Friday, November 9

Practical Excellence in Restorative Dentistry: Integrating Modern Technologies with Proven Results

Program kicks-off September 8th

Please share this publication with the entire dental office
COURSES INFORMATION:

Preceptorship in Dental Implantology - Participants meet for five weekend sessions learning the latest research in implants. See page 6 and 7.

James P. Hollers Memorial Lectureship allows your team to learn new proven techniques and technologies. Plus, everyone gains seven hours of CE! See page 10 and 11.

Longhorn Football Dental Study Club is 3 hours of CDE by a prominent speaker, a tail gate meal and the excitement of Longhorn Football game in Austin. See page 8.

More information is inside this catalog or on our website http://smile.uthscsa.edu or call us at 210-567-3177
Welcome ...

to the UT Health San Antonio, Continuing Dental Education Program. We are blessed to have **SAN ANTONIO, TX** as a great place for us to host our courses. Our new clinic, **CENTER FOR ORAL HEALTH CARE AND RESEARCH (COHR)**, gives us some fantastic spaces to demonstrate, illustrate and teach our programs. Also, besides the “live” courses, we offer other learning opportunities such as on-line learning, study clubs like our **LONGHORN FOOTBALL DENTAL STUDY CLUB** that meets before each UT Austin home game, and travel programs such as “**Ski & Learn**”.

When you look at the entire program, we have over 230 course offerings. Some topics offered multiple times throughout the year and some as an annual event such as the **James P. Hollers Lecture**. We have made every attempt to build a program that meets the needs of today’s dental professional.

We look forward to being your Dental Continuing Education provider.

Scott G. Stafford, DDS, MBA
Director
Continuing Dental Education

(210) 567-3177
Dr. Bill Dodge arrived on the UT Health San Antonio campus as a young dentist and newly minted faculty member in 1978. That young man never dreamed he would finish his career as Dean of the one of the most highly regarded dental schools in the nation. After a 40-year career with the School of Dentistry, Dr. Dodge has announced his retirement.

In 2016, a grateful alumnus established the Dean William W. Dodge, DDS Endowment for Excellence in Dentistry to honor Dr. Dodge, his mentorship, and his tremendous contributions to the School of Dentistry. He served first as a Professor and then later as the Associate Dean for Patient Care, the Vice Dean, and, for the past five years, as Dean. The purpose of the endowment fund is to benefit the School’s greatest needs at the discretion of the Dean. You are invited to honor Dr. Dodge and his years of service by making a gift to this important endowment fund. If you have questions or comments, please contact Patrick A. O’Hara, Senior Associate Vice President, Development, UT Health San Antonio. ohara@uthscsa.edu, 210-567-2575.

Adriana Segura, D.D.S, M.S., has been named Interim Dean of the School of Dentistry effective June 1, 2018. Dr. Segura has served the School of Dentistry in a variety of roles since 1999. She began her career at UT Health San Antonio as Associate Professor in the Department of Pediatrics in the School of Medicine and the Department of Pediatric Dentistry in the School of Dentistry, and served as the Director of the Predoctoral Division in Pediatric Dentistry. She was promoted to Professor with tenure in 2004. In 2006, she was named Interim Chair of the Department of Community Dentistry and Director of the Ricardo Salinas Clinic. From 2009 through 2017, she served as Associate Dean for Student Affairs and was recently named Associate Dean for Academic, Faculty and Student Affairs. Her academic appointment is in the Department of Comprehensive Dentistry.

Dr. Segura will serve as Interim Dean until a permanent Dean can be named. A search committee is currently actively working to identify outstanding candidates for the permanent Dean position.
# 24th Annual Preceptorship in Dental Implantology

## Preceptorship Program

### LEVEL ONE - PRECEPTORSHIP

- The rationale and scientific basis for the successful clinical practice.
- The current concepts, principles, and clinical methodology.
- The proper evaluation, diagnosis, and selection of patients.
- To develop and understand specific implant, surgical, and prosthodontic skills.
- To manage the more difficult clinical situations.
- The practice management aspects of dental implantology.

### LEVEL TWO - DENTAL TEAM WEEKEND

#### Dental Team Implant Certification
**February 8, 2019**
- Develop engaging communication strategies that will help patients say YES to the treatment they need and want.
- Understand instrumentation/maintenance procedures for optimal patient care.

#### The Business of Implant Dentistry
**Communication, Organization, and Managing Risk**
**February 9, 2019**
- Make financial arrangements with fewer misunderstandings
- Coordinate treatment to completion of care
- Get Things Done!

### LEVEL THREE - A SIMULATED IMPLANT PLACEMENT AND RESTORATIVE COURSE

This three-day program provides lectures, lab observation, and hands-on instruction on simulated-patient mannequins that feature soft tissue and “bone”. Each learning station is equipped with all the necessary surgical and restorative instrumentation to give the participants a wealth of implant experience. The faculty leads the course participants through multiple implant scenarios.

- Basic restorative and surgical treatment planning skills, rationale, and scientific basis for using implant therapy.
- Minor bone grafting & impression techniques.
- The latest implant surgery & instrumentation.
- Options for complex prosthodontic needs.

The longest running implant continuum!

Visit our website for more details on this program and click the Preceptorship Dental Implant banner http://smile.uthscsa.edu

Five sessions at a glance!

CLASS 1 • October 5 & 6, 2018
History and Principles of Dental Implantology
Using Radiology to Guide Implant Planning and Surgery
Treatment Planning & Designing the Implant Restoration & Patient Cases
Basic Surgical Principles for Dental Implantology

CLASS 2 • November 2 & 3, 2018
Diagnostic Imaging for Implant Dentistry
Legal Aspects of Implant Dentistry
Multidisciplinary Implant Treatment Planning
Implant Prosthodontics: Seeing Old Landscapes with New Eyes
Making Implant Dentistry Everyday Dentistry

CLASS 3 • December 7 & 8, 2018
Retooling the General Practice with Dental Implants
Dental Implant Treatment Planning: Biology, Biomaterials, Patient Selection, Diagnosis, Basic Surgery, Basic Prosthetics & Maintenance
Hands-on Participation Exercises on Models in the MD Labs

CLASS 4 • January 11 & 12, 2019
Guided Bone Regeneration: Decision – making in Clinical Practice
Clinical Anatomy of the Head and Neck

CLASS 5 • February 8 & 9, 2019
Fixed Restorations Abutment Choices and Communications
Patient Presentation (Participation Session)
Implant Surgical Complications
Implant Restorative Complications and Management
Sinus Elevation and Augmentation: The Closed and Open Approach
Provisionalization and Ridge Augmentation
Diagnosis and Treatment of Peri-Implants
Patient Presentation (Participation Session)
Immediate Full Arch Implant Rehabilitation - Prosthodontics, Surgical and Laboratory Principles

CLASS 5 • Dental Team Weekend
Dental Team Implant Certification Course
(Dental Hygienists & Dental Assistants)
The Business of Implant Dentistry
Communication, Organization, and Managing Risk

PRECEPTORSHIP DIRECTORS

BRIAN L. MEALEY, D.D.S., M.S.,
received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1983. He attained his specialty certificate in Periodontics from Wilford Hall Air Force Medical Center, Lackland Air Force Base in 1990 and a Master of Science in Periodontics from the University of Texas Health Science Center at San Antonio, Dental School. Dr. Mealey is a Professor and Director of the Periodontics Residency at UT Health San Antonio, School of Dentistry.

E. MATTHEW LAMB, D.D.S., F.A.C.P.,
is a board certified prosthodontist and Director of the Residency in Advanced Prosthodontics at UT Health, San Antonio. Dr. Lamb graduated from New York University College of Dentistry. He pursued two years of advanced surgical and restorative training at the Hunter Holmes McGuire VA Medical Center in Richmond, Virginia. He then moved to San Antonio to complete a prosthodontics residency and currently teaches at UT Health San Antonio, School of Dentistry.

