You have the knowledge on dental implants but now you need the support of your staff

Don’t leave them in the dark and shatter your practice dreams

TEAM WEEKEND
Your staff will understand the entire dental implant process from start to finish

FRIDAY, FEBRUARY 8, 2019
Dental Team Implant Certification Program
- Definitions
- Assessment, Diagnosis & Treatment Planning
- Patient Interaction
- Implant Surgical Procedures
- Implant Prosthodontic Procedures
- Maintenance & Evaluation Procedures
- Marketing

SATURDAY, FEBRUARY 9, 2019
The Business of Implant Dentistry Communication, Organization, and Managing Risk
- Improve the practice/patient relationship
- Develop a system of continual communication/care
- Quote and collect appropriate fees for quality care
- Take insurance out of the doctor/patient relationship

ADIA - Membership status of the Association of Dental Implant Auxiliaries is included, upon completion of this program.

OFF SITE (PARTICIPATION & LECTURE) PROGRAM REFUND POLICY: If you must cancel your registration, please notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that a refund may be considered. Due to commitments to off-site properties, any cancellation made prior to the start of the program will be subject to an administrative fee assessment of $198.50. Any cancellation made two months or less, prior to the course does not qualify for a refund. However, participants may choose to place their tuition minus an administrative and direct cost fee assessment into a holding account for future use. “No Shows” will not qualify for refunds. Written notification is required within five business days by mail, fax, or e-mail to initiate the refund process. Please allow four to six weeks for all refunds. Specific refund policies may apply to all off-site programs. Contact our office for the specific refund policy regarding any course.

Objectives:
- Current state in the United States
- How did this happen
- Current guidelines

Orthognathic and Implant Placement in the Narrow Space

SCOTT RAKE, DDS, graduate from the University of Louisville School of Dentistry in 1995. Dr. Rake went on to complete his Oral and Maxillofacial Surgery residency at the University of Minnesota. He joined Dakota Valley Oral and Maxillofacial Surgery in 1999. Dr. Rake has been an adjunctive clinical professor at the University of Minnesota Division of Oral and Maxillofacial Surgery since 2000. He is a member and Diplomate of the American Board of Oral and Maxillofacial Surgeons, ADA, and the St. Paul, Minnesota District Dental Society.

Cone Beam CT:
Basic Principles, Interpretation and Applications in Dentistry

RUJUTA KATKAR BDS, MDS, MS, Diplomate American Board of Oral & Maxillofacial Radiology, Assistant Professor-department of Comprehensive Dentistry at UT Health, San Antonio. Dr. Katkar earned her MDS degree in Oral Medicine, Diagnosis and Radiology from India. She received her Master’s degree with Certificate in Oral & Maxillofacial Radiology from University of Iowa in 2011. She worked at the University of Florida College Of Dentistry as an oral medicine resident. In 2011, she was accepted for a two year residency at the University of Minnesota. Dr. Katkar is actively involved in teaching postgraduate and graduate students in Oral & Maxillofacial Radiology at UT Health San Antonio.

Objectives:
- Basic Principles of CBCT and Cross-sectional anatomy
- Describe basic principles
- Discuss various scan acquisition and reconstruction
- Limiting radiation exposure to patient.
- Understand cross-sectional radiographic anatomy

Applications and Interpretation of CBCT
- CBCT in implant dentistry, Endodontics, Orthodontics, TMJ and airway disorders
- Image reformations in multiple planes
- Physiologic versus pathologic incidental findings
- The importance of systematic review and interpretation of a scan
- Discuss ethical and medico-legal considerations of CBCT

Opioid Epidemic

P. ANGIE RAKE, DDS, received her dental degree from the University of Minnesota School of Dentistry in 1997. She completed an Oral and Maxillofacial Surgery Internship at the Minneapolis Veterans Affairs Medical Center. Dr. Rake is a graduate of the Oral and Maxillofacial Surgery training program at the University of Minnesota. In 2002, she joined Dakota Valley Oral and Maxillofacial Surgery. She remains active in academics as an adjunct associate professor at UM-SOD. She is a member and Diplomate of the American Board of Oral and Maxillofacial Surgeons and numerous societies.

Ask the OMFS
Both doctors Angie and Scott Rake will allocate an hour to any questions. Whether it’s “Off the cuff”, about a case, or a topic in the spectrum of Oral and Maxillofacial Surgery.

TIMES
Pre Check-in: Wednesday 8:30 PM-9:00 PM
Sign-in & Breakfast: Thursday, 7:00 AM
Program: Thursday-Friday, 7:30-9:30 AM; 4:30-6:30 PM
Saturday, 7:30-11:30 AM
Breakfast will be provided at the morning session. Snacks and refreshments will be available for the course participants at the afternoon sessions.

LOCATION
WESTIN SNOWMASS RESORT • Snowmass Village, Colorado

TUITON
Dentist or Team Member: $655.00 Additional Dental Team Member: $595.00

25th Annual

Preceptorship in Dental Implantology

PRECEPTORSHIP INFORMATION
This Preceptorship honors our co-founders Roland M. Meffert, D.D.S. and Robert J. Cronin, Jr., D.D.S., M.S., and consists of an annual review and updated curriculum that is clinically focused while incorporating the latest research from the clinical basic sciences. This will provide the participant with an understanding of the rationale and scientific basis for the clinical practice of implantology. The participants will meet for five weekend sessions which will include didactic sessions and some hands-on training experiences in an interactive learning environment.

PRECEPTORSHIP OBJECTIVES
The participant will learn:
• The rationale and scientific basis for the successful clinical practice of implantology.
• The current concepts, principles, and clinical methodology used effectively in practice.
• The proper evaluation, diagnosis, and selection of patients for implant placement and restoration.
• To develop and understand specific implant, surgical and prosthodontic skills, and the different modalities available.
• To manage the more difficult clinical situations, such as patients with advanced maxillary or mandibular atrophy.
• The practice management aspects of dental implantology: records, insurance, informed consent, medical-legal and marketing considerations.

Presentation by 20+ Dental Experts of national and international acclaim

DIDACTIC SESSIONS
• History and future of dental implantology.
• Biomechanical and biomaterial aspects of dental implantology.
• Physiologic and Biomechanical aspects of bone and dental implantology.
• Physiology of bone with emphasis on cellular, molecular healing, bone maturation of bone in function and selection of implants with different designs and surfaces relating to bone density and planned implant function.
• Anatomy and Anatomical structures (muscles, nerves, arteries) as they relate to implant placement and stress distribution.
• Philosophies of implant retention & stabilization.
• Essential treatment planning facets, including patient selection, past dental and medical history, essential diagnostic guides (casts, templates, etc.), documentation, appointment sequencing with laboratory, surgeon, restorative dentist.
• Surgical and prosthetic considerations including incision design, fixture and abutment selection, occlusal considerations, and force transmission.
• Peri-implantitis and its effect on the dental implant from the infectious and traumatic aspects.

PARTICIPATION SESSIONS
• Procedures for developing optimum esthetics and the biomechanical loading aspects of implant restorations.
• Indications and techniques relating to insertion of implants in single tooth and fresh extraction site situations.
• Hard and soft tissue grafting, guided soft, hard tissue regeneration in both pre and post implant placement, including sinus lift procedures.
• Repair of the ailing, failing implant with new regenerative procedures and materials.
• An overview of informed consent documentation and medical-legal review.
• The principles of practice management, marketing, and insurance considerations.
• Post-restoration responsibilities of staff personnel, hygienist, surgeon and restorative dentist on a recall basis.
• Demonstration of instruments, techniques for post-implant placement, restoration hygiene.
• Principles in troubleshooting, rescue, and retrieval procedures.

Each session video recorded and made available online to all attendees for future study and review.
(Viewing recorded videos of this preceptorship will not substitute attending live sessions. No CE credits awarded.)
Implants are rapidly becoming a preferred treatment option. This course has been designed for dentists who desire a solid foundation in modern dental implantology.

