Please share this publication with the entire Dental Office!
William O. Butler Endowment for Dental Research

UT Health San Antonio School of Dentistry is raising funds that will grow a new endowment supporting research. This endowment will help finance various research projects for students and if beneficial, support other research funded areas. Financial assistance will also be available for travel expenses and registration fees at conferences where the research results will be presented. This endowment will also support the Annual School of Dentistry Science Symposium. Any size donation is welcome.

The endowment is named after William O. Butler, internationally known Continuing Dental Education Director at UT Health San Antonio School of Dentistry. His 27-year career in dental continuing education was focused on programs that were scientific based.

Bill was the Director of Continuing Dental Education and Alumni Affairs from 1994 to 2017. At the time of his retirement, he was the longest continuous director in a dental school in the United States, having served four years at UMKC prior to San Antonio.

William Oliver Butler received his B.S. in 1972 and his M.S. in 1974. Both degrees were awarded by Kansas State University in Manhattan, Kansas. Bill Butler entered the dental field as Director at the University of Missouri - Kansas City School of Dentistry in November 1990. At the time of hiring, Bill was one of the first non-dental degree, non-Ph.D. directors at a major US dental school. In August 1994 Bill accepted the Director’s position for Continuing Dental Education at The University of Texas Health Science Center San Antonio.

Each year the CE office provides more than 250 educational program opportunities, registers over 12,500 participants annually, and has an active database of over 117,000 dental professionals that have chosen San Antonio to provide them with their lifelong learning experiences. That says a lot for a school that has a little over 4,000 graduates at the time of Bill’s retirement. The CE program was nominated for consideration for the prestigious Gies Award in 2016.

Bill has been very active over the past twenty-seven years serving our dental profession in many capacities:

- Active Member American Dental Education Association (ADEA)
- Served in an active position of two sections, Continuing Dental Education & Development and Alumni Affairs for 23 straight years
- Recipient of the 2013 ADEA Presidential Citation and the 2016 Chair of the ADEA Board of Director’s Citation
- Associate Member American Dental Association (ADA)
- Past CERP committee member (ADA) and served extra year as a Consultant to CERP committee (ADA)
- Past Continuing Education Provider Recognition (CCEPR) Appeal Board Member (ADA)

He has been recognized and honored by several dental organizations:

- Honorary Member International College of Dentist (ICD)
- Honorary Member San Antonio District Dental Society
- Honorary Member Omicron Kappa Upsilon (OKU)
- Honorary Member Academy of Dentistry International (ADI)

I wish to make a donation to the: William O. Butler Research Endowment

A salute to the Kenneth D. Rudd Award Recipients

In 1974 the Office of Continuing Dental Education began fulfilling the Health Science Center mission by offering lifelong learning programs. While the first graduating classes were under the auditorium attending classes we were conducting our first CE courses in the newly built Dental School. Please join us on campus at one of our programs.

All KDR recipients will receive 5% off the full tuition of any Spring course at the Health Science Center January through May 2017.

We are now recognizing two new levels of the Kenneth D. Rudd recipient award categories; Honoring JoAnne T. Hayashi and Rebecca S. Nixon

JoAnne T. Hayashi recipient - 500-749 CE hours receive 8% off the full tuition of any Spring course at the Health Science Center.

Rebecca S. Nixon recipient - 750-1,000 CE hours receive 10% off the full tuition of any Spring course at the Health Science Center.

Over 3250 dental professionals have taken over 100 hours of CE from us since 1974.

Dr. Kenneth D. Rudd Continuing Dental Education Participant Award...

Dr. Kenneth D. Rudd is Professor Emeritus Department of Prosthodontics, and former Associate Dean for Continuing Dental Education at The University of Texas Health Science Center at San Antonio, School of Dentistry. He was an internationally renown prosthodontist and was recognized for his participation in numerous dental organizations. He had dedicated more than 50 years to the field of dentistry. He was working on specifications for dental materials for the American National Standards Institute/ADA. Your patronage to our continuing dental education courses allows us to continue to recognize his outstanding contributions.

The Kenneth D. Rudd Continuing Dental Education participant who have acquired at least 100 continuing dental education hours of courses as an attendee or presenter sponsored by the Office of Continuing Dental Education at The University of Texas Health Science Center at San Antonio, School of Dentistry.

JoAnne T. Hayashi Continuing Dental Education Participant Award...

JoAnne T. Hayashi, M.A., a native of San Francisco, California, received her Bachelor of Arts degree in Liberal Arts from the University of California at Berkeley in 1960 and Master of Arts degree in Education from Stanford University, Palo Alto, California in 1961. While at Stanford, she was a member of Pi Lambda Theta, Upsilon Chapter, Honor Society for Women in Education. Prior to joining the Office of CDE, JoAnne assisted in coordinating a continuing education program funded by a grant under the direction of Continuing Education Services at the Health Science Center in 1979. The multi-disciplinary program, A Challenge: Delivering Health Care to the Mexican-American Population in Border Communities, was presented in locations at McAllen, Del Rio, and Laredo, Texas.

In 1980, Ms. Hayashi joined the Office of Continuing Dental Education at the School of Dentistry, reporting to Dr. Kenneth D. Rudd, Associate Dean for Continuing Dental Education until his retirement in 1993. Subsequently, Mr. William O. Butler followed as Director of Continuing Dental Education. In 1985, she was one of the recipients of the Employee Excellence in Service Award presented by The University of Texas Health Science Center at San Antonio.

She retired in January 2006 after 27 years of service as Conference Coordinator, and has spending more time with her six grandchildren who reside in Austin, Texas, Carlsbad, California; and Lakeland, Florida and has been working on a list of ever growing projects, activities, and hobbies.

JoAnne T. Hayashi Continuing Dental Education participant who have acquired at least 500-749 continuing dental education hours of courses as an attendee or presenter sponsored by the Office of Continuing Dental Education at The University of Texas Health Science Center at San Antonio, School of Dentistry. As a recipient of the JTH Award, the participant will be eligible to receive 8% off the full tuition of any Spring course January through the end of May.

If you feel we have miscalculated your hours, please contact our office so we can research your past attendance records.

Rebecca S. Nixon Continuing Dental Education Participant Award...

Rebecca S. Nixon, was hired in the Office of Continuing Dental Education in October 28, 1981 as an Administrative Clerk in the Office of the Dental Dean.

A loyal and hard working employee, Becky has remained in the Office of Continuing Education, despite other offers both internally and externally to entice her away. It has always been obvious that she had chosen a career in lifelong learning. Becky worked long hours, was willing to accept and learn new responsibilities, always was willing to be the “volunteer”, and accepted any challenge that was thrown her way. Her career path moved her through the various promotions steps to her current position. Through out her entire career, she has remained committed to making a difference for members of our office, dental school staff and students, and the dental professionals worldwide. Becky has had a vital role in introducing over 84,000 dental professionals, more than 600 internationally known speakers, and over 3,700 alumni to our Dental School.

Becky was promoted to Office Manager in May of 2007 after having served as Administrative Assistant II to the Director since the First of September 1997.

Ms. Nixon’s promotion to Office Manager was largely due to her increased responsibilities and willingness to provide oversight to the Dental School Alumni Association. On September 1, 2002 the Office of Continuing Dental Education was charged with the responsibility of managing the affairs of the Alumni Association. With Becky being the key contact to the alumni of our School of Dentistry.

Becky’s oversight was best described “extremely successful for the Alumni Association” as we continued to maintain our budget goals, establish reserves, and for the first time made plans to use our resources to support the School of Dentistry efforts to meet budget reductions and also enable us to remain solvent in the future. Becky was instrumental in helping establish our strategy and her efforts have worked extremely well; as we have been able to recover all our costs, and stabilize our monthly cash flow.

After 36 years of loyal service to the Office of Continuing Education and the Health Science Center, Becky retired on August 31, 2017. At the time of her retirement Ms. Nixon was recognized as the longest continually employed CE professional at a Dental School nationally.

The Rebecca S. Nixon Continuing Dental Education participant who have acquired at least 750-1000 continuing dental education hours of courses as an attendee or presenter sponsored by the Office of Continuing Dental Education at The University of Texas Health Science Center at San Antonio, School of Dentistry. As a recipient of the RSN Award, the participant will be eligible to receive 10% off the full tuition of any Spring course January through the end of May.

If you feel we have miscalculated your hours, please contact our office so we can research your past attendance records.

Walt Disney once said

“You can dream, create, design and build the most wonderful place in the world…
But it requires people to make the dream a reality”

The above five individuals worked together over a thirty year period and helped Dr. Hollers bring his dream to a reality.

They have passed the torch of responsibility to the new generation of dental professionals.
We now must continue to further build upon their dream.

I wish to make a donation to the: James P. Hollers Memorial Lectureship Endowment
on behalf of these pioneers for dental education

☐ Dr. James Bauerle  ☐ Dr. Claude Nabers  ☐ Dr. James Hollers  ☐ Dr. Billy Rigsby  ☐ Dr. Kenneth Rudd

JAMES E. BAUERLE, D.D.S., M.S., was born September 24, 1923, in Hamilton Pool, Texas. He received his D.D.S. from St. Louis University School of Dentistry in 1946. Bauerle specialized in Oral Surgery and received his M.S. in Oral Surgery from the University of Pittsburgh School of Dentistry in 1950. He was appointed by Governor Preston Smith in January, 1973, to serve as a Regent of The University of Texas System for a six-year term. James E. Bauerle, D.D.S. passed on February 6, 2007.

CLAUDE NABERS, D.D.S. was the first Distinguished Lecturer at The James P. Hollers Memorial Lectureship on November 2, 1984. The program was held in the Auditorium at The University of Texas Health Science Center at San Antonio. His dental career began in 1946 when he graduated from the University of Texas School of Dentistry, Houston and later received his MSD at the Northwestern University Dental School in 1949. He has played an integral part in the development of The University of Texas Health Science Center at San Antonio. Dr. Nabers was a member of its Development Board from 1989 to 1994.

JAMES P. HOLLERS, D.D.S. graduated from Tulane College with his dental degree in 1924, and soon re-located to San Antonio, Texas. He became the driving force to establish a major health science center presence for South Texas. One of the turning point events in the long history of San Antonio took place on June 5, 1969 in front of the Alamo under the blazing south Texas sun. Preston Smith, Governor of Texas, signed the legislative bill that authorized the construction of the Dental School in San Antonio as well as the Nursing School and The University of Texas at San Antonio. Proudly looking on, just over Governor Smith’s shoulder, was Dr. Jim Hollers, who on that day saw his twenty year campaign to bring not only a Dental School, but also an entire Medical Center Complex to San Antonio, transformed from dream to reality.

Without a doubt, the history of Medical Education in South Texas and what we now know as the South Texas Medical Center is intertwined with the history of Dr. Jim Hollers. If it’s true that every great enterprise requires the right person, in the right place, at the right time ... then Dr. Jim Hollers was the right person, in the right place, at the right time for San Antonio.

BILLY E. RIGSBY, D.D.S. was born November 7, 1930, in San Augustine, Texas. Dr. Rigsby attended The University of Texas Dental School in Houston, where he graduated with honors in 1958. He was given the opportunity to join four other Dentists to start The University of Texas Dental School in San Antonio, Texas where he served as Associate Dean for Clinical Affairs. He played a major role in the design of the dental school. Billy Edward Rigsby, D.D.S. passed on June 11, 2005.

KENNETH D. RUDD, D.D.S. was born on February 10, 1916 in Marion, Kansas. Dr. Rudd received his DDS degree in 1943 from the University of Missouri School of Dentistry at Kansas City. Dr. Rudd was hired by the University of Texas Health Science Center in San Antonio in 1974, as a tenured full professor in the Department of Prosthodontics and later became Associate Dean of Continuing Education until his retirement in 1994. Kenneth Dielman Rudd, D.D.S. passed on June 14, 2013.