PRECEPTORSHIP IN DENTAL IMPLANTOLOGY REFUND POLICY
If you must cancel your registration, please notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that a refund may be considered. Due to commitments to these type of programs, any cancellation made before August 6, 2018 will be subject to an administrative fee assessment of 25% of total tuition plus applicable nonrefundable deposits. Any cancellation made after August 6, 2018 does not qualify for a refund. However, participants may choose to place their tuition minus an administrative, applicable nonrefundable deposits, and any direct cost fee assessment’s into a holding account for future use. “No Shows” will not qualify for refunds. Written notification is required within five business days by mail, fax, or e-mail to initiate the refund process. Please allow four to six weeks for all refunds.

PRIORITY TICKETS, PRIORITY SEATING, AND PRIORITY PARKING WILL BE GIVEN TO SEASON SUBSCRIBERS
• Season Subscribers who order the same number of extra ticket(s) for each game will be given priority.
• The Season Subscriber who orders extra ticket(s), but not the same number of tickets for each game, will not be guaranteed that the guest(s) will be seated together.
• Those who register on an individual basis for the series and ordering extra ticket(s), will not be guaranteed that the guest(s) will be seated next to the individual.

TICKET AND PARKING PASS POLICY
Because of the high demand of football tickets, a policy has been established for ordering extra game tickets on a limited basis. All ticket orders are handled on a first-come, first-served basis. Parking passes are limited, we have only enough to provide 1 per family. If more become available, you will be contacted.
CONTINUING DENTAL EDUCATION ONLY

- Already a season ticket holder or you just want the CE only?
- Please reserve a spot in the CE programs only.
- Please find enclosed $1,325.00
- One parking pass is included in your package

- CDE SUBSCRIBER A: Send a nonrefundable deposit of $250.00 by June 1, 2018 and receive a 20% fee reduction for the CE programs only.
  - $1,325.00 - $265.00 - $250.00 = $810.00 (Balance due by July 27, 2018)
  - One parking pass is included in your package

- CDE SUBSCRIBER B: Send a nonrefundable deposit of $250.00 by July 6, 2018 and receive a 15% fee reduction for the CE programs only.
  - $1,325.00 - $198.75 - $250.00 = $876.25 (Balance due by July 27, 2018)
  - One parking pass is included in your package

The 33rd Annual
James P. Hollers Memorial Lectureship

Friday, November 9, 2018

NORRIS CONFERENCE CENTER • SAN ANTONIO

Bring the Dental Team. New techniques, new technologies to learn.

Our speakers are experienced in their choice of topics. Lectures are approved for CE hours.

Visit our vendors in the Exhibit Hall. Learn about their products and services that can improve your profession.
Our 2018 Distinguished Lecturer

ROBERT A. LOWE, DDS,
FAGD, FICD, FADI, FACD, FIADFE, FASDA
Diplomat, American Board Of Aesthetic Dentistry
Fellow, American Society for Dental Aesthetics

Dr. Robert A. Lowe graduated magna cum laude from Loyola University School of Dentistry in 1982 and was a Clinical Professor in Restorative Dentistry until its closure in 1993. He maintains a private practice in Charlotte, lectures internationally, and publishes on aesthetic and restorative dentistry. In 2004, he received the Gordon Christensen Outstanding Lecturers Award, and in 2005, Diplomate status on the American Board of Esthetic Dentistry.

Practical Excellence In Restorative Dentistry:
Integrating Modern Technologies with Proven Results

OVERVIEW
In this technique filled seminar, new technologies and techniques will be discussed along with how implementation of these technologies can help you create consistent quality and the “bottom line” of your practice. A discussion regarding the latest dental materials and delivery modalities will help in treatment planning even the most difficult functional and aesthetically challenging cases.

OBJECTIVES - Each participant will learn:
1. How to use some of the latest composite and bioactive restorative materials to save time and create excellent clinical results.
2. How to refine techniques to create “perfect” master impressions and have successful cementation of all types of aesthetic restorations.
3. Unique options to ceramic for indirect aesthetic restorations in anterior region.
4. How to “orthodontically” prepare teeth systematically to correct the clinical crown orientation to correct tooth misalignment when patients decide conventional orthodontics is not for them.

JULY 20

TSBDE-Approved Course for Certification
Nitrous Oxide Monitoring Certification Course for
Dental Hygienists and Dental Assistants
MARY E. JACKS, R.D.H, M.S.

OVERVIEW
Dental hygienists and dental assistants, who are not currently certified to monitor nitrous oxide/oxygen inhalation conscious sedation, must now attend an approved certification course. In accordance with Rule 114.4, this course has been approved by the Texas State board of Dental Examiners (TSBDE). Upon registration for the course, participants will receive a packet of study materials. The course will consist of:

- Class, laboratory, and test session (8 hours)
- Participants must pass a written examination with a 70%
- To meet the individual needs of each student, remediation and re-testing will be determined on a case-by-case basis.
- Participants may retake the examination up to 2 times ($10 each exam). If the participant does not successfully pass after the 3rd try, the course must be retaken.

Successful completion of this course will permit certification for five (5) years.

To engage the participants’ learning, innovative teaching techniques will be used to. Games, audience response, and role-playing demonstrations of clinical emergencies associated with nitrous oxide-oxygen conscious sedation are some of the learning strategies that will be used. Upon completion of the course the student should be competent to pass an examination covering the following:

OBJECTIVES

- Brief history of Nitrous Oxide-Oxygen Conscious Sedation (NO-OCS)
- The legal provisions (Texas Jurisprudence) for Dental Auxiliaries to monitor NO-OCS
- Dental anatomy and physiology related to NO-OCS
- Common drugs that react to the exposure of NO-OCS
- The operation of equipment used to monitor Nitrous Oxide, as well as the safety features and infection control of equipment
- Responsibilities in monitoring patients under NO-OCS
- Recognition and management of medical emergencies associated with Nitrous Oxide

PRESENTER
MARY E. JACKS, R.D.H, M.S., is an Assistant Professor in the Division of Dental Hygiene, Department of Periodontics at the University of Texas Health Science Center at San Antonio. Ms Jacks has over 25 year’s clinical experience and has been full-time faculty member since 2000. Areas of teaching expertise include: Periodontics, advanced hand and powered instrumentation, faculty calibration, humor in healthcare, and distance education technologies.

JULY 20-21

Participation/Certification Course for Dentists and Dental Hygienists
Dental Laser Proficiency Course and Clinical Simulation
ROBERT A. CONVISSAR, D.D.S., B.S.

OVERVIEW
Has the hoopla surrounding the introduction of lasers to dentistry been more smoke than substance? Since 1990, the USFDA has approved the use of 7 different wavelengths creating a world of difference in how the lasers operate, and their usefulness in the oral cavity.

The first day will detail laser use in the following:

The second day will provide each participant hands-on experience with the various wavelengths, performing surgical procedures on in-vitro models. Real time videos of routine laser procedures will be part of the discussion of specific instrument settings and techniques for laser surgical procedures.

OBJECTIVES
At the conclusion of the course, the participant will be familiar with the various wavelengths, their effects on oral tissues, and their uses for specific oral diseases and pathologies found in everyday practice.

PRESENTER
ROBERT A. CONVISSAR, D.D.S., B.S., obtained his degree from New York University College of Dentistry in 1980. He is a pioneer in the field of laser dentistry and one of the first dentists to incorporate lasers into general practice. He has extensive experience with CO2, Nd:YAG, Diode and Erbium wavelengths.

TIME
Check-in: 7:30 AM
Program: Friday, 8:00 AM - 5:00 PM
Saturday, 8:00 AM - 12:00 PM

Continuing Dental Education

**NEWSFLASH**

sedation/anesthesia

The dental board’s emergency preparedness rules apply to all Texas dentists holding a sedation/anesthesia permit—

 Permit holders must create and maintain preoperative checklists, meet emergency preparedness standards, and meet requirements governing prevention and response to sedation/anesthesia emergencies. These new regulations were required by the Texas State Board of Dental Examiners’ Sunset legislation—Senate Bill 313.