**DATES**
Course meets Friday and Saturday once a month October thru March. Dates TBA

**LOCATION**
UT Health San Antonio, School of Dentistry

**AGD CODES:** 690 and others applicable

**HOURS:** 80 possible

---

“The presenters’ enthusiasm, passion, and knowledge is so inspiring... the program is very helpful for aspiring dentists who want to better understand implants.”

- Course participant
**Dental Laser Proficiency Course and Clinical Simulation**

Grasp the concepts of laser dentistry

Hands-on

Laser practice management & marketing tips

...and much more!

**JANUARY 18-19**

**Dental Laser Proficiency Course and Clinical Simulation**

ROBERT A. CONVISSAR, D.D.S., B.S.

**OVERVIEW**

Has the hoopla surrounding the introduction of lasers to dentistry been more smoke than substance? Since 1990, the USFDA has approved the use of 7 different wavelengths creating a world of difference in how the lasers operate, and their usefulness in the oral cavity.

The first day will detail laser use in the following:
- Non-Surgical, Surgical & Regenerative Periodontal Therapy
- Surgical & Restorative Implantology
- Esthetic/Cosmetic Dentistry
- Fixed & Removable Prosthetics
- Practice Management/Marketing
- Pedo/Ortho
- Pedo & Adolescent Operative Dentistry
- Endo

The second day will provide each participant hands-on experience with the various wavelengths, performing surgical procedures on in-vitro models. Real time videos of routine laser procedures will be part of the discussion of specific instrument settings and techniques for laser surgical procedures.

**OBJECTIVES**

At the conclusion of the course, the participant will be familiar with the various wavelengths, their effects on oral tissues, and their uses for specific oral diseases and pathologies found in everyday practice.

**PRESENTER**

ROBERT A. CONVISSAR, D.D.S., B.S., obtained his degree from New York University College of Dentistry in 1980. He is a pioneer in the field of laser dentistry and one of the first dentists to incorporate lasers into general practice. He has extensive experience with CO2, Nd.YAG, Diode and Erbium wavelengths.

**TIME**

Check-in Friday & Saturday: 7:30 AM
Program: Friday, 8:00 AM - 5:00 PM
Saturday, 8:00 AM - 12:00 PM

**LOCATION**

UT Health San Antonio, School of Dentistry

**Tuition**

Dentist: $595.00
Dentist: $595.00 - 15% = $505.75
Dentist: $595.00 - 12% = $524.00
Hygienist: $415.00

**Credit**

Course Code: 163980A
AGD Code: 260/497
Hours: 12

The Dental School thanks Diamond Dental Supply for its unrestricted educational grant in support of this CDE program.

**REDUCED TUITION!**

Hands-On Course

"Recognition and Management of Medical and Moderate Sedation Emergencies: Hands-on Learning with SimMan"

ERNEST B. LUCE, D.D.S.

**OVERVIEW**

This one-day course will focus on recognition and management of sedation and other medical emergencies in the dental office. Course format will minimize lecture in order to maximize practice time on a sophisticated, computerized human simulator device, SimMan. Only a limited number of participants will be in each class in order to ensure plenty of time for each person to practice on the manikin.

Activities will include basic and advanced ventilation techniques including use of several airway devices, as well as the use of many emergency drugs, including sedation reversal drugs. In addition, intravenous drug administration on pig feet and cricothyrotomy on pig trachea will be discussed, demonstrated and practiced. Cardiac defibrillation will be part of several of the practice situations.

**OBJECTIVES**

Upon completion of the course, participants will:
- Recognize an evolving medical or sedation emergency
- Understand the use and placement of basic and advanced airway devices
- Use and administration of emergency medications
- Understand critical thinking and problem solving in medical/sedation emergencies
- Develop leadership skills as they apply to emergency management

**PRESENTER**

ERNEST B. LUCE, D.D.S., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. In June of 1986, he completed a one year General Practice Residency at The University of Texas Health Science Center at San Antonio. Upon completion of the residency, Dr. Luce joined the Department of Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio. Currently, he is a Clinical Associate Professor at the Health Science Center, and he also maintains a part time private practice in general dentistry in San Antonio.

**TIME**

Check-in: 7:30 AM - 8:00 AM
Program: Friday, 8:00 AM - 6:00 PM

**LOCATION**

UT Health San Antonio, School of Dentistry

**Tuition**

Dentist: $1,200

**Credit**

Course Code: 163981A
AGD Code: 142
Hours: 8
Topics include, but are not limited to:

- Allergic reactions
- Autoimmune disorders
- Candidiasis
- Benign oral lesions
- Dry mouth
- HIV/AIDS
- Oral cancer

Objective:

Participant questions are strongly encouraged. Specific topics include, but are not be limited to:

- Allergic reactions
- Autoimmune disorders
- Candidiasis
- Benign oral lesions
- Dry mouth
- HIV/AIDS
- Oral cancer

**Overview**

With the aid of multiple slides and cases, presented in an interactive case-based discussion format, this course is intended to improve the practitioner’s ability to obtain and interpret the medical history and plan appropriate treatment modifications to recognize and properly manage common oral conditions.

**Objectives**

Participant questions are strongly encouraged. Specific topics include, but are not be limited to:

- Allergic reactions
- Autoimmune disorders
- Candidiasis
- Benign oral lesions
- Dry mouth
- HIV/AIDS
- Oral cancer

**Presenter**

MICHAELL A. HUBER, D.D.S., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He continued with postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1988. Upon his retirement from the United States Navy in 2002, Dr. Huber joined the faculty as an Assistant Professor in the Division of Oral Medicine, Department of Dental Diagnostic Science at The University of Texas Health Science Center at San Antonio, Dental School.

He has been teaching both pre-doctoral and graduate dental students at the Health Science Center, and is an active participant in the Dental School’s Tertiary Care Oral Medicine Clinic. His current research activities include evaluating novel diagnostic techniques for the early detection of oral cancer.

**Time**

Check-in: 8:00 AM
Program: Friday, 9:00 AM-12:00 PM

**Location**

UT Health San Antonio, School of Dentistry

**Tuition**

Individual: $125.00

**Credit**

(Course Code: 163982A)
AGD Code: 730 Hours: 3

**Special Fee Offer**

Register for the morning program and receive a discount on the afternoon Texas Brief.

Lunch is included for the participants attending both sessions.

---

**Overview**

Recent guidance published jointly by the American Dental Association and the American Academy of Orthopedic Surgeons pertaining to the prevention of prosthetic joint infection in the dental setting has been recently introduced. In addition new recommendations from the United States Preventive Services Task Force addressing screening for oral cancer have also been introduced. Both of these new sets of guidelines have generated much debate and consternation in the dental profession. The purpose of this course is to update the practitioner on the pros and cons of both recommendations and offer a perspective on how best to interpret and implement.

**Objectives**

At conclusion, participants should be able to discuss:

- Relevant risks of dental care as it pertains to prosthetic joint infection.
- Have a better understanding of the recently released guidance addressing prosthetic joint infection and dental care.
- Discuss the oral screening and its integral relationship with the comprehensive head and neck examination.

**Presenter**

MICHAELL A. HUBER, D.D.S., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He continued with postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1988. Upon his retirement from the United States Navy in 2002, Dr. Huber joined the faculty as an Assistant Professor in the Division of Oral Medicine, Department of Dental Diagnostic Science at The University of Texas Health Science Center at San Antonio, Dental School.

