1) test strip to confirm sterile conditions throughout the chamber, and one (1) control strip to guarantee accurate results, and a return mailer for confirmation of test results. The culturing service is included in the price of the kit.

Culture reports are mailed on a quarterly basis. In the event that you have a positive culture result you will be notified immediately by phone and a laboratory report will be sent to you.

Remember to place your spore monitoring kit in a fully loaded sterilizer with regular wrapped instruments.

Before you begin, you should be aware of the most common problems resulting in positive culture results:

• Overloaded chambers
• Failure to preheat the sterilizer
• Improper cleaning of items before sterilization

• Setting the time and/or temperature too low
• Interruption of the cycle
• Tightly wrapped packages.

We look forward to your participation in this program.

Dental Hygiene Mission

The mission of the Division of Dental Hygiene is to promote wellness by improving oral health in local, regional, national and international communities through innovative learner-centered education, quality service and patient care, and integrated research.

Dental Hygiene Continuing Education

Whether you’re seeking continuing education for relicensure, certification, re-entry into the workplace or simply to enhance your career and enrich your life, our mission is to provide quality, innovative, lifelong learning opportunities.

Turn the page for Dental Hygiene continuing education opportunities!
COURSE DESCRIPTION:
Designed for the dental hygienist re-entering the profession, the participant will have the opportunity to review infection control procedures, practice radiographic techniques, and refresh basic clinical instrumentation and advanced clinical skills. An update on the latest periodontal theories and classifications will also be addressed. Course instructors design the materials to meet the participant’s individualized needs. Dates and times are determined based on participant’s needs and convenience as well as instructor availability.

COURSE TOPICS:
Radiographic Technique
• Gain an appreciation for radiographic principles.
• Provide instruction, demonstration and hands-on session in the exposure of a full-mouth series of radiographs on a manikin.
• Provide instruction, demonstration and hands-on session in the exposure of horizontal and vertical bite-wing radiographs on a manikin.

Assessment Review
• Provide review of pertinent literature related to periodontics, instrumentation and clinical therapies.
• Conduct a head and neck examination in order to detect any potential abnormalities.
• Conduct a periodontal assessment to include measurement of sulcus, recession, mobility and furcations.

Infection Control
• Provide an update on OSHA standards.
• Discuss the principles for infection control to include, bloodborne pathogens, hazardous waste and general safety.
• Provide an understanding of the methods of breaking the cycle of infection and the elimination of cross contamination.

Advanced Clinical Techniques and Equipment
• Discuss, demonstrate and provide a hands-on session on advanced instrumentation to include root planing theory and technique.
• Provide a demonstration and hands-on session on ultrasonic instrumentation to include manual and auto-tuned equipment.
• Provide a demonstration and hands-on session on air abrasive polishing.
• Provide update on the newest available instruments in the market place.
Application of Pit and Fissure Sealants • A Certification Course for Dental Assistants
January 17-18, 2013

COURSE DESCRIPTION
This two day course meets Texas State Board of Dental Examiners Rule 114.3 which states that a dental assistant wishing to obtain certification must complete a minimum of 16 hours of clinical and didactic education in pit and fissure sealants taken through a CODA accredited dental hygiene program approved by the Board. Course of instruction includes:

- Microbiology and infection control
- Patient management and medical emergency considerations
- Dental anatomy, sealant products, techniques and placement
- Ethics and jurisprudence related to pit and fissure sealants

The laboratory and clinical portions of the course will provide the participant with:

- Experience in securing a dry field
- Ergonomic considerations
- Placement of dental sealants with light and chemical cured products on extracted teeth in a laboratory setting
- Placement of at least 6 pit and fissure sealants and topical fluoride on a patient that has been prescreened for sealant placement

Please Note: PARTICIPANTS MUST PROVIDE THE PATIENT

Rule 114.3 also states that dental assistants must also have at least two years of dental assisting experience and show successful completion of current course in basic life support (AHA, ARC).

Applicant must have proof of malpractice insurance (may be obtained through Seabury & Smith (1-800-503-9230) and current CPR certification. Presenters provide a friendly and relaxing learning environment. Special attention is given to the hands-on instruction.

Location: The University of Texas Health Science Center at San Antonio
Program Time: 8:00AM-4:00PM
Tuition: $495, includes lab, clinical, handouts and study materials
Credit: 16 hour certification course

Full refund of tuition will be honored if cancellation is provided on or before three weeks prior to course. You may print the following registration form, complete and fax to 210-567-3830, or send by mail with payment:

Coronal Polishing for the Dental Assistant
August 10, 2012, October 26, 2012 or February 8, 2013

OVERVIEW
This program offers 8 hours of clinical and didactic education required by the Texas State Board of Dental Examiners for certification in coronal polishing. This course will include: Oral Anatomy; Tooth morphology; Indications, contraindications and complications for coronal polishing; Infection control procedures; and Jurisprudence relating to coronal polishing. The laboratory and clinical activity will include: training in using a slow-speed hand piece; principles of coronal polishing; armamentarium; operator & patient positioning, polishing technique, polishing agents; and polishing coronal surfaces of teeth. This course is offered through the Department of Dental Hygiene at The University of Texas Health Science Center at San Antonio in collaboration with San Antonio College Dental Assisting Program and is a TSBDE APPROVED & ACCREDITED COURSE. In order to obtain your certification the State also requires at least 2 yrs as a dental assistant.