Be sure and stay informed on all new rules and regulations that have an impact on the profession.

http://smile.uthscsa.edu

(210) 567-3177
Seven minutes ago, the patient in terms of fewer and shorter duration visits, caries- at the time their access to their trusted dentist is limited. Many of these patients would benefit greatly from fixed prostheses, but who is going to make them affordable and readily available? Modern surgical techniques make it possible to treat the majority of implant patients in the general practice setting, efficiently and with minimal morbidity. Today it is possible to not only lower prices but also make these the most profitable procedures in your office by many-fold. You can also decrease costs to the patient in terms of fewer and shorter duration visits, decreased pain, bleeding and post-op complications, and easier and less costly repair and rework. In addition, recent advances in the dental laboratory industry now make what once were the most advanced and costly implant prosthetics routine and very affordable dentistry.

OBJECTIVES

• Describe the advantages of flapless implant surgery over conventional placement using a flap.
• Understand the various approaches to interproximal grafting, and indications for each approach.
• Know the techniques and armamentarium for crestal approach sinus grafting.
• Understand the advantages and indications for immediate loading of dental implants.
• Understand the interface between dental laboratory CAD/Cam technology and surgical guide fabrication for immediate load full arch prostheses.
• Hands-on experience using models for implant placement and crestal approach sinus augmentation.

PRESENTERS

WILLIAM C. RODDY, D.D.S., obtained his dental degree from the University of Iowa in 1979. After he completed dental school, he served in the U.S. Navy from 1979-1989, retiring at the rank of Captain. During his Naval dental career, Dr. Roddy completed a Prosthodontics Fellowship and a Comprehensive Postdoctoral Residency. Other tours included shipboard duty, co-director of a General Practice Residency program, base prosthodontist, base endodontist, service as examining member of the Federal Services Board of Comprehensive Dentistry, and Head of Clinical Investigations at the Naval Dental Research Institute, and Clinic Director. He was also granted two patents.

ROBERT P. MARBACH, BA, CDT is the founder and owner of Authentic Dental Lab in San Antonio, TX. He is a past Board of Director at The Pankey Institute. Mr. Marbach is a Board Certified Dental Technician currently working on his Masters in dental technology and has over 25 years of dental experience. In 1999 Bob received his Technical Certificate of Completion from the Pankey Institute. Mr. Marbach is a past member of the Advisory Board for The Canadian Journal of Dental Technology.

Lecture Course for the Entire Dental Team
Fundamentals and Advances in Resin Composites, Adhesive Systems and Cements

SHARUKH S. KHAJOTIA, B.D.S., M.S., PH.D

OVERVIEW
Resin composites, bonding agents and dental cements are constantly evolving areas of restorative dentistry. Dentists are faced with a vast array of restorative dental materials, and are expected to separate advertising from reality. In this presentation, Dr. Khajotia will differentiate among the various categories of resin composites, adhesive systems and resin luting cements from the perspective of critical Materials Science considerations and clinical use, without personal bias or commercial interests. During this presentation, Dr. Khajotia will review the composition, manipulation and properties of various types of resin composites including nano-hybrid, nano-filled, flowable and bulk-filled categories. Dr. Khajotia will then provide participants with a unique insight into current research in his laboratory on the development of an antibacterial bonding system. He will also discuss interactions between oral biofilms and polymer-based dental biomaterials based on his research efforts. Tools will be provided to assist participants with reviewing and selecting restorative biomaterials.

OBJECTIVES
- Composition and properties of resin composite
- Benefits and limitations of resin composites
- Innovations in polymer chemistry
- Properties of bonding agents
- Benefits and limitations of bonding agents
- Developing an antibacterial adhesive system
- Composition of resin luting cements
- Benefits and limitations of resin luting cements
- Interactions between oral biofilms and polymer-based dental biomaterials
- Concepts about dental biomaterials
- tools for the review of dental biomaterials

PRESENTER
SHARUKH S. KHAJOTIA, B.D.S., M.S., PH.D., attained a dental degree from Nair hospital Dental College, university of Bombay, India (1988), a Master of Science degree in Dental Biomaterials from Marquette university (1992), and a Ph.D. in oral Biology from the Medical College of Georgia (1997). He is currently the assistant Dean for research as well as Professor and Chair of the Department of Dental Materials in the College of Dentistry at the University of Oklahoma. He also holds appointments in the OU health Sciences Center Graduate College and the OU School of Chemical, Biological and Materials Engineering.

Texas Brief AM
The Dynamics of Anterior Teeth: Form, Function, and Esthetics
JACK I. SHIRLEY, D.D.S.

OVERVIEW
The clinician is spending more time taking care of anterior teeth. If the dentist is not bleaching them, he or she is covering them with beautiful porcelain. It is time to take a close look at what makes front teeth look beautiful and function correctly. Let’s see if form does follow function. In this course, Dr. Shirley will look at the anatomy of anterior teeth, the esthetics of anterior teeth, how to prepare anterior teeth for crowns and veneers, how to temporize anterior veneers and crowns, and how anterior teeth function.

OBJECTIVES
- Review the anatomy of anterior teeth
- Understand totally how anterior teeth are supposed to function
- Take a close look at what makes front teeth esthetically pleasing
- Preparation of anterior teeth -- crowns and veneers
- Simple methods of temporization
- A quick review of impression technique

PRESENTER
JACK I. SHIRLEY, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio in 1979. He has maintained a private practice in San Antonio, Texas for over twenty years. Dr. Shirley has been associated with the Pankey Institute in Key Biscayne, Florida for eighteen years. He has served as Associate Faculty for thirteen years and is President of the Board of Trustees and a member of the Board of Directors. Dr. Shirley has been selected to represent the Pankey Institute through its speakers Bureau and can be heard throughout the national at numerous dental meetings speaking about Pankey philosophy, techniques, and the effectiveness of comprehensive care dentistry. He has a passion for dental education and a strong desire to help dentists reach their full potential.

Texas Brief PM
Occlusion Made Easy
JACK I. SHIRLEY, D.D.S.

OVERVIEW
A walk down occlusion lane is a walk that we often want to take, but Dr. Shirley advocates, “Give it another chance; it might change your whole practice and the way you practice dentistry.”

This course on occlusion has received rave reviews from dentists around the country. One dentist’s comment was, “This is the first time I have ever understood occlusion, and I have been a dentist for 28 years.” Another dentist said, “Finally, someone is giving me something I can use in my practice.” This is just the beginning. Come join us and see why you are actually going to start enjoying occlusion and are going to be excited about what it will do for your practice.

OBJECTIVES
Topics to be discussed:
- CR vs. CO.
- What is adequate anterior guidance?
- The significance of incline interferences.
- Should we be concerned with condylar guidance?
- How to recognize occlusal disease and what to do about it.
- How to equilibrate and who to equilibrate.
- Split construction and adjustment.
- Verbal skills that will help you with patient education.
- How to make sure those big veneer cases are functioning properly.

PRESENTER
JACK I. SHIRLEY, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio in 1979. He has maintained a private practice in San Antonio, Texas for over twenty years. Dr. Shirley has been associated with the Pankey Institute in Key Biscayne, Florida for eighteen years. OVER 3,250 DENTAL PROFESSIONALS HAVE PARTICIPATED IN OVER 100 HOURS OF CE WITH US!

THANK YOU FOR SUPPORTING OUR PROGRAMS

OVERVIEW AND OBJECTIVES
This one-day course will serve as a comprehensive review of pediatric dental care. Course participants will interact with the faculty in an open-forum seminar on a variety of pediatric dentistry topics, including the following:

- Examination, Diagnosis and Treatment Planning
- Infant Examination and Anticipatory Guidance
- Restorative Dentistry for the Pediatric Patient
- Pulp Therapy for the Primary Dentition
- Space Maintenance
- Non-Pharmacologic Behavior Management
- Nitrous Oxide Analgesia for the Child Patient
- Local Anesthetic Dosage Regimens for Pediatric Patients

PRESENTERS
CLAUDIA I. CONTRERAS, D.D.S., received her D.D.S. degree from the National University of Mexico City, Mexico City, Mexico in 1993. She continued with her postgraduate training as a Preceptor in Pediatric Dentistry at The University of Texas Health Science Center at San Antonio in 1999. This was followed by an Internship in Pediatric Dentistry at the University of Puerto Rico, San Juan, Puerto Rico where she attained her Certificate in Pediatric Dentistry in June 2004. Subsequently, Dr. Contreras completed her training as a Fellow in June 2005 at The Children’s Hospital & University of Colorado Health Science Center in Denver, Colorado. She currently serves as an Assistant Professor in the Department of Pediatric Dentistry at The University of Texas Health Science Center at San Antonio.