(210) 567-3177
Minimally Invasive Antimicrobial Treatment for Basic to Advanced Periodontal Disease

OVERVIEW
Adding chemotherapeutic methods to target the periodontal bacteria will allow for successful management of very advanced cases that might otherwise have been treated only with extraction, to infected cases you might traditionally treat with non-surgical methods. In doing so, results will be improved over classic surgical or SCRP methods which may not kill all bacteria at the diseased sites. These innovative methods will be explained by outlining both in-office procedures, as well as specific anti-microbial procedures for the patient to do at home. When combined, they yield predictable results for previously failing cases as well as those treated for the first time.

Treatment will be illustrated with clinical photos and radiographs, including clinical applications in dogs that also show excellent results. Cases will be shown and literature quoted to validate the procedures.

LEARNING OBJECTIVES:
1. See why Periodontal Surgery or SCRP may fail.
2. Learn to manage failed and failing cases.
3. Improve diagnostics with bacterial culturing.
4. Role of patient care at home as part of treatment.

How Crown Lengthening Will Enhance Your Restorative Results

OVERVIEW
This topic covers methods, limitations, and benefits of both esthetic and functional crown lengthening. You will have a better understanding of these principles to help patients enjoy better and more predictable results.

These principles apply to both posterior and anterior teeth, and both will be covered. Participants will see how crown margin proximity to soft tissue can adversely impact their restorative results, which in turn leads to better understanding of why tissues are red and sore at times. Discussion points include making diagnostic decisions regarding Crown Lengthening from both radiographic and clinical perspectives. It includes a detailed discussion of Biologic Width and how that impacts restorative decisions, including how to improve “Gummy Smile” issues.

Multiple case examples are shown from both radiographic and clinical perspectives, starting with initial evaluation through the surgery and final completion.

LEARNING OBJECTIVES:
1. How to achieve predictable impressions every time.
2. Biologic Width and its role in predictable results.
3. Learn why crowns come loose and how to prevent it.
4. Causes of red gum tissue around crown margins.
5. Diagnose esthetic and functional crown lengthening.

Achieving Predictable Restorative Results with Soft Tissue Grafting

OVERVIEW
Learn evidenced-based solutions for the types of soft tissue challenges that you face on a daily basis, such as how to cover those exposed roots and predictably stop, or prevent, recession especially in the esthetic zone. Learn to gain peace of mind in knowing the gingiva stays in place at the margins of newly placed esthetic crowns.

In this course, methods are illustrated to solve those problems and enhance your restorative results by using both Free Gingival and Connective Tissue Grafts.

LEARNING OBJECTIVES:
1. Understand diagnostic criteria for each graft.
2. Indications and limitations for each graft.
3. To stop or prevent recession in the esthetic zone.
4. When to graft or not to graft.
5. Causes of red gum tissue around crown margins.
6. Diagnose esthetic and functional crown lengthening.
Lecture Course

Advances in Direct Restorative Materials

SHARUKH S. KHAJOTIA, B.D.S., M.S., Ph.D.

OVERVIEW
Resin composites, CAD/CAM and 3-D printed resin materials for digital dentistry, and light-curing units are constantly evolving areas of restorative dentistry. In addition, the category of bioactive materials is rapidly evolving. Dentists are faced with a vast array of restorative dental biomaterials, and are expected to separate advertising from reality.

In this presentation, Dr. Khajotia will differentiate among the various categories of resin composites, bioactive materials and light-curing units from the perspective of critical Biomaterials Science considerations and clinical use, without personal bias or commercial interests. He will also discuss CAD/CAM and resin-based 3-D printed materials for digital dentistry from that perspective.

During this presentation, Dr. Khajotia will review the composition, manipulation and properties of various types of resin composites including nano-hybrid, nano-filled, flowable and bulk-filled categories. Innovations in polymer chemistry will also be examined. In addition, recent developments in light-curing units and bioactive materials will be reviewed. Overall, this presentation will provide participants with the tools needed to review and select suitable resin composites, bioactive materials, materials for digital dentistry and light-curing units with confidence.

OBJECTIVES
1. Composition, manipulation and properties of resin composites
2. Benefits, limitations and clinical suggestions for resin composites
3. Innovations in polymer chemistry
4. Composition, manipulation and properties of bioactive materials
5. Benefits, limitations and clinical suggestions for bioactive materials
6. Composition, manipulation and properties of CAD/CAM and 3-D printed resin materials for digital dentistry
7. Benefits, limitations and clinical suggestions for CAD/CAM and 3-D printed resin materials for digital dentistry
8. Benefits, limitations and clinical suggestions for dental light-curing units
9. Concepts that dentists need to know about dental biomaterials
10. Tools for the review and selection of dental biomaterials

PRESENTER

ANNOUNCEMENT—MARK THIS DATE TOO!
August 9th
Dr. Khajotia will be visiting our CDE Department twice in 2019

Mastering Bonding Agents and Cements

Dr. Khajotia will review the composition, manipulation and properties of bonding agents, resin luting cements, glass ionomers and resin-modified glass ionomers, with an emphasis on the latest generation of bonding agents. He will then provide attendees with a unique insight into current research in his laboratory!
GET YOUR TEAM ABOARD TO ASSIST YOU ON IMPLANTS!

Your staff will walk away with a better understanding and a higher level of confidence in implant dentistry.

Improve the quality of the practice/patient relationship.

With the full support of your staff, you can jump right into providing the best care possible for your patients.

FRIDAY, FEBRUARY 8, 2019
Dental Team Implant Certification Program

- Definitions
- Assessment, Diagnosis & Treatment Planning
- Patient Interaction
- Implant Surgical Procedures
- Implant Prosthodontic Procedures
- Maintenance & Evaluation Procedures
- Marketing

ADIA
Membership status of the Association of Dental Implant Auxiliaries (ADIA) is included, upon completion of Friday’s program.

SATURDAY, FEBRUARY 9, 2019
The Business of Implant Dentistry
Communication, Organization, and Managing Risk

- Find and inspire implant candidates to receive care
- Answer questions effectively about implant dentistry
- Help patients make great decisions
- Make financial arrangements with few misunderstandings
- Coordinate treatment to completion of care
- Manage Risk—Your Role and Responsibility

TEAM WEEKEND

FEBRUARY 8, 2019

A Lecture Course

**Dental Team Implant Certification Program**

EDIE GIBSON, R.D.H., M.S.

**OVERVIEW**

The field of dental implantology is vast, ever-changing and can be intimidating. As a TEAM member, it is critical to have a comprehensive understanding of implantology, including surgical, restorative and maintenance options, in order to communicate more effectively with your patients. A discussion of implant therapy along with signs, symptoms, and etiology of peri-implant complications, evidence-based maintenance protocols, revolutionary periodontal regenerative options, and how to talk implants with your patients, will be discussed.

**OBJECTIVES**

Upon completion, participants will be able to:

- Develop an appreciation of dental implants as a treatment option for your clients
- Understand the types of implants and surface treatments available in the market today
- Understand implant terminology
- How to assess a client for implant therapy
- Differentiate between the latest technology, instruments and products
- Develop customized home care protocols
- Communicate the risks and benefits of implants

**COURSE OUTLINE**

- Classification and Definitions of Dental Implants
- Scientific Basis for Dental Implant Therapy
- Overview of Surgical and Restorative procedures
- Maintenance and Evaluation Procedures
- Communication

**PRESENTER**

EDIE GIBSON, RDH, MS, is a Registered Dental Hygienist that brings over 30 years of diverse, hands-on clinical and business expertise to the podium. She incorporates real world experiences and humor, making difficult subjects fun, empowering, and thought provoking for the entire TEAM! She believes in a collaborative, patient-centric approach to treatment in order to achieve stellar outcomes.

Edie is a Chief of OMS Services for Jameson Management, Certified Speaker for Straumann, and a Thought Leader/KOL for several dental companies. She is the former Executive Director, Certified Educator, and founding Fellow of the ADIA, as well as co-creator of the Dental Hygiene Implant Certification Program (DHICP). She is a 2013 Sunstar RDH Award of Distinction recipient, a Certified Psychotherapist and a contributing author to the bestselling book, Overcoming Mediocrity.