OBJECTIVES
• State the effect polishing has on the patient, environment, teeth and gingival tissues.
• Identify indications for polishing the teeth.
• Discuss contraindications for polishing the teeth.
• Distinguish between abrasion, abrasive and polishing.
• Identify the characteristics of abrasive particles.
• Determine how particle size/shape, speed, and pressure affect abrasiveness.

PRESENTERS
LYNN SMILEY, R.D.H., B.A., is a clinical instructor in the Department of Dental Hygiene at the University of Texas Health Science Center at San Antonio. She has 25 years of experience as a dental hygienist. Currently, she is the course director for Introduction to Clinical Theory, PreClinical Dental Hygiene, Clinic I and Clinic I Seminar. As the Junior Year Clinic Coordinator, Ms. Smiley is responsible for the clinical experience of students in their first semester of patient care. In addition to her teaching activities, she presents continuing education courses for the Department of Dental Hygiene. Her areas of expertise are fundamentals of instrumentation, infection control protocols, tobacco cessation and the use of dental materials by the dental hygienist. She also provides continuing education courses to dental assistants for certification in the application of pit and fissure sealants and coronal polishing.

REGISTRATION INFORMATION

Telephone Number: (210) 567-3177 • Fax Number: (210) 567-6807 • Web: http://smile.uthscsa.edu

PRE-REGISTRATION: Pre-registration for all courses is nec-
essary. It is beneficial for participants to preregister for a course as the course packet will be available for them at final check-in. Please call the Office of Continuing Dental Education at (210) 567-3177 to preregister for a course or mail the registration form with your check made payable to “UTHSCSA” to:

UTHSCSA
Continuing Dental School
MSC 7930
7703 Floyd Curl Drive
San Antonio, Texas 78229-3900

The Office of Continuing Dental Education cannot be held responsible for the cost of a nonrefundable airline ticket or flight change in the event of a course cancellation or the rescheduling of the program.

Upon registering in any Continuing Dental Education activity, the participant agrees that the University of Texas Health Science Center at San Antonio and its affiliates, and all personnel associated with the program are not responsible or liable for any injury or other damages sustained by the attendee in connection with the scheduled activity, and the participant hereby releas-es each of them from any claims against them arising directly or indirectly from any such injury or damage.

The registered participant grants permission to the Office of Continuing Dental Education (and its designees and agents) to utilize the participant images, likeness, actions and/or statements in any live or recorded audio, video, or photographic display or other transmission, publication, or reproduction made of, about, or at, the activity, without further authorization or compensation.

Participants may not use video or audio recording devices during the course or scheduled event. Registering for any Continuing Dental Education activity constitutes acceptance of these terms.

PAYMENT BY CHECK: To hold your space in any of the continuing education programs, please provide credit card infor-
mation when preregistering. If payment by check is desired, the credit card will not be charged, but will be “on hold” until the check is received by the Office of Continuing Dental Education.

PAYMENT BY CREDIT CARD: MasterCard, Visa, or Discover Card only.

ON-SITE CHECK-IN: Please check details of each course for designated time and location of course check-in. Participants can pick up packets one hour prior to the beginning of the course. Same day walk-in enrollments will be accommodated on a space-available basis.

CONFIRMATION: Your registration confirmation will be mailed from our registrar within 5-7 working days upon receipt of pay-
ment. You will also receive a listing of nearby hotel accommodations. Payment must be accompanies with final confirmation letter designating it. If you must cancel your registration, please notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that a refund may be con-
sidered. A cancellation made prior to the start of the program will be subject to an administrative fee assessment of $60.00. Any cancellation made one week or less prior to the course does not qualify for a refund. However, participants may choose to place their tuition minus an administrative and direct cost fee assessment into a holding account for future use. No Show will not qualify for refunds. Written notification is required within five business days by mail, fax, or e-mail to initiate the refund process. Please allow four to six weeks for all refunds. Specific refund policies apply to all on-site programs. Contact our office for specific refund policy regarding any course.

CONTINUUM, PARTICIPATION, DENTAL STUDY CLUBS, AND MULTIPLE SERIES REFRUND POLICY: If you must cancel your registration, please notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that a refund may be considered. Due to commitments to these type of programs, any cancellation made prior to the start of the program will be subject to an administrative fee assessment of $160.00 plus any applicable nonrefundable deposits. Any can-
cellation made one month or less prior to the course does not qualify for a refund. However, participants may choose to place their tuition minus an administrative, applicable nonrefundable deposits, and any direct cost fee assessment into a holding account for future use. No Show will not qualify for refunds. Written notification is required within five business days by mail, fax, or e-mail to initiate the refund process. Please allow four to six weeks for all refunds. Specific refund policies apply to all on-site programs, study clubs, and on-going series programs. Contact our office for specific refund policy regarding any course.