(210) 567-3177 http://smile.uthscsa.edu 5
OBJECTIVES

- Discuss specific restorative planning principles for partially dentate and edentulous patients
- Identify causes of dental implant failures
- Explain restorative thinking in preventing implant failures
- Experience a detailed hands-on session with restorative components
- Leave the course knowing basic implant restorative principles and ready to get started!

OVERVIEW

The lecture will cover comprehensive restorative planning in implant dentistry. The presenter will discuss restorative options to implant success (What has worked/What has not!) and cover clinical case presentations. In addition, the speaker will discuss how to enhance confidence restoring dental implants, as well as, providing better service to our patients.

PRESENTER

NORMA OLVERA, D.D.S., M.S.

Dr. Olvera has been in full-time private practice as a prosthodontist in Houston, Texas for the past 20 years. She has extensive experience in the area of oral rehabilitation involving all facets of reconstructive dentistry with and without dental implants.

Evaluation and Management of Pediatric Facial Swellings

JEFFREY C. MABRY, D.D.S., M.S.

OVERVIEW

Untreated dental caries and dental trauma can have devastating, and even life-threatening, consequences. Over 50% of pediatric facial swellings are from odontogenic origin. This course will review:

- Background info on pediatric facial swellings
- Clinical assessment of pediatric facial swellings, including: classification, challenges, and five significant "Red Flags"
- Clinical management of pediatric facial swellings, including: treatment philosophy, key treatment principles, non-surgical management, surgical management

OBJECTIVES

Upon completion of this course, participants will be able to:

- Recognize the consequences and potential complications of facial swellings in children
- Discuss the classification system for facial swellings based on origin, location and severity
- Recognize the most common non-odontogenic causes of pediatric facial swellings
- Recognize the most common facial spaces involved in pediatric odontogenic infections
- Understand the systematic approach used to assess children presenting with facial swellings
- Identify the 5 significant "red flags" frequently associated with pediatric facial swellings
- What drives the decision for hospital admission
- Discuss the core principles of non-surgical (pharmacologic) treatment
- Discuss the core principles of surgical treatment

PRESENTATION

JEFFREY C. MABRY, DDS, MS

Dr. Mabry retired from the USAF in October 2006. During his last USAF tour, he served as the Chairman, Pediatric Dentistry, 59th Dental Squadron, Lackland AFB, TX. He served as the Chief Military Consultant to the USAF Surgeon General for Pediatric Dentistry. Dr. Mabry serves as a Professor at UT Health San Antonio, Department of Developmental Dentistry and is the Director of the Dental Center at the Children's Hospital of San Antonio.

Texas Brief AM
Achieving Predictable, Clinical Outcomes For Restorative Success
Utilizing Conventional & Digital Dentistry
ROBERT P. MARBACH, B.A., C.D.T.

OVERVIEW
This lecture will discuss and illustrate the latest in CAD/CAM digital technology relating to you, your assistant, and your lab. Identify the basics of occlusion and how it relates to the success of anterior restorations and full mouth rehabilitation. Facing the esthetic challenges in your practice to decide today what type of restoration is best for your patient. View clinical secrets on preps, temps, impressions, cords, cements and why shade selection is difficult and how to get it right the first time.

OBJECTIVES
• Identify the problems associated with color and lighting and how to improve our shade-taking ability
• Trouble shoot impression techniques and materials to get perfect impressions
• Apply the communication tools needed to achieve optimal results between you and the lab
• Understand the basics of occlusion in restoring anterior teeth.
• Know what questions to ask and tools required to achieve excellent anterior esthetics.
• How to end the #1 problem that labs see.
• Learn why 92% of impressions have bad margins

PRESENTER
ROBERT P. MARBACH, BA, CDT is the founder and owner of Authentic Dental Lab in San Antonio, TX. He is a past Board of Director at The Pankey Institute. Mr. Marbach is a Board Certified Dental Technician currently working on his Masters in dental technology and has over 25 years of dental experience. In 1999 Bob received his Technical Masters in dental technology and has over 25 years of

Texas Brief PM
Occlusion Made Easy
JACK I. SHIRLEY, D.D.S.

OVERVIEW
A walk down occlusion lane is not a walk that we often want to take, but Dr. Shirley advocates, “Give it another chance; it might change your whole practice and the way you practice dentistry”.

This course on occlusion has received rave reviews from dentists around the country. One dentist’s comment was, “This is the first time I have ever understood occlusion, and I have been a dentist for 28 years.” Another dentist said, “Finally, someone is giving me something I can use in my practice.” This is just the beginning. Come join us and see why you are actually going to start enjoying occlusion and are going to be excited about what it will do for your practice.

OBJECTIVES
Topics to be discussed:
• CR vs. CO.
• What is adequate anterior guidance?
• The significance of incline interferences.
• Should we be concerned with condylar guidance?
• How to recognize occlusal disease and what to do about it.
• How to equilibrate and who to equilibrate.
• Splint construction and adjustment.
• Verbal skills that will help you with patient education.
• How to make sure those big veneer cases are functioning properly.

PRESENTER
JACK I. SHIRLEY, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio in 1979. He has maintained a private practice in San Antonio, Texas for over twenty years. Dr. Shirley has been associated with the Pankey Institute in Key Biscayne, Florida for eighteen years. He has served as Associate Faculty for thirteen years and is President of the Board of Trustees and a member of the Board of Directors. Dr. Shirley has been selected to represent the Pankey Institute through its speakers Bureau and can be heard through the national at numerous dental meetings speaking about Pankey philosophy, techniques, and the effectiveness of comprehensive care dentistry. He has a passion for dental education and a strong desire to help dentists reach their full potential.

23rd Annual Longhorn Football Dental Study Club
Austin, Texas

Earn clinical hours toward your annual CDE requirements and enjoy the excitement of college football. Sign up now to hear lectures on pertinent dental topics presented by prominent speakers followed by tail gate meals before attending the home games. Guests are welcome to attend the meal functions and games.

NEW TICKET AND PARKING PASS POLICY

Because of the high demand of football tickets this year, a policy has been established for ordering extra game tickets on a limited basis. All ticket orders are handled on a first-come, first-served basis. Parking passes are limited, we have only enough to provide 1 per family. If more become available, you will be contacted.

Priority Tickets, Priority Seating, and Priority Parking will be given to Season Subscribers.

• Season Subscribers who order the same number of extra ticket(s) for each game will be given priority.
• The Season Subscriber who orders extra ticket(s), but not the same number of tickets for each game, will not be guaranteed that the guest(s) will be seated together.
• Those who register on an individual basis for the series and ordering extra ticket(s), will not be guaranteed that the guest(s) will be seated next to the individual.

Comprehensive Treatment Planning in a Modern Practice

ADAM M. KRISTOFF, D.D.S.

OVERVIEW
This course will cover several comprehensive cases which include a wide spectrum of dentistry. The discussion will involve guiding patients between traditional crown and bridge, endodontics, implant surgery/restoration, Invisalign, and cosmetic dentistry while managing patient health, desires, and realistic outcomes.

OBJECTIVES
- Technology reviewed will include the use of intraoral scanning and 3D CBCT to enhance outcomes.
- Additionally, case presentation to the patient, financing, and how to help patients commit to treatment will be discussed.
- Finally, business based decisions in picking / implementing new technologies, marketing new skills, and business philosophy uncommon to dentistry will be discussed.

PRESENTER
ADAM M. KRISTOFF, D.D.S., received his dental degree at The University of Texas Health Science Center at San Antonio in 2001. He achieved his ADA accredited residency for Advanced Education in General Dentistry in 2003. Dr. Kristoff has a private practice in Austin, TX.

TIME
Check-in: Saturday, five hours prior to kick-off Game: UT vs. Maryland University Royal Texas-Memorial Stadium (kick-off time TBA)

LOCATION

Luncheons for Learning
Mandibular Tissue Supported Implant-Retained Overdentures: A Satisfactory Solution
PEGGY P. ALEXANDER, DDS, MPH

FORMAT
One day a month a speaker discusses a dental topic during lunch. The sessions are informal and the group has an opportunity to interact with the speaker during the short discussion period at the end of the lecture. It requires only about one and one-half hour of your time to learn the latest developments in many areas of dentistry. It also offers the opportunity to become better acquainted with your colleagues and staff since all dental professionals are invited to attend.

OVERVIEW
An implant-retained mandibular overdenture is considered by many to be the gold standard for rehabilitation of the edentulous mandible. This course will describe aspects of treatment planning, surgical preparation and functional loading of the mandibular prosthesis featuring the Locator® retentive system.

OBJECTIVES
- To discuss the rationale for various implant options
- To develop an orderly approach to treatment planning
- To describe preparation techniques required for radiographic and surgical stents
- To clarify various approaches to surgical placement of the implant fixtures
- To demonstrate installation and functional loading of the Locator® abutment.

PRESENTER
PEGGY ALEXANDER, D.D.S., M.P.H., received her DDS degree from Meharry Medical College School of Dentistry in 1981. She also received a Certificate in Dental Hygiene from the University of Alabama at Birmingham in 1987. Dr. Alexander is currently Clinical Professor in the Department of Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio, Dental School. She also serves as a Research Associate the Department of Periodontics at the UT Health Science Center.

Prior to her appointment at The University of Texas Health Science Center at San Antonio, Dental School, she had served the National Health Services Corps, in the United States Uniformed Services and maintained a private practice in San Antonio. Dr. Alexander’s research interests include control of infection, cross contamination in the dental setting, parafunctional habits and their effect on the dentition, and etiology of dental erosion.

TIME
Check-in & Lunch: TBD, 11:30 AM
Program: Thursday, 12:00 PM-1:00 PM

LOCATION
UT Health San Antonio, School of Dentistry

OVERVIEW
With the aid of multiple slides and cases, presented in an interactive case-based discussion format, this course is intended to improve the practitioner's ability to obtain and interpret the medical history and plan appropriate treatment modifications to recognize and properly manage common oral conditions.

OBJECTIVES
Participant questions are strongly encouraged. Specific topics include, but are not be limited to:
- Allergic reactions
- Autoimmune disorders
- Candidiasis
- Dry mouth
- HIV/AIDS
- Oral cancer

PRESENTER
MICHAEL A. HUBER, D.D.S., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He continued with postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1988. Upon his retirement from the United States Navy in 2002, Dr. Huber joined the faculty as an Assistant Professor in the Division of Oral Medicine, Department of Diagnostic Science at The University of Texas Health Science Center at San Antonio, Dental School.

He has been teaching both pre-doctoral and graduate dental students at the Health Science Center, and is an active participant in the Dental School’s Tertiary Care Oral Medicine Clinic. His current research activities include evaluating novel diagnostic techniques for the early detection of oral cancer.

TIME
Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM-12:00 PM

LOCATION
UT Health San Antonio, School of Dentistry

SPECIAL FEE OFFER
Register for the morning program and receive a discount on the afternoon Texas Brief. Lunch is included for the participants attending both sessions.

Texas Brief PM
Lecture Course
Update on Antimicrobial Prophylaxis and Oral Cancer Screening in Dental Practice

OVERVIEW
Recent guidance published jointly by the American Dental Association and the American Academy of Orthopedic Surgeons pertaining to the prevention of prosthetic joint infection in the dental setting has been recently introduced. Both of these new sets of guidelines have generated much debate and consternation in the dental profession. The purpose of this course is to update the practitioner on the pros and cons of both recommendations and offer a perspective on how best to interpret and implement.

OBJECTIVES
At conclusion, participants should be able to discuss:
- Relevant risks of dental care as it pertains to prosthetic joint infection.
- Have a better understanding of the recently released guidance addressing prosthetic joint infection and dental care.
- Discuss the oral screening and its integral relationship with the comprehensive head and neck examination.