CLAUDIA I. CONTRERAS, D.D.S., M.S., obtained her dental degree from Intercontinental University at Mexico City. After working as a general practitioner for a couple of years she continued her training at The University of Texas Health Science Center at San Antonio where she completed her Residency in Pediatric Dentistry. She continued her education and received her Masters Degree in Orthodontics at the Intercontinental University.

TIME
Check-in: 8:00 AM
Program: Friday, 9:00 AM-5:00 PM

LOCATION

SEPTEMBER 21

Lecture Course
Pediatric Dentistry Update for the General Practitioner

OVERVIEW
Today’s dentists have more opportunities than ever before to successfully practice esthetic dentistry — providing needed dentistry beautifully. DAVID M. BONNER has the gift of sorting through the vast array of new materials and techniques to help dentists simplify the complexities of doing excellent restorative dentistry. This presentation empowers dentists and their teams with the use of modern materials and techniques to predictably provide patients with beautiful long lasting restorations. The numerous clinical and business "pearls" presented enhance the ease, joy, and dental team approach to clinical dentistry. This is a course for the entire dental team.

OBJECTIVES
The participant will learn about:

- Creating Life-like Direct Anterior Restorations, including Class IV, direct veneers, and diastema closure
- Porcelain veneers "simplified" from smile design, preparation, beautiful tempromatization, ease in bonding, to rapid clean-up
- Principles of Full-Mouth Reconstruction
- Eliminating the Problem of Post-op Sensitivity
- Creating Excellent Posterior Esthetic Restorations
- Great posterior contacts through new and improved matrix systems
- Update on the Latest Techniques & Materials in Adhesion Dentistry
- Eliminate the “generation” confusion about bonding agents
- Impressions – How to get them perfect every time
- Clinical Pearls that enhance the Ease & Predictability of Practice
- Business Systems that Enhance Clinical Practice & Profitability
- How a MBA approaches Dental Fees
- Strategic and Financial Planning

PRESENTER
DAVID M. BONNER, D.D.S., M.B.A., M.A.G.D., F.I.C.D., F.I.C.O.I., received his dental degree from the University of Texas Health Science Center School of Dentistry in San Antonio. He earned his MBA in Health Care Management from Texas Tech University. His private practice is focused on esthetic dentistry. DAVID M. BONNER has also been an adjunct clinical professor at the UT Health Science Center School of Dentistry.

Certification Course for Dentists
Nitrous Oxide
Conscious Sedation
Hands-On Training Course
ERNEST E. VALDEZ, D.D.S.

OVERVIEW
The course will provide information to meet the Nitrous Oxide/oxygen inhalation conscious sedation. This is a required course for dentists on the rules and regulations for the Texas State Board of Dental Examiners to qualify for a sedation/anesthesia permit.

OBJECTIVES
At the end of the didactic and clinical sessions, the participant will be able to:
• Define conscious sedation and be aware of the benefits for the patient and dentist.
• Understand the psychophysiology of pain, anxiety, and sedation.
• Understand the physiology of respiration and of N2O-O2 inhalation.
• Know the advantages, disadvantages, indications, and contraindications to the use of N2O in normal and medically compromised patients.
• Understand the techniques used to administer N2O and monitor patients while they receive it.
• Recognize the complications that may arise as a result of N2O administration, and understand the prevention, early detection, and treatment of these complications.
• Learn the hazards associated with the use of N2O & accepted methods used to reduce exposure to an acceptable level in the dental office.
• Recognize special problems associated with the use of N2O in children and know the proper technique for administering it to them.
• Discuss nitrous oxide equipment, including tanks, regulators, manifolds and machines.
• Understand guidelines for installation and use as issued by the National Fire Protection Association and the American Dental Association.
• Recognize the similarities of N2O sedation and hypnosis, be familiar with the basic concepts of hypnosis and its usefulness as an adjunct to N2O sedation.

PRESENTER
ERNEST E. VALDEZ, D.D.S., received his DDS degree from The University of Texas Health Science Center at San Antonio, School of Dentistry in 1993. He pursued a two year General Practice Residency at UTHSCSA which he completed in 2001. Dr. Valdez has served as co-investigator of numerous research projects. He has published articles in the Journal of Oral & Maxillofacial Surgery, British Journal of Oral & Maxillofacial Surgery, and the Journal of Periodontal Research.

SEPTEMBER 28

Lecture Course for the Entire Dental Team
Practice Growth Through Esthetic Regeneration and Implant Dentistry
DONALD P. CALLAN, BS, BA, D.D.S

OVERVIEW
Implant success is no longer judged by whether the implant integrates or how long the implant remains in the patient’s mouth. The lack of precise duplication of color, contour, and function of the natural dentition for the final implant prostheses may ultimately result in an implant failure as defined by your patient. The entire implant team must envision the final result appropriate for each patient. Patients expect and deserve the finest restoration available, a safe procedure, and long term results.

This presentation is designed to achieve the criteria of longevity for the dentists and the criteria as set by the implant patient in defining success as esthetics, function, longevity, and a healthy environment. Dr. Callan will also present a dental implant update based on sound biological literature to meet the demands of your patients. Implant selection, placement location, spacing, marketing, surgical stents, immediate load, immediate placement, and surgical placement will also be reviewed.

The purpose of this program is to provide evidence-based information to evaluate grafting materials for periodontal, restorative, and implant dentistry based upon clinical, aesthetic, functional, and histological results in humans.

OBJECTIVES
- Understand the goal of implant dentistry.
- Identify the need and indications for implant success.
- Define and avoid implant failure.
- Understand the difference between implant successes and implant survival.
- Select proper implant location to obtain maximum esthetics.
- How to market dental implants to your patients.
- Understand how to prevent implant problems.
- Identify the proper time and sequence of implant placement procedures.
- Select proper implants based on sound biological principles.

PRESENTER
DONALD P. CALLAN, D.D.S., received his dental degree in 1975 and a Certificate in Periodontics from the University of Missouri at Kansas City in 1978. Dr. Callan maintains a private practice limited to Periodontics with an emphasis on tissue regeneration and implant dentistry in Little Rock, Arkansas. His current hospital appointment includes the Arkansas Children Hospital in Little Rock, Arkansas.

SEPTEMBER 29

Lecture Course for the Entire Dental Team
Gingivitis, Periodontitis, Peri-Implantitis: The Connection and Treatment
DONALD P. CALLAN, BS, BA, D.D.S

OVERVIEW
Periodontal diseases are chronic, infectious, and inflammatory diseases resulting from exposure of the periodontum to dental plaque, a complex bacterial biofilm that accumulates on the teeth. With periodontal disease the epithelial tissue, connective tissue and bone is damage and the teeth and dental implants may be lost. To understand long term survival of dental implants, the clinician must have a clear understanding of the epithelial tissue, connective tissue and bone relationships to the dental implant surfaces. Evidence suggests that periodontitis and peri-implantitis may be the same and may contribute to the development or progression of local tissue break down and other diseases or conditions. In light of the high prevalence of the periodontal disease, these associations may be important for the maintenance of dental implants. Patients and health care providers must be informed that periodontal intervention may prevent the onset of hard and soft tissue breakdown or progression of various systemic diseases.

The purpose of this presentation to provide evidence based information to evaluate the relationships of the hard and soft tissues of connection to dental implants and to determine if these tissues are subject to periodontal breakdown.

OBJECTIVES
- Understand the hard and soft tissue relationships to dental implants.
- To understand the pathways of periodontal break down about dental implants.
- Identify hard and soft tissue conditions that may contribute to periodontal break down about dental implants.
- Determine the time and sequence for treatment and prevention of failing dental implants.
- To properly to inform the patient of the potential periodontal disease and systemic concerns of dental implants.
- Determine the proper maintenance of dental implants by the patient and the dental hygienist.