**TIME**

Check-in: 7:30 AM
Program: Friday, 8:00 AM - 4:00 PM

**LOCATION**

UT Health San Antonio-School of Dentistry

**TUITION**

Individual: $260.00

**CREDIT** (Course Code: 163959A) Hours: 7

**SPECIAL INFORMATION**

Upon completion of this program, the participant will be eligible for membership status of the Association of Dental Implant Auxiliaries (ADIA).

---

FEBRUARY 9, 2019

A Lecture Course

**The Business of Implant Dentistry Communication, Organization, and Managing Risk**

JOY MILLIS, CSP

**OVERVIEW**

Management and communication skills go hand-in-hand with the clinical skills necessary to provide implant dentistry. Marketing the service, answering questions, maintaining patient records, coordinating treatment, quoting fees, making financial arrangements and risk management will be discussed. Handout materials provided will assist in the rapid implementation of skills learned and systems discussed during this program.

**OBJECTIVES**

At the conclusion of this program, participants should be able to:

- Increase the likelihood that patients will act on treatment recommendations.
- Improve the quality of the practice/patient relationship.
- Reduce the risk to the patients and the practice by developing a system of continual care and communication.
- Quote and collect appropriate fees for quality care.
- Take insurance out of the doctor/patient relationship

**PRESENTER**

JOY MILLIS, CSP, is a successful entrepreneur. Her business development firm Joy of Communication, equips and motivates professionals to implement quality-based marketing and communication skills. She has earned the prestigious Certified Speaking professional (CSP) designation from the National Speakers Association. Ms. Millis also serves on the visiting faculty of The Medical College of Georgia, Howard University, The University of Miami and UT Health San Antonio where she teaches management excellence for implant dentistry.

**TIME**

Check-in: 8:00 AM
Program: Saturday, 8:30 AM - 4:30 PM

**LOCATION**

UT Health San Antonio-School of Dentistry

**TUITION**

Dentist: $210.00
Allied Dental Personnel: $160.00

**CREDIT** (Course Code: 163960A) AGD Code: 550 Hours: 7

$50 off!
When you register and pay for both Team Weekend courses
Make your plans for two!

There’s plenty to do just in downtown. Take a stroll, shop, and dine on the riverwalk. Hop on a boat and enjoy the scenery of our city. Stop and visit the Briscoe Western Art Museum and the historic Alamo. Go up 750 feet into the sky at the Tower of Americas and take in the view from the observation deck.

The best part is you will be visiting our campus. Your course presenters will be Jack I. Shirley, DDS or Russell A. Baer, DDS. The office of CDE looks forward to seeing you on Valentine’s weekend 2019.

To help you plan, here’s our suggested online sites:

- thealamo.org
- visitsanantonio.com
- toweroftheamericas.com
- thesanantonioriverwalk.com

To register for a course call us at 210-567-3177 or flip to page 36
OVERVIEW

The clinician is spending more time taking care of anterior teeth. If the dentist is not bleaching them, he or she is covering them with beautiful porcelain. It is time to take a close look at what makes front teeth look beautiful and function correctly. Let’s see if form does follow function. In this course, Dr. Shirley will look at the anatomy of anterior teeth, the esthetics of anterior teeth, how to prepare anterior teeth for crowns and veneers, how to temporize anterior veneers and crowns, and how anterior tooth function.

OBJECTIVES

- Review the anatomy of anterior teeth
- Understand totally how anterior teeth are supposed to function
- Take a close look at what makes front teeth esthetically pleasing
- Preparation of anterior teeth -- crowns and veneers
- Simple methods of temporization
- A quick review of impression technique

PRESENTER

JACK I. SHIRLEY, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio in 1979. He has maintained a private practice in San Antonio, Texas for over twenty years. Dr. Shirley has been associated with the Pankey Institute in Key Biscayne, Florida for eighteen years. He has served as Associate Faculty for thirteen years and is President of the Board of Trustees and a member of the Board of Directors. Dr. Shirley has been selected to represent the Pankey Institute through its speakers Bureau and can be heard through the national at numerous dental meetings speaking about Pankey philosophy, techniques, and the effectiveness of comprehensive care dentistry. He has a passion for dental education and a strong desire to help dentists reach their full potential.

Register for the morning program and receive a 30% discount on either of the afternoon Texas Briefs. Lunch is included for the participants attending both sessions.
FEBRUARY 22

Lecture Course for the Entire Dental Team
**Practice Growth Through Esthetic Regeneration and Implant Dentistry**

DONALD P. CALLAN, BS, BA, D.D.S.

**OVERVIEW**

Implant success is no longer judged by whether the implant integrates or how long the implant remains in the patient's mouth. The lack of precise duplication of color, contour, and function of the natural dentition for the final implant prostheses may ultimately result in an implant failure as defined by your patient. The entire implant team must envision the final result appropriate for each patient. Patients expect and deserve the finest restoration available, a safe procedure, and long term results.

This presentation is designed to achieve the criteria of longevity for the dentists and the criteria as set by the implant patient in defining success as esthetics, function, longevity, and a healthy environment. Dr. Callan will also present a dental implant update based on sound biological literature to meet the demands of your patients. Implant selection, placement location, spacing, marketing, surgical stents, immediate load, immediate placement, and surgical placement will also be reviewed.

The purpose of this program is to provide evidence-based information to evaluate grafting materials for periodontal, restorative, and implant dentistry based upon clinical, esthetic, functional, and histological results in humans.

**OBJECTIVES**

- Understand the goal of implant dentistry.
- Identify the need and indications for implant success.
- Define and avoid implant failure.
- Understand the difference between implant successes and implant survival.
- Select proper implant location to obtain maximum esthetics.
- How to market dental implants to your patients.
- Understand how to prevent implant problems.
- Identify the proper time and sequence of implant placement procedures.
- Defend clinically, functionally, and histologically, the use of the dental implant system being utilized.
- Select proper implants based on sound biological principles.

**PRESENTER**

DONALD P. CALLAN, D.D.S., received his dental degree in 1975 and a Certificate in Periodontics from the University of Missouri at Kansas City in 1978. Dr. Callan maintains a private practice limited to Periodontics with an emphasis on tissue regeneration and implant dentistry in Little Rock, Arkansas. His current hospital appointment includes the Arkansas Children Hospital in Little Rock, Arkansas.

FEBRUARY 23

Lecture Course for the Entire Dental Team
**Gingivitis, Periodontitis, Peri-Implantitis: The Connection and Treatment**

DONALD P. CALLAN, BS, BA, D.D.S.

**OVERVIEW**

Periodontal diseases are chronic, infectious, and inflammatory diseases resulting from exposure of the periodontium to dental plaque, a complex bacterial biofilm that accumulates on the teeth. With periodontal disease the epithelial tissue, connective tissue and bone is damage and the teeth and dental implants may be lost. To understand long term survival of dental implants, the clinician must have a clear understanding of the epithelial tissue, connective tissue and bone relationships to the dental implant surfaces. Evidence suggests that periodontitis and peri-implantitis may be the same and may contribute to the development or progression of local tissue break down and other diseases or conditions. In light of the high prevalence of the periodontal disease, these associations may be important for the maintenance of dental implants. Patients and health care providers must be informed that periodontal intervention may prevent the onset of hard and soft tissue breakdown or progression of various systemic diseases.

The purpose of this presentation to provide evidence based information to evaluate the relationships of the hard and soft tissues of connection to dental implants and to determine if these tissues are subject to periodontal breakdown.

**OBJECTIVES**

- Understand the hard and soft tissue relationships to dental implants.
- To understand the pathways of periodontal break down about dental implants.
- Identify hard and soft tissue conditions that may contribute to periodontal break down about dental implants.
- Determine the time and sequence for treatment and prevention of failing dental implants.
- To properly to inform the patient of the potential periodontal disease and systemic concerns of dental implants.
- Determine the proper maintenance of dental implants by the patient and the dental hygienist.