PRESENTER

OBJECTIVES

Many surgeons are now making provisionals for the restorative dentist. I will cover many reasons why this is important that the restorative dentist is responsible for making the surgical guide but many of us are uncomfortable with this responsibility. After this course you will want to be the person in charge of producing and providing the surgical guide.

OBJECTIVES

- Responsibilities of the restorative dentist when doing anterior implants
- How to determine where the free gingival margin will end up
- How to let the surgeon know where the place the implant for optimum esthetic results
- Why contours of the provisional are so important
- How to transfer all the information accurately to the lab technician

PRESENTERS

JACK I. SHIRLEY, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio in 1979. He has maintained a private practice in San Antonio, Texas for over twenty years. In addition to his practice, Dr. Shirley has been associated with The Pankey Institute for Advanced Dental Education in Key Biscayne, Florida for eighteen years. During much of this time, he has as served on the Institute’s Visiting Faculty, Board of Trustees. Currently he is the President of the LD Pankey Dental Foundation, Inc., the nonprofit oversight Board of the Pankey Institute.

TIME

SPECIAL FEE INFORMATION
Additional game tickets can be purchased at $XXX.00 each. Pre-game meals can be purchased for guests at $XXX.00 per person. We have a limited number of parking passes that are on a first come first serve basis. Please register early.
OVERVIEW Effective September 1, 2008 Rule 10.1666, licensees may choose to have up to four (4) hours of risk management-related coursework in order to decrease the risk management, record keeping, and ethics courses and the allowance for self-study hours has been increased to (6) hours. This course is designed to assist the dental practitioner in minimizing their chances of a lawsuit or Dental Board investigation through the use of effective risk management techniques.

OBJECTIVES
- Learn the top three reasons dental offices are at risk for lawsuits.
- Understand how the utilization of risk management techniques can drastically decrease the risk of a lawsuit.
- Be able to identify issues in your own practice which will reduce the incidence of a Dental Board investigation.
- Identify the essential elements which must be in every dental record to allow you to comply with Dental Board Rules.
- Learn the steps which must be taken to increase your chances of a favorable outcome in a Dental Board investigation.
- Understand the common infection issues which can reduce your exposure from investigations by other State or Federal agencies.

PRESENTER
EDWARD P. "JOE" WALLER, JR., D.D.S., M.S., received his dental degree from St. Louis University School of Dentistry in 1969 and his law degree from St. Mary's University School of Law in 1990. Mr. Waller is an attorney with the law firm of Brown & Bin in San Antonio, Texas. His practice is focused on the defense of hospitals, physicians, and dentists in medical and dental malpractice lawsuits. Dr. Waller also frequently represents dentists in investigations and hearings before the State Board of Dental Examiners.

AGD Code: 550

Special Fee Offer
Register for the morning program and receive a 30% discount on the afternoon Texas Brief. Lunch will be included for the participants attending both sessions.

OVERVIEW
Infections present a significant hazard in the dental environment. Although protection of the patient is an obvious priority, oral healthcare personnel are also vulnerable to exposure. The intent of this course is to set forth an Infection Control/Exposure Control protocol to minimize the transmission of infections in the clinical process (for the protection of patients, dental healthcare personnel alike) via direct contact with blood, saliva, and other secretions; via indirect contact with contaminated instruments, operating room equipment, and environmental surfaces; and via the contaminant's, such as droplet spatters or aerosols of infectious body fluids.

OBJECTIVES
Participants in this course will be introduced to evidence-based information which will facilitate compliance with 29 CFR Part 1910, Occupational Exposure to Bloodborne Pathogens, Final Rule (Federal Register 56(235): 64004-182, 1991 and the implementation of recommendations made by other federal, state, and local agencies and professional organizations.

In addition to fulfilling your annual OSHA requirements upon completion of this course, oral healthcare personnel should be able to:
- Understand the rationale for the need for an Infection Control/Exposure Control Protocol.
- Develop and implement a practical Infection Control/Exposure Control Protocol appropriate for a particular oral healthcare setting.
- Education and training; standard precautions
- Vaccinations
- Personal protective equipment;
- Work practice and engineering controls
- Environmental infection control;
- Post exposure evaluation and follow-up
- Medical record; medical conditions and work restrictions

PRESENTER
MICHAEL A. HUBER, D.D.S., received his degree from The University of Texas Health Science Center at San Antonio Dental School in 1980. He completed his postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1986.

TIME

OVERVIEW AND OBJECTIVES
This one-day course will serve as a comprehensive review of clinical pediatric dentistry. Course participants will interact with the faculty in an open-forum seminar on a variety of pediatric dentistry topics, including the following:
- Examination, Diagnosis, Treatment Planning
- Infant Examination and Anticipatory Guidance
- Restorative Dentistry for the Pediatric Patient
- Pulp Therapy for the Primary Dentition
- Space Maintenance
- Non-Pharmacologic Behavior Management
- Nitrous Oxide Analgesia for the Child Patient
- Local Anesthetic Dosage Regimens for Pediatric Patients

Lecture/Participation Course
Restorative Planning in Implant Dentistry
NORMA OLVERA, D.D.S., M.S.

OVERVIEW
The lecture will cover comprehensive restorative planning in implant dentistry. The presenter will discuss restorative options to implant success that has worked (What has not!) and cover clinical case presentations. In addition, the speaker will discuss how to enhance confidence restoring dental implants, as well as, providing better service to our patients.

OBJECTIVES
• Discuss specific restorative planning principles for partially dentate and edentulous patients
• Identify causes of dental implant failure
• Explain restorative thinking in implanting implant failures
• Experience a detailed hands-on section with restorative components
• Leave the course knowing implant restorative principles and ready to get started!

PRESENTER
NORMA OLVERA, D.D.S., M.S., obtained her dental degree from The University of Texas Health Science Center at San Antonio in 1995. She completed her post-graduate training in prosthodontics and received certification and Master of Science in prosthodontics. She is currently an assistant professor in the Department of Comprehensive Dentistry at UT Health Science Center at San Antonio.

Dr. Olvera had a full-time private practice as a prosthodontist in Houston, Texas for the past 20 years. She has extensive experience in the area of oral rehabilitation involving all facets of reconstructive dentistry with and without dental implants.

COURSE
NITROUS OXIDE CONSCIOUS SEDATION
HANDBS-ON TRAINING COURSE
ERNEST E. VALDEZ, D.D.S.

OVERVIEW
The course will provide information to meet the Nitrous Oxide/oxygen inhalation conscious sedation. This is a required course for dentists on the rules and regulations for the Texas State Board of Dental Examiners to qualify for an sedation/anesthesia permit.

OBJECTIVES
At the end of the didactic and clinical sessions, the participant will be able to:
• Define conscious sedation and be aware of the benefits for the patient and dentist.
• Understand the psychophysiology of pain, anxiety, and sedation.
• Understand the physiology of respiration and of N2O-O2 inhalation.
• Know the advantages, disadvantages, indications, and contraindications to the use of N2O in normal and medically compromised patients.
• Understand the techniques used to administer N2O and monitor patients while they receive it.
• Recognize the complications that may arise as a result of N2O administration, and understand the prevention, early detection, and treatment of these complications.
• Learn the hazards associated with the use of N2O and accepted methods used to reduce exposure to an acceptable level. Recognize special problems associated with the use of N2O in children and understand the precautions required in administering it to them.
• Discuss nitrous oxide equipment, including tanks, regulators, manifolds and machines.
• Understand guidelines for installation and use as issued by the National Fire Protection Association and the American Dental Association.
• Recognize the similarities of N2O sedation and hypnosis, be familiar with the basic concepts of hypnosis and its usefulness as an adjunct to N2O sedation.

PRESENTER
ERNEST E. VALDEZ, D.D.S., earned his DDS degree from The University of Texas Health Science Center at San Antonio in 1993. He is currently in private practice.

TIME

NEW COURSE
Lecture Course for The Entire Dental Team
“Grand Slam” Restorative Dentistry

OVERVIEW
Today’s dentists have more opportunities than ever before to successfully practice esthetic dentistry providing needed dentistry beautifully. Dr. Bonner has the gift of sorting through the vast array of new materials and techniques to help dentists simplify the complexities of doing excellent restorative dentistry. This presentation empowers dentists and their teams with the use of modern materials and techniques to predictably provide patients with beautiful long lasting restorations. The numerous clinical and business “pearls” presented enhance the ease, joy, and dental team approach to clinical dentistry.

OBJECTIVES
The participant will learn about:
• Creating Life-like Direct Anterior Restorations, including Class IV, direct veneers, and diastema closure
• Porcelain veneers “simplified” from smile design, preparation, beautiful temporization, ease in bonding, to rapid clean-up
• Principles of Full-Mouth Reconstruction
• Eliminating the Problem of Post-op Sensitivity
• Creating Excellent Posterior Esthetic Restorations
• Great posterior contacts through new and improved matrix systems
• Update on the Latest Techniques & Materials in Adhesion Dentistry
• Eliminate the “generation” confusion about bonding agents
• Impressions – How to get them perfect every time
• Clinical Pearls that enhance the Ease & Predictability of Practice
• Business Systems that Enhance Clinical Practice & Profitability
• How a MBA approaches Dental Fees
• Strategic and Financial Planning

PRESENTER
DAVID M. BONNER, D.D.S., M.B.A., M.A.G.D., F.I.C.D., F.A.C.D., F.I.C.O.I., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He earned his MBA in Health Care Management from Texas Tech University. His private practice is focused on esthetic dentistry. He is also an adjunct clinical professor at the UTHSCSA dental school. Dr. Bonner is an accomplished dentist, professor, author, researcher, and professional speaker who is passionate about dentistry. Dr. Bonner has served as President of the Panhandle District Dental Society and as a Vice-President for the Texas Academy of General Dentistry.

TIME
Check-in: TBD 8:00 AM

Register before August 18, 2017 to receive a 15% discount

IMPORTANT COURSE INFORMATION
Participants must complete our on-line didactic portion of Nitrous Oxide Conscious Sedation as a prerequisite to attending this clinical session. At an additional fee of $247.50. (The course can be found at http://smile.uthscsa.edu). Visit our website and click on Interactive Web Courses. Participants must also bring a copy of their CPR certification on the day of the course.

This course will not certify allied dental personnel.

http://smile.uthscsa.edu

(210) 567-3177

13
Objectives
At the conclusion of the course, participants will learn:

- Jurisprudence and ethics review
- Types of lawsuits affecting dentistry
- Potential sources of all dental lawsuits
- What are the odds of being sued
- New challenges increasing the risk of being sued
- What to do if you are sued
- Texas State Board disciplinary actions
- What to do if you are charged with violations
- Keeping dental records that meet TSBDE requirements and provide malpractice defense
- What the future holds

Effective September 1, 2008 Rule 104.1, licensees may choose to have up to four (4) hours of risk management-related coursework. Includes risk management, record keeping, and/or ethics courses and the allowance for self-study hours has been increased to (6) hours.
OVERVIEW
Periodontal diseases are chronic, infectious, and inflammatory diseases resulting from exposure of the periodontium to dental plaque, a complex bacterial biofilm that accumulates on the teeth. With periodontal disease the epithelial tissue, connective tissue and bone are damaged and the teeth and dental implants may be lost. To understand the long-term survival of dental implants, the clinician must have a clear understanding of the epithelial tissue, connective tissue and bone relationships to the dental implant surfaces. Evidence suggests that periodontitis and peri-implantitis may be the same and may contribute to the development or progression of local tissue breakdown and other diseases or conditions. In light of the high prevalence of the periodontal disease, these associations may be important for the maintenance of dental implants. Patients and health care providers must be informed that periodontal intervention may prevent the onset of hard and soft tissue breakdown or progression of various systemic diseases.

The purpose of this presentation is to provide evidence based information to evaluate the relationships of the hard and soft tissues of connection to dental implants and to determine if these tissues are subject to periodontal breakdown. To understand the mechanism by which periodontal infections may contribute to the destruction of periodontal tissues or the loss of dental implants.

