Courses Overviews & Objectives
A Schedule Glance at Each 5 Sessions
Tuition, Registration, Payment Plan
PRECEPTORSHIP OBJECTIVES

The participant will learn:

• The rationale and scientific basis for the successful clinical practice.
• The current concepts, principles, and clinical methodology.
• The proper evaluation, diagnosis, and selection of patients.
• To develop and understand specific implant, surgical and prosthodontic skills.
• To manage the more difficult clinical situations.
• The practice management aspects of dental implantology.

DIDACTIC SESSIONS

• History and future of dental implantology.

• Biomechanical and biomaterial aspects of dental implantology.

• Physiology of bone as well as selection of implants with different designs and surfaces relating to bone density and planned implant function.

• Anatomy of the maxilla and mandible.

• Anatomical structures (muscles, nerves, arteries) as they relate to implant placement.

• Philosophies of implant retention and stabilization.

• Treatment planning facets, including patient selection, past dental and medical history, essential diagnostic guides (casts, templates, etc.), documentation, appointment sequencing with laboratory, surgeon, and restorative dentist. Essentials of joint treatment planning, and recall principles.

• Surgical and prosthodontic considerations including incision design, fixture and abutment selection, occlusal considerations and force transmission.

• Peri-implantitis and its effect on the dental implant from the infective and traumatic aspects.

• Post-restoration responsibilities of staff personnel, hygienist, surgeon and restorative dentist on a recall basis.

Implants are becoming more widely accepted for tooth replacement and denture retention. Gain the skills and knowledge to offer these services to your patients.

• Includes demonstration of instruments, techniques for post-implant placement, and restoration hygiene.

• Principles in troubleshooting, rescue and retrieval procedures.

• The prosthodontic aspects of diagnosis and treatment planning as well as the clinical communication of this information to the surgeon.

• Procedures for developing optimum esthetics and the biomechanical loading aspects of implant restorations.

• Component systems will be categorized with specific indications for their use.

• The importance of optimal laboratory support and clinical communication skills to facilitate positive interaction with the dental technician.

• Diagnosis and management of surgical and restorative complications.

• The Preceptorship will feature hands-on and interactive sessions.

• Hands-on exercises will familiarize the preceptors with the surgical and restorative aspects of dental implant systems and prosthetic laboratory techniques.
DON’T STAND ALONE, GET THE WHOLE TEAM ON BOARD

A Lecture Course
Dental Team Implant Certification Program
EDIE GIBSON, RDH, MS

Implant dentistry is here to stay! Is your team prepared to discuss the benefits of this life changing treatment with your patients? Are you all speaking the same implant language in order to gain patient acceptance? Turning a “no” into a YES involves passion, integrity and unwavering confidence in your dentistry! This trio of traits will lead to improved patient engagement and help your patients move out of the NOzone and into your schedule.

Upon completion, participants should be able to:
• Develop engaging communication strategies that will help patients say YES to the treatment they need and want
• Learn problem solving strategies for overcoming objections
• Appreciate surgical and restorative options
• Recognize signs and symptoms of peri-implant diseases
• Understand instrumentation/maintenance procedures for optimal patient care
• Differentiate between technologies to help create a customized home care protocol to improve patient engagement

EDIE GIBSON, RDH, MS, is a Registered Dental Hygienist that brings over 30 years of diverse, hands-on clinical and business expertise to the podium. She incorporates real world experiences and humor into all her programs, making difficult subjects fun, empowering, and thought provoking for the entire TEAM!

Edie owned a private Dental Hygiene practice in Crested Butte, CO called About Face where implant dentistry was everyday conversation. Edie is the Sr. Director, Clinical Education and Training for Claronav, a Founding Fellow of the ADIA, and a 2013 Sunstar RDH Award of Distinction recipient. She is also a Thought Leader/KOL for several companies and a contributing author to the bestselling book, Overcoming Mediocrity.

FEBRUARY 8, 2019

A Lecture Course
The Business of Implant Dentistry
Communication, Organization, and Managing Risk
JOY MILLIS, CERTIFIED SPEAKING PROFESSIONAL

Did you know that 50 percent of your existing patients could be implant candidates waiting to receive care? Did you also know that your team members can have the greatest influence on your patients’ decisions about treatment?

Joy Millis brings important skills for improving organization and communication when providing implant dentistry! From marketing to managing risk, along with making financial arrangements without insurance involvement, and coordinating treatment to completion, this program is essential to your success in bringing more implant dentistry and comprehensive care into your practice!

At the conclusion, participants should be able to:
• Find and inspire implant candidates to receive care
• Understand the impact of the environment on treatment acceptance
• Answer questions effectively about implant dentistry
• Help patients make great decisions and receive the best of care
• Make financial arrangements with fewer misunderstandings
• Coordinate treatment to completion of care—Get Things Done!
• Manage Risk—Your Role and Responsibility

JOY MILLIS, CSP, CERTIFIED SPEAKING PROFESSIONAL, is an expert with the business of implant dentistry, getting paid without insurance involvement, and recovering lost patients. She has a rich history in implant dentistry as a pioneer in the field. As a practice development consultant, Joy helps dentists grow their practices and train their teams, addressing the needs and fears, while helping them better serve their patients. She has earned the National Speakers Association’s highest earned designation of Certified Speaking Professional, CSP, and is on the visiting faculty of the UT Health San Antonio along with Augusta University (MCG), where she teaches the business of implant dentistry. Joy Millis is dentistry’s superhero, providing innovative solutions for dentists in crisis—reviving their spirit and their practice.

A SIMULATED IMPLANT PLACEMENT AND RESTORATIVE COURSE

The patient treatment mannequins are the most advanced in the world. Receive the knowledge, skills and confidence that are essential to a successful implant practice.

This three-day program provides lectures, lab observation, and hands-on instruction on simulated -patient mannequins that feature soft tissue and “bone”. Each learning station is equipped with a computer for accessing reference materials and has all simulated patient materials, including: radiographs, CT scans, and models.

This course is designed for dentists who have a surgical experience and have completed the Preceptorship in Dental Implantology.

*Course to be held at Zimmer Biomet Institute Training Facility in Carlsbad, California

Course date in Spring 2019 - More details coming soon!

Participants will be able to understand:

- Basic restorative and surgical treatment planning skills, rationale, and scientific basis for using implant therapy to restore oral function, health and esthetics.

- Surgical skills in soft tissue management and implant placement for single-unit, multiple-unit and full arch cases.

- Treatment planning, scientific rationale and surgical treatment skills in minor bone grafting techniques such as ridge augmentation and ridge preservation techniques.

- Techniques in extraction and immediate implant placement.

- Gain experience with the latest implant surgery and prosthetic implant instrumentation.

- Impression techniques.

- Restorative techniques using advanced mannequin models for single unit, multiple unit, and fully edentulous scenarios with various overdenture attachments.

- Various treatment options for managing complex prosthodontic needs.
The Dental School thanks Nobel Biocare, Salvin Dental Specialities, Straumann USA, and Zimmer Biomet for their unrestricted educational grants in support of this continuing education program.