PRESENTER
DONALD P. CALLAN, D.D.S., received his dental degree in 1975 and a Certificate in Periodontics from the University of Missouri at Kansas City in 1978. (210) 567-3177
OVERVIEW
Successful completion of this course will provide the necessary training for a dentist to apply to the Texas State Board of Dental Examiners for a permit to administer minimal enteral (oral) sedation (level 1 permit). The course is a 16 hour curriculum of lecture with simulated patient scenarios and multiple case discussions.

OBJECTIVES
- Understand current TSBDE rules and regulations regarding minimal sedation.
- To outline the pharmacology of commonly utilized oral sedatives and techniques.
- Weigh advantages and disadvantages of various oral medications.
- Discuss medical considerations for sedation.
- Address pediatric considerations.
- Provide a comprehensive review of patient evaluation including medical history and vital signs.

PRESENTERS
ERNEST B. LUCE, D.D.S., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. In June of 1986, he completed a one year General Practice Residency at The University of Texas Health Science Center at San Antonio. Upon completion of the residency, Dr. Luce joined Comprehensive Dentistry at UTHealth San Antonio.

**October 13**

**Lecture Course**

**Dental Sleep Medicine: Snoring and Obstructive Sleep Apnea**

**RICHARD B. DRAKE, D.D.S.**

**OVERVIEW**
This course will discuss the new TSBDE new ruling 108.12, concerning the dental treatment of sleep disorders. Are you sick and tired of being sick and tired? Fatigue is the number one complaint heard by health professionals across the globe. Fifty to seventy million Americans suffer from sleep related problem. Sleep related breathing disorders, such as snoring and obstructive sleep apnea, are at the top of this list. Less than 10% of these patients have been diagnosed. As dentists, we are in a prime position to be the first to recognize this disorder and to help steer patients in the right direction to get diagnosed. We also have the ability to treat many of these patients ourselves, thus improving their quality of life as well as possibly saving their life!

**OBJECTIVES**

**Background:**
- Understand normal breathing and airway anatomy
- Understand the problems and variants that lead to snoring and obstructive sleep apnea.
- Learn the health risks associated with sleep disordered breathing.

**Signs and Symptoms:**
- Learn the effects of sub-optimal sleep on health and quality of life.
- Recognize those symptoms and behaviors that may indicate sleep disordered breathing.

**Diagnosing:**
- Understand current and proposed diagnostic methods and the role of dentists in the team approach.

**Treatment:**
- Review the current treatment modalities for snoring and for mild, moderate and severe OSA.
- Explore the role that dentists can play in the management of sleep disordered breathing.

**Follow Up:**
- Understand the side effects of oral appliance therapy and how to manage them.

**PRESENTER**

**RICHARD B. DRAKE, D.D.S.,** received his D.D.S. from UTHSCSA School of Dentistry in 1989. He maintained a private practice in general dentistry from 1990 to 2001. He is the founder of Dental Sleep Medicine Associates of San Antonio, a private practice devoted solely to the treatment of snoring and sleep apneas and is a Diplomate of the American Board of Dental Sleep Medicine. He serves on the Board of Directors with the American Academy of Dental Sleep Medicine, as well as chairing the Reimbursement Committee.

**TIME**

**October 19**

**Lecture Course for the Entire Dental Team**

**Management of Dental Trauma in the Pediatric Patient**

**LINA M. CARDENAS, D.D.S., M.S., Ph.D.**

**OVERVIEW**
Dental trauma is part of General and Pediatric Dentistry practice. Current research has led to a better understanding of the healing mechanisms that translate into better clinical protocols for the management of trauma. The course will start with an introduction to trauma and the evaluation of the patient with trauma. Then, a review of the classification, diagnosis and treatment of traumatic lesions is presented. Finally, several clinical cases will be presented and discussed.

A review of the current guidelines (from the American Academy of Endodontics, the International Association of Dental Traumatology and the American Academy of Pediatric Dentistry) for the management of dental trauma in the primary and permanent dentition will be presented. Easy-to-use decision analysis and protocols for the emergency treatment as well as follow-up and referral needs will also be discussed.

**OBJECTIVES**
Present a systematic way of gathering trauma history. Review the classification of traumatic dental injuries. Discuss the diagnosis, emergency treatment and follow-up in primary tooth trauma according to type of injury. Discuss the diagnosis, emergency treatment and follow-up in permanent tooth trauma according to type of injury. Present clinical cases of primary and permanent tooth trauma.

**PRESENTER**

**LINA M. CARDENAS, D.D.S., M.S., Ph.D.,** obtained her first dental degree from CES University on Columbia in 1992. She received her second degree at the UTHSCSA, graduating Magna Cum Laude. She traveled to Nagasaki University and received a combined degree in Pediatric Dentistry with a PhD in Dental Science. Following that, she completed a combined three year specialty training in Pediatric Dentistry with a Master of Science at the University of North Carolina at Chapel Hill. She is a Board Certified Pediatric Dentist.

**TIME**
Check-in: 8:00 AM
Program: Friday, 9:00 AM-5:00 PM

OCTOBER 19
Texas Brief AM
Lecture/Interactive Course
Part I-A Spanish Class for the Dental Office
Vamos al Dentista
(Let’s Go to the Dentist)
Introduction to Spanish
MYLENE MACKEY, M.S., B.S.

OVERVIEW
Although there are many excellent Spanish books and courses available, this course is designed specifically for members of the dental team. A brief, but intensive introduction for beginners on the everyday application of basic Spanish grammar, pronunciation, and vocabulary will be presented. In addition, Mrs. Mackey will review simple phrases, which can be commonly used by the dental team. The material will be based upon the text, Vamos al Dentista, designed to be used in a dental office.

PRESENTER
MYLENE MACKEY, M.S., B.S., received her Masters degree in mental health counseling from St. Mary’s University, previously earning her Bachelors in theater and psychology form Texas A&M. Mrs. Mackey currently works as a Licensed Practicing Counselor. She has taught Spanish for many years including offering private lessons to businesses and individuals. Mrs. Mackey enjoys translating documents, traveling to Mexico, yoga, reading and drawing.

TIME
Check-in: 8:00 AM
Program: Friday, 9:00 AM-12:00 PM

Part II-A Spanish Class for the Dental Office
Vamos al Dentista
(Let’s Go to the Dentist)
Dental Terminology
MYLENE MACKEY, M.S., B.S.

OVERVIEW
This course is designed for members of the dental team with some knowledge of the Spanish language and wish to meet the even greater need for its usage. Part II concentrates on dental terminology. Mrs. Mackey will review common vocabulary and standard phrases related to a dental practice. The material will be based upon the text, Vamos al Dentista, designed to be used in a dental office.

OBJECTIVES
• This course will be a comprehensive review of the Spanish language most commonly used in the dental office. The participants should already be somewhat familiar with the language.

PRESENTER
MYLENE MACKEY, M.S., B.S., received her Masters degree in mental health counseling from St. Mary’s University, previously earning her Bachelors in theater and psychology form Texas A&M. OCTOBER 26
Participation Course
TMD Diagnoses and Treatments for General Practitioners
EDWARD F. WRIGHT, D.D.S., M.S.

OVERVIEW
This course consists of a morning presentation and an afternoon of clinical activities. The morning presentation will first discuss initial patient evaluation and a recommended treatment protocol for integrating and utilizing multidisciplinary TMD therapies. This sequence will then be applied to 14 documented cases in which the resident's symptoms and clinical evaluation results are presented, and potential diagnoses and treatments will be discussed. Several of these cases are of patients who present with symptoms similar to TMD, but other diagnoses are determined, i.e., acute pulpalgia, sinusitis, etc. Participants will be taught to identify these disorders from TMD through history and clinical evaluation.

The afternoon clinical activities will involve working with a fellow participant, in which the masticatory and cervical musculature will be palpated, various jaw positions will be reviewed, and various splints brought to the course will be adjusted. The course parallels Dr. Wright's recently published TMD textbook.