OBJECTIVES
- Understand the hard and soft tissue relationships to dental implants.
- To understand the pathways of periodontal breakdown about dental implants.
- Identify hard and soft tissue conditions that may contribute to periodontal breakdown about dental implants.
- Determine the time and sequence for treatment and prevention of failing dental implants.
- To properly to inform the patient of the potential periodontal disease and systemic concerns of dental implants.
- Determine the proper maintenance of dental implants by the patient and the dental hygienist.

PRESENTER
DONALD P. CALLAN, D.D.S., received his dental degree in 1975 and a Certificate in Periodontics from the University of Missouri at Kansas City in 1978. Dr. Callan has a private practice limited to Periodontics with an emphasis on tissue regeneration and implant dentistry in Little Rock, Arkansas.

TIME
Check-in: TBD, 7:30 AM

The Dental School thanks PerioScal for its unrestricted educational grant in support of this continuing education program.

THE DENTIST’S PLEDGE
I, as a member of the dental profession, shall keep this pledge and these stipulations.

I understand and accept that my primary responsibility is to my patients, and I shall dedicate myself to render, to the best of my ability, the highest standard of oral health care and to maintain a relationship of respect and confidence. Therefore, let all come to me safe in the knowledge that their total health and well-being are my first considerations.

I shall accept the responsibility that, as a professional, my competence rests on continuing the attainment of knowledge and skill in the arts and sciences of dentistry.

I acknowledge my obligation to support and sustain the honor and integrity of the profession and to conduct myself in all endeavors such that I shall merit the respect of my patients, colleagues and my community. I further commit myself to the betterment of my community for the benefit of all of society.

I shall faithfully observe the Principles of Ethics and Code of Professional Conduct set forth by the profession.

All this I pledge with pride in my commitment to the profession and the public it serves.

Author Unknown
23rd Annual Preceptorship in Dental Implantology

**PRECEPTORSHIP INFORMATION**
This Preceptorship honors our co-founders Roland M. Meffert, D.D.S. and Robert J. Cronin, Jr., D.D.S., M.S., and consists of an annual review and updated curriculum that is clinically focused while incorporating the latest research from the clinical basic sciences. This will provide the participant with an understanding of the rationale and scientific basis for the clinical practice of implantology. The participants will meet for six weekend sessions which will include didactic sessions and some hands-on training experiences in an interactive learning environment.

**PRECEPTORSHIP OBJECTIVES**
The participant will learn:
- The rationale and scientific basis for the successful clinical practice of implantology.
- The current concepts, principles, and clinical methodology used effectively in practice.
- The proper evaluation, diagnosis, and selection of patients for implant placement and restoration.
- To develop and understand specific implant, surgical and prosthodontic skills, and the different modalities available.
- To manage the more difficult clinical situations, such as patients with advanced maxillary or mandibular atrophy.
- The proper evaluation, diagnosis, and selection of patients for implant placement and restoration.
- The current concepts, principles, and clinical methodology used effectively in practice.
- The rationale and scientific basis for the successful clinical practice of implantology.

**DIDACTIC SESSIONS**
- History and future of dental implantology.
- Three-day classroom/cadaver laboratory exercises.
- Biomechanical and biomaterial aspects of dental implantology.
- Physiology of bone with emphasis on cellular, molecular healing, bone maturation of bone in function and selection of implants with different designs and surfaces relating to bone density and planned implant function.
- Anatomy of the maxilla, mandible and TMJ in terms of available bone and anatomy as related to stress distribution.
- Anatomical structures (muscles, nerves, arteries) as they relate to implant placement.
- Philosophies of implant retention and stabilization.
- Essential treatment planning facets, including patient selection, past dental and medical history, essential diagnostic guides (casts, templates, etc.), documentation, appointment sequencing with laboratory, surgeon, restorative dentist.
- Essentials of joint treatment planning, and recall principles.
- Surgical and prosthodontic considerations including incision design, fixture and abutment selection, occlusal considerations, and force transmission.
- Peri-implantitis and its effect on the dental implant from the infective and traumatic aspects.
- Post-restoration responsibilities of staff personnel, hygienist, surgeon and restorative dentist on a recall basis.
- Demonstration of instruments, techniques for post-implant placement, restoration hygiene.
- Principles in troubleshooting, rescue, and retrieval procedures.
- The prosthodontic aspects of diagnosis and treatment planning as well as the clinical communication of this information to the surgeon.
- Procedures for developing optimum esthetics and the biomechanical loading aspects of implant restorations.
- Component systems will be categorized with specific indications for their use.
- The importance of optimal laboratory support and clinical communication skills to facilitate positive interaction with the dental technician.
- Indications and techniques relating to insertion of implants in single tooth and fresh extraction site situations.
- Hard and soft tissue grafting, guided soft, hard tissue regeneration in both pre and post-implant site situations.
- Repair of the ailing, failing implant with new regenerative procedures and materials.
- An overview of informed consent documentation and medical-legal review.
- The principles of practice management, marketing, and insurance considerations.
- An opportunity for your dental hygienist to complete a certification course in dental implant hygiene.

**PARTICIPATION SESSIONS**
- The Preceptorship will feature hands-on and interactive sessions.
- Co-Directors will conduct a two hour diagnostic and treatment planning segment featuring the preceptors’ patient cases at each of the weekend sessions.
- Implant anatomy laboratory will give the preceptors the opportunities to familiarize themselves in implant anatomy through dissection and to actually place implants in cadaver models.
- Hands-on exercises will familiarize the preceptors with the surgical and restorative aspects of dental implant systems and prosthetic laboratory techniques.

**DATES**
- October 6 & 7, 2017 • November 3 & 4, 2017
- December 8 & 9, 2017 • January 12 & 13, 2018
- February 9 & 10, 2018 • March 9-11, 2018

OCTOBER 5
Luncheons for Learning
A Novel, Comprehensive Approach to TMJD and Headache Management
CHRISTOPHER J. PERRY, D.M.D.

FORMAT
One day a month a speaker discusses a dental topic during lunch. The sessions are informal and the group has an opportunity to interact with the speaker during the short discussion period at the end of the lecture. It requires only about one and one-half hour of your time to learn the latest developments in many areas of dentistry. It also offers the opportunity to become better acquainted with your colleagues and staff since all dental professionals are invited to attend.

OVERVIEW
Temporomandibular disorder is a complex condition with many etiologies, symptoms, and treatment modalities. There is no “one size fits all” treatment for patients. There are many “band aids” to manage TMJD, but few of them get to the bottom of the disease. Dr. Perry has developed a comprehensive approach to evaluation, management and ultimate treatment of most TMJD conditions, focusing on muscle rehabilitation prior to definitive dental correction and joint stabilization.

This course will focus on an understanding of the TMJ, causative agents of TMJD, and a systematic protocol for diagnosis and treatment.

OBJECTIVES
• An understanding of the anatomy and function of the TMJ.
• An understanding of normal occlusion function.
• An understanding of the natural and iatrogenic etiologies of Temporomandibular disorder.
• An understanding of the “Perry 3D Protocol” of TMJD therapy.

PRESENTER
CHRISTOPHER J. PERRY, M.S., D.M.D., FAGD, obtained his dental degree from The University of Medicine and Dentistry of New Jersey in 1999. Dr. Perry is the Immediate-Past President of the San Antonio Academy of General Dentistry. Since completing a two year residency in Advanced General Dentistry at UTHSCSA he has been an assistant clinical Professor in the department of General Dentistry. Dr. Perry has lectured internationally on topics from practice management to CEREC and restorative dentistry. As President of Perry Dental Health Consulting, he has consulted with practices around Texas and in the Northeast.

Includes Luncheon and Lecture
Individual: $49.50

CREDIT (Course Code: 160482A)
AGD Code: 257 Hours: 1

LUNCH INCLUDED
Plan to arrive at 11:30 AM. This will give you time to eat before the presentation starts at 12:00 PM. Should you be delayed, you can eat during the presentation.
OVERVIEW
Today’s parents frequently access the internet to gather information on all aspects of pediatric medicine and dentistry. This course is designed to provide a general review of pediatric dentistry, focusing on the parents most frequently asked questions. The lecture will start with pre-natal and newborn concerns. Next, we will discuss common eruption problems, orthodontic concerns, pediatric oral pathology, trauma, dental infections, and prevention issues. Finally, we will cover those topics in the media that often stimulate questions from our well-informed parents.

OBJECTIVES
• Recognize the most common newborn dental anomalies and advise the parents accordingly
• Discuss the systemic conditions that are associated with the delayed eruption of teeth and premature loss of primary teeth
• Diagnose and treat the most common intraoral soft tissue lesions
• Recognize the most common causes of cervical lymphadenopathies in children
• Discuss the causes of intrinsic and extrinsic tooth stains
• Diagnose and treat the common types of trauma to the primary teeth, surrounding soft / hard tissues
• Diagnose and manage dental infections
• The latest prevention strategies for young children
• Discuss “what’s new” in pediatric dentistry

PRESENTER
JEFFREY C. MABRY, DDS, MS
retired from the USAF in October, 2006. During his last USAF tour, he served as the Chairman, Pediatric Dentistry, 59th Dental Squadron, 59th Aeromedical Dental Group, Lackland AFB, TX. He served as the Chief Military Consultant to the USAF Surgeon General for Pediatric Dentistry. Dr. Mabry serves as a Professor at the UT Health San Antonio, Department of Developmental Dentistry and is the Director of the Dental Center at the Children’s Hospital of San Antonio.

TIME
Check-in: Saturday, five hours prior to kick-off
Game: UT vs. Kansas State University
Royal Texas-Memorial Stadium (kick-off time TBA)

LOCATION
Joe C. Thompson Conference Center at The University of Texas at Austin
26th and Red River (next to LBJ Library)
Austin, Texas 78713

**October 13**

**Lecture Course for the Entire Dental Team Management of Dental Trauma in the Pediatric Patient**

**LINA M. CARDENAS, D.D.S., M.S., Ph.D.**

**OVERVIEW**

Dental trauma is part of the General and Pediatric Dentistry practice. Current research has led to a better understanding of the healing mechanisms that translate into better clinical protocols for the management of trauma. The course will start with an introduction to trauma and the evaluation of the patient with trauma. Then, a review of the classification, diagnosis and treatment of traumatic lesions is presented. Finally, several clinical cases will be presented and discussed.

A review of the current guidelines (from the American Academy of Endodontics, the International Association of Dental Traumatology and the American Academy of Pediatric Dentistry) for the management of dental trauma in the primary and permanent dentition will be presented. Easy-to-use decision analysis and protocols for the emergency treatment as well as follow-up and referral needs will also be discussed.

**OBJECTIVES**

Present a systematic way of gathering trauma history. Review the classification of traumatic dental injuries. Discuss the diagnosis, emergency treatment and follow-up in primary tooth trauma according to type of injury. Discuss the diagnosis, emergency treatment and follow-up in permanent tooth trauma according to type of injury. Present clinical cases of primary and permanent tooth trauma.

**PRESENTER**

**LINA M. CARDENAS, D.D.S., M.S., Ph.D.**, obtained her first dental degree form CES University on Columbia in 1992. She received her second dental degree at the University of Texas Health Science Center at San Antonio, graduating Magna Cum Laude. She traveled to Nagasaki University and received a combined degree in Pediatric Dentistry with a PhD in Dental Science. Following that, she obtained her second dental degree at the University of Texas Health Science Center at San Antonio. She is a Board Certified Pediatric Dentist.