**PRESENTER**

DONALD P. CALLAN, D.D.S., received his dental degree in 1975 and a Certificate in Periodontics from the University of Missouri at Kansas City in 1978. Dr. Callan maintains a private practice limited to Periodontics with an emphasis on tissue regeneration and implant dentistry in Little Rock, Arkansas. OVERVIEW
The key to successful Endodontics is a grasp of the basic principles of treatment. Attention to detail in following the dictates of the Endodontic Triad, microbial control, cleaning & shaping, and seal of the canal system, is a requirement to achieve this goal.

ENDO 101 presents a philosophy of treatment grounded in these principles and coupled with over fifty years of clinical experience. Today’s technological advances are integrated with these basic principles to achieve success.

ENDO 102 involves establishing a Glide Path, with an M4 reciprocating contra angle. This time honored device decreases hand, wrist, and mental fatigue. If you can establish working length with a #10 .02 stainless steel hand file you can clean and shape the canal to ideal proportions with little time & effort. This approach is compatible with all of the rotary instrumentation systems available today. Seal of the canal system, the base of the Endodontic Triad, will be explored with emphasis on the latest technical root canal filling materials.

OBJECTIVES
• The Endodontic Triad-the keys to success.
• The Mandibular Block Revisited
• Simplified Rubber Dam Application.
• The Five Rules of Access Preparation.
• Crown Down Philosophy & Technique.
• Understanding the Foramen Finder.
• Importance of irrigation and a look at the newest systems & devices.
• The Glide Path how it relates to cleaning and shaping.
• Nickel Titanium Rotary File, metallurgy and use.
• Advantages of the Twisted File.
• A step by step, Instrumentation Technique.
• Sealing the Canal System with 3D condensation using SuperEndo-β (Beta) technology.
• Endogastritis: its causes and cures.

 PRESENTER
NOAH CHIVIAN, F.A.C.D., F.I.C.D., D.D.S., earned his dental degree from the University of Pennsylvania School of Dentistry in 1959 and later completed his graduate endodontics program at Temple University's School of Dentistry. He was a Research-Teaching Fellow in Endodontics and received his certificate in Endodontics from Temple University School of Dentistry. He is a member of Omicron Kappa Upsilon, a Diplomate of the American Board of Endodontics, an honorary member of the Societe Francaise d’Endodontie, a recipient of the Warren T. Wakai Award from the Japanese Endodontic Association, received the Alumni Award of Merit from the University of Pennsylvania School of Dental Medicine, the Edgar D Cooldidge Award from the American Association of Endodontists and the Presidential service Award from The New Jersey Dental Association.

Lecture Course
Dental Sleep Medicine: Snoring and Obstructive Sleep Apnea
RICHARD B. DRAKE, D.D.S.

OVERVIEW
This course will discuss the new TSBDE new ruling 108.12, concerning the dental treatment of sleep disorders. Are you sick and tired of being sick and tired? Fatigue is the number one complaint heard by health professionals across the globe. Fifty to seventy million Americans suffer from sleep related problem. Sleep related breathing disorders, such as snoring and obstructive sleep apnea, are at the top of this list. Less than 10% of these patients have been diagnosed. As dentists, we are in a prime position to be the first to recognize this disorder and to help steer patients in the right direction to get diagnosed. We also have the ability to treat many of these patients ourselves, thus improving their quality of life as well as possibly saving their life!

OBJECTIVES
Background:
• Understand normal breathing and airway anatomy and the problems and variants that lead to snoring and obstructive sleep apnea.
• Learn the health risks associated with sleep disordered breathing.
• Learn the basics of sleep
Signs and Symptoms:
• Learn the effects of sub-optimal sleep on health and quality of life.
• Recognize those symptoms and behaviors that may indicate sleep disordered breathing.
Diagnosing:
• Understand current and proposed diagnostic methods and the role of dentists in the team approach.
Treatment:
• Review the current treatment modalities for snoring and for mild, moderate and severe OSA.
• Explore the role that dentists can play in the management of sleep disordered breathing.
Follow Up:
• Understand the side effects of oral appliance therapy and how to manage them.

PRESENTER
RICHARD B. DRAKE, D.D.S., received his D.D.S. from UTHSCSA School of Dentistry in 1989. He maintained a private practice in general dentistry from 1990 to 2001. He is the founder of Dental Sleep Medicine Associates of San Antonio, a private practice devoted solely to the treatment of snoring and sleep apnea and is a Diplomate of the American Board of Dental Sleep Medicine. He serves on the Board of Directors with the American Academy of Dental Sleep Medicine, as well as chairing the Reimbursement Committee.

Texas Brief AM
Lecture/Interactive Course
Part I-A Spanish Class for the Dental Office
Vamos al Dentista
(Let's Go to the Dentist)
Introduction to Spanish
MYLENE MACKEY, M.S., B.S.

OVERVIEW
Although there are many excellent Spanish books and courses available, this course is designed specifically for members of the dental team. A brief, but intensive introduction for beginners on the everyday application of basic Spanish grammar, pronunciation, and vocabulary will be presented. In addition, Mrs. Mackey will review simple phrases, which can be commonly used by the dental team. The material will be based upon the text, Vamos al Dentista, designed to be used in a dental office.

PRESENTER
MYLENE MACKEY, M.S., B.S., received her Masters degree in mental health counseling from St. Mary's University, previously earning her Bachelors in theater and psychology from Texas A&M. Mrs. Mackey currently works as a Licensed Practicing Counselor. She has taught Spanish for many years including offering private lessons to businesses and individuals. Mrs. Mackey enjoys translating documents, traveling to Mexico, yoga, reading and drawing.

(Let's Go to the Dentist)
Dental Terminology
MYLENE MACKEY, M.S., B.S.

OVERVIEW
This course is designed for members of the dental team with some knowledge of the Spanish language and wish to meet the even greater need for its usage. Part II concentrates on dental terminology. Mrs. Mackey will review common vocabulary and standard phrases related to a dental practice. The material will be based upon the text, Vamos al Dentista, designed to be used in a dental office.

OBJECTIVES
• This course will be a comprehensive review of the Spanish language most commonly used in the dental office. The participants should already be somewhat familiar with the language.

PRESENTER
MYLENE MACKEY, M.S., B.S., received her Masters degree in mental health counseling from St. Mary's University, previously earning her Bachelors in theater and psychology from Texas A&M. Maximize Therapeutic Benefits with your TMD Patients

TMD Diagnoses and Treatments for General Practitioners

MARCH 22

Participation Course
TMD Diagnoses and Treatments for General Practitioners
EDWARD F. WRIGHT, D.D.S., M.S.

OVERVIEW
This course consists of a morning presentation and an afternoon of clinical activities. The morning presentation will first discuss initial patient evaluation and a recommended treatment protocol for integrating and utilizing multidisciplinary TMD therapies. This sequence will then be applied to 14 documented cases in which the patient's symptoms and clinical evaluation results are presented, and potential diagnoses and treatments will be discussed. Several of these cases are of patients who present with symptoms similar to TMD, but other diagnoses are determined, i.e., acute pulpalgia, sinustis, etc. Participants will be taught to identify these disorders from TMD through history and clinical evaluation.

The afternoon clinical activities will involve working with a fellow participant, in which the masticatory and cervical musculature will be palpated, various jaw positions will be reviewed, and various splints brought to the course will be adjusted. The course parallels Dr. Wright's recently published TMD textbook.