OBJECTIVES
The course is designed to help dentists more cost effectively obtain maximal therapeutic benefit with their TMD patients. Participants will:

- Learn to identify patients who generally will not respond well to traditional TMD therapy and how that can be changed.
- Gain new insight of the prevalence of referred pain and the pain interconnection between the teeth, masticatory system, and cervical area.
- Understand which allied health professionals are able to help their TMD patients and when they would be most beneficial.
- Palpate the masticatory and cervical musculature of a fellow participant.
- Practice mandibular manipulation techniques.
- Adjust a splint that a fellow participant brings to the course.

PRESENTER
EDWARD F. WRIGHT, D.D.S., M.S., is a professor at the University of Texas Health Science Center–San Antonio. He completed a 1-year general dentistry residency, a 2-year TMJ and Craniofacial Pain Fellowship, and a 2-year TMD research fellowship. He is the Course Director for the dental school's TMD Course, Occlusion and TMD Course, and Dental Anatomy and Occlusion Course. Dr. Wright is the primary author of over 50 publications, author of the textbook "Manual of Temporomandibular Disorders" (in its 3rd edition), and Diplomate of the American Board of Orofacial Pain.

TIME
Check-in: 7:30 AM
Program: 8:00 AM - 5:00 PM
LOCATION
UT Health San Antonio, School of Dentistry
TUITION
Individual: $240.00
KDR Recipient: $198.00
CREDIT
AGD Code: 180
Hours: 7

IMPORTANT COURSE INFORMATION:
Participants must bring to the course a splint they provide their patients. The splint needs to be fabricated to either the participants' maxillary or mandibular arch. The splint may be fabricated from acrylic, soft thermoplastic mouthguard material, or some intermediate material (Flexite, Bruxene, hard/soft lami nated material, etc.). NTI appliances are not recommended and should not be brought. Participants must bring a long shank bur and a long shank #6 or #8 round bur. If he or she brings a splint made from soft thermoplastic mouthguard mate rial, the participant must also bring the cast it was molded over.

The class will be limited to the first 14 dentists to register.

http://smile.uthscsa.edu

26
NOVEMBER 16

TSBDE-Approved Course for Recertification Review Course in Moderate Sedation & Advanced Emergency Procedures in the Dental Office (Level 2 and Level 3 Sedation Review) ERNEST B. LUCE, D.D.S.

OVERVIEW
The Texas State Board of Dental Examiners (TSBDE) requires level 2 and level 3 sedation permit holders to complete approved continuing education every 2 years to maintain the sedation permit. This must take the form of ACLS, PALS or an approved sedation review course. Individuals who complete the entire course will receive a certificate that can be submitted to the TSBDE to document completion of the approved moderate sedation review course. Level 2 and 3 permit holders must also complete every 2 years an additional 8 hours of medical emergency or sedation related CE separate from the ACLS, PALS or this "approved" course.

OBJECTIVES
• Review the Texas rules and regulations regarding the administration of moderate enteral and oral sedation.
• Update the dentist on patient evaluation for the administration of moderate sedation.
• Update the dentist on monitoring techniques for moderate sedation.
• Update the dentist on pharmacology relating to moderate sedation.
• Review basic EKG interpretation.
• Review airway management techniques useful in the administration of moderate sedation.
• Review risk management in moderate conscious sedation.

PRESENTER
ERNEST B. LUCE, D.D.S., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. In 1986, he completed a one year General Practice Residency at The University of Texas Health Science Center at San Antonio. Upon completion, Dr. Luce joined the Department of Comprehensive Dentistry at The UT Health Science Center at San Antonio. Currently, he is a Clinical Associate Professor at the Health Science Center, and he also maintains a part time private practice in general dentistry in San Antonio.

His teaching duties include didactic presentations as well as clinical supervision of graduate general dentistry residents. Dr. Luce served as Head of the Graduate Division of the Department of General Dentistry and Program Director for the General Practice Residency at UT Health Science Center at San Antonio from 1991 to 1999.

NOVEMBER 16

Lecture Course Oral Cancer: From Diagnosis to Management MICHAELA A. HUBER, D.D.S.

OVERVIEW
Successful management of the oral cancer patient requires a multidisciplinary effort, in which the dental professional plays a critical role. An estimated 29,000 new cases of oral and oropharyngeal will be diagnosed this year, many as a consequence of an oral screening provided by a dentist. Research over the past decade has produced several advances improving the profession’s ability to diagnose, treat, and manage the short and long-term consequences of oral cancer. Ultimately, however, successful cancer therapy often incurs lifelong impairments, which may adversely affect the patient’s quality of life. As many of the impairments directly affect the oral cavity, the dentist will be frequently called upon to manage many of these impairments such as mucositis, xerostomia, increased caries, and disfigurement. This course will provide a review of the most contemporary approaches to manage the oral cancer patient, from diagnosis to management.

OBJECTIVES
• The participants will learn about:
  • Epidemiologic overview
  • Cancer prevention
  • Diagnostic/Screening modalities
  • Contemporary treatment strategies
  • During-treatment care
  • After-treatment care

PRESENTER
MICHAELA A. HUBER, D.D.S., received her dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He continued with postgraduate training in Oral Medicine and Maxillofacial Radiology at the National Naval Dental Center, Bethesda, Maryland in 1988 and received a certificate in Oral Medicine in 1988. Upon his retirement from the United States Navy in 2002, Dr. Huber joined the faculty as an Assistant Professor in the Division of Oral Medicine, Department of Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio, Dental School.

NEW SPEAKERS

Lecture Course Sleep Medicine: The “Dentist” Role and Introduction to Orofacial Mandibular Disorders and Therapy KAREN WUERTZ, D.D.S., P.A.
JEANNE BAILEY, DDS

OVERVIEW
The presentations will include strategies for assessing, managing and treating of Sleep Breathing Disorders (SBD) such as Snoring and Obstructive Sleep Apnea (OSA). A thorough review of current literature and theories will be presented to assist the dentist in developing a comprehensive treatment plan for SBD patients. Attendees will be able to appreciate and understand the dentist’s role in evaluating oral habits, postural considerations and restrictions that contribute to the development of Craniofacial Disorders. Orofacial myology therapy will be introduced and their role on growth and development reviewed.

OBJECTIVES
• Understand the importance of developing a multidisciplinary team approach to diagnosis, treatment and management
• Identify signs and symptoms of sleep disordered breathing
• Understand clinical techniques to incorporate Oral Appliance Therapy
• Demonstrate a wide range of didactic and clinical tools in the assessment & treatment
• Describe the role of OMDs and their contribution in Sleep Disordered Breathing

PRESENTERS
KAREN WUERTZ, DDS, PA, DABLS is a Diplomat of the American Board of Craniofacial Dental Sleep Medicine, a Diplomate of the American Board of Laser Surgery and a fellow in the American Academy of Craniofacial Pain. Dr. Wuertz is passionate about treating patients, as it relates to oral restrictions, oral function, and airway management during sleep.

JEANNE BAILEY, DDS earned her dental degree from West Virginia University, School of Dentistry (1983). Dr. Bailey continued her professional education with significant post-graduate study in cosmetic dentistry at the Las Vegas Institute of Advanced Dental Studies. She developed an interest in craniofacial pain, including dental related sleep-disordered breathing, and TMJ.

Edwards P. “Joe” Waller, D.D.S, J.D.

OVERVIEW
Effective September 1, 2008 Rule 104.1, licensees may choose to have up to four (4) hours of risk management-related coursework (includes risk management, record keeping, and/or ethics courses and the allowance for self-study hours has been increased to (6) hours. This course is designed to assist the dental practitioner in minimizing their chances of a lawsuit or Dental Board investigation through the use of effective risk management techniques.