**TIME**

Check-in: TBD, 8:00 AM
Program: Friday, 9:00 AM - 5:00 PM

**LOCATION**

UT Health San Antonio, School of Dentistry

**October 13**

**Lecture Course Update on Common Medical Conditions and Lesions Encountered in the Contemporary Dental Practice**

**MICHAEL A. HUBER, D.D.S.**

**OVERVIEW**

Demographic trends clearly demonstrate that as the average life-expectancy continues to grow in America, so does the burden of chronic illness. Thus, the contemporary dental practitioner is encountering an ever-increasing number of patients with a multitude of medical conditions and associated oral lesions which affect both the patient’s oral health and management. In addition, many dental patients see their dentist more regularly and frequently than they do their primary medical manager. This places the dental practitioner in the unique position of often being the first to observe the signs and symptoms of a serious systemic condition. This course will provide a review of some of the common medical conditions and associated oral lesions the dental practitioner is likely to encounter in his or her practice. In addition, the historical and clinical clues of commonly encountered undiagnosed systemic conditions will be provided.

**OBJECTIVES**

This course is intended to improve the practitioner’s ability to obtain and interpret the medical history and correlate these findings with the clinical examination to:

- Establish an appropriate diagnosis
- Plan appropriate treatment modifications to safely manage the medically compromised patient

Specific topics discussed will include, but not be limited to:

- Allergic reactions
- Autoimmune disorders
- Candidiasis
- Cardiovascular disease
- Dermatologic disease
- Dry mouth
- Hepatitis
- HIV/AIDS
- Indications for antimicrobial prophylaxis
- Oral cancer
- Sexually transmitted diseases

**PRESENTER**

**MICHAEL A. HUBER, D.D.S.,** received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He continued with postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine and Maxillofacial Radiology at the Naval Dental Hospital, Bethesda, Maryland in 1988. Upon his retirement from the United States Navy in 2002, Dr. Huber joined the faculty as an Assistant Professor in the Division of Oral Medicine, Department of Dental Diagnostic Science at The University of Texas Health Science Center at San Antonio, Dental School.

**October 13**

**Lecture/Hands-On Course Gingival and Connective Tissue Grafting**

**JAMES S. KOHNER, D.D.S.**

**OVERVIEW**

This course discusses and evaluates the use of two different soft tissue grafts. It includes detailed indications, contra-indications and multiple case examples of Free Gingival and Connective Tissue Grafts. The surgical exercises use pig jaws to allow participants the opportunity of harvesting, placing and suturing both types of grafts. Gingival Grafts are excellent for creating zones of attached gingiva where neither root coverage nor esthetics are factors. They provide a predictable way to stop recession from progressing. Connective Tissue Grafts are very useful for total root coverage in cases of severe recession, especially in the maxilla where esthetics is important.

This workshop is for the dentist who wants to offer soft tissue grafting to their patients or to someone who just wants to learn more about enhancing esthetic restorative results. Two video demonstrations of surgical techniques are included.

A workbook detailing the procedures is included.

**OBJECTIVES**

At the conclusion, participants should be able to:

- Learn diagnostic criteria for graft selection
- Understand indications for each type of graft
- Understand limitations of each type of graft
- Step-by-step harvesting, placing and suturing
- Step-by-step use of specialized instruments

**PRESENTER**

**JAMES S. KOHNER, D.D.S.,** received his dental degree from The Ohio State University, and Case Western Reserve University Dental School, and obtained his certification in Periodontics from the Boston University School of Graduate Dentistry. He currently lives in Scottsdale, Arizona. Dr. Kohner is an experienced teacher who has presented courses on Soft Tissue Grafting to a wide range of audiences, including many state associations all over the US and in 8 foreign countries, and has presented at the American Academy of Periodontology meetings for many years. He has been teaching for the Perio Institute since 2003.

OCTOBER 14

Lecture/Hands-On Course

Crown Lengthening Workshop

JAMES S. KOHNER, D.D.S.

OVERVIEW

This course provides a maximum “hands-on” experience covering the various principles and clinical procedures needed for crown lengthening. We cover indications, contraindications, and methods of managing surrounding bone.

Topics include: how to handle hard and soft tissues; proper surgical techniques; preservation of esthetics in the final tissue contours; and relocation of all structures that comprise the biologic width; namely: sulcus, junctional epithelium, connective tissue fibers, and bone.

The “hands-on” experiences include flap surgery with pig jaws, plus bone surgery on anatomically correct plaster models. It is coupled with a detailed slide presentation, as well as two video demonstrations of surgical techniques.

Dentists who want to do some or most of their own crown extensions, or those who just want to know more about the subject, will be helped by this course. Crown extension is one of the most commonly required procedures in restorative dentistry, and is often under utilized.

A workbook detailing the procedures is included.

OBJECTIVES

At the conclusion, participants should be able to:

• Make predictable impressions every time
• Learn why crowns come loose and how to prevent it
• Save chair time and be more profitable
• Understand causes of red gum tissue around crown margins
• Diagnose esthetic crown lengthening
• Understand the Gummy Smile
• Coordinate surgery with restorative procedures

Lecture Course

Dental Sleep Medicine: Snoring and Obstructive Sleep Apnea

RICHARD B. DRAKE, D.D.S.

OVERVIEW

This course will discuss the new TSBEDE new ruling 108.12, concerning the dental treatment of sleep disorders. Are you sick and tired of being sick and tired? Fatigue is the number one complaint heard by health professionals across the globe. Fifty to seventy million Americans suffer from of sleep related problem. Sleep related breathing disorders, such as snoring and obstructive sleep apnea, are at the top of this list. One third of these patients have been diagnosed. As dentists, we are in a prime position to be the first to recognize this disorder and to help steer patients in the right direction to get diagnosed. We also have the ability to treat many of these patients ourselves, thus improving their quality of life as well as possibly saving their life!

OBJECTIVES

Background:

• Understand normal breathing and airway anatomy and the problems and variants that lead to snoring and obstructive sleep apnea.
• Learn the health risks associated with sleep disordered breathing.
• Learn the basics of sleep

Signs and Symptoms:

• Learn the effects of sub-optimal sleep on health and quality of life.
• Recognize those symptoms and behaviors that may indicate sleep disordered breathing.

Diagnosing:

• Understand current and proposed diagnostic methods and the role of dentists in the team approach.

Treatment:

• Review the current treatment modalities for snoring and for mild, moderate and severe OSA.
• Explore the role that dentists can play in the management of sleep disordered breathing.

Follow Up:

• Understand the side effects of oral appliance therapy and how to manage them.

PRESENTER

RICHARD B. DRAKE, D.D.S., received his D.D.S. degree from The University of Texas Health Science Center at San Antonio, Dental School in 1989. He maintained a private practice in general dentistry from 1990 to 2001 and currently serves as Clinical Assistant Professor of the Department of Dental Diagnostic Science at The University of Texas Health Science Center at San Antonio. He is the founder of Dental Sleep Medicine Associates of San Antonio, a private practice devoted solely to the treatment of snoring and sleep apnea. Dr. Drake is also a member of the University’s Center for Dental Sleep Medicine. Dr. Drake is a Diplomate of the American Board of Dental Sleep Medicine. He serves on the Board of Directors with the American Academy of Dental Sleep Medicine, as well as chairing the Reimbursement Committee.

Lecture Course

Removing Aging Barriers in Your Dental Practice

ELEONORE D. PAUNOVICH, D.D.S.

OVERVIEW

The success story of increasing life expectancy, as witnessed in the 20th century, along with the aging “baby boomers” has resulted in an unprecedented rate of growth in the number of older adults. With this growing population, oral health care providers have been challenged to manage patients with multiple chronic medical problems, multiple medications, functional limitations as well as cognitive and attentional deficits. These trends have heralded healthcare’s challenge for the 21st century, which is to improve oral health as part of the quality of life for this growing population.

This session will identify some of the medical, functional and cognitive challenges that many of the more prevalent chronic medical conditions impose on our adult patients. Through a multi-dimensional dental assessment model, dentists, dental hygienists and dental assistants will have an opportunity to learn about some of the different aspects and challenges confronting the dental team providing oral health care to medically challenged adult patients.

OBJECTIVES

Participants will learn:

• Clinical signs and symptoms associated with some of the more common chronic medical conditions associated with older adults to include cardiovascular disease, respiratory disease, gastro-intestinal, endocrine, renal disease, and liver disease.
• Review some of the medical and management issues associated with some of the more common cognitive and functional conditions associated with older adults to include neuromuscular Disorders.
• How to apply a multi-dimensional assessment plan for the older adult patient to aid your risk assessment, assessment of informed consent, dental problem diagnosis and treatment planning.
• Tips and trends to improve the dental team’s management of medically challenged adults.

PRESENTER

ELEONORE D. PAUNOVICH, D.D.S., M.Sc., received her dental degree from Indiana University School of Dentistry and has been on active duty as a general dentist in the United States Air Force. She was selected by the USAF to enter a residency program in dental radiology and oral pathology, which she completed at The University of Texas Health Science Center at San Antonio.

**Texas Brief AM**  
Lecture Course  
**Part I-A Spanish Class for the Dental Office**  
**Vamos al Dentista**  
**Let’s Go to the Dentist**  
**Introduction to Spanish**  
**MYLENE MACKEY, M.S., B.S.**

**OVERVIEW**  
Although there are many excellent Spanish books and courses available, this course is designed specifically for members of the dental team. A brief, but intensive introduction for beginners on the everyday application of basic Spanish grammar, pronunciation, and vocabulary will be presented. In addition, Mrs. Mackey will review simple phrases, which can be commonly used by the dental team. The material will be based upon the text, Vamos al Dentista, designed to be used in a dental office.

**OBJECTIVES**  
• A beginner’s course of the Spanish language for members of the dental team. This course is a prerequisite for Part II.

**PRESENTER**  
MYLENE MACKEY, M.S., B.S., received her Masters degree in mental health counseling from St. Mary’s University, previously earning her Bachelors in theater and psychology form Texas A&M. Mrs. Mackey currently works as a Licensed Practicing Counselor. She has taught Spanish for many years including offering private lessons to businesses and individuals. Mrs. Mackey enjoys translating documents, traveling to Mexico, yoga, reading and drawing.

**TIME**  
Check-in: TBD, 8:00 AM  
Program: Friday, 9:00 AM-12:00 PM

**LOCATION**  
UT Health San Antonio, School of Dentistry

**TUITION**  
Includes text, Vamos al Dentista  
Individual: $125.00

**Part II-A Spanish Class for the Dental Office**  
**Vamos al Dentista**  
**Let’s Go to the Dentist**  
**Dental Terminology**  
**MYLENE MACKEY, M.S., B.S.**

**OVERVIEW**  
This course is designed for members of the dental team with some knowledge of the Spanish language and wish to meet the even greater need for its usage. Part II concentrates on dental terminology. Mrs. Mackey will review common vocabulary and standard phrases related to a dental practice. The material will be based upon the text, Vamos al Dentista, designed to be used in a dental office.

**OBJECTIVES**  
• This course will be a comprehensive review of the Spanish language most commonly used in the dental office. The participants should already be somewhat familiar with the language.

**PRESENTER**  
MYLENE MACKEY, M.S., B.S., received her Masters degree in mental health counseling from St. Mary’s University, previously earning her Bachelors in theater and psychology form Texas A&M. OVERVIEW
This course will review a variety of topics pertinent to patient evaluation, record keeping, and risk management in addition to the various aspects of surgical techniques and procedures.

OBJECTIVES
The participant will learn about:
- Patient evaluation
- Record keeping
- Risk management
- Local anesthesia
- Armament
- Preoperative evaluation for extractions
- Flap design
- Routine and difficult extractions
- Third molar evaluation and surgery
- Biopsy technique
- Minor preprosthetic surgery
- Emergencies

OBJECTIVES
The participant must bring to the course a splint they provide their patients. The splint needs to be fabricated to either the participant's maxillary or mandibular arch. The splint may be fabricated from acrylic, soft thermoplastic material, or any intermediate material (Flexite, Bruxaze, hand-laminated material, etc.). NTI appliances are not recommended and should not be brought. Participants must also bring a long shank acrylic bur and a long shank #6 or #8 round bur. If he or she brings a splint made from soft thermoplastic mouthguard material, the participant must also bring the cast it was molded over. The class will be limited to the first 14 dentists to register.