TO REQUEST A REFUND: If you must cancel your registration, please notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that your refund may be considered. Written notification is required within five business days by mail, fax, or e-mail to initiate the refund process. A written request is required to process any refund or transfer. Contact our office for specific refund policy regarding any course.

INTERACTIVE WEB COURSE REFUND POLICY: If you must cancel your registration, please notify the Office of Continuing Dental Education by sending us an e-mail at smile@uthscsa.edu with your User Code and course title before the START DATE indicated so that your refund may be con-
sidered. Cancellations made after the START DATE, will be sub-
ject to an administrative and direct cost fee adjustment. No ref-
unds will be given after the completion of the first chapter, re-
gardless of START DATE.

COURSE CHANGES/CANCELLATION: The Office of Continuing Dental Education reserves the right to: (1) limit regis-
tration; (2) refuse admission by refunding the course fee; (3) change course content, date, and time; (4) change the course faculty; (5) change the course location; (6) change the course content or faculty and such change will not entitle the reg-
istered participant to a refund; (7) cancel any course no less than one week prior to the course; (8) change or add circumstances make this necessary, at which time registered participants will be notified by telephone using the number provided on the registration form; (9) remove the participant from the premises if the patron’s con-
duct endangers or disrupts other attendees, speakers, or staff.

CONCERNS, COMPLAINTS & SUGGESTIONS: To assure an optimal educational experience, the Office Of Continuing Dental Education encourages course participants, faculty and staff to register concerns, complaints or suggestions for improvement. If a concern, complaint, or action to warrant a fair and expeditious review, contact the Office of Continuing Dental Education for the appropriate form. Concerns or complaints against a CE provider may be directed to the provider or to ADA CERP at www.ada.org/goto/cerp.

GENERAL REFUND POLICY: If you must cancel your registra-
tion for any type of continuing dental education course, please notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that a refund may be con-
sidered. A cancellation made prior to the start of the program will be subject to an administrative fee assessment of $60.00. Any cancellation made one week or less prior to the course does not qualify for a refund. However, participants may choose to place their tuition minus an administrative and direct cost fee assessment into a holding account for future use. No Show will not qualify for refunds. Written notification is required within five business days by mail, fax, or e-mail to initiate the refund process. Please allow four to six weeks for all refunds. Specific refund policies apply to all on-site programs. Contact our office for specific refund policy regarding any course.

OFF SITE (PARTICIPATION & LECTURE) COURSE POLICY: If you cannot attend an off-site course you have registered for, you must notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that a refund may be considered. A cancellation made prior to the start of the program will be subject to an administrative fee assessment of $60.00. Any cancellation made one week or less prior to the course does not qualify for a refund. However, participants may choose to place their tuition minus an administrative and direct cost fee assessment into a holding account for future use. No Show will not qualify for refunds. Written notification is required within five business days by mail, fax, or e-mail to initiate the refund process. Please allow four to six weeks for all refunds. Specific refund policies apply to all on-site programs. Contact our office for specific refund policy regarding any course.

TWO STEP INSTANT SAVINGS: Two Step Instant Savings does not apply to any course that has already been discounted. This discount does not apply to Continuum, Dental Study Clubs and Multiple Series courses. Register within 60 days of the course and receive a 20% discount. Register within 30 days of the course and receive a 15% discount. These courses are non-refundable. However, participants may choose to place their tuition minus an administrative and direct cost fee assessment into a holding account for future use.

TEXAS BRIEF: Unless enrolling in consecutive Texas Brief courses, no lunch is provided.

DOCUMENTATION OF COURSE CREDIT HOURS: A $10.00 administrative fee will be charged for requests of documentation of continuing dental education course credit hours. A written request must be accompanied with payment. All participants are provided an official statement of attendance at the time of the course. This document is acceptable by the IINS and Texas State Board of Dental Examiners as proof of attendance to the course. Course attendance is finalized at the completion of individual sessions or programs. Any requested audit by state dental boards will require participant authorization to release information.

CREDIT: The University of Texas Health Science Center at San Antonio, Dental School Continuing Dental Education Program is designated as a recognized provider by the Continuing Educa-

tion Recognition Program (CERP) conducted under the auspices of the American Dental Association. The formal continuing dental education courses are accepted for Fellowship/Mastership and membership maintenance credit by the Academy of General Dentistry.

Dentist: All courses are acceptable for credit by the Academy of General Dentistry and are offered in cooperation with the Texas Dental Association and the American Dental Education Association.

Dental Technician: Courses are approved for documented credit hours by the National Board for Certification.

Auxiliary: Courses are approved by the Texas Dental Hygienists Association and the Dental Assisting National Board, Inc.

Individuals should consult with their State Boards regarding recognition of courses acceptable for relicensure.

EMERGENCY CONTACT: Telephone numbers for the Office of Continuing Dental Education 210-567-3177. To contact a participant in the event of an emergency and there is not an answer, call the University Police at (210) 567-2800.