OBJECTIVES
• Learn the top three reasons dental offices are at risk for lawsuits.
• Understand how the utilization of risk management techniques can dramatically decrease the risk of a lawsuit.
• Be able to identify issues in your own practice which will reduce the risk of a Dental Board investigation.
• Identify the essential elements which must be in every dental record to allow you to comply with Dental Board Rules.
• Learn the steps which must be taken to increase your chances of a favorable outcome in a Dental Board investigation.
• Understand the documentation issues which can reduce your exposure from investigations by other State and Federal agencies.

PRESENTER
Edward P. “Joe” Waller, Jr., D.D.S., J.D., received his dental degree from St. Louis University School of Dentistry in 1989 and his law degree from St. Mary’s University School of Law in 1990. He is an attorney with the law firm of Brin & Brin in San Antonio, Texas. His practice is focused on the defense of hospitals, physicians, and dentists in medical and dental malpractice lawsuits. Dr. Waller also frequently represents dentists in investigations and hearings before the State Board of Dental Examiners.

TIME

SPECIAL FEE OFFER
Register for the morning program and receive a discount on the afternoon Texas Brief. Lunch is included for the participants attending both sessions.
Overview
This course is designed to satisfy the Texas Dental Board requirement for continuing education in minimal enteral sedation (required every 2 years for level 1 minimal sedation permit holders). This course does not qualify a dentist to apply for a new minimal sedation permit. Individuals who complete the course will receive a certificate, which can be submitted to the TSBDE as documentation of continuing education in minimal sedation.

Objectives
At the end of this course, the participant will have a renewed understanding of the many elements of the safe administration of enteral conscious sedation including:

• Spectrum of sedation and the limits of enteral sedation.
• Patient evaluation and appropriate patient selection with an emphasis on recognizing patients at high risk of complications.
• Pharmacology of sedative agents including drug interactions and appropriate selection for patients with differing medical conditions.
• Appropriate use, limitations of and interpretation of monitors.
• Management of urgencies and emergencies especially as they pertain to minimal sedation.
• Rules and Regulations of the TSBDE on the administration of minimal enteral sedation.

Presenter
ERNEST B. LUCE, D.D.S., received his DDS degree from the University of Texas Health Science Center at Houston in 1985. In June of 1986, he completed a one year General Practice Residency at The University of Texas Health Science Center at San Antonio. Upon completion of the residency, Dr. Luce joined the Department of Comprehensive Dentistry at The University of Texas Health Science Center at San Antonio. Currently he is a Clinical Associate Professor at the Health Science Center, and he also maintains a part time private practice in general dentistry in San Antonio.

## Online Learning Opportunities

### ORAL/SYSTEMIC DISEASE LINKS
- The Patient with Endocrine Disorders (2 sections)
- Hypertension: Risk Stratification and Patient Management in the Oral Health Care Setting (2 sections)
- Teaching Oral Disease Prevention and Health Promotion (1 section)

### OROFACIAL PAIN
- The Right (and Wrong) Way to Treat Pain (2 sections)
- Facial Pain not caused by teeth (3 sections)

### ORTHODONTICS
- How to Take Perfect PVS Impressions Every Time (1 section)
- Increasing Role of Orthodontics in Interdisciplinary Treatment (1 section)

### OSHA & INFECTION CONTROL
- OSHA 2014 update (Certification Continuum Course/3 sections)

### PATIENT CO-MANAGEMENT
- Patient Management…From A Non Clinical Perspective (1 section)
- Team-Driven, Patient-Centered, Practice Management (3 sections)

### PEDIATRIC DENTISTRY
- Dental Trauma in Pediatric Dentistry (5 sections)
- Pediatric Dental Trauma (1 section)
- Trauma in the Pediatric Patient (1 section)
- Pediatric Dentistry Refresher (1 section)
- Antibiotic Prophylaxis for Dental Patients at Risk for Infection (1 section)
- Anomalies of the Pediatric Oral Cavity (1 section)
- Diagnosis and Treatment of Pediatric Oral Trauma (3 sections)

### PERIODONTICS
- Management Of The Extraction Site (1 section)
- Periodontal and Prosthetic Management of Fused Teeth (1 section)
- Update on Bone Grafting (1 section)
- Update on Bone Substitutes: “What Every Dentist Needs to Know” (1 section)
- Crown Lengthening: A Powerful Tool for Healthier Gums and Better Crowns (1 section)
- The 3 U’s of Vitamin D Therapy: Mis-Understood, Unappreciated, Underused (1 section)
- Socket Preservation: Indications and Options (1 section)
- Instrument Sharpening (1 hour of didactic)

### PERSONAL DEVELOPMENT
- Estate Planning (1 section)

### PHARMACOLOGY
- The Right (and Wrong) Way to Treat Pain (2 sections)

### PRACTICE MANAGEMENT
- Patient Management…From A Non Clinical Perspective (1 section)
- Team-Driven, Patient-Centered, Practice Management (2 sections)
- Lawsuits and HIPAA (1 section)
- Strategies to Keep “UP-TO-DATE” with the Explosion of Biomedical Information (1 section)

### PRACTICE MANAGEMENT/RISK MANAGEMENT
- Jurisprudence: How to Avoid A Legal Entanglement (Dental Sleep Medicine) (1 section)
- Legal Considerations for Today’s Practitioner (2 hours of Continuing Education)

### PROSTHODONTICS (REMOVABLE, FIXED, MAXILLOFACIAL)
- Emergence Profiles In Natural Tooth Contours (1 section)
- How to Achieve Excellent Marginal Fit and Cervical Contour with Crowns (1 section)
- Impressions Made Simple (6 sections)
- Review of Smile Design Parameters (1 section)
- The Precision Prosthesis Attachments used in Removable Prosthetics (1 section)
- Contemporary Complete Dentures, “What Every Dentist Should Know” (1 section)
- Mandibular Tissue Supported Implant-Retained Overdentures (1 section)
- Predictable Complete Dentures III/The Platinum DVD Edition (14 hours of Continuing Education)
- Predictable Complete Dentures: Helpful Hints (6 hours of Continuing Education)
- Difficult Dentures Made Easier: An Alternative To Dental Implants (5 hours of Continuing Education)
- Predictable Complete Dentures (5 hours of Continuing Education)
- Edentulous Impression Trays
- Complex Prosthetics in General Practice, “What to do, How to do it and When” (3 sections)
- Understanding Current All-Ceramic Systems (1 section)

### RESTORATIVE DENTISTRY
- Implants, Tissue Control, and Laboratory Communication (1 section)

### SEDATION
- Combination - Inhalation Enteral (Oral)
- Minimal Sedation Level 1 (Texas Certification Continuum Course 12 sections)
- Minimal Enteral (Oral) Sedation (Level 1) Permit Renewal Course (Texas Certification Continuum Course/7 sections)
- Nitrous Oxide Conscious Sedation: For Dentists (Texas Certification Continuum Course/9 hours of didactic)
- Monitoring the Administration of Nitrous Oxide: For Dental Hygienists and Assistants (Texas Certification Continuum Course/9 hours of didactic)
- Triazolam (Halcion) Sedation as an Alternative to IV Sedation (1 section)
- Local Anesthesia Administration (4 hours of Continuing Dental Education)

### SLEEP MEDICINE
- Dental Sleep Medicine

### SPECIAL CARE DENTISTRY
- Treating the Pregnant Dental Patient (1 section)
- Managing the Medically Compromised Patient (4 sections)
- All on 4 Rehabilitation in the Endentulous Arch: Team Approach
- Update on Oral Cancer Diagnostic Aids

### TMJ/TMD AND MPD
- Evaluating and Treating TMD (3 sections)
- TMD Highlights (1 section)

**A Simulated Implant Placement and Restorative Course**

This three-day program provides lectures, lab observation, and hands-on instruction on simulated-patient mannequins that feature soft tissue and “bone”.

Each learning station is equipped with all the necessary surgical and restorative instrumentation to give the participants a wealth of implant experience. The faculty leads the course participants through multiple implant scenarios.

This course is designed for dentists who have a surgical experience and have completed the Preceptorship in Dental Implantology.

*Course to be held at Zimmer Biomet Institute Training Facility in Carlsbad, California

Course date in Spring 2019

PRE-REGISTRATION: Pre-registration for all courses is nec-

essary. It is beneficial for participants to pre-register for a course as the course packet will be available for them at final check-in.