PRESENTERS
GREGORY K. SPACKMAN, D.D.S., M.B.A., received his dental degree from the University of Nebraska College of Dentistry in 1977, subsequently continuing his training in Oral and Maxillofacial Surgery at Mayo Graduate School of Medicine in Rochester, Minnesota where he was awarded a Certificate in Oral and Maxillofacial Surgery. Dr. Spackman earned his MBA degree from Harvard University in 1987.

GREGORY K. SPACKMAN, D.D.S., M.B.A., received his dental degree from the University of Nebraska College of Dentistry in 1977, subsequently continuing his training in Oral and Maxillofacial Surgery at Mayo Graduate School of Medicine in Rochester, Minnesota where he was awarded a Certificate in Oral and Maxillofacial Surgery. Dr. Spackman earned his MBA degree from Harvard University in 1987.

Dr. Spackman served as the Preclinical Director in the Department of Oral and Maxillofacial Surgery at the Dental School. He is also active in the Clinical Faculty Practice and serves on the Faculty Practice Advisory Board.

EDEWARD F. WRIGHT, D.D.S., M.S., received his dental degree from the University of California at Los Angeles and completed a 2-year AGD Residency at Fort Knox, Kentucky.

He was a tenured professor and Director of the AEGD Residency at Baylor College for 20 years and now is in general practice with his son, Brian Wakefield, DDS, in Lewisville, Texas.

PRESENTER
NOAH CHIVIAN, F.A.C.D., F.I.C.D., D.D.S., earned his dental degree from the University of Pennsylvania School of Dentistry in 1986. He completed his graduate endodontics program at Temple University’s School of Dentistry. He was a Research Teaching Fellow in Endodontics and received his certificate in Endodontics from Temple University School of Dentistry. He is a member of Omicron Kappa Upsilon, fellow of the American and International Colleges of Dentistry, a Fellow of the American Association of Endodontists, Diplomate of the American Board of Endodontics, a honorary member of the Societe Francaise d’Endodontie, and a recipient of the Warren T. Wakaii Award from the Japanese Endodontic Association. Dr. Chivian received the Alumni Award of Merit from the Pennsylvania School of Dental Medicine, the Edgar D. Smith Edge Award from the American Association of Endodontists, and the Presidential service Award from The New Jersey Dental Association.

SPECIAL FEE INFORMATION
Additional game tickets can be purchased at $TBD.00 each. Pre-game meals can be purchased for guests at $15.00 per person. We have a limited number of parking passes that are on a first come first serve basis. Please register early.
OVERVIEW
The Texas State Board of Dental Examiners (TSBDE) requires level 2 and level 3 permit holders to complete approved continuing education every 2 years to maintain the permit. This must take the form of ACLS, PALS or an approved sedation review course. Individuals who complete the entire course will receive a certificate that can be submitted to the TSBDE to document completion of the approved moderate sedation review course. Level 2 and 3 permit holders must also complete every 2 years an additional 8 hours of medical emergency or sedation related CE separate from the ACLS, PALS or this "approved" course.

OBJECTIVES
- Review the Texas rules and regulations regarding the administration of moderate enteral and moderate parenteral sedation.
- Update the dentist on patient evaluation for the administration of moderate sedation.
- Update the dentist on monitoring techniques for moderate sedation.
- Update the dentist on the management of sedation emergencies and common medical emergencies.
- Review basic EKG interpretation.
- Review airway management techniques useful in the administration of moderate sedation.
- Review risk management in moderate conscious sedation.

PRESENTER
ERNEST B. LUCE, D.D.S., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. In 1986, he completed a one year General Practice Residency at The University of Texas Health Science Center at San Antonio. Upon completion, Dr. Luce joined the Department of Comprehensive Dentistry at The UT Health Science Center at San Antonio. Currently, he is a Clinical Associate Professor at the Health Science Center, and he also maintains a part time private practice in general dentistry in San Antonio.

His teaching duties include didactic presentations as well as clinical supervision of graduate general dentistry residents. Dr. Luce served as Head of the Graduate Division of the Department of General Dentistry and Program Director for the General Practice Residency at UT Health Science Center at San Antonio from 1993 to 1999.

TIME
Check-in: TBD, 7:30 AM Program: Friday, 8:00 AM - 5:00 PM

OBJECTIVES
• Learn the top three reasons dental offices are at risk for lawsuits.
• Understand how the utilization of risk management techniques can dramatically decrease the risk of a lawsuit.
• Be able to identify issues in your own practice which will reduce the risk of a Dental Board investigation.
• Identify the essential elements which must be in every dental record to allow you to comply with Dental Board Rules.
• Learn the steps which must be taken to increase your chances of a favorable outcome in a Dental Board investigation.
• Understand the documentation issues which can reduce your exposure from investigations by other State and Federal agencies.

OVERVIEW
Effective September 1, 2008 Rule 104.1, licensees may choose to have up to four (4) hours of risk management-related coursework (includes risk management, record keeping, and/or ethics coursework) which will reduce the risk of a Dental Board investigation through the use of effective risk management techniques.

SPECIAL FEE OFFER
Register for the morning program and receive a discount on the afternoon Texas Brief. Lunch is included for the participants attending both sessions.

If you can't join us please take our online OSHA course. Scan the QR code
Candidates who successfully complete this course and its prerequisites will receive a Certificate of Standard Proficiency in Dental Lasers recognized by the Academy of Laser Dentistry.

OVERVIEW
The severe wear patient has multiple etiologies. We want to know and understand the cause of the wear and how to tailor our restorative efforts to the patient’s needs.

The first day will detail laser use in the following:
- Non-Surgical, Surgical & Regenerative Therapy
- Surgical & Restorative Implantology
- Esthetic/Cosmetic Dentistry
- Fixed & Removable Prosthetics
- Practice Management
- Oral Med/Coral
- Surgery/Oral Path
- Pedo/Ortho
- Pedo & Adolescent Operative Dentistry

The second day will provide each participant hands-on experience with the various wavelengths, performing surgical procedures on in-vitro models. Real-time videos of routine laser procedures will be part of the discussion of specific instrument settings and techniques for laser surgical procedures.

OBJECTIVES
- Understand the various new materials used to restore these patients.
- Describe the etiologies for the worn dentition.
- Describe how to perform an accurate diagnostic mounting to evaluate wear.
- Explain the use of the diagnostic mounting in diagnosis and treatment planning.
- Understand the proper sequence for restoring extensive wear.
- Understand the various new materials used to restore difficult cases.

We are happy to announce that we will be partnering with the Academy for Academic Leadership in Atlanta, GA

AAL

Launched in 2005, AAL is a collaborative of scholars, educational specialists, and consultants providing services that help leaders in businesses, nonprofits, and academia pursue excellence, the application of knowledge, the discovery of ideas, and the quest of lifelong learning.

AAL focuses on leadership development, teaching and learning, humanistic healthcare and consulting services

aalgroup.org

The lifelong learning activity has been planned and implemented in accordance with the standards of the ADA Continuing Education Recognition Program (ADA CERP) through joint efforts between UTHSCSA D.S. and AAL.

A NEW OUTREACH LOCATION

DECEMBER 15

Texas Brief AM
Lecture/Participation Course for Dental Hygienists
Curved Ultrasonic Inserts: How It Works?
JUDY A. ALVARADO, M.Ed., R.D.H.
VIRGINIA G. CARRILLO, R.D.H., M.Ed.

OVERVIEW
New ultrasonic instruments allow slimmer inserts to be operated at a higher power, and curved inserts for better adaptation. A case based format will be utilized to introduce new techniques for improving calculus removal skills with difficult periodontal patients. This course will bring the latest information in ultrasonic instrumentation in a combined classroom and ‘hand-on’ session.

OBJECTIVES
By attending this workshop participants will:
• Review the evolution of ultrasonic instrumentation
• Review the anatomy of the root surface of teeth
• Develop strategies to accomplish non-surgical periodontal instrumentation
• Practice with slim inserts on specially prepared typodonts
• Practice with curved inserts on specially prepared typodonts.

PRESENTERS
JUDY A. ALVARADO, M.Ed., R.D.H.
holds a full-time Dental Hygiene faculty position at UT Health San Antonio in the Department of Periodontics. She graduated from UTHSCSA Dental Hygiene Program in 1992. In 2014, she completed her Masters in Education from Concordia University Portland Oregon.

VIRGINIA G. CARRILLO, R.D.H., M.Ed.
earned her Bachelor of Science from the University of Texas Health Science Center San Antonio in Dental Hygiene in 2004 and earned her Master’s in in Educational Leadership from Concordia University, Portland, Oregon 2014. Carrillo is also a Course Director and a Clinical Instructor at UT Health San Antonio.

DECEMBER 15

Texas Brief PM
Lecture/Participation Course for Dental Hygienists
On the Cutting Edge: Effective Instrument Sharpening
LYNN A. SMILEY R.D.H., M.Ed.

OVERVIEW
This course is built for all practitioners that want to learn how to effectively sharpen scaling instruments for use in clinical practice. Despite the many gadgets that have come out over the years to assist with instrument sharpening most clinicians still rely on their trusty hand stones to accomplish the task. This course focuses on sharpening utilizing hand stones and will emphasize maintaining the integrity of instruments during sharpening that will increase the longevity of your instruments clinical use. We will also review infection control and personal protective equipment protocol that should be in place for instrument sharpening. This hands-on workshop will allow participants to participate in presenter guided practice with instrument sharpening.

OBJECTIVES
At the end of this course, attendees/participants will be able to:
• Properly identify characteristics of universal/area specific scaling instrument design.
• Identify when instruments require sharpening.
• Understand the benefits of maintaining instrument sharpness and the risks of working with dull instruments.
• Identify common sharpening errors and how to avoid them
• List infection control and personal protective equipment needed for instrument sharpening.
• Successfully sharpen scaling instruments while maintaining the integrity of the instruments design.

PRESENTER
LYNN A. SMILEY, R.D.H., M.Ed., is a clinical instructor in the Division of Dental Hygiene, Department of Periodontics at the University of Texas Health Science Center at San Antonio. She has 25 years of experience as a clinical dental hygienist. She is currently course director for Introduction to Clinical Theory, PreClinical Dental Hygiene, Clinic I and Clinic I Seminar.

TIME
Check-in: TBD, 12:30 PM
Program: Friday, 1:00 PM-4:00 PM

LOCATION
UT Health San Antonio, School of Dentistry

TUITION

AGD Code: 490 Hours: 3
NEW COURSE

JANUARY 19-20

Participants will receive a packet of study materials. The course has been approved by the Texas State board of Dental Examiners (TSBDE). Upon registration for the course, participants will be mailed a packet of study materials. The course will consist of:

- Class, laboratory, and test session (8 hours)
- Participants must pass a written examination with a 70%
- To meet the individual needs of each student, remediation and re-testing will be determined on a case-by-case basis.
- Participants may retake the examination up to 2 times ($10 each exam). If the participant does not successfully pass after the 3rd try, the course must be retaken.

Successful completion of this course will permit certification for five (5) years.

To engage the participants' learning, innovative teaching techniques will be used. Games, audience response, and role-playing demonstrations of clinical emergencies associated with nitrous oxide-oxygen conscious sedation are some of the learning strategies that will be used. Upon completion of the course, students should be competent to pass an examination covering their use for specific oral diseases and pathologies found in the oral cavity.

The first day will detail laser use in the following: Non-Surgical, Surgical & Regenerative Periodontal Therapy, Surgical and Restorative Implantology, Esthetic/Cosmetic Dentistry, Fixed & Removable Prosthetics, Practice Management/Marketing, Oral Med/Oral Surgery/Oral Pathology, Pediatric Dentistry, and Adolescent Operative Dentistry.