OBJECTIVES
The course is designed to help dentists more cost effectively obtain maximal therapeutic benefit with their TMD patients. Participants will:
• Learn to identify problems who generally will not respond well to traditional TMD therapy and how that can be changed.
• Gain new insight of the prevalence of referred pain and the pain interconnection between the teeth, masticatory system, and cervical area.
• Understand which allied health professionals are able to help their TMD patients and when they would be most beneficial.
• Palpate the masticatory and cervical musculature of a fellow participant.
• Practice mandibular manipulation techniques.
• Adjust a splint that a fellow participant brings to the course.

PRESENTER
EDWARD F. WRIGHT, D.D.S., M.S., is a professor at the University of Texas Health Science Center–San Antonio. He completed a 1-year general dentistry residency, a 2-year TMJ and Craniofacial Pain Fellowship, and a 2-year TMD research fellowship. He is the Course Director for the dental school’s TMD Course, Occlusion and TMD Course, and Dental Anatomy and Occlusion Course. Dr. Wright is the primary author of over 50 publications, author of the textbook “Manual of Temporomandibular Disorders” (in its 3rd edition), and Diplomate of the American Board of Orofacial Pain.

TIME
Check-in: 8:00 AM
Program: Friday, 9:00 AM - 5:00 PM

LOCATION
UT Health San Antonio, School of Dentistry

TUITION
Individual: $220.00
KDR Recipient: $198.00

CREDIT
(Course Code: 163997A)
AGD Code: 180

IMPORTANT COURSE INFORMATION:
Participants must bring to the course a splint they provide their patients. The splint needs to be fabricated to either the participants’ maxillary or mandibular arch. The splint may be fabricated from acrylic, soft thermoplastic mouthguard material, or any intermediate material (Flexite, Bruxeze, hard/soft laminated material, etc.). NTI appliances are not recommended and should not be brought. Participants must also bring a long shank acrylic bur and a long shank #6 or #8 round bur. If he or she brings a splint made from soft thermoplastic mouthguard material, the participant must also bring the cast it was molded over. The class will be limited to the first 14 dentists to register.
MARCH 22

Lecture/Participation Course
Restorative Planning in Implant Dentistry
NORMA OLVERA, D.D.S., M.S.

OVERVIEW
The lecture will cover comprehensive restorative planning in implant dentistry. The presenter will discuss restorative options to implant success (What has worked/What has not!) and cover clinical case presentations. In addition, the speaker will discuss how to enhance confidence restoring dental implants, as well as, providing better service to our patients.

OBJECTIVES
• Discuss specific restorative planning principles for partially dentate and edentulous patients
• Identify causes of dental implant failures
• Explain restorative thinking in preventing implant failures
• Experience a detailed hands on session with restorative components
• Leave the course knowing basic implant restorative principles and ready to get started!

PRESENTER
NORMA OLVERA, D.D.S., M.S., obtained her dental degree from The University of Texas Health Science Center at San Antonio in 1987. She completed her post-graduate training in prosthodontics and received her certification and Master of Science in prosthodontics. She’s currently an assistant professor in the Department of Comprehensive Dentistry at the University of Texas Health Science Center at San Antonio.

Dr. Olvera has been in full-time private practice as a prosthodontist in Houston, Texas for the past 20 years. She has extensive experience in the area of oral rehabilitation involving all facets of reconstructive dentistry with and without dental implants.

MARCH 22-23

TSBDE-Approved Course for Certification Minimal Enteral (Oral) Sedation and Emergency Procedures
ERNEST B. LUCE, D.D.S.
ERNEST E. VALDEZ, D.D.S.

OVERVIEW
Successful completion of this course will provide the necessary training for a dentist to apply to the Texas State Board of Dental Examiners for a permit to administer minimal enteral (oral) sedation (level 1 permit). The course is a 16 hour curriculum of lecture with simulated patient scenarios and multiple case discussions.

OBJECTIVES
• Understand current TSBDE rules and regulations regarding minimal sedation.
• To outline the pharmacology of commonly utilized oral sedatives and techniques.
• Weigh advantages and disadvantages of various oral medications.
• Discuss medical considerations for sedation.
• Address pediatric considerations.
• Provide a comprehensive review of patient evaluation including medical history and vital signs.

PRESENTERS
ERNEST B. LUCE, D.D.S., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. In June of 1986, he completed a one year General Practice Residency at The University of Texas Health Science Center at San Antonio. Upon completion of the residency, Dr. Luce joined Comprehensive Dentistry at UT Health San Antonio.

ERNEST E. VALDEZ, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio, School of Dentistry in 1993. He pursued a two year General Practice Residency at UTHSCSA which he completed in 2001. Dr. Valdez has served as co-investigator of numerous research projects. He has published articles in the Journal of Oral & Maxillofacial Surgery, British Journal of Oral & Maxillofacial Surgery, and the Journal of Periodontal Research.

TIME
Check-in both days: 7:30 AM

Certification Course for Dentists
Nitrous Oxide
Conscious Sedation
Hands-On Training Course

ERNEST E. VALDEZ, D.D.S.

OVERVIEW
The course will provide information to meet the Nitrous Oxide/oxygen inhalation conscious sedation. This is a required course for dentists on the rules and regulations for the Texas State Board of Dental Examiners to qualify for an sedation/anesthesia permit.

OBJECTIVES
At the end of the didactic and clinical sessions, the participant will be able to:
- Define conscious sedation and be aware of the benefits for the patient and dentist.
- Understand the psychophysiology of pain, anxiety, and sedation.
- Understand the physiology of respiration and of N2O-O2 inhalation.
- Know the advantages, disadvantages, indications, and contraindications to the use of N2O in normal and medically compromised patients.
- Understand the techniques used to administer N2O and monitor patients while they receive it.
- Recognize the complications that may arise as a result of N2O administration, and understand the prevention, early detection, and treatment of these complications.
- Learn the hazards associated with the use of N2O and accepted methods used to reduce exposure to an acceptable level in the dental office.
- Recognize special problems associated with the use of N2O in children and know the proper technique for administering it to them.
- Discuss nitrous oxide equipment, including tanks, regulators, manifolds and machines.
- Understand guidelines for installation and use as issued by the National Fire Protection Association and the American Dental Association.
- Recognize the similarities of N2O sedation and hypnosis, be familiar with the basic concepts of hypnosis and its usefulness as an adjunct to N2O sedation.

PRESENTER
ERNEST E. VALDEZ, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio, School of Dentistry in 1993. He pursued a two year General Practice Residency at UTHSCSA which he completed in 2001. Dr. Valdez has served as co-investigator of research projects and has published numerous articles in professional periodicals.

IMPORTANT COURSE INFORMATION
Participants must complete our online didactic portion of Nitrous Oxide Conscious Sedation as a prerequisite to attending this clinical session at an additional fee of $247.50. (The course can be found at http://smile.uthscsa.edu) Click Online Courses, Interactive Courses, & View Courses. Participants must also bring a copy of their CPR certification on the day of the course.

THIS COURSE WILL NOT CERTIFY ALLIED DENTAL PERSONNEL

APRIL 5
Texas Brief AM
Lecture Course
“Lawsuits, Dental Board Investigations, and Other Bad Things That Can Happen to a Dental Practice!”
How to Avoid These Setbacks in Your Dental Office.
EDWARD P. “JOE” WALLER, D.D.S, J.D.

OVERVIEW
Effective September 1, 2008 Rule 104.1, licensees may choose to have up to four (4) hours of risk management-related coursework (includes risk management, record keeping, and/or ethics courses and the allowance for self-study hours has been increased to (6) hours. This course is designed to assist the dental practitioner in minimizing their chances of a lawsuit or Dental Board investigation through the use of effective risk management techniques.

OBJECTIVES
- Learn the top three reasons dental offices are at risk for lawsuits.
- Understand how the utilization of risk management techniques can dramatically decrease the risk of a lawsuit.
- Be able to identify issues in your own practice which will reduce the risk of a Dental Board investigation.
- Identify the essential elements which must be in every dental record to allow you to comply with Dental Board Rules.
- Learn the steps which must be taken to increase your chances of a favorable outcome in a Dental Board investigation.
- Understand the documentation issues which can reduce your exposure from investigations by other State and Federal agencies.