Please contact Continuing Dental Education at (210) 567-3177 to pre-register for a course or mail the registration form with your fee made payable to “UTHSCSA” to:

UTHSCSA
Continuing Dental Education MSC 7930
7703 Floyd Curl Drive
San Antonio, Texas 78229-3800

The Office of Continuing Dental Education may find it necessary to implement a reasonable fee increase on noted courses.

The Office of Continuing Dental Education cannot be held responsible for the cost of a nonrefundable airline ticket or flight change in the event of a course cancellation or the rescheduling of the program.

Upon registering in any Continuing Dental Education activity, the participant agrees that the University of Texas Health Science Center at San Antonio and its affiliates, and all personnel associated with the University, its instructions, and any notices, letters, action, decisions or statements in any live or recorded audio, video, or photographic display or other transmission, exhibition, publication, or reproduction made of, about or for, or activity without further authorization or compensation.

Participants may not use video or audio recording devices during the course or scheduled event.

Registering for any Continuing Dental Education activity constitutes acceptance of these terms.

PAYMENT BY CREDIT CARD: MasterCard, Visa, or Discover Card only.

ON-SITE CHECK-IN: Please check details of each course for designated time and location of course check-in. Participants can pick up packets one hour prior to the beginning of the course. Same day walk-in enrollments will be accommodated on a space-available basis.

CONFIRMATION: Your registration confirmation will be mailed from your registration within 5-7 working days upon receipt of pay-

ment. You will also receive a listing of nearby hotels at this time.

This will be followed by a final confirmation letter designating the date and location of the course within 10 days of the program date. A map of the campus and parking information is on the Health Science Center website at www.uthscsa.edu. Proof of payment and Certificate of Attendance will be issued on day of the course to those participants who have preregistered and prepaid for scheduled courses. Additional copies of the Certificate of Attendance can be issued; however, participants will be charged an administrative fee of $20.00. Participants who pay on the day of the course will be mailed their Receipt of Payment and Cer-

tificate of Attendance.

TUITION DISCOUNT: “Recipients of the Kenneth D. Ruid CDE Award may deduct 5 to 10% of the tuition of designated courses. This special tuition discount is in effect for one course only and must be requested at the time of registration. If you must cancel your registration, please notify the Office of Continuing Dental Education as soon as you determine you are unable to attend so that a refund may be considered. Any cancellation made prior to the start of the program will be subject to a nonrefundable administrative fee of $99.25. Any cancellation made one week or less prior to the course will be not eligible for a refund. However, participants may choose to place their tuition minus an administrative and direct cost fee assessment into a holding account for future use. “No Shows” will not be given a refund. Written notification is required within five business days by fax, mail, or e-mail to initiate the refund process. Please allow four to six weeks for all refunds. Specific refund policies may apply to all off-site programs. Contact our office for the specific refund policy regarding any course.

CONTINUUM, PARTICIPATION, DENTAL STUDY CLUBS, and MULTIPLES: Refunds are not eligible for these type of programs, any cancellation made prior to the start of the program will be subject to an administrative fee assessment of 25% of total tuition plus any applicable nonrefundable deposits. Any cancellation made one month or less prior to the course does not qualify for a refund. However, participants may choose to place their tuition minus an administrative, applicable non-refundable deposits, and any direct cost fee assessment into a holding account for future use. “No Shows” will not qualify for refunds. Written notification is required within five business days by fax, mail, or e-mail to initiate the refund process. A written request is required to process any refund or transfer. Contact our office for the specific refund policy regarding any course.

INTERACTIVE WEB COURSE REFUND POLICY
If you must cancel your registration, please notify the Office of Continuing Dental Education by sending us an e-mail at smile@uthscsa.edu with your User Code and course title before the START DATE indicated so that your refund may be considered. Cancellations made after the START DATE will be subject to an administrative and direct cost fee adjustment. No refunds will be issued after the completion of the first chapter, regardless of START DATE.

COURSE CHANGES/CANCELLATION: The Office of Continuing Dental Education reserves the right to: (1) limit registration; (2) refuse admission by refunding the course fee; (3) change the location, date and starting time of the program, course content, and/or faculty and such change will not entitle the registered participant to a refund; (4) cancel any course no less than one week prior to the course should circumstances make this necessary, at which time registered participants will be notified by telephone using the number on your registration form; (5) remove the participant from the premises if the patron’s conduct endan-

gerers or disrupts other attendees, speakers, or staff.

TWO STEP INSTANT SAVINGS: Two Step Instant Savings does not apply to any course that has already been discounted. This discount is only for designated Dental Study Clubs and Multiple Series courses. For designated courses registrants will pay and complete by 60 days of the course and receive a 15% dis-

count. Register and pay within 30 days of the course and receive a 12% discount. These courses are non-refundable. However, participants may choose to place their tuition minus an admin-

istrative and direct cost fee assessment into a holding account for future use.

TEXAS BRIEF: Unless enrolling in consecutive Texas Brief courses, no lunch is provided.

DOCUMENTATION OF COURSE CREDIT HOURS: A $20.00 administration processing fee will be charged for requests of documentation of continuing dental education credits. A request must be made by mail, fax or e-mail required within five business days to initiate the refund process. Please allow four to six weeks for all refunds. Specific refund policies apply to all off-site, continuum, particip-

ation, and on-going series programs. Contact our office for the specific refund policy regarding any course.

CREDIT: UTHSCSA School of Dentistry, Continuing Dental Ed-

ication Program is designated as a recognized provider by the Continuing Education Recognition Program (CERP) conducted under the auspices of the American Dental Association. The for-

mal continuing dental education courses are accepted for Fel-

lowship/Mastership and membership maintenance credit by the Academy of General Dentistry.

Some courses are acceptable for credit by the Academy of General Dentistry and are offered in coopera-

tion with the Texas Chapter of AGD.

Dental Technician: Courses are approved for documented credit hours by the National Board for Certification.

Auxiliary: Certification will be considered. Written notification is required within five business days by fax, mail, or e-mail to initiate the refund process. Please allow four to six weeks for all refunds. Specific refund policies may apply to all off-site programs. Contact our office for the specific refund policy regarding any course.

Individuals should consult with their State Boards regarding recognition of courses acceptable for relicensure.

CONFLICT OF INTEREST: As required by the ADA and our Institutional Compliance and Standard of Conduct, all em-

ployees of the Office of Continuing Dental Education and CDE Advisory Board, Inc. are required to disclose any financial arrange-

ment or affiliation with any corporate organization or individual that either they nor any member of their family has a financial relationship with the University of Texas Health Science Center at San Antonio that could influence their judgment. All employees of the Office of Continuing Dental Education are required to disclose any financial or other personal interest of any nature or kind in any product, service and/or company that will be discussed or considered during their presentation. If they do this has been noted in the handouts and promotion material.

EMERGENCY CONTACT: Telephone number for the Office of Continuing Dental Education: 210-567-3177. To contact a faculty member in the event of an emergency, please call 735-2989. If you do not have a TDD, call 1-800-735-2988.

LOCATION: UTHSCSA School of Dentistry is located at Medi-

cal Center, 7703 Floyd Curl Drive (opposite Methodist Hospital). This entrance is open all hours, weekends and after hours.

COMPLIMENTARY PARKING: For those of you who will be driving to campus, the security officer at the main gate will in-

struct you where to park. You will be given a validated ticket at check-in that you will need to exit the lot at the end of the course. Ticket validation occurs only once during registration. If you decide to leave and come back we are unable to validate any additional tickets and you will be responsible for pay-

ment at the gate.

LATE ENTRY TO THE DENTAL SCHOOL: The main doors to the Dental School are locked during the weekends. Please in-

form our office if you are unable to check in at designated times.

The University of Texas Health Science Center at San Antonio ADA CERP Recognition Code is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

UTHSCSA designates the number of credit hours for each course individually. UTHSCSA’s new accreditation term will extend from 11/1/2016 through 12/31/2019.

Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at:

www.ada.org/cerp.