The second day will provide each participant hands-on experience with the various wavelengths, performing surgical procedures on in-vitro models. Real-time videos of routine laser procedures will be part of the discussion of specific instrument settings and techniques for laser surgical procedures.

At the conclusion of the course, participants will be familiar with the various wavelengths, their effects on oral tissues, and their uses for specific oral diseases and pathologies found in everyday practice. They will be able to incorporate this knowledge for determining which laser wavelength is most appropriate for their practice.

PRESENTER

ROBERT A. CONVISSAR, D.D.S., B.S., obtained his dental degree from New York University College of Dentistry in 1980. Dr. Convissar is a pioneer in the field of laser dentistry and one of the first dentists to incorporate lasers into general practice. He has extensive experience with CO2, Nd:YAG, Diode, and Erbium wavelengths.

The David E. Snyder Luncheons for Learning Series 2018

Course Director

David E. Snyder, D.D.S., entered the University of Washington Dental School in 1950, just at the beginning of the Korean War. After graduation in 1954 he served in the Navy Dental Corps for three years, two of which were spent on the USS Nereus, a submarine tender home ported in San Diego, California. After his discharge, he opened a practice in San Diego.

Accounts of “old dentistry” from his father, teaching of dental schools of the 1950’s, and tricks learned from Dr. James P. Vernetti encouraged Dr. Snyder to teach senior dental students several alternative techniques. Some of them, such as the intra-osseous local anesthetic injections taught by Dr. Vernetti in the 1960’s, became popular in our Texas school decades later.

TIME

11:30 AM - 1:00 PM
The first or second Thursday of each month (Subject to change due to state meetings or holidays)

LUNCH INCLUDED

Plan to arrive at 11:30 AM. This will give you time to eat before the presentation starts at 12:00 PM. Should you be delayed, you can eat during the presentation.

If you have any suggestions for topics please call us at 210-363-8623
OBJECTIVES

This one-day course will focus on recognition and management of sedation and other medical emergencies in the dental office. Course format will minimize lecture in order to maximize practice time on a sophisticated, computerized human simulator device, SimMan. Only a limited number of participants will be in each class in order to ensure plenty of time for each person to practice on the manikin.

Activities will include basic and advanced ventilation techniques including use of several airway devices, as well as the use of many emergency drugs, including sedation reversal drugs. In addition, intravenous and intratracheal administration on pig feet and cricothyrotomy on pig trachea will be discussed, demonstrated and practiced. Cardiac defibrillation will be part of several of the practice situations.

OBJECTIVES

Upon completion of the course, participants will:

- Recognize an evolving medical or sedation emergency
- Understand the use and placement of basic and advanced airway devices
- Use and administration of emergency medications
- Understand critical thinking and problem solving in medical/sedation emergencies
- Develop leadership skills as they apply to emergency management

PRESENTER

ERNEST B. LUCE, D.D.S., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. In June of 1986, he completed a one year General Practice Residency at The University of Texas Health Science Center at San Antonio. Upon completion of the residency, Dr. Luce joined the Department of Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio. Currently, he is a Clinical Associate Professor at the Health Science Center, and he also maintains a part time private practice in general dentistry in San Antonio.

Lecture Course

Clinicopathologic Cases of Common Oral Conditions
MICHAEL A. HUBER, D.D.S.

OVERVIEW

With the aid of multiple slides and cases, presented in an interactive case-based discussion format, this course is intended to improve the practitioner’s ability to obtain and interpret the medical history and plan appropriate treatment modifications to recognize and properly manage common oral conditions.

OBJECTIVES

Participant questions are strongly encouraged. Specific topics include, but are not be limited to:
- Allergic reactions
- Autoimmune disorders
- Candidiasis
- Benign oral lesions
- Dry mouth
- HIV/AIDS
- Oral cancer

PRESENTER

MICHAEL A. HUBER, D.D.S., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He continued with postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1988. Upon his retirement from the United States Navy in 2002, Dr. Huber joined the faculty as an Assistant Professor in the Division of Oral Medicine, Department of Dental Diagnostic Science at The University of Texas Health Science Center at San Antonio, Dental School.

He has been teaching both pre-doctoral and graduate dental students at the Health Science Center, and is an active participant in the Dental School’s Tertiary Care Oral Medicine Clinic. His current research activities include evaluating novel diagnostic techniques for the early detection of oral cancer.

Register for the morning program and receive a 30% discount on the afternoon Texas Brief. Lunch is included for the participants attending both sessions.
OBJECTIVES
- Understand the limitations of planar film, the need to embrace CBCT, and the interpretation of CBCT scans.
- Review different methods of surgical guide fabrication from simple in-house methods to laboratory fabricated.
- Describe the advantages of the flapless surgical approach over conventional flap surgery.
- Understand the advantages of the crestal approach to sinus augmentation, necessary armamentarium, surgical protocol and the management of complications based on the medical literature.

PRESENTER
WILLIAM C. RODDY, D.D.S., received his dental degree from the University of Iowa in 1979. He served on active duty in the US Navy from 1979-1999, retiring at the rank of Captain. He currently is the sole proprietor in his General Dentistry practice in Fort Worth. His in-house lab has 3 different milling systems for the fabrication of surgical guides, zirconia bridges, and titanium bars and custom abutments.

Texas Brief PM Lecture Course
Achieving Predictable, Clinical Outcomes For Restorative Success Utilizing Conventional & Digital Dentistry
ROBERT P. MARBACH, B.A., C.D.T.

OVERVIEW
This lecture will discuss and illustrate the latest in CAD/CAM digital technology relating to you, your assistant, and your lab. Identify the basics of occlusion and how it relates to the success of anterior restorations and full mouth rehabilitation. Facing the esthetic challenges in your practice to decide today what type of restoration is best for your patient. View clinical secrets on preps, temps, impressions, cords, cements and why is shade selection difficult and how to get it right the first time.

OBJECTIVES
- Learn the pros and cons between intraoral scanners vs. conventional impressions
- Identify the problems associated with color and lighting and how to improve our shade-taking ability
- Trouble shoot impression techniques and materials to get perfect impressions
- Apply the communication tools needed to achieve optimal results between you and the lab
- Understand the basics of occlusion in restoring anterior teeth.
- Know what questions to ask and tools required to achieve excellent anterior esthetics.
- See the differences in restorative products available and how to choose the best for your patient.
- Apply tools to build a more successful practice through image building and marketing.

PRESENTER
ROBERT P. MARBACH, BA, CDT is a Past Board of Directors at The Pankey Institute. He is Founder and owner of Authentic Dental Lab in San Antonio, TX. Mr. Marbach is a Board Certified Dental Technician currently working on his Masters in dental technology and has over 25 years of dental experience. In 1999 Bob received his Technical Certificate of Completion from the Pankey Institute. Mr. Marbach is a past member of the Advisory Board for The Canadian Journal of Dental Technology.

Luncheons for Learning

FEBRUARY 1

**FORMAT**
One day a month a speaker discusses a dental topic during lunch. The sessions are informal and the group has an opportunity to interact with the speaker during the short discussion period at the end of the lecture. It requires only about one and one-half hour of your time to learn the latest developments in many areas of dentistry. It also offers the opportunity to become better acquainted with your colleagues and staff since all dental professionals are invited to attend.

**OBJECTIVES**
- Establish an appropriate diagnosis
- Plan appropriate treatment modifications to safely manage the medically compromised patient.

Specific topics discussed will include, but not be limited to:
- Allergic reactions
- Autoimmune disorders
- Candidiasis
- Cardiovascular disease
- Dermatologic disease
- Dry mouth
- Hepatitis
- HIV/AIDS

Shubhik S. Khajotia, B.D.S., M.S., Ph.D.

College of Dental Medicine, Medical University of South Carolina, Assistant Dean for Research as well as Professor and Chair of the Department of Dental Materials in the College of Dentistry at the University of Oklahoma. He also holds appointments in the OU Health Sciences Center Graduate College and the OU School of Chemical, Biological, and Materials Engineering.

OBJECTIVES

- Review the anatomy of anterior teeth
- Understand totally how anterior teeth are supposed to function
- Take a close look at what makes front teeth esthetically pleasing
- Preparation of anterior teeth -- crowns and veneers
- Simple methods of temporization
- A quick review of impression technique

OVERVIEW

The clinician is spending more time taking care of anterior teeth. If the dentist is not bleaching them, he or she is covering them with beautiful porcelain. It is time to take a close look at what makes front teeth look beautiful and function correctly. Let’s see if form does follow function. In this course, Dr. Shirley will look at the anatomy of anterior teeth, the esthetics of anterior teeth, how to prepare anterior teeth for crowns and veneers, how to temporize anterior veneers and crowns, and how anterior teeth function.

PRESENTER

JACK I. SHIRLEY, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio in 1979. He has maintained a private practice in San Antonio, Texas for over twenty years. Dr. Shirley has been associated with the Pankey Institute in Key Biscayne, Florida for eighteen years. He has served as Associate Faculty for thirteen years and is President of the Board of Trustees and a member of the Board of Directors. Dr. Shirley has been selected to represent the Pankey Institute through its speakers Bureau and can be heard through the nation at numerous dental meetings speaking about Pankey philosophy, techniques, and the effectiveness of comprehensive care dentistry. He has a passion for dental education and a strong desire to help dentists reach their full potential.

FEBRUARY 23
NEW COURSE
Lecture Course for the Entire Dental Team
Practice Growth Through
Esthetic Regeneration and Implant Dentistry
DONALD P. CALLAN, BS, BA, D.D.S.

OVERVIEW
Implant success is no longer judged by whether the implant integrates or how long the implant remains in the patient’s mouth. The lack of precise duplication of color, contour, and function of the natural dentition for the final implant prostheses may ultimately result in an implant failure as defined by your patient. The entire implant team must envision the final result appropriate for each patient. Patients expect and deserve the finest restoration available, a safe procedure, and long term results.

This presentation is designed to achieve the criteria of longevity for the dentists and the criteria as set by the implant patient in defining success as esthetics, function, longevity, and a healthy environment. Dr. Callan will also present a dental implant update based on sound biological literature to meet the demands of your patients. Implant selection, placement location, spacing, marketing, surgical stents, immediate load, immediate placement, and surgical placement will also be reviewed.

The purpose of this program is to provide evidence-based information to evaluate grafting materials for periodontal, restorative, and implant dentistry based upon clinical, esthetic, functional, and histological results in humans.

OBJECTIVES
• Understand the goal of implant dentistry.
• Identify the need and indications for implant success.
• Define and avoid implant failure.
• Understand the difference between implant successes and implant survival.
• Select proper implant location to obtain maximum esthetics.
• How to market dental implants to your patients.
• Understand how to prevent implant problems.
• Identify the proper time and sequence of implant placement procedures.
• Defend clinically, functionally, and histologically, the use of the dental implant system being utilized.
• Select proper implants based on sound biological principles.

PRESENTER
DONALD P. CALLAN, D.D.S., received his dental degree in 1975 and a Certificate in Periodontics from the University of Missouri at Kansas City in 1978. Dr. Callan maintains a private practice limited to Periodontics with an emphasis on tissue regeneration and implant dentistry in Little Rock, Arkansas. His current hospital appointment includes the Arkansas Children Hospital in Little Rock, Arkansas.

Beyond the Classroom

Online Learning from The Office of Continuing Dental Education at UT Health San Antonio
www.smile.uthscsa.edu
Online Learning Opportunities are Presentations-On-Demand (ePOD)

Video presentations are streamed in your web browser in Quicktime format. If you don’t have the latest version QuickTime software installed in your computer, we provide the link to Apple’s website at http://www.apple.com/quicktime/download

www.smile.uthscsa.edu

CDEmobile and CDEonDemand are free presentations that allow the dental professional to view the content and be able to receive credit. These presentations are high definition, entertaining, state of the art advanced animation technology video presentations which allow users to select and watch/listen to internet/streaming continuing education video content available 24 hours-a-day, 7 days-a-week.