PRESENTER
EDWARD P. “JOE” WALLER, JR., D.D.S., J.D., received his dental degree from St. Louis University School of Dentistry in 1969 and his law degree from St. Mary’s University School of Law in 1990. He is an attorney with the law firm of Brin & Brin in San Antonio, Texas. His practice is focused on the defense of hospitals, physicians, and dentists in medical and dental malpractice lawsuits. Dr. Waller also frequently represents dentists in investigations and hearings before the State Board of Dental Examiners.

TIME
Check-in: 8:00 AM
Program: Friday, 9:00 AM-12:00 PM

APRIL 5
Texas Brief PM
Lecture Course
OSHA Training Course: The In’s and Out’s of Germ Warfare
MICHAEL A. HUBER, D.D.S.

OVERVIEW
Infections present a significant hazard in the dental environment. Although protection of the patient is an obvious priority, oral healthcare personnel are also vulnerable to exposure. The intent of this course is to set forth an Infection Control/Exposure Control Protocol to minimize the transmission of infections in the clinical process (for the protection of patients and oral health care personnel alike) via direct contact with blood, saliva, and other secretions; via indirect contact with contaminated instruments, operatory equipment, and environmental surfaces; and via airborne contamination, such as droplet spatter and aerosols of infectious body fluids.

OBJECTIVES
Participants in this course will be introduced to evidence-based information that will facilitate compliance with 29 CFR Part 1910.1030, Occupational Exposure to Bloodborne Pathogens, Final Rule (Federal Register 56(235): 64004-182, 1991 and the implementation of recommendations made by other federal, state, and local agencies and professional organizations.

In addition to fulfilling your annual OSHA requirements upon completion of this course, oral healthcare personnel should be able to:
- Understand the rational for the need for an Infection Control/Exposure Control Protocol.
- Develop and implement an practical Infection Control/Exposure Control Protocol appropriate for a particular oral healthcare setting, which include the following essential elements:
  - Education and training; Standard precautions
  - Personal protective equipment; Work practice and engineering controls
  - Environmental infection control; Post exposure evaluation and follow-up
  - Medical records; Medical conditions and work restrictions

PRESENTER
MICHAEL A. HUBER, D.D.S., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He continued with postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1988.

TIME
Check-in: 12:30 PM

Lecture/Hands-On Course

Comprehensive Implant Placement Course
SIDNEY L. BOURGEOIS, JR, DDS, MICHAEL P. MILLS, DMD, MS, & RONALD G. VERRETT, DDS, MS

OVERVIEW
This course is designed for dentists who have a significant surgical background and a basic knowledge of implant dentistry. It is a comprehensive, hands-on experience in implant dentistry. The program will combine multiple surgical and prosthodontic procedures to help enhance the participant’s knowledge in both the restorative and surgical aspects of implant dentistry. It will be geared toward dentists who already have a solid didactic and pre-clinical background in implant dentistry.

This impressive facility is focused on training with its sophisticated labs, audiovisual equipment and lecture facilities with the most advanced and realistic patient treatment mannequins in the world.

OBJECTIVES
At the conclusion of the course, participants will be able to understand and develop:

• Basic restorative and surgical treatment planning skills, rationale, and scientific basis for using implant therapy to restore oral function, health and esthetics.
• Surgical skills in soft tissue management and implant placement for single, multiple-unit & full arch cases.
• Treatment planning, scientific rationale and surgical treatment skills in minor bone grafting techniques such as ridge augmentation and ridge preservation techniques
• Techniques in extraction and immediate implant placement
• Gain experience with the latest implant surgery and prosthetic implant instrumentation.
• Impression techniques
• Restorative techniques using advanced mannequin models for single unit, multiple unit, and fully edentulous scenarios with various overdenture attachments.
• Using various treatment options for managing complex prosthodontic needs

PRESENTERS
SIDNEY L. BOURGEOIS, JR., D.D.S., obtained his degree from Louisiana State University School of Dentistry in May 1991. In August 2006, Dr. Bourgeois resigned his Commission in the United States Navy and joined the faculty at The University of Texas Health Sciences Center in San Antonio as a Clinical Assistant Professor.

MICHAEL P. MILLS, D.M.D., M.S., received his degree from the University of Alabama School of Dentistry in 1970. Did a year of General Practice Residency at Eglin USAF Regional Hospital in Florida. Dr. Mills is a Clinical Associate Professor with teaching responsibilities in the Postdoctoral Division of the Department of Periodontics.

RONALD G. VERRETT, D.D.S., M.S., attained both his dental and M.S. degrees from The University of Texas Health Science Center at San Antonio, School of Dentistry in 1979 and 1987. Continuing his postgraduate training with the U.S. Air Force, he completed a General Practice Residency at Barksdale Air Force Base, Louisiana in 1980 followed by a Prosthodontic Residency at Wilford Hall USAF Medical Center at Lackland Air Force Base, Texas in 1987.

The most advanced and realistic patient treatment mannequins in the world

TIME

APRIL 12
Lecture Course
The Dental Wear Patient, Diagnosis and Treatment
PAUL A. HANSEN, D.D.S.

OVERVIEW
The severe wear patient has multiple etiologies. We want to know and understand the cause of the wear and how to tailor our restorative efforts to the patient’s needs.

Initial examination of a new patient occasionally reveals a severely worn dentition characterized by extensive wear and loss of tooth structure. Function and esthetics are compromised, and the prognosis for one or several teeth may be jeopardized if the problem is not corrected. The complex nature of this condition, and its multifactorial etiology, often overwhelms the restorative dentist in treating such widespread tooth destruction.

Loss of tooth structure may be a result of mechanical wear (attrition, abrasion) or chemical attack (erosion). We will review the various etiologies and the risks associated with each when we try to reconstruct the patient. A brief review of dental occlusion will be included as a point of orientation.

We will review the new materials on the market for restoring these patients. The use of zirconia or lithium disilicate will be reviewed. We will discuss material properties and how best to use them for the dental wear patient. Concentration on full mouth reconstruction cases.

This program is a clinically orientated program reviewing over 30 years of cases and follow up documented by Dr. Hansen.

OBJECTIVES
Following this unit of instruction, the practitioner should be able to:
• Describe the etiologies for the worn dentition.
• Identify the types of tooth wear.
• Describe how to perform an accurate diagnostic mounting to evaluate wear.
• Explain the use of the diagnostic mounting in diagnosis and treatment planning.
• Understand the proper sequence for restoring extensive wear cases.
• Understand the various new materials used to restore difficult cases.

PRESENTER
PAUL A. HANSEN, D.D.S., obtained his dental degree from the University of Nebraska Medical Center College of Dentistry in 1975. He completed a one-year Prosthodontic residency at the University of Texas Health Science Center in San Antonio, Texas (UTHSCSA) and a two-year Prosthodontic at Wilford Hall Medical Center. Currently he is Associate Professor at the U of N College of Dentistry Director of Prosthodontics.

SYMPOSIUM

OPIOIDS: A New Direction

THE MYTHS AND FACTS ABOUT THE OPIOID CRISIS:
A PERSONAL AND NATIONAL PERSPECTIVE

A. OMAR ABUBAKER,
BDS, DMD, PHD

Dr. Abubaker currently serves as Professor and Chairman of the Department of Oral and Maxillofacial Surgery, School of Dentistry, Chief of the Division of Oral and Maxillofacial Surgery, Department of Surgery, School of Medicine and Chairman of the Department of Dentistry, at Virginia Commonwealth University, Richmond, VA. Dr. Abubaker recently earned a Graduate Certificate in Addiction Studies from the International Program in Addiction Studies which is jointly housed in Virginia Commonwealth University, The University of Adelaide, Australia and Kings College London, England.