- CDEMobile
CDEmobile provides video content on different dental topics for FREE! The course content are designed to work on iPhone, iPod Touch, iPad and Android-based mobile phones and devices: http://cdemobile.uthscsa.edu

- CDEonDemand
CDE on Demand are 1-hour video presentations which allow users to select and watch/listen to internet/streaming continuing education video content for FREE using your computer (desktop or laptop) available 24 hours-a-day, 7 days-a-week: http://cdeondemand.uthscsa.edu

Video Streaming, Interactive Web Courses, and Testing Center courses allow the dental professional to view content in 1 hour, 1.5 hour and 2 hour segments and receive credit. We also offer continuum courses which may require multiple lectures that meet specific requirements for certifications. These presentations are high definition, entertaining, state of the art advanced animation technology video presentations which allow users to select and watch/listen to internet/streaming CE video content, 24 hours-a-day, 7 days-a-week.

- Video Streaming
These presentations are produced at the Massad Center for Higher Learning, state of the art film studio, or are provided by our Partners in Education after a peer review process based on UTHSCSA standards. http://cdestream.uthscsa.edu

- Interactive Web Courses
You are invited to participate in our interactive didactic courses presented by UT Health Science Center at San Antonio, Continuing Dental Education. This is the modern version of the correspondence courses. http://icourses.uthscsa.edu

- Testing Center
This testing site allows the dental professional to take a short quiz and receive CE credits after viewing or reading dental material that has been made available through the Office of Continuing Dental Education at The UTHSCSA, School of Dentistry. http://testingcenter.uthscsa.edu

Online Learning Opportunities

ADHESIVE DENTISTRY

ANESTHESIA AND PAIN CONTROL
- Combination - Inhalation Enteral (Oral) Minimal Sedation Level 1 (Texas Certification Continuum Course 12 sections)
- Minimal Enteral (Oral) Sedation (Level 1) Permit Renewal Course (Texas Certification Continuum Course 7 sections)
- Nitrous Oxide Conscious Sedation: For Dentists (Texas Certification Continuum Course 9 hours of didactic)
  ○ Monitoring the Administration of Nitrous Oxide: For Dental Hygienists and Assistants (Texas Certification Continuum Course 3 sections)
  ■ Triazolam (Halcion) Sedation as an Alternative to IV Sedation (1 section)

CAD/CAM
- Computerized Dentistry for Private Practice: Abutments, Ceramics and Occlusion (1 section)

CARIOLOGY AND CARIES MANAGEMENT

COMMUNITY ORAL HEALTH/POLICY

DENTAL ASSISTING
- Dental Assistant Registration Course and Examination (Texas Certification Continuum Course 8 hours of didactic)

DENTAL DIGITAL RADIOGRAPHY
- Using 3D Imaging: The New Standard of Care (1 section)

DENTAL ECONOMICS AND PRACTICE MANAGEMENT
- Seven Ways To Avoid Carpal Tunnel Syndrome (3 sections)

DENTAL HYGIENE
- Instrument Sharpening (1 hour of didactic)

DENTAL MATERIALS
  ■ Dental Materials in Modern Dentistry (1 section)

DENTAL PUBLIC HEALTH

DENTAL RESEARCH

DIAGNOSIS HEALTH AND WELLNESS

DIAGNOSIS AND TREATMENT PLANNING
- Patient Management...From A Non Clinical Perspective (1 section)
- Team-Driven, Patient Centered, Practice Management (3 sections)

ELECTRO-, RADIO-, AND LASER SURGERY

EMERGENCY DISASTER PREPAREDNESS /FORENSICS

EMERGING TECHNOLOGIES/DENTAL ENDODONTICS
- Perforations: The Endodontic Dilemma
- Anterior Endodontics For The General Practitioner (1 section)
- Instrumentation: The Science and The Art (1 section)
- Options For The Endodontically Compromised Tooth (1 section)
- Obturation: Basis, Objectives, and Techniques (1 section)
- Endodontic Retreatment: Achieving Success the Second Time (2 sections)
  ○ The Essentials of Endodontic Diagnosis (1 section)
  ■ The Endontic Dilemma (1 section)
  ■ Cracked Tooth Syndrome (1 section)
  ■ Endodontic Management of Immature Permanent Teeth (1 section)
  ■ Vertical Fractures: Diagnosing Vertical Root Fractures with new and Advanced Imaging Technologies (1 section)

ERGONOMICS
- Seven Ways To Avoid Carpal Tunnel Syndrome (3 sections)
- Ergonomics in Pain Management (including Carpal Tunnel Syndrome) (five chapters)

ESTHETIC AND COSMETIC DENTISTRY
- Achieving Aesthetic Laminate Veneers (1 section)
  ■ Truth about Zirconia: Clinical Assessment Update (1 section)
  ■ Understanding Current All-Ceramic Systems (1 section)

ETHICS AND LAW
  ■ Lawsuits and HIPAA (1 section)
  □ Legal Considerations for Today’s Practitioner (2 hours of CE)
  ■ Jurisprudence: How to Avoid A Legal Entanglement (Dental Sleep Medicine (1 section)

EVIDENCE-BASED PRACTICE
- Evidence-Based Practice Skills and Tools for Practitioners (1 section)
- Keep Up-to-Date with Biomedical Info

FUNDAMENTALS OF EXCELLENCE IN THE DENTAL PRACTICE

GENERAL DENTISTRY

GERIATIC DENTISTRY

IMPLANTOLOGY

Implant Dentistry

Form, Function, and Esthetics
to the provider or to ADA CERP at www.ada.org/goto/cerp.
Concerns or complaints about a CE provider may be directed

The University of Texas Health Science Center at San Antonio
is an ADA CERP Recognized Provider. ADA CERP is a service
of the American Dental Association to assist dental profession-
als in identifying quality providers of continuing dental educa-
tion. ADA CERP does not approve or endorse individual
courses or instructors, nor does it imply acceptance of credit
hours by boards of dentistry.

Continuing Dental Education credits are designated in each
course description.

Concerns or complaints about a CE provider may be directed
to the provider or to ADA CERP at www.ada.org/goto/cerp.

ADA CERP® Continuing Education Recognition Program

UT Health Science Center at San Antonio is an ADA CERP Recognized Provider
REGISTRATION INFORMATION

Telephone Number: (210) 567-3177 • Fax Number: (210) 567-6807 • Web: http://smile.uthscsa.edu

PRE-REGISTRATION: Preregistration for all courses is necessary. It is the registrant’s responsibility to preregister for a course as the course packet will be available for them at final check-in. Please call the Office of Continuing Dental Education at (210) 567-3177 to preregister for a course or mail the registration form with check made payable to “UTHSCSA” to:

UTHSCSA
Continuing Dental Education MSC 7930
7703 Floyd Curl Drive
San Antonio, Texas 78229-3900

The Office of Continuing Dental Education may find it necessary to implement a reasonable fee increase on noted courses.

The Office of Continuing Dental Education cannot be held responsible for the cost of a nonrefundable airline ticket or flight change in case of cancellation of a course cancellation or the rescheduling of the program.

Upon registering in any Continuing Dental Education activity, the participant agrees that the University of Texas Health Science Center at San Antonio and their affiliates, and all personnel associated with the program are not responsible or liable for any injuries or other damages sustained by the attendee in connection with the scheduled activity, and the participant hereby releases each of them from any liability arising directly or indirectly from any such injury or damage.

The registered participant grants permission to the Office of Continuing Dental Education (and its designees and agents) to utilize the participant’s image, likeness, actions and/or statements in any and all media, in print, video, or photographic form, play or other transmission, exhibition, publication, or reproduction made of, about, or at the activity without further authorization or compensation.

Participants may not use video or audio recording devices during the course or scheduled event.

Registering for any Continuing Dental Education activity constitutes acceptance of these terms.

PAYMENT BY CREDIT CARD: MasterCard, Visa, or Discover Card only.

ON-SITE CHECK-IN: Please check details of each course for designated time and location of course offering. Participants can pick up packets one hour prior to the beginning of the course. Same day walk-in enrollments will be accommodated on a space-available basis.

CONFIRMATION: Your registration confirmation will be mailed from our registrar within 5-7 working days upon receipt of payment. You will also receive a listing of nearby hotels at this time. This will be followed by a final confirmation letter designating the details and location of the course within 10 days of the program date. A map of the campus and parking information is on the Health Science Center website www.uthscsa.edu. Proof of payment and Certificate of Attendance will be issued on day of the course to those participants who have completed the course. Replacements or additional copies of the Certificate of Attendance can be issued, however, participants will be charged an administrative fee for reissues. Participants who pay on the day of the course will be mailed their Receipt of Payment and Certificate of Attendance.

TUITION DISCOUNT: "Recipients of the Kenneth D. Rudd CDE Participant Award may deduct 5 to 10% from the tuition of designated courses. This tuition discount is offered to the participants who have attended at least 100 continuing dental education hours of courses sponsored by the Office of Continuing Dental Education. The University of Texas Health Science Center at San Antonio, School of Dentistry.

ACCOMMODATING PEOPLE WITH SPECIAL NEEDS: If you are a person with special needs and desire special accommodations, please advise us at the time of registering for the course. Requests will be kept confidential. Individuals with speech or hearing impairments can contact the Office of CDE by using TDD Message Relay Texas. If you have a TDD, 1-800-730-2369. If you do not have a TDD, call 1-800-730-2988.

AFFILIATIONS: The University of Texas Health Science Center at San Antonio, School of Dentistry is a member of the American Dental Education Association.

CONCERNS, COMPLAINTS & SUGGESTIONS: To assure an optimal educational experience, the Office of Continuing Dental Education and the Dental School’s Committee on Continuing Education are committed to management courses, faculty and staff to register concerns, complaints or suggestions for formal review and, if appropriate, subsequent action. To warrant a fair and expeditious review, contact the Office of Continuing Dental Education for the appropriate form. Concerns or complaints about a CE provider may be directed to the provider or to the ADA CERP at www.adacerp.org.

GENERAL REFUND POLICY: If you must cancel your registration, please notify the Office of Continuing Dental Education as soon as possible. If you must cancel your registration prior to the start of the course, all refunds will be subject to an administrative fee assessment of $99.25. Any cancellation made one week or less prior to the course does not qualify for a refund. However, participants may choose to place their tuition minus an administrative and direct cost fee assessment into a holding account for future use. "No Shows" will not qualify for refunds. Written notification is required within five business days by mail, fax, or e-mail to initiate the refund process. Please allow four to six weeks for all refunds. Specific refund policies may apply to all off-site or on-line, subscription, and/or company that will be discussed or considered during their presentation. They do this has been noted in the handouts and promotion material.

EMERGENCY CONTACT: Telephone number for the Office of Continuing Dental Education; 210-567-3177. To contact a participant in the event of an emergency and there is an on-site dentist on call or the Program Coordinator, 210-567-3177. The contact information for on-site dentists can be obtained by dialing 911 or contacting the University of Texas Health Science Center Safety Department at 210-567-3177. Location numbers will be provided with final confirmation letter.

LOCATION: UTHSCSA School of Dentistry is located at Medical Drive and Floyd Curl Drive. The main entrance to the complex is at Floyd Curl Drive (opposite Methodist Hospital). This entrance is open all hours, weekends and after hours.

COMPLIMENTARY PARKING: For those of you who will be driving to campus, the security officer at the main gate will give you a parking pass. You will be given a valid ticket at check in that you will need to exit the lot at the end of the course. Ticket validation occurs only once during registration. If you decide to leave and come back we are unable to validate any additional tickets and you will be responsible for payment at the gate.

LATE ENTRY TO THE DENTAL SCHOOL: The main doors to the Dental School are locked during the weekends. Please inform our office if you are unable to check in at designated times.