Satisfies TSBDE opioid training requirements

This symposium is supported by the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) under D88HP28810, Postdoctoral Training in General, Pediatric and Public Health Dentistry and Dental Hygiene, $2.1 million, 100% federally funded. The information or content and conclusions are those of the author and should not be construed as the official position or policy of, nor should any endorsements be inferred by HRSA, HHS or the U.S. Government.

Lecture Course
Review Course in Minimal Enteral (Oral) Sedation
(Level 1 Sedation)
ERNEST B. LUCE, D.D.S.

OVERVIEW
This course is designed to satisfy the Texas Dental Board requirement for continuing education in minimal enteral sedation (required every 2 years for level 1 minimal sedation permit holders). This course does not qualify a dentist to apply for a new minimal sedation permit. Individuals who complete the course will receive a certificate, which can be submitted to the TSBDE as documentation of continuing education in minimal sedation.

OBJECTIVES
At the end of this course, the participant will have a renewed understanding of the many elements of the safe administration of enteral conscious sedation including:
- Spectrum of sedation and the limits of enteral sedation.
- Patient evaluation and appropriate patient selection with an emphasis on recognizing patients at high risk of complications.
- Pharmacology of sedative agents including drug interactions and appropriate selection for patients with differing medical conditions.
- Appropriate use, limitations of and interpretation of monitors.
- Management of urgencies and emergencies especially as they pertain to minimal sedation.
- Rules and Regulations of the TSBDE on the administration of minimal enteral sedation

PRESENTERS
ERNEST B. LUCE, D.D.S., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. In June of 1986, he completed a one year General Practice Residency at The University of Texas Health Science Center at San Antonio. Currently he is a Clinical Associate Professor at the Health Science Center, and he also maintains a part time private practice in general dentistry in San Antonio.

TIME
Check-in: TBD, 7:30 AM
Program: Friday, 9:00 AM - 4:00 PM

LOCATION
UT Health San Antonio, School of Dentistry

TUITION
Dentist: $220.00

Hours: 6

The School of Dentistry thanks Access Medical USA for its unrestricted educational grant in support of this continuing education series.

Lecture Course
Oral Cancer: From Diagnosis to Management
MICHAEL A. HUBER, D.D.S.

OVERVIEW
Successful management of the oral cancer patient requires a multidiscipline effort, in which the dental professional plays a critical role. An estimated 29,000 new cases of oral and pharyngeal will be diagnosed this year, many as a consequence of an oral screening provided by a dentist. Research over the past decade has produced several advances improving the profession’s ability to diagnose, treat, and manage the short and long-term consequences of oral cancer. Ultimately, however, successful cancer therapy often incurs life-long impairments, which may adversely affect the patient’s quality of life. As many of the impairments directly affect the oral cavity, the dentist will be frequently called upon to manage many of these impairments such as mucositis, xerostomia, increased caries, and disfigurement. This course will provide a review of the most contemporary approaches to manage the oral cancer patient, from diagnosis to management.

OBJECTIVES
- The participants will learn about:
  - Epidemiologic overview
  - Cancer prevention
  - Diagnostic/Screening modalities
  - Contemporary treatment strategies
  - During-treatment care
  - After-treatment care

PRESENTERS
MICHAEL A. HUBER, D.D.S., M.A.G.D., F.I.C.D., F.I.C.O.I., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He continued with postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1986 and received a Certificate in Oral Medicine in 1988. Upon his retirement from the United States Navy in 2002, Dr. Huber joined the faculty as an Assistant Professor in the Division of Oral Medicine, Department of Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio, Dental School.

Lecture Course
“Grand Slam” Restorative Dentistry
DAVID M. BONNER, D.D.S., M.A.G.D.

OVERVIEW
Today’s dentists have more opportunities than ever before to successfully practice esthetic dentistry – providing needed dentistry beautifully. Dr. Bonner has the gift of sorting through the vast array of new materials and techniques to help dentists simplify the complexities of doing excellent restorative dentistry. This presentation empowers dentists and their teams with the use of modern materials and techniques to predictably provide patients with beautiful long lasting restorations. The numerous clinical and business “pearls" presented enhance the ease, joy, and dental team approach to clinical dentistry. This is a course for the entire dental team.

OBJECTIVES
The participant will learn about:
- Creating Life-like Direct Anterior Restorations, including Class IV, direct veneers, and diastema closure
- Porcelain veneers “simplified" from smile design, preparation, beautiful tempmorization, ease in bonding, to rapid clean-up
- Principles of Full-Mouth Reconstruction
- Eliminating the Problem of Post-op Sensitivity
- Creating Excellent Posterior Esthetic Restorations
- Great posterior contacts through new and improved matrix systems
- Update on the Latest Techniques & Materials in Adhesion Dentistry
- Eliminate the “generation" confusion about bonding agents
- Impressions – How to get them perfect every time
- Clinical Pearls that enhance the Ease & Predictability of Practice
- Business Systems that Enhance Clinical Practice & Profitability
- How a MBA approaches Dental Fees
- Strategic and Financial Planning

PRESENTERS
DAVID M. BONNER, D.D.S., M.B.A., M.A.G.D., F.I.C.D., F.I.C.O.I., received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He earned his MBA in Health Care Management from Texas Tech University. His private practice is focused on esthetic dentistry. He is also an adjunct clinical professor at the UTHSCSA dental school. Dr. Bonner is an accomplished dentist, professor, author, researcher, and professional speaker who is passionate about dentistry. Dr. Bonner has served as President of the Panhandle District Dental Society and as a Vice-President for the Texas Academy of General Dentistry.

Contemporary Aesthetic Treatment Options: An Overview of Self-Ligating Aesthetic Bracket Systems and A Review of Early Orthodontic Treatment Indications

CARLOS NURKO D.D.S., M.S.

OVERVIEW FOR AESTHETIC BRACKET SYSTEMS
We are confronted to be familiar with these new orthodontic aesthetic treatment options as a way to spontaneously and quickly adapt facial aesthetics & quality of life. Our patients are requesting orthodontic treatment at an earlier age and should we deviate from the “Gold Standard” to initiate orthodontic treatment earlier?

OBJECTIVES FOR AESTHETIC BRACKET SYSTEMS
• List the different contemporary orthodontic esthetic treatment options with an emphasis in using self-ligating aesthetic bracket systems
• Introduce the Lingual Minor Tooth Movement, presenting clinical indications, case selection and clinical cases

OVERVIEW FOR EARLY ORTHODONTICS
The “Gold Standard” for initiating orthodontic treatment is known to be during the adolescent growth spurt, and or the late mixed to early permanent dentition, this timing has been shown to be the most effective and efficient. Why deviate from this standard and initiate treatment earlier?

PRESENTER
CARLOS NURKO D.D.S., M.S., obtained his Doctor of Dental Surgery degree from Universidad Nacional Autonoma de Mexico in 1992. He completed a pediatric residency at the University of Alabama at Birmingham in 1996. He was faculty at the University of Alabama at Birmingham Koolen in 1998-2001, and then received his certificate in orthodontics from the University of North Carolina at Chapel Hill in 2004.

**GENERAL REFUND POLICY:** If you must cancel your registration for any type of continuing dental education course, please notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that a refund may be considered. Any cancellation made prior to the start of the program will be subject to an administrative fee assessment of $99.25. Any cancellation made one week or less prior to the course does not qualify for a refund. However, participants may choose to place their tuition minus an administrative and direct cost fee assessment into a holding account for future use. “No Shows” will not qualify for refunds. Written notification by mail, fax or e-mail is required within five business days to initiate the refund process. Please allow four to six weeks for all refunds. Specific refund policies apply to all off-site, continuum, participation, and on-going series programs. Contact our office for the specific refund policy regarding any course.

**TEAM WEEKEND**
